Malibu Comics

Good guys, bad guys, Ultrahumans, mutants, and some Dinosaurs for Hire. What kind of bizarre group is this? The cast of characters that inhabit the pages of Malibu Comics.

Malibu is turning into one of the hottest comic companies of the '90s, mainly thanks to their new line of books launched this year: The Ultraverse.

If you are wondering what ingredients might be necessary to make a huge hit in an industry that is already filled with too many carbon copy superhero-filled universes, look no further. The Malibu recipe for success consists of three ingredients, in equal parts:

A universe that is bound together with consistency.

Everything that co-exists in this universe must work and fit together

should be some big-name talent in place to write and draw your characters and make them leap off the page and take on a life of their own.

By taking care of the

By taking care of the last task first, Malibu pushed the pieces in place.

Creators Larry Niven, Mike Barr, Steve Englehart, Steve Gerber, James Hudnall, Len Strazewski, and Gerard Jones got together to create both the universe and the charac-

ters. Stressing continuity as the most important thing, the stage was set for a universe like none other.

The initial event was so successful that the talent keeps coming on board. Norm Breyfogle has taken over the drawing chores on Prime and most recently, Barry Windsor Smith announced that he will be bringing a new title, Rune, to the Ultraverse in January 1994. In Smith's own words Rune will be about "an alien vampire that makes Dr. Doom look like Ghandi."

As for the characters originally created for the Ultraverse, they are so diverse that any

comic book fan will be able to find something they enjoy.

Prime is your average thirteen year-old boy, with one small problem:
He has the ability to transform into the most powerful Ultrahuman in the

world. Faster than

you can say child star, his normal life is turned upside down by Ultranormal madmen with plans of world conquest.

The Strangers are a whole group of average people who just happened to be on the

same cable car when it was struck with a strange bolt of energy that transformed them into Ultra-humans. Now, seven of them have gotten together to fight

crime and attempt to figure out why they received the abilities they did.

And Sludge, a crooked cop who managed to get on the bad side of the mafia and was thusly gunned down and left for dead in the sewer. But since this is a sewer in the Ultraverse, Frank Hoag is transformed into Sludge, a character described by writer Steve Gerber as "Dirty Harry who drips."

Other Ultraverse characters like Solitaire, Mantra, Nightman, Hardcase, Firearm, and Prototype—along with teams like The Solution, Freex, and Exiles—make up the most explosive new universe since start of the Silver-Age!

Malibu has proven that you don't need to be one of the "Big Guys" to make good comics, and because of their hard work, dedication, and just plain good ideas, they are on their way to becoming the next of the "Big Guys."
