## ■ ALEX KIDD - ENCHANTED CASTLE (£29.99)

The Buzz Sega Mega Drive review...

That cunning Kidd is back in yet another adventure - and at a good value price.

Alex, in side-on view, has to battle through 10 horizontally and vertically scrolling screens to do battle in Sky Castle and rescue his dad, King Thor.

In a similar vein to something like **SUPER MARIO BROTHERS**, this is a fun and surprisingly addictive game taking you through towns, underground caverns, underwater, sky and desert scenarios.

## ■ ALEX KIDD review continued

To help Alex complete his adventure he plays, for his life, Janken (stones scissors or paper) and wins motorbikes, weapons, pedicopters, magic cloaks etc.

On the way he has to take on, or avoid, nasties like murderous motorcars, angry aeroplanes, vicious vultures, manic monkeys and savage scorpions.

This isn't an exciting beat and shoot 'em up but a game in a similar but more gentle vein, with cartoon-style graphics and great sound FX. It's light-hearted fun! **OVERALL SCORE 87%**
