Editor's Letter

The Big 3 at E³

GamePros, it IS on! The video game wars begins in November. Nintendo, Microsoft, and even Sony revealed almost all to 62,000 gawking game-industry types at E³, the Electronic Entertainment Expo (for more info, see ProNews, this issue, and gamepro.com).

Thanks to Nintendo's strategy of locking-down GameCube info until showtime, the "oohs" and "aahs" as dynamite first-party games were unveiled was loud enough to drown out the question...where are the third-party games? Shigeru Miyamoto let on that he may unveil a new Mario game for the GameCube this summer, so Nintendo even managed to turn eyes (and divert third-party related queries) toward its Spaceworld show in Tokyo this August. The GameCube launches on November 5.

Meanwhile, Microsoft has been refreshingly open about its Xbox and Xbox games. M's game lineup is looking deep and "X"-ceptional. The Xbox launches on November 8.

Sony, to its credit, wasn't content just to pummel the crowd with its "we're number one" mantra or let an impressive stable of third-party games do all the talking. It rolled out a veritable PC-desktop's worth of online partners, which included Netscape, RealNetworks, Macromedia, Cisco Systems—and the mighty AOL. Toss in a PS2 modem, hard drive, and new LCD screen, and, yes, Sony is supposing that the PS2 will be able to say, "You've got mail" in November.

To see the best E³ games (in our opinion), check out our E³ Showstoppers special feature this issue.

HEAD 2 HEAD

Cram the Sugar and Spice, You Sexist Pig

My name is Rochelle and I've been playing video games since I was five years old, when Duck Hunt was the "in" thing. I'm now 15 and I'm still getting crap from guys saying things like, "Girl gamers stink" or "You're lying, girls don't like all the fighting." Well, this makes me angry. I wasn't a little girl playing with dolls; instead, I played with dinosaurs. The reason I'm writing you is that I think you should put an article in your magazine called, "Revenge of the Girl Gamers." I mean, c'mon, you're always putting Aya Brea, Lara Croft, and Vikki on every page because you know that's what guys want to stare at. Yes, these girl characters are "hot" and kick butt, but you have to keep in mind that they're just characters and aren't real—even though I know some of you guys wish those chicks were. So you guys really need to give us girl gamers a break! We enjoy the same games as you!

► Rochelle Koperdak—Kalamazoo, MI

It's stunning to think that this age-old battle of the sexes is still being waged. Anybody who doubts the prowess of females at action games need look no further than Kornelia, GameSpy's Quake-player-for-hire who regularly dominates tournaments as well as exhibition matches at trade shows. Any guy who thinks "girl gamers stink" should seek her out and be humbled—and remember, there are plenty more where she came from. Miss Spell and Jen X are right there with you, Rochelle.

Monkey Business

I have MTV Music Generator for the original PlayStation. I was wondering if I bought one of those devices that lets you save your PlayStation files onto your hard drive, would I be able to burn the songs onto a CD? Also, if Johnny Greenthumb had three purple monkeys and Anna Appletree had four purple monkeys and their purple monkeys mated, then how many purple monkeys would they have? Thank you for your time and effort.

► J-Fry—Via Internet

You wouldn't be able to play those songs back. You could transfer the data through a DexDrive and send songs to your friends or back them up to CDs, but you can play those songs only through a PlayStation. Ditto for Music Generator 2 and the SharkLink on the PS2. As for Johnny

and Anna, it depends on whether or not all the monkeys mated with each other. Together, of course, they would have seven monkeys total without any of them mating. But we have no idea how many of those monkeys are male and how many are female, or how many offspring they would produce. So there's not enough info. Ask Johnny and Anna where the hell they found purple monkeys to begin with.

Online Rumbles

I have a quick question for ya. I was playing Quake III Arena online with my Dreamcast and a person asked me, "Are you on Dreamcast or PC?" Now, I didn't have a keyboard at that time to reply, but is it true that people on their PCs are playing with Dreamcast users?

► Randy Moore—Edmond, OK

Yep. Gamers are split as to whether this gives either side an advantage; if you're good at the controls for the system of your choice, it all comes down to skill anyway. PC and Dreamcast owners can also square off online in 4x4 Evolution.

Hell Hath No Fury Like a Gamer Scorn'd

This letter is in reference to your ProNews article, "The Dream Is Over" [April]. Disgust doesn't even come close to describing my feelings toward Sega. Once again, the loser of the gaming industry fails—and fails spectacularly. From the Genesis to the Saturn to the Dreamcast, Sega has demonstrated to all faithful Sega owners that not only can it run itself into the ground with great success, but that it also expects us to buy more to cut its losses. It's laughable that Sega president Peter Moore believes the release of 100 new games will appease Dreamcast owners. I implore all Dreamcast owners not to buy another Sega product. Sega dies with the Dreamcast!

► Paul Raftree—Garwood, N.J.

Paul, you're one of several gamers who feel that Sega has run out of second chances. Bad judgement and costly mistakes (especially in the hardware realm) have earned Sega a bad reputation—sometimes warranted, sometimes not. But slamming the Genesis? Come on—that was a fine system with plenty of support from both first- and third-party companies. Granted, the 16-bit heyday

08.10.2001

SAMURAI JACK™

A DARING NEW ANIMATED SERIES FROM CARTOON NETWORK

WORLD PREMIERE MOVIE

AUGUST 10, 2001 7:00 PM E/P

**CARTOON
NETWORK**

Play the Samurai Jack game on CartoonNetwork.com < AOL Keyword: Samurai Jack

ended about six years ago, but give credit where credit's due. And you forgot the 32X. You can't go rippin' on Sega without mentioning the 32X. It's a law.

Changing of the Nintendo Guard

I'm thinking of buying a Game Boy Advance, but before I do, I'd like to know if the system is also backward compatible with old Game Boy games. This is a problem for me because I have a ton of Game Boy games but not too many Game Boy Color games. Also, what's happening to Nintendo 64 games! All the articles in your magazine are about games for the Dreamcast, PlayStation, and PlayStation 2. Is the N64 about to disappear for good?

► **Justin Lewis—Pueblo, CO**

There's good news and bad news. The good news is that monochrome Game Boy games play fine on a Game Boy Advance, shaded just like they are when plugged into a Game Boy Color. Check out this issue's Buyers Beware column for more info. Now the bad news: Developers started drifting away from the Nintendo 64 many months ago, preferring to pour their money and resources into the PlayStation 2, Xbox, and GameCube, none of which use expensive cartridges. When Nintendo announced "Dolphin" plans last year, it was the beginning of the end, which explains why you've seen so few pages of *GamePro* devoted to N64 games: There simply aren't very many. If you have an N64, keep it, enjoy it, play it, love it—but don't expect much more software for it.

Pros of the Past (And Present)

I was wondering what happened to most of your editors who wrote only one or two articles? You know—Slo-Mo, Atomic Dawg, Jen X, even Boba Fett. Is it that their articles weren't good enough or did they just quit early?

► **Brandon Getz—Great Mills, MO**

Jen X and Atomic Dawg take great offense—they're still here, thank you very much. The only reason they don't write more frequently is that they're busy running other areas of the magazine most of the time. Boba Fett, meanwhile, became so girthy that he could no longer bend over to pick up a controller; with no video gaming exercise, he's just become rounder and rounder ever since. As for Slo-Mo, his sluggish pace finally caught up with him; he kept coming into the office later and later, and one day didn't show up at all. He called to say he'd be a little tardy, but that was three years ago.

No, Really—Buyers Beware

I was wondering if you know where the freaking button on my PlayStation 2 is that allows you to launch multiple atomic warheads? (I just want to blow the hell out of England.)

► **Eugene Rodriguez—Pontiac, MI**

We could tell you but it would void your warranty.

Fresh Air Is Good For Your Brain

First of all, I love your magazine. Now here are things that happen in Shenmue that can't happen in real life: Ryo can't have a Saturn a decade early; Fuku Hara San can't have a Virtua Fighter poster before it was made; and what's with the Dream-casko Collectible?

► **Youlchoi—Via Internet**

Wow...something else that apparently can't happen is you getting out more.

Play as Shadow, Sonic's evil double, and conquer the world.

BY THE WATCH DOG

August means only one thing to this dog—going to the beach! Uh, no dogs on the beach? Oh well, there's no time for lying around in the sand with all these questions about the Game Boy Advance, SharkPort, GameShark 2, and PlayStation 2/DVD passwords.

Q Will the Game Boy Advance play Game Boy Color games? And will the Game Boy Advance fit into the Game Boy Color's carrying case?

JOE COFONE—LAKEWOOD, NJ

A The Watch Dog responds: Yes, you can play Game Boy Color and Game Boy games on the Game Boy Advance. Great, huh? The Game Boy line has always boasted backward compatibility. If you remember, the Game Boy Color could also play Game Boy games. Also, import games will work on the GBA. As for fitting into the GBC carrying case, the GBA is roughly the same size as the GBC, but its shape is different, so it may not fit into some GBC carrying cases. It fit into the InterAct Accessories TravelPak with room to spare, however, and will probably fit into most roomy cases made of soft material. But if a case is hard-molded and form-fitted exactly to the shape of the GBC, the GBA won't fit (for more info on the GBA, see our special feature, "Launch Party Advance," in the July issue).

Q I've been using InterAct Accessories' SharkPort to download GameShark codes and saved-games to my PlayStation 2, but it corrupted the other saved games on my PS2 memory card. Any solutions?

DAVID TINNEY—HYATTSVILLE, MD

A The InterAct Web site reads: "Memory card corruption can occur for multiple reasons. First, please make sure that you do not have saved games for Rayman 2, MDK 2, or Super Bust-A-Move on your memory card. These saved games are not compatible with the SharkPort. You will either need to delete these saves or transfer them to another memory card. Second, please make sure that you shut down the SharkPort PC software and soft power-off your PS2 by holding down the reset button when you finish transferring data. If you are continuing to have problems, we have confirmed that some early revisions of the PS2 memory cards will not work properly with the initial release of the SharkPort. If you have one of these memory cards, you will need the updated PlayStation 2 CD for the SharkPort. Please contact our consumer service department at support@gameshark.com

[or call 410/785.4064] to receive this updated CD. Please be sure to include your full name and mailing address in your e-mail."

The Watch Dog adds: Thanks to InterAct for fixing the problem, or at least discovering what the problem is and making users aware of it. While InterAct can't be held responsible for Sony changing its PS2 memory cards, InterAct is responsible for thoroughly testing and tweaking its products to make sure they work with every game, including Rayman 2, MDK 2, and Super Bust-A-Move, rather than waiting for users to have problems with these games.

Q I forgot the parental password for my PS2, and I can't play DVDs without it. Is there any way to reset it?

RAYON_66—VIA INTERNET

A The Watch Dog responds: Let's hope Rayon_66 really forgot his password and didn't just conveniently "forget" that he's not allowed to watch R-rated movies. According to page 72 of the book *PlayStation 2 For Dummies*, written by GamePro's own Dan Elektro, the code 7444 will erase the existing password and enable you to enter a new one (this is also explained in the PlayStation 2 manual). The code will work for all PlayStation 2 consoles. If your parents use the Parental Control feature and don't want you changing the password, please "forget" you read this.

Q I bought InterAct Accessories' GameShark 2 for my new PS2, but when I tried it, it didn't work. Could it be because I have a brand new PlayStation 2?

CHRIS MARTUCCI—VIA INTERNET

A An InterAct rep responded: "Sony has updated the DVD driver on its new PS2s to version 1.30U, which won't work with InterAct Accessories' GameShark 2 versions 1.3 and lower. The GameShark 2 has been upgraded to version 1.4, which will work with the new PS2 DVD driver. If you have GameShark 2 version 1.3 or lower and your PS2 has the new DVD driver, InterAct will send you a free upgrade of GameShark 2 version 1.4. Otherwise, the upgrade is \$10, including shipping and handling."

SUBMISSIONS

At GamePro, listening is what we do best. When you have a problem with a product or feel you've been ripped off, we want to know. Write to:

GamePro's Buyers Beware
P.O. Box 193709, San Francisco, CA 94119-3709

Or e-mail us at:
buyers_beware.gamepro@gamepro.com

The Watch Dog adds: If you think you need the upgrade to make your GameShark 2 work with your PlayStation 2, contact InterAct at support@gameshark.com or call 410/785.4064. Also, early versions of the SharkPort may be incompatible with the new PS2 DVD driver, according to the InterAct Web site, and may need an upgrade.

U I was reading Buyers Beware in your June issue,

and there was a question about DVDs jumping around when played on the PS2. I noticed this with my own PS2 early on.

Then I started giving all my DVDs a real good rubdown with a soft cloth to remove any fingerprints or smudges before playing them. Since then, I haven't had one DVD skip.

SCOTT FITCH—VIA INTERNET

The Watch Dog adds: Good tip, Scott. Thanks. In fact, if you call Sony with a problem about playing a CD or DVD, almost the first thing they'll ask is if the underside of the disc is clean. So be sure to try cleaning it—if you're lucky, that should do that trick, as it did for Scott. The Sony PlayStation Web site reads: "You can clean your discs using a dry, lint-free cloth. We recommend small circular pads made specifically for cleaning discs. These are sold at most record or computer software stores. Please do not use other materials, such as a paper towel or a T-shirt, as their abrasive nature may scratch the disc." If just a cloth doesn't remove the smudge, run the problematic disc under warm (not hot) water and massage it with liquid hand soap, then dry it with the cloth using radial strokes (from the inside edge of the disc to the outside, in straight lines—never rub in a circle).

YOU MAKE THE CALL

Sega: 800/872-7342

ALL YOUR FACE ARE BELONG TO US

3Q's incredible facial scanning technology enables gamers to get ahead in online games—their own. *By Dan Elektro*

YOU'VE HEARD THE phrase "in-your-face gaming"—now you get to try it for real, thanks to a company called 3Q. Gamers can have their faces digitally scanned with alarming accuracy and then inserted straight into their favorite games, quickly and affordably. Is the Internet ready for your ugly mug?

3Q's technology creates a hi-res 3D model of your face in milliseconds.

I Think I'm a Clone Now

Not only is 3Q's scanning process fast and accurate, it's also FDA approved. The "cloning" technology began life as medical software: Surgeons needed a way to accurately digitize the human body quickly, especially with younger, squirming patients. A system was devised where three digital cameras take simultaneous photos, then the images are triangulated to create a complete—and kinda spooky—3D model in as little as eight milliseconds.

For \$14.99, gamers 17 and older can now step into the "Q-Clone Generator"—basically a digital photo booth—and have their faces ripped off. Once a face has been scanned and an image created, you can add fun elements like a kiss-print or a scar. Ten minutes later, you're walking home with a custom-burned CD with skins for the game of your choice. Right now, your choice has to be Quake III Arena, Unreal Tournament, Half-Life and/or Counter-Strike, but that's a good start.

Body Building

The service is new, so there are a few drawbacks: Only the face is scanned, and it's attached to a non-negotiable, sci-fi-style helmet. Also, a clunky player model is automatically joined to the scanned face; the Quake III model's shirt-and-pants combo seems rather mundane, while the UT model looks like an overweight reject from *Tron*. 3Q is working

on improvements, but, if you know how to make your own skins and models, the CD includes the raw BMP and OBJ files for use in your own custom creations.

Facing the Future

Q-Clone Generators are currently being tested in software stores in Seattle, WA; Dallas, TX; and San Jose, CA, with more to follow this fall. The software will also get an upgrade, allowing for full scans of your head, with hat and hair if you choose. More games are on the horizon, too: 3Q hopes to support *The Sims*, sports games, console titles, and the massively multiplayer universes of tomorrow. Check out the company's Web site (www.3qme.com) for more information—and then get ready for your close-up.

Frag 'em and smile! Your virtual face can be as serious or goofy as you like.

The Q-Clone Generator isn't much more than a high-tech photo booth, but it can do things you won't believe.

3Q can currently support Quake III, Unreal Tournament, and Half-Life, with more games on deck.

GAMECUBE: NOVEMBER 5, \$199

Nintendo reveals console and software details to public

At a packed press conference the day before the 2001 Electronic Entertainment Expo began, Nintendo unveiled its plans—and, more importantly, its software—for the highly anticipated GameCube. Gamers will be able to buy the system on November 5 for \$199.

The system's price point, which was not revealed until E³ had concluded, is \$100 less than that of its two biggest rivals, the PlayStation 2 and Xbox, but it's also a reflection of the company's goals. "We consider ourselves, above all, a game-based entertainment company," said Nintendo Director Satoru Iwata, implying that Sony and Microsoft are technology driven. "In our view, we are only an entertainment company—but we are working to become the best entertainment company anywhere."

Iwata outlined three industry trends—too much focus on graphics, too many sequels, and too many multiplatform games—that Nintendo will attempt to counteract. "People do not need video games," he said. "If they get too bored, they'll just go away. At Nintendo, we are committed to fighting these trends."

Nintendo had been suspiciously quiet about its GameCube launch plans and software until the press conference, but announced 15 exclusive games to an enthusiastic crowd, including Super Smash Bros. Melee, Luigi's Mansion, Metroid Prime, and Shigeru Miyamoto's newest title, Pikmin. A key player in the GameCube's development, Miyamoto was greeted with thunderous applause. "Let me introduce you to our new baby," he said, referring to the GameCube. "Like all babies, it is small but it will make a lot of noise." Nintendo also showed a hybrid Panasonic DVD player/GameCube console, which is slated to go on sale in Japan later this year.

The GameCube is slated for a September 14 debut in Japan and will appear in Europe in early 2002. Details on GameCube software can be found in this issue's E³ Showstoppers feature.

NEWS BITS

N64: E³ No-Show

It wasn't too much of a surprise, but Nintendo 64 fans may be disappointed to hear that their machine was nonexistent at E³. Official news that Dinosaur Planet and Eternal Darkness are now GameCube titles only further sealed the platform's fate. The only Nintendo 64 games on display were Tony Hawk's Pro Skater 2 and bam! Entertainment's proposed Powerpuff Girls and Dexter's Lab games.

Spider-Man: The Movie—The Game

Activision's E³ booth featured a large Spidey display but precious few visuals pertaining to the upcoming movie tie-in game, slated for a Summer 2002 release on the PS2 and GameCube. However, spies at the Daily Bugle were able to slip GamePro this screenshot of the game. Stay tuned, true believers.

Is Half-Life Dreamcast Dead?

In late May, major retailers including Electronics Boutique removed Sierra's Dreamcast version of Half-Life from their computers and announced that the disc would not be coming out. That's bad, but here's where it gets weird: Sierra, at press time, still had not made an announcement confirming or denying the game's cancellation. Is Half-Life dead, or merely comatose? Check out sierrastudios.com to find out the latest official statement.

XBOX: NOVEMBER 8, \$299

Microsoft's bid for a piece of the console gaming pie officially got underway at a press gathering the day before E³, where Microsoft's Chief Xbox Officer, Robbie Bach, announced that the Xbox will go on sale November 8 for \$299.

The announcement came rather casually near the beginning of Bach's speech, as Microsoft wanted the event to be more about what the Xbox could do instead of how much it would cost. Or, as Bach put it, "We're going to let the games do the talking." Demonstrations were offered of several upcoming titles, including Oddworld: Munch's Oddysee, Halo, Mad Dash Racing, Pirates of Skull Cove, and Dead or Alive 3. Announcements were made for Dino Crisis 3, Bruce Lee: Quest of the Dragon, and a game based on the movie Shrek, all of which will be exclusive to the platform.

Microsoft plans to have between 600,000 and 800,000 Xboxes available on the launch date, with anywhere between 1 million and 1.5 million machines in stores by the end of 2001. The company expects to have 15 to 20 games ready by November 8 and announced that 80 exclusive games are currently in development, half of which are first-party titles. "Microsoft, unlike Sony, is very committed to doing first-party software ourselves," said Bach.

Perhaps the strongest words came from Tomonobu Itagaki, creator of Dead or Alive 3: "It's very easy for a newcomer to be underestimated," he said. "You may have that feeling about this machine as well. Maybe you were skeptical before you saw this. I came to offer proof of the Xbox's power."

Microsoft also revealed that Xbox software will ship in translucent green DVD-style jewel cases, and the company is developing a headset microphone called the Voice Commander for speech chats during gameplay. Bach called the Xbox "the only console designed from the ground up to do online gaming right," and announced that 25 companies are committed to creating online content for the Xbox. Sega Chief Executive Officer Peter Moore announced that the 2K3 versions of its NFL, NBA, World Series, and NCAA football games would all appear on the Xbox with online play, and that the company is also planning Crazy Taxi Next and House of the Dead 3 for the console. When posing the question as to whether or not Sega thought Microsoft would succeed, Moore gave the crowd a start by answering, "You bet your ass. Thank you very much."

Highlights of the Xbox's E³ showing can be found in this issue's E³ Showstoppers feature.

SONY, AOL, NETSCAPE TO BRING PS2 ONLINE

Shortly after Nintendo and Microsoft announced their respective launch plans at E³, Sony offered details about its plans for the PlayStation 2 and its inevitable online future—namely, strong partnerships with America Online, Netscape, Macromedia, RealNetworks, and Cisco—and confirmed the November release of a hard drive and network adapter. At Sony's E3 booth, AOL, Netscape, RealVideo, and the hard drive were already up and running. The first online PS2 games are expected this fall—including Tony Hawk's Pro Skater 3, Tribes, Frequency, Twisted Metal Online, and SOCOM: U.S. Navy Seals—but full online implementation will not occur until spring 2002, as software development kits will not go out to developers until this winter.

The \$40 network adapter will include an Ethernet port for broadband connections, but also a 56K modem for users who do not yet have access to cable or DSL. The 40-gigabyte hard drive's price has not been announced.

Additionally, Sony revealed plans for an official first-party DVD remote control that will ship in September for \$19.99, and proposed winter releases for a hi-res LCD display, a keyboard, and a mouse. Sony also announced an LCD screen for the PS one, with an expected ship date of November and a price of \$129 for the standard version, or \$149 for the deluxe version, which will include speakers.

Once expected to be broadband-only, Sony's network adapter will feature a 56K modem as well.

Sony's LCD screen, keyboard, and mouse will turn the PS2 into a mini-PC.

The PS2, however, was the true focus of the event. "The PS2 is poised for the leadership position," said Kaz Hirai, claiming that the PlayStation and PS2 currently comprise 55 percent to 60 percent of the console gaming market: "We are the brand for the living room." Sony said PS2 production will climb to 2 million per month this fall, and over 100 new games are planned for the system this year alone. Exclusive titles will include Final Fantasy X, Metal Gear Solid 2, Virtua Fighter 4, Legacy of Kain: Soul Reaver 2, and Devil May Cry. "Devil May Cry was created on the concept that it absolutely has to be cool," said its creator, Shinji Mikami. "We told the staff, 'Everything will be okay as long as it's cool.'"

The hard drive, which will be released in November, slides into the expansion bay of the PlayStation 2.

For more details on upcoming PlayStation and PS2 software, see the E³ Showstoppers feature in this issue.

DRESSED TO FRAG

Video games have a language all their own—and to prove it, the T-shirts from Game Skins feature imagery and in-jokes that only fellow gamers will get. With simple designs based on Dance Dance Revolution's arrow patterns, Street Fighter II's buttons, Gauntlet's health warnings, and even Konami's classic NES infinite life code, the iconography of the shirts says it all. And if your friends don't understand the naked significance of the W, A, S, and D keys on a shirt, find new friends. Show your gaming pride for just \$17 a shirt at www.game-skins.com.

GAMEPRO LABS

Mad Catz Roll Cage

Rating: 5.0

It's all fun and games until you scratch your Game Boy Advance screen, right? Unlike the bulky plastic flip shields of yore, the Roll Cage is a rubber-and-steel strap that fits around your GBA to prevent catastrophe. The metal bars provide a full half-inch of clearance between the screen and anything that would injure it, while the contraption doesn't restrict the buttons or dramatically increase weight. A great new idea for a great new handheld!—*Dan Elektro*

Price: \$9.99. Contact: Mad Catz, 800/831-1442, www.madcatz.com

Logitech Cordless MouseMan Optical

Rating: 4.5

Now that optical mice are the standard, Logitech has taken the concept one step further and made 'em both optical and cordless. This wireless MouseMan features a comfy right-hand profile, a healthy 6-foot operating range, easily replaceable AA batteries, and USB PC/Mac compatibility. Unfortunately, it has one less button than Microsoft's IntelliMouse Explorer (just four, with the wheel), but it also has one less cord. This is the gamer's path to fragging freedom.

—*Dan Elektro*

Price: \$69.95. Contact: Logitech, 800/231-7717, www.logitech.com

STATIC

...THPS2 GBA...THPS2 GBA...THPS2 GBA...Microsoft let Major Mike hold the cardboard carton that the Xbox will ship in. Major reports that he "felt all tingly inside." • When the GP crew hit Six Flags Magic Mountain the day before E³, it was a marathon of roller coasters, interrupted only by Dan Elektro vomiting **ALL E³ EDITION!** and everybody hunting Beef-cake in the bumper cars. • Pokémon, Pikmin...nah, it's just a coincidence. Right? • Nintendo made a big deal about how a glut of sequels is ruining the industry. Then it showed the latest "franchise" games for Super Smash Bros., Metroid, Wave Race, Mario Kart, and Zelda. Our guess is Nintendo feels it's not a sequel if it doesn't have a number after it. Unless, you know, that number is 64. • Why is Sony's press kit a huge binder of paper when the company invented the CD? • Best overheard line: the booth model who proclaimed, "God, I wish I could wear pants." • Speaking of the bleeding edge of technology, last year Kaz Hirai said Sony was all about the broadband future. Broadband would be in homes faster than expected because the PS2 would lead the broadband charge. Apparently, Sony will now lead that broadband charge with a hybrid 56K modem. • That's what the world needed: Final Fantasy skateboards & Halloween costumes. • GamePro broke with noisy-booth tradition by setting up shop in the Staples Center this year. Kobe says, "Hi." • Return to Castle Wolfenstein...
Return

GAMEPRO LABS SPECIAL: LOGITECH GT FORCE

Rating: 4.5

Because Polyphony Digital (the developer of Gran Turismo 3) wrote its own drivers for Logitech's new PlayStation 2 force-feedback steering wheel, playing Gran Turismo 3 with the GT Force is a sublime experience. The wheel plugs into the PlayStation 2's USB port and clamps easily to a desk or table, while the gas/brake pedals rest on the floor. The compact wheel has a comfortable grip and good button layout, including racing-style behind-the-wheel click-shifters.

The only downsides are that the pedals feel a little flimsy and skid around too easily, and at \$99, it ain't cheap. Still, between the effective force feedback and the wheel's slick performance with Gran Turismo 3, console gamers have rarely had such an attractive wheel to whet their need for speed.—*Air Hendrix*

Price: \$99. Contact: Logitech, 800/231-7717, www.logitech.com

TRICKS &

First Screens for GameCube & Xbox!

EA Sports Big returns to carve up the competition with SSX Tricky. Can the PS2 snowboarding sensation expand to the Xbox and GameCube and still remain king of the mountain? *By Dan Elektro*

IN MANY WAYS, SSX helped define what PlayStation 2 gaming was about. Combine Sony's reliance on its third-party companies during the machine's launch with the debut of the EA Sports Big label, and you'll see that there was an awful lot riding on that little snowboard. Now that SSX has kick-started a platform and resuscitated a dying genre, its sequel, SSX Tricky, faces a challenge: How can it improve on its second PS2 run and successfully bring its frosty fresh gameplay to the Xbox and GameCube this fall? The answer is a word that snowboarders know all too well: balance.

Old Dogs...

"We really focused on fundamentals the first time around," says Larry LaPierre, the game's producer. And now that EA's nailed the basic glee of swooshing down the mountain with reckless abandon, the programmers are spending time on details like character development, secret pathways, and, most of all, the tricks. The original game was designed as a racing experience, but many players picked it up expecting more Tony Hawk-like stunt-based gameplay. LaPierre says the game is expanding to keep both camps happy.

"We've really managed to create a much more compelling and gratifying trick experience without compromising all the things we loved in the original," he says. "The tracks are set up uniquely for show-off mode, the tricks have gotten even more over the top, and we've added a trick-grading system that gives you a quick analysis of how 'tricky' your combo was."

The biggest stunt innovation will be the "ubertricks," a set of 36 insane, just-barely-plausible moves that draw influence from skateboarding, BMX, and free-style motocross. The moves will include one-footed stunts, board spins, kickflips, airwalks, and even some moves where characters lie down on the board. "Our whole schtick has always been that

Tricky's "ubertricks" will enable players to do wild stunts you'll likely never see on the real slopes!

It's a year later, so returning characters have changed their appearance—dig Moby's funky facial hair!

The PS2 version is furthest along of the three Tricky games, but the programmers have little time to relax.

Treats

we don't do anything in the game that's impossible," says Steve Rechtschaffner, executive producer of both SSX and SSX Tricky. "We do a lot of things that aren't likely." Exactly how and when players will be able to trigger ubertricks is still being worked out; it could be a specific button combination, or it could hinge on a limited-time window after bringing your boost meter to maximum. It's the kind of thing that only experimentation and playtesting will decide.

The wild riders of SSX are returning for a second run—and this time, they'll have a whole new bag of tricks.

This Time, It's Personal

Ubertricks are just one of several ways the EA team has found to improve SSX without changing the core elements. For instance, it's a year later in the game world, and both the tracks and riders have undergone some changes.

Improved A.I. will result in a tighter pack throughout the race.

Executive producer Steve Rechtschaffner says Tricky is "all about creating emotions. It's an action game, so it has those heightened experiences."

Pretty boy J.P. spent the last year in France, so his fashion sense and attitude reflect that. Downhill diva Elise sports a new haircut, while other riders were just cut, period. "Unfortunately, Hiro and Jurgen were in a bad crash at the end of last season and will not return this year," jokes LaPierre. "But a fresh crop of new and eager competitors have made their way onto the circuit." They include Psymon, whose mysterious accident results in him frequently muttering to himself (to the great dismay of Kaori); and the hapless Luther-Dwayne, the slightly repulsive ladies' man (see sidebar, "New Characters"). As an added treat, several well-known movie and music stars will provide the characters' voices.

With new characters come new behaviors—lots of them. "The characters matter not just outside the game but in the game," says Rechtschaffner. "It matters who likes who, who dislikes who. You may not understand it the first time you play,

continued ▶

"There are things we are getting to on the PS2 as our second iteration than the Xbox allows us to do from the start without much effort," says producer Larry LaPierre.

"The nice part of the GameCube is there's a bit more simplicity and focus, with the bigger button," says EA's Steven Rechtschaffner.

Title Tricks

You may have heard about SSX sequels named SSX: DVD or SSX Director's Cut. Both were working titles that were scrapped in favor of SSX Tricky. "Moving things over to DVD media initially inspired the potential use of SSX: DVD as the title," explains producer Larry LaPierre. "As we delved further into the details and execution, it became evident that the experience was really beginning to take all aspects of the game to the next level. We all felt that SSX Tricky was much more descriptive of the overall experience we're going to deliver. That title speaks to the improved trick focus of the game, it supports the trickiness of the race lines and combat strategies—Tricky just says it all so well."

New animations this time around will include uber-tricks, balls, and wipeouts.

but after a while, you'll realize that Elise, maybe, has no tolerance for Mac. If you play as Mac and you smack her once, you're gonna piss her off immediately. And you might not notice that it takes a bunch more times to piss off Moby, but maybe it's because Mac and Moby are friends."

All characters will have a best friend and worst enemy programmed in; it's up to players to figure them out. And thanks to a bit of code called "dynamic aggression tables," characters' reactions evolve as you play: They remember how you've picked on them, so grudges are retained throughout the game. By the final race, you may find your enraged nemesis is no longer interested in winning the race—he just wants to make you eat snow.

Track Stars

At least the snow will look good enough to eat. The expansive, gorgeous tracks are returning in the sequel, albeit altered just enough to impress newbies and intrigue veterans. Tokyo Megaplex, for instance, will still be built on a pinball machine theme, but will consist of three distinct layers—your skill will determine which one you enjoy on any given lap. Other tracks are being re-sculpted to make weak spots more exciting, offering new lines, fresh alternate paths, and tight new trick spots—better balanced for beginners, pleasantly fresh for vets. "The venues will feel familiar, but don't get too complacent," warns LaPierre. "Things can change a lot in a year."

Two all-new tracks will debut in Tricky: a mountainous newbie slope called Garibaldi, and a final showdown in Alaska. "We realized we needed a much better first course," admits Rechtschaffner. "We need a first course that makes you feel like a hero, even if you've never played the game."

Look for Garibaldi to feature bigger ramps, faster speed, and steep drops that afford air even if you don't time the jumps correctly. That said, only half of the first track will be the marked course—the rest of the terrain will consist of challenging shortcuts and alternate paths, ready for skilled players to discover and explore.

SSXbox, Cubed

In addition to the courses, EA is planning improvements to the trick book, along with wipeout animations, player feedback, and even more impressive control ("It never sounds like a big thing when you say it," says

"We're getting to do a level of depth that you can achieve only the second time around," says executive producer Steve Rechtschaffner.

Eddie is one of Tricky's six new characters. His hairdo will be animated and react to wind—what the EA programmers jokingly call, "fro physics."

Knocking down your opponent during a race will max out your boost meter—but it might also make your victim seek revenge.

One welcome innovation will be a better structured Trick Book, which, when you pause the game, will show you the stunts you have yet to complete.

The Garibaldi course will feature several steep drops that result in trick opportunities even if you mess up your timing.

EA's Steven Rechtschaffner says, "there are neat opportunities to make control simpler and make it feel better in some ways" on the GameCube.

Rechtschaffner, "but it's everything"). Late flips that would've ended in wipe-outs in the first game are being adjusted so they're landable at the last moment, tweaking the physics for the sake of more rewarding gameplay.

All those elements should make a game that was already pretty easy to pick up and play an absolute thrill for players of all skill levels—and they should widen SSX's surprising mass-market appeal. "We didn't set out to make a game to sell to the people who already bought the first game," claims Rechtschaffner. "This is not sequel exploitation strategy. What we're really striving for is more elegance. We talk a lot about things being intuitive. Hopefully, you should never have to read the manual. I can't imagine there's anything we're doing that any gameplayer—an expert or a casual or first-timer—isn't going to pick up and appreciate."

That appreciation should be easy to develop no matter which platform you choose. While the team is most experienced with the PS2, it has a fondness for the GameCube controller and nice things to say about Xbox's development tools, so all three games should look and play roughly the same. "We have to spend far too much time getting the physics to work the way we want and the courses to look the way we want," says Rechtschaffner. "Variety for variety's sake is useless." Besides confirming that the physics engine will indeed be exactly the same across all platforms, LaPierre points out that console evolution has been helpful: "Classically, you look at the differences between the N64 and the PlayStation; technically, they created very significant differences visually. Now, with the amount of texture space that all the platforms have, I think you're going to see a lot less visual difference than we have in the past."

"We're absolutely ecstatic to be making an action/arcade style game," says EA's Steve Rechtschaffner.

All the original tracks will appear in Tricky, but they'll have been altered and improved in the "off-season."

The physics will be improved so that once-impossible slow flips are now just barely landable.

Friendships will matter in Tricky: If Mac and Moby don't like Eddie, they're more likely to fight on the slopes.

Tricked Out

Right now, all three versions of SSX Tricky are in fairly early development. The PS2 version and either the Xbox or GameCube incarnation will be available around late November; the remaining game of the trio should appear before year's end. And the EA Sports Big team knows it has a lot of fans to please—some of whom are serious gamers, but many of whom are not. "We never expected the game to be picked up so broadly," admits Rechtschaffner. "We wanted to cross over to people that liked racing games, action/sports games, arcade games, adventure games. When we started getting people who had never played games, that was like... 'Wow.'"

Garibaldi will be Tricky's first track, specially designed to reward inexperienced players.

Whether on Xbox, GameCube, or PS2, EA plans to take advantage of each machine's unique strengths.

Fresh Faces

Meet two of SSX Tricky's six new characters

Luther-Dwayne

Luther-Dwayne Grady rules the mountain because he is a mountain. Whether you consider him unflappable or oblivious, one thing is certain: He's big, he's bad, and he's the kind of bear who holds a grudge. Maybe you'll get lucky and he won't notice—or even feel—your puny smack attacks, but look out if he does. He'll throw a race to exact his revenge.

Eddie

Edward Wachowski got his start in street luge, so pure speed is his best weapon. You might not assume it from his not-so-aerodynamic afro, but rest assured—he knows how to carve curves and opponents. His goofy, youthful nature has earned him the nickname "The Kid," but his sharp style and wealth of pop culture knowledge prove him more experienced than his nickname might suggest.

So You Want To Be

It's the quickest way to get your foot in the door of the video game industry—but it's not easy. If being paid to play games all day long sounds fun, check out the facts first.

By Dan Elektro and Four-Eyed Dragon

RECEIVING MONEY FOR playing video games—the perfect job, right? According to the large quantity of mail we get about this topic, most of you seem to think so. But before you try to convince a game company that you're the perfect tester by filling out your resume with a list of games you've completed and claims of how you're a hardcore gamer, be warned: This virtual paradise might not be all you think it is.

Repeat Until Done

"It's not all fun and games," says Danny Lam, describing his experience as a Sega game tester before becoming a journalist for multiple game publications. "You really have to have a lot of patience to be a tester, and realize that sometimes the job is testing the same game day in and day out for a couple of weeks." To be an effective tester, you have to master a game from beginning to end, playing it through several times. If you're the kind of gamer who completes new releases quickly but then immediately sells the game after beating it, this is not the job for you. For a game tester, repetition is a way of life.

The Write Stuff

As a game tester, your job is to find every single thing that could possibly be wrong in a game, and then write about it in painstaking detail. Did you hit an enemy but not have it register? Were you able to fly through what should have been a solid object? Did the grass give you as much traction as the road around Turn Three? These are all things you have to not only notice but also describe in well-written words. Says Danny, "You definitely need to have some decent writing skills to relay accurate information. Sometimes, the report on a single bug can take up the whole page; the developers won't know how to fix the problem if you can't explain it clearly." Besides writing about specific errors, you may also have to generate concise reports that detail all your findings and evaluations.

a Game Tester?

What's Your Time Worth?

You'd do well to approach game testing as a full-time job. If you can manage it as a summer job, wonderful—but the time commitment and reality of 18-hour days can't be stressed enough. If you're in high school, you probably won't have the time to both test games and attend classes. If you're a college student, you might be able to schedule your classes so that it works out, but prepare to be busy. A normal job posting for a game tester will usually state that applicants must prepare to work overtime, late hours, and during weekends, in addition to 40-plus hours during the weekdays. The hours can be odd as well. At Sega, for example, Danny did the afternoon shift that lasted from

2 P.M. to 11 P.M. with only a one hour break for dinner, while the morning shift started at 5 A.M.

Moreover, pay varies depending on your qualifications and experience: For instance, at one major game publisher, a temporary tester receives \$8.50/hour, full timers get \$9.50/hour, a senior tester ranges between \$10 and \$12.50/hour, and a lead tester can make up to \$35,000/year. Additionally, you may be asked to be a contractor, working only during the summer or winter months when more games are scheduled for release.

Are You Qualified?

Enduring monotonous game playing, surviving long hours, and having impeccable writing skills aren't the only qualifications you need to be a game tester. Because testers must talk to game developers, marketing, and public relations people on a regular basis, companies always ask for someone with strong verbal communication skills. You also need a knack for leadership, as you'll constantly be in groups analyzing the latest game builds and discussing a plan of attack against bugs. Being familiar with spreadsheet and word applications on a PC is a must, too.

Learning Curve

So what's the benefit of being a game tester, especially when it's not just fun and games? Crave Entertainment sums it up eloquently in a recent job posting: "Testing is the mailroom of the game business!" In another words, this occupation may be laborious and repetitive, but it also rewards you with a full understanding of the ins and outs of the entire company, which makes the job of game tester a perfect stepping stone for advancement to other opportunities in the video game industry. In fact, many top executives, lead producers, designers, and video game editors started as game testers. The benefit is receiving a good start in the biz—and, of course, being paid to play games! 

How Do I Apply?

You apply for game testing jobs as you would any other job: Call the company and ask for the human resources, department, then inquire about game testing positions. Be prepared to mail or fax a resume and cover letter that stress your skills in problem solving, communication, writing, reading comprehension, and any other attributes you feel can qualify you as a strong game tester. Also, companies never allow you to test games at home, so geographical location is important. Nintendo testers work at Nintendo HQ in Redmond, Washington, so if you're in Illinois, consider Chicago-based Midway first, and so on.

PUT IT TO THE TEST!

Be honest! You already know the right answers. Find out why smoking's not for you, no matter who you are.

WHAT'S YOUR FAVORITE MUSIC?

- A. Alternative, rock, electronica.
- B. Rap and hip-hop.
- C. Pop, world music.
- D. Love songs, ballads.

If they cancelled school for a day, what would you do?

- A. Read your favorite book.
- B. Play sports.
- C. Help around the house.
- D. Go out with your friends.

IF YOU COULD MAKE YOUR DREAMS COME TRUE, YOU'D:

- A. Be the world-champion of your favorite sport.
- B. Be voted "most popular" in school.
- C. Work at a space center.
- D. Get a date with the cutest girl/guy in class.

4

FOR A PARTY, YOU PUT ON:

- A. Something original and wild, even if it doesn't look that great.
- B. The latest fashions.
- C. Something classic: it's better to be safe than sorry.
- D. Something like what your friends are going to wear.

YOUR FAVORITE KIND OF MOVIE IS:

- A. Romance.
- B. Comedy.
- C. Action-adventure.
- D. Horror.

THINK
DON'T
SMOKE

R E S U L T S

5-8 POINTS

You're sensitive and responsible, you know what you want and you have drive. Why blow it with a cigarette? Smoking's not going to help you get anywhere you want to go.

9-12 POINTS

You're outgoing, yet sensitive. And you're totally social. You like people and people like you. You already know you don't need a cigarette to fit in.

13-15 POINTS

You're playful. You like to mix it up and you don't go unnoticed. You're a trend setter who never follows the crowd. That's why you'll make the right decision about cigarettes. You don't need to smoke because some people do.

E3 SHOWS

It's 2001, and the Electronic Entertainment Expo was a games odyssey. We had a tough time choosing, but here are our picks for the best of the show for all the systems.

By The GamePro Editors

LUIGI'S MANSION

BY MAJOR MIKE

Developed and published by Nintendo

Target release date: November

IT SEEMED TO be a given that Nintendo's upcoming next-gen system would launch in concert with a new Mario title, but GameCube's premier software offering will be a little different. Instead of the usual block-breaking, coin-collecting, and boss-battling scheme, Luigi's Mansion has Mario's brother taking center stage for a little house cleaning—the haunted kind. Armed with a ghost-vacuum akin to something from *Ghostbusters*, Luigi will be able to stun ghosts and other spirits with a flashlight, then suck 'em in for a coin reward.

Despite the simplistic scenario, Luigi's Mansion's complex control scheme and breathtaking visuals should keep gamers riveted. LM will use both analog sticks: One will move Luigi in any direction, the other will control his torso, so you can walk in one direction and attack in another. Be prepared to put in some serious time mastering this learning curve. As for the visuals, these sparse screens do the actual gameplay little justice. The mansion will be loaded with ghosts, spirits, illusions, and other special effects—from Luigi's translucent flashlight beam to misty breath when he enters a cold room—that should leave you blinking in disbelief. From what was on display at E³, LM looked like a must-have 3D action/adventure GameCube title that will ably show off the system's capabilities. 

TOPPERS

STAR WARS ROGUE LEADER: ROGUE SQUADRON II

BY UNCLE DUST

Developed by Factor 5

Published by LucasArts

Target release date:
November

STICKING WITH WHAT it does best, LucasArts teamed up with Factor 5 to produce one of the most awe-inspiring sights of this year's E³—Star Wars Rogue Leader: Rogue Squadron II. The game wowed crowds by featuring more impressive and detailed visuals than the first two *Star Wars* movies. E³ attendees crowded around the kiosk at the packed Nintendo booth to sneak a peak—since the only other place it was shown was behind closed doors at LucasArts.

X-Wings, B-Wings, and A-Wings flew through environments teaming with TIE Fighters and Interceptors in three preview-version settings—the Death Star, Cloud City, and the space around a Star Destroyer. Rogue II will feature around 14 missions from the original trilogy, with interesting objectives that have continuity with the films, such as escorting the rebel fleet to their secret base on Hoth after the first Death Star is destroyed. The scale and scope of the game was simply amazing, proving that Nintendo's GameCube can compete technologically with any other next-gen console system. Plus, the complex controls took complete advantage of the GameCube controller by including cool features like a targeting computer and the ability to look around the cockpit as you fly. Rogue Leader, standing by! 

E3 SHOWSTOPPERS

PIKMIN

BY STAR DINGO

Developed and published by Nintendo

Target release date: December

IF NINTENDO'S GOAL with the GameCube is innovation, then it has already hit the originality jackpot. The latest game to sprout from the mind of Nintendo design legend Shigeru Miyamoto (of Zelda fame) is Pikmin, an action/strategy/mind-control/plant-symbiosis sim unlike any this or any other world has seen before.

The unquestionably off-kilter premise? You're a little silver space-man who crash-lands on an inhospitable world populated by tiny plant-creatures called Pikmin. Your goal is to cultivate, guide, evolve, and rally groups of up to 100 of the little legumes so that they build bridges, remove barriers, destroy predators, and otherwise change their world to help you return home. Pikmin's graphics are already lush, beautiful, and hyper-detailed, while watching your Pikmin herd, hop, and sway under the influence of your rainbow head-beam is plain mesmerizing. Everything about Pikmin just screams unique—well, just as long as you ignore the fact that the game's title is similar to that of another Nintendo franchise spelled with a "p," "k," "m" and "n"....

SUPER SMASH BROS. MELEE

BY STAR DINGO

Developed and published by Nintendo

Target release date: November

LET'S SAY YOU'RE Nintendo. You're about to launch a new cutting-edge game system, but some upstart company named Microsoft is stealing your thunder by launching one of its own. So you're waving your hands in the air and screaming, "Look over here! We're back! We rule!" Well, if the words aren't effective, you'd probably prove it with a game that takes characters from every freakin' one of your most popular franchises and hurls them into one huge, ridiculous four-player brawl—and Super Smash Bros. Melee is that brawl, er, game.

"See Mario?" says the GameCube, "See Pikachu, Samus, and those two lovable Eskimo weirdoes from Ice Climber? Have you taken your fill of Kirby, Yoshi, Star Fox, and Link?! Baby, you ain't gettin' them anywhere else."

The original version of Super Smash Bros. for the N64 was one of the system's best multiplayer games, and Melee doesn't mess with that formula—except by adding over a dozen new backgrounds, a ton of new characters, 30 new items, a single-player quest, and a 64-player tournament mode. Oh yeah, the game also come with an exponential increase in graphical punch, courtesy of the 'Cube.

E3 SHOWSTOPPERS

METROID PRIME

BY MAJOR MIKE

Developed by Retro Studios

Published by Nintendo

Target release date: 2002

NINTENDO 64 GAMERS have been clamoring for a Metroid adventure starring famed interstellar bounty hunter, Samus Aran. Although an N64 version never materialized, a GameCube version is in the works, and a video of the game in progress was briefly shown at E3. Little is known about Metroid Prime, but gamers can expect a 3D gameplay engine coupled with epic exploration, awesome weaponry, gigantic bosses, and more. Although Prime won't appear until next year, you can get a piece of Samus in Super Smash Bros. Melee.

ETERNAL DARKNESS

BY MAJOR MIKE

Developed by Silicon Knights

Published by Nintendo

Target release date: December

MANY GAMES ASK you to put your life in danger, but not many ask you to risk losing your...sanity? Eternal Darkness, on the other hand, will challenge your sense of reality. In this 3D action/adventure game, you'll chase an evil force through time. You start as a gladiator then go on to play as a total of 13 characters in as many eras, from 100 B.C. to the present. As you venture through horrific historical events, including the Inquisition and two World Wars, your sanity meter is affected by how well you play the game. If you play poorly, your sanity will decrease and you'll begin to hallucinate, right up to your real—or imaginary—death. Confusing? You bet...or do you?

Wars, your sanity meter is affected by how well you play the game. If you play poorly, your sanity will decrease and you'll begin to hallucinate, right up to your real—or imaginary—death. Confusing? You bet...or do you?

STARFOX ADVENTURES: DINOSAUR PLANET

BY ATOMIC DAWG

Developed by Rare

Published by Nintendo

Target release date: November

FOX McCloud, MISSING in action on the Nintendo 64, returns for a tour of duty with the GameCube. It's not clear how much of the N64 project, Dinosaur Planet, was actually folded into StarFox Adventures, but this primeval world is deep in dino doo-doo. An evil dinosaur named General Scales is blasting sections of the planet into space. To save the day, Fox will have to perform plenty of hand-to-hand combat with a magical, multi-functional staff. Don't worry, he also returns to his famous Arwing starfighter for classic aerial combat. When it comes to launching a sequel, no one...outfoxes Nintendo.

E3 SHOWSTOPPERS

DEAD OR ALIVE 3

BY TOKYO DRIFTER

Developed by
Team Ninja

Published by Tecmo

Target release date:
Fall 2001

TO AMPLY EXHIBIT the Xbox's power at E³, Microsoft needed a game miles ahead of anything yet seen on the PlayStation 2. Ironically, it bagged just such a title by snatching Tecmo's Dead or Alive series from the PS2; now DOA3 will appear exclusively on the Xbox, with its stunning character models and impressive fighting environments. The tremendously detailed environments are all the more amazing when you consider their massive

size: When asked how large the fighting areas would be, Tomonobu Itagaki, head of DOA developer Team Ninja, jokingly replied, "Several miles."

The character models were definitely powered up from previous incarnations, the easiest recognizable change being the lifelike movement of the characters' hair and costumes. In fact, the single most gratuitous use of processing power came in the form of a female fighter in karate gear, whose entire outfit moved as fluidly as real clothing—to the point of realistically interacting with her body underneath. As for the game's character roster, many old favorites, such as Ayane and Kasumi, are returning. Itagaki could not confirm if all the old fighters would reappear, saying he'd rather incorporate as many new characters as possible; not surprisingly, the DOA3 footage at E³ revealed at least four new fighters (one of whom looked like a boss). **G**

CEL DAMAGE

BY TOKYO DRIFTER

Developed by
Pseudo Interactive

Published by
Electronic Arts

Target release date:
Fall 2001

THE CLASSIC, CEL-SHADED, flat cartoon style look is so ubiquitous that it's easy to pass over a game like Cel Damage—especially at an eye-popping expo like E³. Fortunately, this Xbox gem was a standout, with its weird vehicle combat and wacky cartoon physics. In the preview version, six strange characters drove outrageously animated rigs, ramming, slamming, and gunning each other down with 36 goofy, toon-lethal weapons. The game-play matched the crude look to a tee, resulting in one hilariously modified take on car combat. **G**

E³ SHOWSTOPPERS

WHILE IT WASN'T playable on the show floor, Jet Set Radio Future looked phenomenal in its early stages. The game first appeared on the Dreamcast as Jet Grind Radio—mixing an original look, funkified music, and creative gameplay. You had to claim your territory by spray-painting your tag while avoiding the police on your futuristic skates.

Similar to Jet Grind, Jet Set Radio Future takes place in the near future when youth battle to express themselves. You'll want to avoid unfriendly rivals and the boys-in-blue, as you glide on your rocket-powered skates through a sharply detailed, cartoon-style city. This time around, you'll be able to perform more tricks and play with a friend in cooperative or competitive mode. Best of all, you can expect an enthralling soundtrack, something that helped make Jet Grind Radio an unforgettable ride. 

JET SET RADIO FUTURE

BY FOUR-EYED DRAGON

Developed and published by Sega

Target release date: Winter 2001

HALO

BY AIR HENDRIX

Developed by Bungie

Published by Microsoft

Target release date: Fall 2001

HALO HAS BEEN generating buzz since its genesis as a PC game, so it had a lot of hype to live up to at this year's E³. While it didn't leave show attendees agape with wonder, Halo certainly proved that it's firmly on track to become an awesome sci-fi shooter. Halo's lush sci-fi setting transports you to a ring-shaped world where humans battle aliens known as the Covenant for control of the world's secrets. Although Microsoft staged these screen shots to show eye candy rather than gameplay, Halo's visuals were dazzling, even though you'll rarely view the action from the perspectives shown here.

Better yet, the gameplay looked promising, combining first-person combat with vehicular mayhem. You'll fight alongside a squad of marines (whose slick A.I. makes them effective partners), then clamber into a jeep with a mounted machine gun to wreak further havoc. Strong multi-player action will include co-op play in the single-player missions and deathmatches via split-screen or LAN. If the rest of Halo plays as well as the E³ demo, it's destined to be one of the Xbox's stars. 

E3 SHOWSTOPPERS

BLOOD WAKE

BY MAJOR MIKE

Developed by
Stormfront Studios

Published by Microsoft

Target release date:
Fall 2001

THE PLAYSTATION MAY have Twisted Metal, but the Xbox is preparing its own brand of vehicular combat with Blood Wake, a game that has boats blowing holes in each other across large bodies of water. With a selection of 10 boat types, you'll take to the high seas for 25 one-player missions, or do battle against up to four other players via a split-screen view. Of course, you can't have combat without weapons, and Blood Wake won't be a shrinking violet with its array of chain guns, torpedoes, mines, and more. **G**

PROJECT GOTHAM RACING

BY AIR HENDRIX

Developed by
Bizarre Creations

Published by Microsoft

Target release date:
Fall 2001

THE SEQUEL IN spirit to the Dreamcast's Metropolis Street Racer, Project Gotham will hit the streets of New York, San Francisco, London, and Tokyo for over 200 races—all on realistically modeled and mapped circuits. While the graphics won't be photo-realistic by any means, they will be appreciably close, so anyone familiar with those four cities should know their way around. The E3 demo, which turned a nighttime lap around NYC's Times Square, sported tight handling and eye-catching visuals. If all goes well, perhaps Project Gotham could be the Xbox's Gran Turismo. **G**

TRANSWORLD SURF

BY AIR HENDRIX

Developed by
Angel Studios

Published by
Infogrames

Target release date:
Fourth Quarter 2001

WHILE SKATEBOARDING HAS exploded, surfing games have never received a fair shake...but TransWorld Surf for the Xbox is poised to change that finally. Sporting some of the most spectacular water effects ever, TransWorld will blend Tony Hawk-style kicks and flips with authentic surfing moves, like stalls. Playing as one of 13 pros, you'll be able to find the perfect set in 10 locations ranging from Baja to Costa Rica to Hawaii. The game's visuals, from the waves to the shore to the marauding sharks, already looked fantastic in the preview version. If the gameplay keeps pace, TransWorld should be a huge hit. **G**

E3 SHOWSTOPPERS

RE

DEVIL MAY CRY

BY MAJOR MIKE

Developed and published by Capcom

Target release date: October

DEVIL MAY CRY is the latest action/horror offering from Capcom producer Shinji Mikami, who also gave us Resident Evil and Dino Crisis. The story centers on Dante, the descendant of a famed devil-hunting swordsman, who is called to the demon world to carry on a 2000-year-old grudge.

Dante's Inferno

In the preview version, a deep gameplay engine emphasized technique over firepower, helping Devil May Cry go beyond the classification of "Just another Resident Evil offspring." In addition to Dante's repertoire of jumps, punches, kicks, and his mastery of weapons (see sidebar, "Look What You Can Do!"), he could also transform into various demons and unleash screen-filling devastation powers. His tricks almost evened the odds, as Dante was besieged by a variety of supernatural forces that included murderous marionettes, slippery phantoms, speedy giant spiders, and a monster which can be described only as a black cloud of roving smog with big teeth and serious attitude.

Devil Inside

Devil May Cry already had looks and brains. Visually, it was a stunner, featuring atmospheric lighting effects, creepy gothic settings that will send shivers down your spine, and tons of interactive objects that should make for hours of exploration. The characters also benefitted from lifelike details, e.g., smoking guns and clothing waving in the wind. A hard-rock soundtrack punctuated by driving sound effects will accompany your every move.

Equally important was a simple control scheme that made even the most complex onscreen action a snap to execute—at times the game looked like *The Matrix* meets *Poltergeist* on steroids. Sure, it may sound as if we're jumping the gun by praising Devil too soon, but a playable demo of this title is being bundled with Resident Evil Code: Veronica X this August, so you'll be able to take a look and tell us if we're wrong. **L**

Look What You Can Do!

One of the coolest aspects of Devil May Cry is the fighting techniques of the main character, Dante. Here's an example of one of his flashiest—and deadliest—combo attacks, dubbed the "swat-and-shoot."

As Dante, use the sword for your first attack.

Swat your adversary into the air with a golf-swing-type motion...

...then, while your enemy is airborne, switch to the twin pistols and blast him!

FFX

FINAL FANTASY X

BY UNCLE DUST

Developed by SquareSoft

Published by Square EA

Target release date: First Quarter 2002

SQUARE'S FANATICALLY ANTICIPATED Final Fantasy X was playable for the first time in the U.S. at E³, and it didn't disappoint—in fact, FFX surpassed expectations. Gamers could play either as Tidus—the rambunctious Blitzballer who searched through ruins fighting water-based monsters—or battle in a party that included Yuna and her three summons: Ifrit, Shiva, and Valfarre. The in-game visuals were striking, and the summoning animations were simply incredible. The wide variety of characters shown in the demo were imaginatively designed in classic FF style, exhibiting intricate detail—and even lip synch to the Japanese dialogue.

While only a few minutes of gameplay were available, those moments were enough to bring droves of fans to the Square EA booth where they lined up to play the game—and see the demo movie, which showcased FFX's CG cinemas. These sequences were so beautiful, they brought tears to the eyes of the showgoers, literally, as they even rivaled the visuals of the upcoming Final Fantasy movie. This game is what the PlayStation 2 is all about.

STATE OF EMERGENCY

BY FOUR-EYED DRAGON

Developed by VIS entertainment

Published by Rockstar

Target release date: Fall 2001

ONE OF THE biggest surprises at E³ was State of Emergency. On paper, this M-rated game will have you inciting riots by taking to the streets and harassing every bystander. Environments will be completely interactive, and you'll have a variety of weapons to use against unsuspecting civilians, brutal cops, and nasty gang members. The simple story has you follow five Resistance agents who are bent on destroying the oppressive American Trade Organization.

The gameplay, however, is controlled chaos—and fun. In the playable version, you could pick a fight using anything from a flamethrower to your fists. Also, the A.I. closely resembled its real-life counterparts: Police relentlessly hunted you down, gang bangers never retreated, and the innocents cowered or ran away. The visuals also contained much detail; as players ran through a complete 3D urban city with tons of people clashing in every which way, the game looked amazingly sharp. Questionable content? Wait and see for yourself.

E³ SHOWSTOPPERS

RE

MAXIMO: GHOSTS TO GLORY

BY TOKYO DRIFTER

Developed and published by Capcom

Target release date: Fourth Quarter 2001

SHROUDED IN MYSTERY since it was announced over a year ago, Maximo made a stunning debut in playable form at E³. "Inspired" by the Ghosts 'N Goblins series, the game's presentation mimics all the classic trap-pings, such as zombies rising from the ground and your character's armor getting knocked off as you take damage. The combination of beautiful graphics, haunting melodies, a unique continue system, and surprisingly deep leap-and-slash gameplay earns Maximo a coveted spot as an E³ showstopper. **G**

METAL GEAR SOLID 2: SONS OF LIBERTY

BY ATOMIC DAWG

Developed and published by Konami

Target release date: Fall 2001

FOR THE SECOND year in a row, Metal Gear Solid 2 earned kudos as best video trailer of E³...oh yes, the game rocks, too. Producer Hideo Kojima hand-carried the video from Japan, but the MGS2 demo from Zone of the Enders was all that was playable. Was that enough? You bet! As for the tantalizing trailer, it revealed a few tidbits about the plot: Metal Gear Ray on a rampage, a female commando with a nasty electro-shock weapon, and the possible return of Ninja. MGS2 looks "solid" for sure. **G**

SILENT HILL 2

BY STAR DINGO

Developed and published by Konami

Target release date: August

KONAMI'S LATEST CINEMATIC creepfest turned every head—and stomach—at E³ with its unprintable acts of surreal, demonic nastiness (the leg-monster is doing what!?) and enough atmosphere to spawn new life on a small, dark planet. The game's use of flashlight effects and shadows was intensely disturbing, and the creatures you'll encounter seem yanked from David

Cronenberg's deepest, darkest nightmares (i.e., *The Fly*, *Dead Ringers*). So get yourself some sleep and a good washcloth for your eyes... 'cuz when this game is released, sleep is out and eye-poppin' stuff is in. **G**

Target release date: October

CAPCOM VS. SNK 2: MARK OF THE MILLENNIUM 2001

BY UNCLE DUST

Developed and published by Capcom

Target release date: September

A BRAVE 2D fighter, Capcom vs. SNK 2: Mark of the Millennium 2001, will be stepping into the ring to take on the PlayStation 2's 3D brawlers. This sequel should be a perfect arcade port (only the arcade version was at the show) and will feature 10 additional fighters in the lineup; Haomaru was easily the crowd favorite at E3. As did Marvel vs. Capcom 2, Capcom vs. SNK 2 is adding a bunch of goodies, including a six-button control scheme and a total of six Grooves, for even more depth to the legendary fighting system. **G**

SLED STORM 2

BY AIR HENDRIX

Developed by EA Canada

Published by EA Sports Big

Target release date: December

FOLLOWING IN THE snowmobile tracks of the sleeper-hit PlayStation original, Sled Storm 2's designers are focusing on creating bigger courses with plenty of opportunities for destruction, like plowing through the local ski lodge. Unlike other EA Sports Big games, though, Sled Storm 2 will concentrate less on tricks and more on destruction, so carnage will earn you points toward a Storm Boost, the game's decked-out turbo. The E3 demo already sizzled with potential, so look for Sled Storm 2 to light up the snow in time for the holidays. **G**

TONY HAWK'S PRO SKATER 3

BY BROTHER BUZZ

Developed by Neversoft

Published by Activision

Target release date:
Winter 2001

TONY HAWK'S PRO SKATER 3 remains on track as one of the can't-miss PlayStation 2 games of the year (for more info, see Sneak Previews, July). It looked gorgeous

at E3, and the online multiplayer demo rocked. Tony 3 will reportedly feature twice as many tricks as before. You'll also get new levels that include Los Angeles and Canada, along with a skatepark editor. However, gamers should be prepared to reset their geek-o-meter... you'll be able to add girl boarders this time around. **G**

SMUGGLER'S RUN 2: HOSTILE TERRITORY

BY JAKE THE SNAKE

Developed by
Angel Studios

Published by
Rockstar Games

Target release date:
October

SMUGGLING ACROSS THE border into the United States is hairy enough, but in Vietnam and Afghanistan, you're as likely to get shot as you are to get caught. The terrain in Smuggler's Run 2 was even more impressive than in the first game, and you could still go anywhere you could see. Vietnam had lush tropical plants, canals crossed by pontoon bridges, bombed-out villages, ruined temples, and fishing towns made up of huts on stilts. Besides your old reliable buggy, you could drive tanklike vehicles, plus the game earned its "Hostile" appellation with enemy tanks that could blow you up with one shot. **G**

BALDUR'S GATE: DARK ALLIANCE

BY STAR DINGO

Developed by
Snowblind Studios

Published by
Black Isle Studios

Target release date:
Fall 2001

BLACK ISLE'S BEAUTIFUL Diablo-flavored third-edition-D&D game will be the perfect showcase for the importance of "little things." Ya know, "little things" like the way the flicker of a torch creates shadows across the room, the way the sparks of a lightning spell bounce and fizzle,

the way water ripples and bounces as you splash around in a pool. 'Cuz these "little things" will make the big, multi-eyed, hell-spawned things look a bazillion times cooler in Dark Alliance. **G**

FREQUENCY

BY DAN ELEKTRO

Developed by Harmonix

Published by Sony

Target release date:
November

IF YOU WERE to combine elements of PaRappa the Rapper, MTV Music Generator, and Atari's classic arcade/shooter, Tempest, you might come up with the innovative stew that is Frequency. Gamers will have to match the beats of songs from Crystal Method, Dub Pistols, DJ Qbert, and others, "capturing" tracks of each song (bass, drums, etc.) while surfing down electric tunnels. With fast-paced gameplay and online support, Frequency could rocket the music genre forward at light speed. **G**

MEDAL OF HONOR: ALLIED ASSAULT

BY AIR HENDRIX

Developed by 2015

Published by EA Games

Target release date: November

EASILY ONE OF E3's most remarkable games, Medal of Honor: Allied Assault stunned the crowd with two spectacular levels: the landing in Normandy at Omaha beach and a sniper-riddled, war-torn French village. The wow factor came from both the dazzling graphics and the sharp teamwork in your unit. As you stormed the beach, fellow soldiers did everything from plead for their lives to bark quick commands that helped you decide your next move (naturally, homages to *Saving Private Ryan* abounded). The end result was a fluid feel to the action that was astonishing—much like *Half-Life* was the first time you played it.

Allied Assault isn't just about squad-based action, though—you'll fight alone and in disguise as you tackle more than 20 levels with objectives like sabotaging U-boats in Norway, holding a bridge at Remagen, and more. Allied Assault seems poised to become one of the year's top PC games, but if you aren't a PC gamer, don't surrender hope yet—Allied Assault's next tour of duty is on the Xbox in early 2002.

RETURN TO CASTLE WOLFENSTEIN

BY JAKE THE SNAKE

Developed by Gray Matter Interactive

Published by Activision

Target release date: Fourth Quarter 2001

ACTIVISION'S E3 BOOTH was mobbed with people gawking at this next-gen shooter. Thanks to the Quake III Arena game engine, Army Ranger B.J. Blaskowitz faced frightfully lifelike Nazi soldiers, plus decidedly non-lifelike monsters, in incredibly atmospheric World War II-era environments, including a barbed-wire compound and creepy dungeons.

The weapons looked almost photo-realistic and behaved just as accurately. The Thompson submachine gun spurted bullets in violent bursts, as did the Sten gun. Even the lowly Luger pistol looked great, as its hammer swung back and forth with each shot. Coolest of all was the flamethrower, which emitted a small, blue igniter flame until you pulled the trigger to unleash a firestorm on enemies, who then writhed in burning agony. The Nazi antagonists wore a vast array

of foreboding uniforms, from the black suits of S.S. officers to the camouflage frocks of elite soldiers. The enemies responded intelligently and grabbed their wounds where you shot them. Every first-person shooting fan will likely want to get their hands on this sure-fire hit.

UNREAL 2

BY JAKE THE SNAKE

Developed by
Legend Entertainment

Published by
Infogrames

Target release date:
First Quarter 2002

UNREAL 2 WAS probably the most impressive-looking PC game at the expo, but it was shown only behind closed doors, so it couldn't stop many people's shows. The vast outdoor terrain varied greatly, even including a deep-space asteroid belt where you could jump-jet from rock to rock, and an Earth-like planet with crinkled hillsides and huge trees with thousands of branches.

The weapons seemed inspired by those in *Aliens*—a robust machine gun spewed blue flame and swarms of bullets that threw up glowing sparks where they hit the wall. Plus, an amazing flamethrower unleashed the best-looking fire ever seen in a game.

SOLDIER OF FORTUNE II: DOUBLE HELIX

BY JAKE THE SNAKE

Developed by
Raven Software

Published by
Activision

Target release date:
First Quarter 2002

THE COLOMBIAN JUNGLE in *Soldier of Fortune II: Double Helix* was some of the best-looking natural scenery in any game at the show. Tall trees loomed over lushly overgrown plants whose leaves swayed in the breeze. Shooting through trees sent leaves falling to the ground. The faces of friends and foes were amazingly detailed. You could shoot AK-74s, M-16s, M-60s,

grenade launchers, plus machine guns mounted in watchtowers and on moving helicopters—"git some!" Not surprisingly given the first *Soldier of Fortune*, the game's insane detail also meant intensely graphic violence.

grenade launchers, plus machine guns mounted in watchtowers and on moving helicopters—"git some!" Not surprisingly given the first *Soldier of Fortune*, the game's insane detail also meant intensely graphic violence.

AGE OF MYTHOLOGY

BY JAKE THE SNAKE

Developed by
Ensemble Studios

Published by
Microsoft

Target release date:
Spring 2002

THOUGH THE BASIC setup hasn't changed from the venerable *Age of Empires* series, *Age of Mythology* was still one of the most eye-catching real-time strategies at E3. The view was from overhead as usual, but the detail of the world and the units was better than ever, with smooth waves crashing into coastlines and swordsmen hacking and slashing at myriad enemies. Coolest of all was the incorporation of powerful mythical creatures, heroes, and gods—such as Beowulf, Cyclops, Minotaur, and many others—into the strategic gameplay.

DUNGEON SIEGE

BY JAKE THE SNAKE

Developed by
Gas Powered Games

Published by Microsoft

Target release date:
Fall 2001

DUNGEON SIEGE COULD be the most beautiful role-playing game yet. In the preview version, the characters roamed completely 3D forests that looked like the setting for a Grimm Brothers' fairy tale, while the world was one huge continuous map with no load times. Desert landscapes, big dungeons, and multistory buildings were equally impressive.

The controls tweaked the best elements of other RPGs for a fast, seamless, and action-packed experience with few repetitive movements. Plus, a powerful editor will enable you to create your own characters, spells—and even entire worlds. **G**

FREELANCER

BY AIR HENDRIX

Developed by
Digital Anvil

Published by Microsoft

Target release date:
2002

THE LATEST FROM the makers of Starlancer, Freelancer is striving to push the boundaries of the space/combat genre. The preview

version unveiled a living universe where your reputation and the local marketplace determine whether you're offered bounty-hunting missions, trade missions, and more. A story line delves into the mysteries of the far-off Sirius System, but the

game literally never ends, as randomly generated missions ensure nonstop action even after you've played out the plot. If you factor in the already-gorgeous graphics, Freelancer looks like a dogfight of galactic proportions. **G**

NEVERWINTER NIGHTS

BY JAKE THE SNAKE

Developed by Bioware

Published by
Black Isle Studios

Target release date:
Spring 2002

PERHAPS BETTER NAMED RPG Construction Set, Neverwinter Nights may be the only Dungeons & Dragons-based RPG you'll ever need. Besides a full single-player game, you'll be able to create your own Forgotten Realms game modules with the Neverwinter Toolset. You'll be able to write your own plots, create characters—and lay out a whole world, which was incredibly quick and easy to do in the E3 demo. Then you'll reign over online games (featuring 64 players per server) as the Dungeon Master, influencing gameplay and altering the plot as you go along. All this, plus awesome graphics. **G**

BANJO-KAZOOIE: GRUNTY'S REVENGE

BY UNCLE DUST

Developed by Rare

Published by Nintendo

Target release date: 2002

NINTENDO'S MARQUEE BEAR and bird are coming back for their third adventure in the upcoming Banjo-Kazooie: Grunty's Revenge for the Game Boy Advance. Featuring the return of Gruntilda, the evil witch from the first Banjo game, and Mumbo Jumbo the shaman, who will have a bunch of new transformations, Grunty's

Revenge will also feature cool new worlds to explore. Plus, all of the patented Banjo moves will be present in the new handheld version of the game.

Judging from the looks of Grunty at E³, Banjo-Kazooie should make a big splash on the GBA. **G**

DIDDY KONG PILOT

BY UNCLE DUST

Developed by Rare

Published by Nintendo

Target release date: 2002

IT'S KONGS VS. KREMLINGS in Rare's furious, aerial kart racer, Diddy Kong Pilot. You'll hop in a crazy flying machine and travel through the unfriendly skies of crazy 3D courses featuring a variety of terrain from sandy beaches to erupting volcanoes. DKP will include a story mode for each character as well as multiplayer action for up to four players in races or dogfights. Another cool aspect of the game will be Tilt Technology—like in Kirby's latest GBC game—that allows players to really feel the thrill of flying. **G**

SABREWULF

BY UNCLE DUST

Developed by Rare

Published by Nintendo

Target release date: 2002

THE BIGGEST GAME Boy Advance surprise of E³ had to be Rare's new action/puzzle game, Sabrewulf. The evil blue-furred title character steals all the valuables in the land to fund animal slavery, so it's up to you, the legendary explorer Sabreman, to stop this maniacal plan. You'll have to explore the world, collecting creatures along the way that will help you solve the many puzzles and infiltrate Sabrewulf's lair.

Each creature will have unique abilities, and only a limited number of them will be able to accompany you on each level. The busy guys at Rare had a lot to show at E³, and Sabrewulf was quite possibly the most unique and original offering from this stellar developer: The Wulf prowls next year. **G**

SUPER STREET FIGHTER II TURBO REVIVAL

BY UNCLE DUST

Developed and published by Capcom

Target release date: August

CAPCOM IS THROWING the weight of its greatest series behind the Game Boy Advance, starting with Super Street Fighter II Turbo Revival, an amazingly fast and smooth version of its classic fighting game. The title will come with an expansive lineup, including original characters such as

Ryu and Chun Li, along with later contestants like Fei Long and Cammy. With four buttons and an extra wide screen, the Game Boy Advance proved to be a perfect fit for the SF series—if you were lucky enough to get through the lines at E3 to play the preview version. **G**

KLONOA EMPIRE OF DREAMS

BY FOUR-EYED DRAGON

Developed and published by Namco

Target release date: August

GET AN EARFUL, literally, with Namco's floppy-eared hero, Klonoa. As in its PlayStation 2 counterpart, you'll perform a lot of jumps, solve challenging puzzles, and ride a hoverboard in more than 35 stages. You can also expect sharp visuals and precise controls as experienced in the playable demo at E³. Klonoa is a platform adventure that promises to bring straightforward gameplay and colorful style right into your hands. **G**

SPYRO: SEASON OF ICE

BY UNCLE DUST

Developed by Digital Eclipse

Published by Universal Interactive Studios

Target release date: November

THE GAME BOY Advance is proving formidable at taking PlayStation series and squishing them into the palm of your hand—and Spyro: Season of Ice is no exception. In this 3D platformer, you'll control the tough little dragon with all of the head-butting and fire-breathing action fans of the series are accustomed to. This latest Spyro adventure will feature 30 levels with a variety of backgrounds—

from tropical islands to lava fields—plus sparkling visuals and easy-to-handle controls. Smaller than ever on the Game Boy Advance, Spyro is living large. **G**

E³ SHOWSTOPPERS

PLAYSTATION PROGNOSIS

BY AIR HENDRIX

THE PLAYSTATION MAY be in its dying days, but not every publisher has abandoned the millions of PlayStation owners as E³ marked the unveiling of several promising PlayStation games. Leading the charge was **Syphon Filter 3**, due out this September (and yup, that means you won't see Syphon Filter on the PS2 until late 2002 or beyond). This two-CD game will follow secret agents Gabe and Lian, who are put on trial in secret by the Senate for their actions in the first two games. As they recount their past missions, you'll play through them, battling with a slew of weapons old and new. The second disc will contain an array of mini-games and multiplayer modes.

In September, **Madden NFL 2002** will mark the series' last season on the PlayStation. Fans can look forward to cool touches like Madden Classic mode, which lets you play Madden '93, and Coach's Corner, where Madden uses his Telestrator to teach football strategy. **Harry Potter & the Sorcerer's Stone** will debut this October, and its E³ demo showcased a promising mix of action and puzzles, including a cool broomstick chase through the Forbidden Forest.

While no details were announced beyond a fall release date, Activision is developing a PlayStation version of **Tony Hawk's Pro Skater 3**. And Capcom is setting up house this fall with **One Piece Mansion**, an intriguing puzzle/strategy game where you'll build and manage a hotel full of unruly tenants.

DREAMS OF DREAMCAST

BY BROTHER BUZZ

THE DREAMCAST'S DAYS are numbered, and a subdued Sega showing at E³ with a limited-access showcase did nothing to dispel that notion. There was also a deafening dearth of third-party Dreamcast games on display; Sega, however, isn't letting the system go down without a fight, and there were some tantalizing first-party previews.

Sonic Adventure 2 (reviewed last issue) was fast, finished, polished, playable, and by far the star of this modest Dreamcast showing.

Other notable titles showed promise for a fall rollout but were not ready for prime-time playing. **Shenmue II** is preparing to continue the saga of Ryo Hazuki in Hong Kong, Kowloon, and Guilin, China. The Shenmue world will be even bigger than before, and welcome improvements will include the ability to mark and map your travels and a feature that helps you avoid repetitive conversations with other characters.

Phantasy Star Online Ver. 2 (working title) will be expanding the size of its online world, and new levels will be added to the current version. Plus, the new Battle Mode will make multiplayer death-matches possible.

Sonic Adventure 2

Phantasy Star Online Ver. 2 (working title)

Phantasy Star Online Ver. 2 (working title)

Shenmue II

Sega Sports is moving full speed ahead. **World Series Baseball 2K2** looked amazing and much-improved now that it's under Visual Concepts' control. **NFL 2K2** featured solid, familiar gameplay with a new interface, and there's a new **NCAA College Football 2K2** game in the works but it had nothing to show at E³. There are high hopes for **Tennis 2K2** and **NHL 2K2** (also now a Visual Concepts project), but both titles were not playable here. Check out this issue's Sports Pages for more on these games.

Sega is definitely retooling for its games-only status, but Dreamcast gamers should still have something to look forward to this year.

FIGHT LIKE AN ANIMAL

BLOODY ROAR 3

From the creators of Bloody Roar® 1 and 2 comes Bloody Roar® 3—the newest in the critically acclaimed fighting series. Unleash the beast within, transforming into your animal life-form mid-fight for the ultimate showdown. Fighting has never looked this good—or been this brutal.

Battle it out as 14 fighters—each with an alternate beast life-form and special combo moves.

Experience brutal single-player and multiplayer action, plus amazing special effects and animations (60 fps).

Tackle 12 gameplay modes in 9 immersive 3-D environments, featuring destructible walls and floors.

FIRST LOOK

Mocap Boxing

BORROWING POLICE 911's motion-sensor technology, Mocap Boxing is a one-on-one dukfest where you step into the ring with worldwide boxing champions. Sure, another one-on-one fighting game is hardly a new concept, but Mocap's implementation is the key as you must work hard—physically—in order to win.

MOCAP FIGHTING MADNESS

Using a first-person view similar to that in such games as Super Punch-Out!!, Mocap's cabinet is "decorated" with sensors so as to track all your movements, which are then translated into on-screen action. Your arms will also get a sturdy workout as you'll literally throw punches with a pair of Special Boxing Gloves, which are attached to the machine by cables that measure the force and speed of each blow, jab, hook, and uppercut.

VIDEO GAME WORKOUT

Gameplay will require the right balance of stamina and precision as you move around the ring and throw punches whenever a targeting circle appears on your opponent. After you've KO'd six opponents three times each, you'll take on the game's final boss for the world championship title. Lazy gamers need not apply—Mocap Boxing could be the next best thing to actually hitting the gym. **G**

Tekken 4

Here's an early look at new fighter Dean Earwicker.

AFTER CONQUERING THE arcades with Tekken Tag Tournament, it was only a matter of time before Namco unleashed its next installment—and Tekken 4 is slated for a late summer release. Very little is known about the game, except that several series vets will return (see sidebar, "Returning Tekken Fighters"), along with one confirmed newcomer, among others. Stay tuned to *GamePro* for more on what's sure to bring fighting fanatics back into the arcades. In the meantime, check out these character renders. **G**

HANDS-ON

Commandos 2

AFTER SOME hands-on time

with Commandos 2, what's amazingly clear is how much Pyro Studios has added to the original game while remaining loyal to the same basic setup. You control four World War II commandos from a real-time-strategy-style overhead view, pointing and clicking where they should go or shoot while sneaking around enemy compounds. But there's so much more you can do now, it's almost like Metal Gear Solid goes to war. Knock on a door, and the Nazi guard will come outside, where you can take him down from behind. Your sapper can detect and defuse mines, then reset them elsewhere. You can control allied troops, though not as completely as you can your team. And you can now go indoors, plus each of the hundreds of buildings are

unique. The only preview level available was Saving Private Smith, in which you save a soldier trapped in a Nazi-held town—and the scenery detail was superb. Other levels will include Pacific islands, a prison camp, and a Japanese aircraft carrier. If you like war games and sneak-and-peak tactics, Commandos 2 should deliver. **G**

Buffy the Vampire Slayer

LAIBACH, AN ANCIENT demon, is seeking to create a bridge between Earth and Hell (would this be a toll bridge?). To succeed, he needs the help of the Master—a 600-year-old vampire who can open dimensional portals. Playing as Buffy Summers, high school student and vampire slayer, you'll have to stop their evil plot. In this third-person action/adventure game, you'll fight zombies, werewolves, demons, and other assorted monsters, using weapons and martial arts. And yes, you can expect to see characters from the TV series as well as some of Buffy's favorite haunts, such as her school and...the shopping mall.

FIRST LOOK

Beam Breakers

BEAM BREAKERS WILL be your chance to drive flying cars in swarming, elevated traffic jams like the ones you saw in *The Fifth Element*. In a future New York City, you're part of a gang and must out-race other gangs to control the streets. Force fields keep the hordes of traffic in elevated lanes, and guide beams prevent uncontrollable crashes, but you'll still be in heaps of danger as you zip in and out of oncoming traffic while avoiding rival gangs and cops. Beam Breakers could be the fresh take on racing the genre needs to keep rolling...er, flying.

FIRST LOOK

LINK MAKES A triumphant return to the Game Boy Color in *The Legend of Zelda: Oracle of Seasons*, giving handheld gamers everything they want—except much innovation.

PROTIP: Do the Subrosian Dance successfully near the Hot Springs and you get the Boomerang.

PROTIP: If you play this game with a Game Boy Advance, it will open up some new options, such as the ability to visit this shop in Horon Village.

Two for the Road

With two new full-length adventures, Nintendo's little left-handed warrior elf should keep busy. In *The Legend of Zelda: Oracle of Seasons*, it's up to Link to save Din, the sorceress who controls the changing of the seasons, from her abductors. To successfully rescue her and return the world to normal, you must find the Rod of Seasons and its four essences. The adventure is classic Zelda fare—as in NES old-school—as you solve the puzzles and defeat the monsters. For some, it will be nostalgic fun, while others may find it a little dated.

I Link, Therefore I Am

The Game Boy Color, however, weathers *Seasons* well. The graphics are bright and colorful, and the tiny characters and simple animation are surprisingly expressive. The GBC never really emits pleasing sounds, but the familiar tones and songs of *Zelda* squeak through the tiny speaker nearly perfectly. The simple control scheme easily gives you access to all the tricks in Link's bag—occasionally, however, you'll tire of flipping through menus.

The story and challenge of this *Zelda* adventure fit right in with the rest of the stellar series, making *Oracle of Seasons* one of the most gripping handheld games you can play on the old Game Boy Color—especially since you can link it up with *Oracle of Ages* for even more adventures. Let's just hope Link's next outing is a little more Advanced.

GRAPHICS	SOUND	CONTROL	FUN FACTOR
4.0	4.5	4.0	4.0

PROTIP: Trade the Cuccodex in town to get the egg. Then head to the Winter Woods, find Maple, and trade the egg with her.

AS THE OTHER half of the *Zelda* Game Boy Color duo, *Oracle of Ages* is an adventure that all fans of this legendary series can enjoy.

The Remembrance of Things Past

The peaceful land of Labrynna is in big trouble, and it's up to Link to save the day. In an attempt to gain control of the entire kingdom, the evil sorceress Veran has taken control of Nayru, the Oracle of Ages. Using a magical harp, Link must travel between the past and present to stop Veran's nefarious agenda.

Oracle of Ages features the standard *Zelda* RPG elements. Throughout your quest, you collect money, find heart containers to build up life, and talk to a surfeit of citizens who give you useful hints. You also have to manage an inventory of items that you collect along the way. But with only two buttons, controlling everything Link can hold and use is sometimes an arduous task, especially in heated situations.

PROTIP: Dig everywhere with the shovel—you'll unearth a bunch of money and hearts.

A Short Parenthesis in a Long Period

Oracle of Ages is reminiscent of the classic NES *Zelda*, both in graphics and sound. From a top-down view, you explore colorful and imaginative lands filled with fanciful creatures that dance in patterned attacks, while the upbeat music score is nicely varied and perfectly sets the tempo of the game.

Considering the lack of quality GBC RPGs, *Oracle of Ages* certainly fills the void. And with the ability to pair up with *Oracle of Seasons*, you'll double your pleasure in Link's newest quest to save his world!

SUGGESTIVE THEMES

BOMBERMAN TOURNAMENT

WITH ITS SIMPLISTIC gameplay, the Bomberman series is in its element on

the Game Boy Advance with Bomberman Tournament. Not only is the multiplayer game as addictive as always, but it also features an RPG-ish one-player adventure to boot.

For the uninitiated, Bomberman's premise is simple: Blow up your opponents before they do the same to you. Aiding your quest of mass destruction are several power-ups, and different combat arenas with conveyor belts and teleporters. However, playing against human opponents is much more fun than taking on the lame A.I. Yet the solo aspect isn't a total dud, as the Quest mode proves to be a lengthy adventure involving puzzle solving, item collecting, and more. Complete with colorful visuals and simple, dead-on controls, this Tournament puts Bomberman right at home. **G**

GRAPHICS	SOUND	CONTROL	FUN FACTOR
4.0	4.0	4.5	4.5

PROTIP: To leave a nasty surprise for your opponents, drop bombs inside pipes, igloos, and other covered structures.

PROTIP: Skull icons can cause Bomberman all kinds of trouble, so destroy them at every opportunity.

IN A RACE to place first in the kart series, Konami has brought out its big-gun mascots to challenge the Mario veterans. But with mediocre gameplay, Konami Krazy Racers makes an unimpressive run.

KONAMI KRAZY RACERS

PROTIP: For a turbo start, accelerate right before the blue head lights up.

You can play as one of eight Konami characters—including Ninja from the Metal Gear series and Castlevania's Dracula—and drive through 16 tracks filled with wacky power-ups and gold coins, which can buy you upgrades and open up hidden courses. Tracks are short, and the extra game modes don't do the game any justice. The only upside is the solid control. As in any scaled down racer, you have to worry only about accelerating, braking, firing a weapon, and timing jumps for better turning. Visually, Konami Krazy Racers shines with a multitude of dazzling colors. Levels, however, are poorly designed, while backgrounds can get bland. The audio is just as awful; silly sound effects, goofy voices, and out-of-tune music can thankfully be turned off. If you are in need of a serious kart racing fix, Konami Krazy Racers is it—mainly because it's the only kart racer out so far. **G**

- 2 players (with link cable)

GRAPHICS	SOUND	CONTROL	FUN FACTOR
3.5	2.5	4.0	3.0

PROTIP: Don't forget to bump opponents off bridges and narrow paths.

PROTIP: At first, learn the tracks by studying the line your competitors take around curves and by recognizing landmarks that indicate curves, such as trees and safety strips.

GT ADVANCE IS a slick racing game that puts the gas to adrenaline-charged competition. And, except for the sounds, this little cartridge is feature rich. You can run 40 cars from eight Japanese auto companies—including Honda, Toyota, Nissan, and more—on 32 tracks. Moreover, you can drive cars you never see outside of Japan, like the Suzuki WagonR and the Honda CAPA. The car graphics are sweet, and the animation zips along. However, finicky lighting will cause the GBA screen to blank out the gameplay visuals. At least the tight controls pull you through the dark; use them to tone down the growling engine noise, too. Despite the dents, GT Advance is a solid early contender in the handheld racing championship—just be sure to drive with the lights on. **G**

GRAPHICS	SOUND	CONTROL	FUN FACTOR
4.0	3.0	4.0	4.0

PROTIP: Try to match your car's handling factors to the layout of the track. For example, short wheel-base cars do well on curvy courses.

ARMY MEN ADVANCE

PROTIP: In Area 41, destroy the towers immediately or alien scum will get you.

PLAYING AS EITHER Sarge or Vikki, your banal mission is to stop the insidious Tan army from using alien technology to take over the (yawn...) world. Army Men: Advance does the basics right—sound effects and control—but is also completely uninventive. You putz around 17 levels of bland interiors and sparse outdoor scenes with your pea-shooter-like weapons collecting keys, maps, and so on, while eliminating enemies. From a top-down view, all the characters look super-deformed, and the gameplay just doesn't go anywhere. You'd have much more fun playing with genuine plastic army men than wasting your time in this virtual ghetto while straining endlessly to obtain just the right light on the god-forsaken Game Boy Advance screen. This is for franchise fanatics only. **G**

Jak and Daxter: The Precursor Legacy

NAUGHTY BY NATURE

Backing Naughty Dog and its Crash Bandicoot series of games was one of the best moves Sony ever made for the PlayStation. Now, since Sony has acquired Naughty Dog, it looks like the Dog's magic just might continue for the PlayStation 2.

Jak and Daxter: The Precursor Legacy will be a massive action/adventure game that will make no bones about following in the footsteps of the Legend of Zelda series, albeit for the PlayStation 2. To out-Zelda the Legend, the game will attempt to strike a balance with exploration, puzzle-solving, and monster-slaying, as two hero-wannabes, Jak and Daxter, seek to save their mystical world from an evil wizard by solving the mystery of an ancient, long-gone race called the Precursors. Of course, their motives aren't entirely altruistic: A mysterious dark power has transformed Daxter into a furry little rodent, and only the secrets of the Precursors can change him back.

As with Crash Bandicoot, Naughty Dog will focus all of its creative energies on Jak and Daxter with no current plans for another game, ostensibly for the life of the PlayStation 2 platform!

HIT THE ROAD, JAK

Jak and Daxter proposes to open up an amazingly large three-dimensional world—the story line will lead the duo to at least three villages. In the E³ preview version, it was readily apparent that you will be able to view landmarks in the distance and then actually play all the way to them. As you would expect, each area of the huge world will have its own environments and atmosphere. Additionally, time will pass with day turning into night.

WWF Raw Is War

BY FOUR-EYED DRAGON

- Developed by Anchor
- Published by THQ
- Target release date: Fall 2001

FIRST LOOK

WHAT'S A BRAND-NEW video game system without a wrestling game? Absolutely nothing, according to millions of WWF fans. That's why Raw Is War is poised to set the standard for wrestling excellence on the Xbox. You'll choose from 30 WWF superstars, including the usual suspects like Stone Cold, The Rock, and Chyna. In true Federation fashion, opponents will be able to grab clothing, and the audience will scatter once the action spills into the stands. You'll even be able to confront your adversary as he struts his stuff on the way to the ring. Plus, you can expect fights to carry on backstage at each venue. Being developed by the same folks who made the refreshing fighter Ultimate Fighting Championship, Raw Is War could be the final champion in today's wrestling video game ring.

Star Wars Obi-Wan

BY UNCLE DUST

- Developed and published by LucasArts
- Target release date: Winter 2001

FIRST LOOK

TAKING A CUE from the most memorable scenes of *Star Wars Episode I: The Phantom Menace*, LucasArts is recreating the intense lightsaber action of that film in *Star Wars Obi-Wan* for the Xbox. Players will wield the lightsaber and the considerable Force powers of the young Padawan title character as he continues to master his skills and be tested by the Jedi council. Besides hacking through legions of droid soldiers, young Jedi will also be able to test their lightsaber dueling skills in multiple one-on-one Jedi challenges throughout the game.

The preview version at E³ didn't have a ton of gameplay to show off, but what was there looked great. The lightsaber dueling arena was impressively lit, and the action was intense. And while tooling around Theed attacking droids, Obi-Wan showed off an extensive lineup of Force powers—throwing the lightsaber was quite cool. The gorgeous graphics and kinetic Jedi prowess of *Star Wars Obi-Wan* could lend some much needed Force to the Xbox.

James Bond 007 In Agent Under Fire

BY AIR HENDRIX

- Developed and published by EA Games
- Target release date: Fourth Quarter 2001

PLAYSTATION 2

FIRST LOOK

APPARENTLY, THE WORLD wasn't enough because the game formerly known as *The World Is Not Enough* has been retooled into *James Bond 007 in Agent Under Fire*. Since a stale movie license wasn't the game's best feature, this move should be good news for Bond fans as EA's game will now tell an original story that pits 007 against Malprave, the head of a terrorist group that's using an army of clones to threaten world peace.

The first-person combat will be paired with some driving levels—in fact, the PlayStation 2 version of *007 Racing* has been folded into *Agent Under Fire* to handle the racing/car combat levels. An early preview of one level sported rich environments and a clean, fluid frame rate as Bond blasted through throngs of enemies. The game's combat levels will also have alternate stealth pathways, so if you tire of playing Rambo, you can crawl through ventilation shafts and otherwise sneak about. On the multiplayer front, *Agent Under Fire* will feature four-player split-screen deathmatches. All told, EA's unveiling of this new direction for its Bond games looked promising. If development stays on track, *James Bond 007 in Agent Under Fire* could be one of this holiday season's top guns. **G**

Dynasty Warriors 3

BY UNCLE DUST

- Developed and published by Koei
- Target release date: December

PLAYSTATION 2

FIRST LOOK

DYNASTY WARRIORS 3, Koei's action-packed sequel to its PlayStation 2 adventure game, will double your martial arts pleasure by delivering the one thing that was missing from *Dynasty Warriors 2*—two-player simultaneous combat in cooperative or competitive action. Two gamers will be able to choose from the huge array of legendary Chinese warriors to take on the many enemies. In addition, *Dynasty Warriors 3* will have twice as many levels as the previous game and will

showcase awesome new battle features, including elephants that you can ride.

Graphical upgrades from *DW2* will enable more characters to be on screen at once and each warrior to have even more animations of their deadly attacks. The surprising success of *DW2* last fall was fueled by the addictive combination of hack-n-slash martial arts combat with strategic maneuvers. You should draw your sword and be ready to defend the new Dynasty this December. **G**

AirForce Delta Storm

BY JAKE THE SNAKE

- Developed and published by Konami
- Target release date: November

FIRST LOOK

FLIGHT SIMS HAVE never been as popular on consoles as they were on the PC, in part because consoles couldn't handle the graphic detail needed by the genre. But the Xbox is all about graphic detail, and, judging from these screenshots, AirForce Delta Storm could be as good-looking as any PC flight sim ever was. You'll fly a whopping 50 aircraft, from the latest real-life military models—such as the A-10 Warthog, F-16 Falcon, and F-18 Hornet—to experimental prototypes not yet in production. If this game is anything like AirForce Delta for the Dreamcast, wannabe jet jockeys will have some fast-paced, jump-in-n-shoot action this November.

Unreal Championship

BY AIR HENDRIX

- Developed by Digital Eclipse
- Published by Infogrames
- Target release date: 2002

FIRST LOOK

UNREAL'S FRAGFESTS CAN be waged on almost every platform, but Unreal Championship is being built from the ground up for the Xbox, and it won't launch until the Xbox goes online sometime in 2002. Like Unreal Tournament, Unreal Championship will be a multiplayer deathmatch, but it's upping the ante with new touches like usable vehicles, linkable weapons, combos, and more. You'll move seamlessly between indoor and outdoor environments, and the E³ demo sported dazzling graphics—especially the lighting and smoke effects. It will be a while before you can play Unreal Championship, but it already looks worth the wait.

It will be a while before you can play Unreal Championship, but it already looks worth the wait.

Spy Hunter

BY FOUR-EYED DRAGON

- Developed and published by Midway Home Entertainment
- Target release date: Fall 2001

UPDATE

THE CLASSIC '80s action-racing game is coming back! Featuring an all-new three-dimensional scheme, Spy Hunter promises to bring back the glory days of straight-forward futuristic vehicular combat, with 14 missions, an armory of slick weaponry, and a slew of auto features. Spy Hunter's new vehicle will be able to transform into a car, boat, jet ski, or motorcycle, and will be jam-packed with lasers and cluster mines. Rid the spies of the world this fall.

Mobile Suit Gundam: Journey to Jaburo

FANS OF THE legendary space saga Gundam will be itching to immerse themselves in Mobile Suit Gundam: Journey to Jaburo, a third-person action/adventure game that will enable you to pilot up to 20 Federation and Zeon mobile suits. You'll turn cities into war zones by pitting your fission-powered mech against newtype Zakus in one-on-one combat or team-coordinated seek-n-destroy missions. While the controls tended to be a little frustrating in the preview version, the accurately rendered mobile suit designs and environments were rife with depth and detail. The One Year War will rage on this summer. **G**

FIRST LOOK

Half-Life

THE CLASSIC PC game is coming to the PlayStation 2, and a playable demo at E3 showed character models and even environmental textures that looked better than those in the original. The frame rate still needed some improvement, but moving and aiming with the PS2 controller worked fine (though mouse and keyboard will be supported). A target lock-on feature kept players facing a particular enemy until it was dead, but could be toggled on and off. Besides split-screen skirmish mode (you'll play against bots in single-player mode), the PlayStation 2 incarnation will feature some new weapons, including the M4 carbine and Spas auto-shotgun. 

Developed by Gearbox/Valve LLC
Published by Sierra
Target release date: Fall 2001

FIRST LOOK

Top Gun—Combat Zones

BASED ON THE legendary movie of the same name, Top Gun will roar onto the PlayStation 2 with heart-pounding aerial combat. You'll fly as one of

the movie's characters—like Maverick, Jester, and Iceman—in four combat zones, including South East Asia and the Gulf.

You'll also need to master the Navy's top flyers: F-14 Tomcat, F-18 Hornet, and F-22 Raptor. It's time to take to the skies once more with everyone's favorite flyboy.

Disney's Tarzan

Disney's
TARZAN

IF YOU SHUDDER in horror at the thought of another lousy movie-license game, the impressive graphics of Disney's Tarzan might just stop you in your tracks...plus, the game's story acts as a sequel to Disney's popular flick. The E3 demo's lush visuals drew crowds to the Ubi Soft booth, while the gameplay mixed platform hopping with extreme sports—such as bungee jumping and surfing—over 15 levels. Find out in November if this Tarzan can rule the jungle.

FIRST LOOK

Pilot Academy

IN THIS BROADLY focused flight simulation, you'll do everything from fly a fighter jet against enemy planes to land a monstrous Boeing 747 with one engine out. You'll choose the path of either a commercial or military pilot, then be taught by personal instructors to fly 24 propeller and jet aircraft—including the A-10 Warthog, C-130, F-14 Tomcat, Concorde, and F-15 Eagle. The maps will be huge—400 square miles—and the action promises to be somewhere between Ace Combat and Flight Simulator.

- Target release date: Fall 2001

FIRST LOOK

ANYWHERE FALL

THE BIGGEST BAD-ASS in the ring is going to get even badder as THQ pumps up WWF SmackDown: Just Bring It for the PlayStation 2. This latest version of the top-selling franchise will include the most realistic graphics yet, with 30 WWF wrestlers in over 60 different match types. But the biggest addition will be the commentary by Michael Cole and Tazz, which will end the silent days of the SmackDown franchise. So players should prepare themselves to put up, shut up, and Just Bring It! **G**

Kinetica

BY FOUR-EYED DRAGON

- Developed and published by Sony
- Target release date: November

FIRST LOOK

IN THIS FUTURISTIC racer, humans have engineered Kinetic Skins, advanced exoskeletons that have been fused with humans and which enable racers to gain excessive speed and incredible agility. You'll go ballistic on high-G vertical climbs and perform insane stunts on 12 death-defying tracks set in six different environments. Additionally, the

game's courses will have multiple line corners and alternative cross-over pathways. You'll be able to harness the action when Kinetica for the PlayStation 2 speeds your way this November. **G**

Splashdown

BY AIR HENDRIX

- Developed by Rainbow Studios
- Published by Infogrames
- Target release date: Third Quarter 2001

FIRST LOOK

THE DEVELOPERS OF ATV Offroad Fury are turning their racing talents toward the surf with Splashdown, the latest jet-ski racing game. Gamers will saddle up in Sea-Doo watercraft for competition on 18 courses in locales ranging from Hawaii to Venice to France. Along with a Career mode, the game will offer two-player split-screen action, and Rainbow is promising loads of wild tricks and wipeouts. Wave Race is still the only game to treat jet skis right, so hopefully Splashdown can set the standard on the PlayStation 2. **G**

The ESRB Ratings Guide

The interactive electronic entertainment industry utilizes a voluntary rating system developed by an independent organization—the Entertainment Software Rating Board (ESRB)—so consumers know what to expect before buying a video or PC game. The following is a quick key to the most common ratings; for a complete description, check out the ESRB's Web site at www.esrb.org or call 800/771-3772 for more information.

Titles rated **Early Childhood (EC)** have content suitable for children ages three and older and do not contain any material that parents would find inappropriate.

Titles rated **Everyone (E)** have content suitable for persons ages six and older. These titles will appeal to people of many ages and tastes. They may contain minimal violence, comic mischief, or crude language.

Games rated **Teen (T)** are suitable for ages 13 and up. These games could have violent content, strong language, and/or suggestive themes.

Games rated **Mature (M)** are appropriate for older gamers, generally 17 and up. Mature-rated games may contain more intense depictions of violence, stronger language, and, on rare occasions, sexual themes.

Titles rated **Adults Only (AO)** have content suitable only for adults. These products may include graphic depictions of sex and/or violence. Adults Only products are not intended to be sold or rented to persons under the age of 18.

The **Rating Pending (RP)** icon may appear in early reviews of soon-to-be-released products. Look for the actual ESRB rating icon on the game's package, check the ESRB's Web site or call its toll-free phone number for updated rating information.

Conker's Bad Fur Day

By Nintendo

Conker more than deserves its Mature rating. You name a vice, Conker has it in spades—scatological humor, binge drinking, gratuitous chunky violence, overt sexuality—all committed by happy, fluffy forest animals. Like *South Park*, this game is meant for only very mature young adults.

Quake III Arena

By Sega

Scary monsters abound in this conversion of the PC hit. Rocket launchers and plasma rifles are used to shoot other players. The in-your-face, hunt-and-kill gameplay can be intense, and, though the action takes place in a sci-fi realm, the game will be unsettling to young gamers.

Quake III Revolution

By Electronic Arts

As in *Quake III Arena*, scary monsters abound in this PC conversion. You use rocket launchers, nailguns, and plasma rifles—among other weapons—to shoot other players. And again, the hunt-and-kill gameplay can be very intense, and, although the action takes place in a sci-fi realm, the game is dark and violent, and may be unsettling to younger gamers.

Twisted Metal: Black

By Sony

While the previous *Twisted Metal* car/combat games have been rated Teen for their slapstick/action-movie style chaos, the series' PS2 debut goes much further into dark territory. In addition to some gruesome, nightmare-worthy characters, cinematics, and imagery, TMB features pedestrians whom players can run over. Definitely preview this one first.

Unreal Tournament

By Infogrames

As with any game involving a lot of gunplay, *Unreal Tournament* features some visceral visuals—a noticeable amount of blood, some gory decapitated-head shots, and fallen competitors collapsing in a heap. Some mild expletives pepper the soundtrack, too, as your robotic enemies talk trash.

Alone in the Dark: The New Nightmare

By Infogrames

Alone in the Dark is a survival/horror game with mild violence mostly limited to fighting supernatural monsters, rather than humans. The violence isn't particularly graphic, with no gushing blood—but red pixels representing blood do appear. The Teen rating is more for the scary atmosphere and theme.

Bloody Roar 3

By Activision

Because it's another entry in the fighting-game genre, *Bloody Roar 3* comes with plenty of in-close, brutal combat with occasional blood appearing following a particular kind of throw or other attack. Some of the *Bloody Roar 3*'s female characters may also raise an eyebrow or two as they're often clad in skimpy, somewhat revealing outfits.

Confidential Mission

By Sega

The violence isn't bloody, but in *Confidential Mission*, the objective is to neutralize people with a gun who are out to get you. The game is filled with animated lifelike violence and realistic weapons. It also awards you for doing special attacks, which may not be an appropriate feature for a younger audience.

Crazy Taxi 2
By Sega

Crazy Taxi 2 breaks every traffic law in the book, as players race through a fictional NYC. While no innocent bystanders are hurt, much property damage occurs. Yet all the action is presented in a cartoonish arcade format—not realistically.

Dark Cloud
By Sony

This new role-playing game from Sony is visually reminiscent of Nintendo's Legend of Zelda series, but Dark Cloud carries with it a darker tone and story line. Parents will find nothing offensive for younger players in Dark Cloud, just some cartoony violence and more mature character relationships.

Escape From Monkey Island
By LucasArts

The game's minimal violence is cartoonish slapstick of the Looney Tunes kind, so the Teen rating is due to the clever (and mostly harmless) dialogue that contains mild, sexually suggestive jokes and occult references. Plus, Escape From Monkey Island has in it an alcoholic beverage called "grog"—the pirate community's beverage of choice.

MDK 2 Armageddon
By Interplay

The game's Teen rating is due to its cartoonish carnage and violence. About the worst you'll encounter in MDK2 Armageddon is a six-legged dog with four Uzis taking out hordes of aliens who explode into green blood and chunks of exoskeleton. Also, every now and then, the game's bizarre humor tends toward bathroom humor.

Outtrigger
By Sega

Outtrigger is a cartoonish first-person shooter that involves plenty of killing, but of the sterile, bloodless variety. Your objective is to kill humans with a variety of weapons, but the killing is never graphic. Characters are surrounded by large geometric shapes, so it feels more like you're fighting triangles than people.

Rainbow Six: Rogue Spear
By Red Storm & Majesco

This game puts you in the combat boots of a topnotch S.W.A.T. team tasked with rescuing hostages, stopping terrorists, and more. Rainbow Six: Rogues Spear's violence isn't over the top, but it is realistic enough and, given the genre of the game, prevalent throughout its missions.

Note: Some box art does not display final ESRB ratings.

GAMEPRO EXPLAINED

Our Rating System

GamePro evaluates every game in four categories: Graphics, Sound, Control, and Fun Factor. Ratings range from 5.0 (the ultimate) to 0.5 (the worst) in half-point increments. Games with a Fun Factor of 3.0 are average; those with a Fun Factor of 4.0 or higher are recommended.

- Graphics:** Judges the overall artistic quality of the animation, cinematics, and scenery.
- Sound:** Critiques the music and sound effects.
- Control:** Rates how the interface and control-pad commands affect the action and fun.
- Fun Factor:** Are you going to have a good time playing this game?

GamePro.com Connection

Whenever you see this symbol within an article, that means you can go to gamepro.com to find late-breaking information on the subject of that article—from additional game coverage, special strategies and codes, to... who knows?! Check out gamepro.com!

WHERE TO FIND THE ESRB RATING

GamePro understands that parents care about the content of the video games their children play. That's why every review printed in our magazine and posted on our Web site lists the ESRB rating. Below, we've circled this rating in a sample review box to help readers locate it throughout GamePro.

Note: Previews do not carry an ESRB rating as games are often not rated until they're ready for review and purchase.

twisted metal: BLACK

PROTIP: Get used to making 180-degree turns with the \times button. A quick turnaround is essential for the inevitable jousting matches.

PROTIP: Homing missiles are preceded by a progressively louder whine. If you hear one, run for cover.

PROTIP: You'll do more damage if you nail enemies with the Ricochet after banking it off a wall.

PROTIP: Homing missiles are the best weapons—fire and forget.

WELCOME BACK TO the Twisted temple, o' ye faithful! After a long, discouraging drought in the genre, Twisted Metal: Black is the game that will make you believe in automotive mayhem once more.

Playing for Creeps

Tournament coordinator Calypso returns, the man with the disturbing power to grant people their evil heart's desire. Naturally, he chooses contestants for his demolition derby who are equally disturbing: a man whose eyes have been torn out, a girl trapped in a porcelain mask, a preacher hell-bent on salvation, and other unhinged recruits from Blackfield Asylum. Because vows of revenge are on the line, you can be sure they're all dead serious about winning.

Dark City

As you progress through the single-player campaign, you may choose your battlefield. Those levels—including a freeway, a junkyard, a drive-in, and a prison ship—start out large and some get larger. They're also wonderfully interactive. From the giant Ferris wheel that crushes suburban houses to the airplane that you can make crash in the junkyard, pretty much everything can be destroyed or at least damaged. Traffic patterns of commuters liven things up, while special areas like the dirt track on the freeway level show how much purely-for-atmosphere stuff a PS2 game can contain.

And yes, that atmosphere does get nasty, especially when players start mowing down pedestrians. Drivers will try to flee their burning wrecks even while they're on fire. On the Freeway level, you can drive into the hospital and run over staffers (wisely, the patients in wheelchairs from the previews have been removed). Almost everything you've heard about the game's dark vibe is true.

Speed Demons

Here's the paradox: Graphically, Twisted Metal: Black simply looks bitchin'. Vibrant explosions and showers of white sparks fill the screen with every missile impact or car contact. Incog Inc. has worked wonders with the particle effects. Dust, smoke, fire, and weather conditions look stunning. The environments are incredibly detailed, from the pedestrians running for their lives to interactive elements like helicopters and machinery.

Best of all, there's never a hint of slowdown—this game is wind-in-your-hair, butane-in-your-veins fast. Cars turn on a dime, powerslide through intersections, and fly through the streets so freakin' quickly, you'll be rushing to keep up. The only time the sense of speed slacks off is in four-player mode, but it's not too bad.

PROTIP: Keep an eye out for health meters that have dipped into the red, then finish them first.

The cool rear-view split-screen mode can be toggled at will—and it's great for watching your back.

PROTIP: Focus on one target at a time. It's easy to go after anybody that drives in front of you, but you'll find it's harder to stay alive that way.

PROTIP: If your car starts to show damage, find a repair station or health power-up. You'll take more damage soon, so the quicker you heal, the better.

Unlock Yellowjacket

Unlocking the secret taxi, Yellowjacket, requires luck and timing. On the Junkyard stage, a commercial airliner circles. You can shoot it with Fire or Homing missiles as long as you're on a raised platform and not locked on another target.

When you see the tail catch fire, you've got it. Next time the plane passes the dirt cliff, it will crash spectacularly into the side of the building—and it's not over yet!

The plane crash creates a tunnel deep into the bowels of the building that leads to a crumbled column and a small control panel. Blow up the panel, and Yellowjacket will descend. You'll now be able to drive the taxi from the original Twisted Metal in both single and multiplayer modes.

PROTIP: In four-player matches, using the radar is crucial. Keep your eye on the upper-left corner of the HUD to see who's where.

When Cars Collide

The in-game music is what you'd hear in a dark action movie: tense, creepy, with lots of staccato punctuation and some gothic chanting. The main theme isn't far off from Nine Inch Nails. Controls respond well, though it takes practice and concentration to simultaneously steer, shoot, execute fighting-game-style secret attacks, and flee for your life. Another nice perk: If you spring for Logitech's GT Force wheel (see this issue's ProNews for a review), TMB supports that, too.

Suspicious Minds

If the game has one drawback, it's that the A.I. is too smart. Computer cars occasionally damage each other, but more often they hunt you—and only you. What little good single health power-ups do is easily counteracted by a single enemy missile. Yes, the odds are supposed to be against you for a sweeter victory, but not this much. Even expert players will be pounding the virtual dashboard in frustration on anything but the Easy setting. Then again, awesome four-player split-screen matches may make you care less about A.I. woes.

Black Magic

It may not always play fair, but TMB's challenge is worth your time. If you've lost your taste for Twisted Metal, this is the game that will bring back your appetite. Twisted Metal: Black is car combat action at its best. **G**

BY DAN ELEKTRO

- Developed by Incog Inc. Entertainment

- Car combat
- 4 players

GRAPHICS	SOUND	CONTROL	FUN FACTOR
5.0	5.0	4.5	4.5

PROTIP: When battling Minion, keep away. Use long-range attacks (Power missiles) and grab health power-ups as you circle the arena.

Grisly details include flaming drivers fleeing from exploded vehicles (one more reason for the game's M rating).

GRAPHICS 5.0

Wondering why you bought a PS2? Peep these explosions, car models, and incredibly interactive environments. The world is dark, but the action within looks incredibly bright. So does Twisted Metal's future as a franchise.

SOUND 5.0

It's the total package: A little NIN-inspired industrial music, a bit of horror movie orchestral stuff, and some good ol' standbys, like booming explosions and human screams of terror.

CONTROL 4.5

There's a lot to juggle in these complex controls, but they respond well and you can choose from logical configurations. If you want to get behind Logitech's USB wheel, TMB supports that, too. Cars are a tad squirrely, though.

FUN FACTOR 4.5

The prodigal psycho returns with Twisted Metal's darkest—and arguably most impressive—chapter yet. Incredible speed, varied multiplayer modes, and challenging A.I. put Twisted Metal: Black on top of the heap.

KLONOA 2

Lunatea's Veil

BY FOUR-EYED DRAGON

- Developed and published by Namco
- \$49.99
- Available July
- Platform/adventure
- 1 player

EVERYONE E	GRAPHICS	SOUND	CONTROL	FUN FACTOR
	5.0	3.0	5.0	5.0

AFTER A THREE-YEAR hiatus, Namco has resurrected its floppy-eared hero for a fabulous quest filled with amazing sights and unbelievable gameplay variety.

I'm All Ears

Klonoa 2's story is straightforward: You guide the long-eared hero through 24 stages as you solve the mysteries of a forgotten kingdom that threaten the Lunatea realm. At its core, Klonoa is a linear platform/adventure game where you hop onto many platforms, avoid deadly creatures, and solve mini-puzzles—all on one designated path. The depth of Klonoa, however, is still surprisingly varied. You can sometimes glide on a hoverboard, the humongous bosses each use unique attacks—and you can use enemies to clear obstacles and solve puzzles, which creates an even more challenging game.

PROTIP: Time your jump to blast this huge mech in its soft spot—its belly.

PROTIP: When on this aircraft, be sure to throw this creature in front of you to destroy the obstacle ahead.

You'll marvel at Klonoa 2's awesome graphics.

Where Klonoa 2 really excels is in its visual brilliance. Taking note of its PlayStation predecessor, this adventure literally blinds you with spectacular colors in imaginative and picturesque worlds. Amazing backdrops surge up at every turn, while enemies show off eye-popping effects. To further enhance this graphical splendor, the automatic camera-angle rotates smoothly for breathtaking views.

It's an Earful

Typical of standard platformers, Klonoa 2 offers a simple control scheme. You have to manage only the direction you want to go and two buttons, one for jumping and one for attacking. It may sound easy, but you'll need to master precise jumps while you're attacking, especially in later levels.

Sadly, with all of its slick features, Klonoa 2 falters with its audio. Horrible voices sound like leftovers from a sub-par anime flick, high pitched, annoying garble that, unfortunately, can't be turned off. The decent music, however, goes well with the game's ambiance and quirky theme.

Klonoa Borealis

Klonoa 2 is a perfect example of how to make a superb game by skillfully combining old-gameplay style with the power of the PS2's graphics engine. No other platform/adventure has even come close to the excellent ride Klonoa 2 offers. Don't miss out!

PROTIP: Look out for eggs that can be cracked open only by throwing things at it. Look for the shadow of invisible eggs, too.

PROTIP: Those explosive creatures are there for a reason. Explode one right beside the crystal key so you can pass through the huge blocks.

PROTIP: When up against the last boss, punch the spinning orb to make it stop, then grab the back end and use it as a weapon.

PROTIP: Remember that you can slow down on your hoverboard by pulling back. That way, you can turn more easily and avoid obstacles.

GRAPHICS 5.0

Watching Klonoa 2 is as close as you'll ever get to riding a never-ending rainbow; amazing colors flow, vividly detailed backgrounds scream with radiance, and sharply animated characters move fluidly.

SOUND 3.0

Put the audio on mute when the characters speak, or you'll just be annoyed. The music, however, is fitting for Klonoa's fantastic, cartoony world.

CONTROL 5.0

Nothing to it—two buttons for attacking and jumping, plus the direction you want to go is all you need to know. It will take practice, though, to master the techniques necessary to conquer later levels.

FUN FACTOR 5.0

Klonoa 2 is a prime lesson in simple yet addictive gameplay with awe-inspiring visuals—a blend that no gamer should miss. Plus, this adventure is suited for all ages!

GAME BOY ADVANCE

WHEN BLOODY ROAR first arrived on the PlayStation in 1998, it became a sleeper hit because of its user-friendly controls and its odd lineup of fighters who transform into animal, insect, or reptile alter-egos. Unfortunately, the latest installment in the series, Bloody Roar 3, offers few updates to that formula aside from improved graphics and some new fighters.

BLOODY ROAR 3

BY MAJOR MIKE

- Developed by Hudson Soft
- Published by Activision
- \$49.99
- Available June
- Fighting
- 2 players

TEEN	GRAPHICS	SOUND	CONTROL	FUN FACTOR
T	4.5	4.0	4.5	4.0

What's That Leopard Wearing?

Roar 3's 12-brawler lineup runs the gamut of genre stereotypes, from voluptuous ladies to lumbering hulks. The responsive and intuitive controls make the game exciting to play, and, while the characters hardly lack diversity, their lack of balance makes for matches either quick and one-sided, or overly long and evenly matched. Effective graphics provide sharp details for the fighters, and the battles never suffer from slowdown even when the screen is packed with special effects, blood, and other flashy visuals. A solid soundtrack fares as well—especially intelligible snippets of dialogue.

PROTIP: Bloody Roar 3 is loaded with hidden goodies: For example, to access the Sumo game, get a high score in Survival mode.

PROTIP: When playing as Shina, give your opponent a nasty surprise when your Beast meter is full: Motion ↓ ↘ →, and then press Beast.

Bloody Roar 3 has 12 playable characters, but you can unlock additional ones, too.

PROTIP: If you're caught in a corner trap and have enough energy, transform into a beast to knock away your attacker.

Roar 3's diverse 3D fighting engine will keep fans of the genre enthralled. The game's pairing of Tekken-ish button-tap combos and splashy Street Fighter-esque super moves strikes an addictive equilibrium. Although these facets make Roar 3 fun to play, it's disappointing that more innovations weren't added to the third installment.

"This One's for You!"

The PS2 has been barren of "A" fighting games since launch, and while Bloody Roar 3 is a refreshing change of pace, it doesn't offer anything that wasn't featured in its first two incarnations. Newcomers will be pleased, but for rabid fans, this is a mute Roar.

LAST YEAR'S ESCAPE FROM MONKEY ISLAND for the PC was a perfect example of one of LucasArts' specialties: old-school, story-driven graphical adventures done right. And this PlayStation 2 version is a scene-for-scene, joke-for-joke port of that modern classic.

PROTIP: Save Marley Mansion! Make a slingshot out of the popped inner-tube, distract the catapult operator with bar snacks, then fiddle with the controls while he's not looking.

PROTIP: Remember the exact order of what you give, say, and do when you meet yourself in the marsh. You have to repeat it all later to prevent a time paradox.

Planet of the Old-School Apes

In this fourth Monkey Island adventure, you again take the role of Guybrush Threepwood, mighty pirate. Upon returning home to Melee Island™

ESCAPE FROM MONKEY ISLAND

after your honeymoon, you're immediately swept up in an island-hopping, puzzle-laden quest to save your home, find the enigmatic Ultimate Insult, and put an end to the crass commercialization of the pirate lifestyle.

The Marginalized Marketing of Melee Island™

Everything that made EFMI so great on the PC arrives on the PS2 intact. The game's many puzzles are perfectly balanced—head-scratchers but completely logical in their own Monkey Island sort of way; and the game invites creative experimentation because you can't die or make a mistake. The cartoony graphics won't win any technical awards yet they're totally appropriate for the game's goofy atmosphere. The music is great, too, while the hilarious voice-acting is so awesome that other PS2 games should actually be embarrassed. The console-oriented interface seems a little

PROTIP: A blend of flowers, wood chips, swamp water, rotting fish, and H2O will trick the blind shopkeeper into thinking you're someone else.

GRAPHICS	SOUND	CONTROL	FUN FACTOR
4.5	4.0	4.5	4.5

WITH AN UPDATED hero and some of the eeriest scenery in any game, the original (pre-Resident Evil) survival/horror series returns to once again scare the tar out of you.

VICTORIAN ERA GOES VERSACE

Paranormal investigator Edward Carnby is back, but the hero and his series have been warped to the present. A newly hip Carnby sports long hair and modern clothes rather than bifocals and tweed. No matter—the New Nightmare repeats what was great about the original game: exploring a house so creepy that Dracula himself wouldn't dare step inside.

You find a key in the plinth of the statue

PRO TIP: Use the wolf mask with the owl statue to find a key.

PRO TIP: Move this statue in front of the mirror to find its secret code.

PRO TIP: Fill the flask with water and use it with the model ship case to obtain a key.

ALONE IN THE DARK

THE NEW NIGHTMARE

PRO TIP: Keep your weapons fully loaded at all times. When you run out of ammo, it's quicker in game time to use the inventory screen (tap Δ) to reload.

PRO TIP: Use the crowbar at this spot in the attic to open a trapdoor.

A murder leads Carnby to Shadow Island, a dark place made even darker by the supernatural dabblings of the local gentry (the island's resident evil). Exploring a vast Victorian estate, you discover loads of evidence pointing to foul deeds, plus hellish monsters you must dispatch with such weapons as a triple-barrel shotgun, grenade launcher, and plasma cannon.

PRESIDENT EVIL

You play as either Carnby or Aline Cedrac, a scholar of ethnology and one tough babe. Each follows different but overlapping paths through the two-disc game. Much of your time is spent collecting keys or other puzzle-solving clues, which are nicely woven into the story. The controls are standard survival/horror fare, and enable easy movement and combat.

The pace is slower than that of Resident Evil, however, and the monsters are not as prevalent—but that makes it all the scarier when a demon finally pops up. Ominous music and constant thunder keeps you edgy, but nothing is as creepy as the surroundings. The prerendered scenery would be stunningly beautiful if it wasn't so darn creepy—it's some of the best scenery on the PlayStation. If you're a Resident Evil fan with no monsters left to kill, don't be lonesome—get Alone in the Dark: The New Nightmare.

Dave Mirra freestyle BMX

MAXIMUM REMIX

PRO TIP: On the high school level, you need to Fastplant the sign high above the ramp—not the lower sign.

ESSENTIALLY A FULLY priced add-on pack, Maximum Remix (a.k.a. Dave Mirra Mark II) gives fans of the first Dave Mirra more to be stoked about—eight new areas, more riders, more tricks, a new soundtrack—plus the entire original game.

The new courses—which include a high school, a carnival, and the Jiffy Market—are cool, but they're marred by jarring texture pop-up and occasional slowdown. The riders and bikes move pretty well, but are blocky and look like rag dolls when they spill. The game's sounds are dominated by the music, which is mostly hard-core punk—perfect for some, but annoying to others.

Tricks are chosen with logical button combinations and are easy to pull off, though the controls seem to waver between too stiff and too sensitive. Even though a better BMX game—Mat Hoffman's Pro BMX—has been released since the first Dave Mirra, the core gameplay of Mirra hasn't been much improved, just expanded. So only huge fans of the original and diehard BMX gamers will want this title.

OUTTRIGGER™

International Counter Terrorism Special Force

BATTLE ONLINE - IN TEAMS OR ON YOUR OWN!

FRANTIC SPLIT-SCREEN COMBAT IN A WIDE VARIETY OF LOCALES

CUSTOMIZE YOUR CHARACTER WITH INSANE FIREPOWER AND TACKLE OVER 40 MISSIONS

Sega is registered in the U.S. Patent and Trademark Office. Sega, Dreamcast, the Dreamcast logo, and Outtrigger are registered trademarks of Sega Corporation. Sega CORPORATION, 1991, 1992, 2000. Presented by AM2 of CRT. All Rights Reserved.

CRAZY TAXI 2

CRAZY TAXI RETURNS to the Dreamcast for another drive of passenger-based racing, this time in a brand-new city. While Crazy Taxi 2 retains most of the fun elements from the first ride, its new features, along with uninteresting landscapes in which to work, make the sequel stall.

TAXI DRIVER

Playing as one of four cabbies, you pick up passengers and deliver them to various destinations throughout a fictional New York City. Racing against the clock, you earn big rewards for speedy passenger deliveries, and net extra bucks for performing various outlandish stunts. One of the best things about the original Taxi ride was its simplicity, as you could bust out a wide variety of tricks and maneuvers by shifting between the drive and reverse gears. However, CT2 adds an awkward "hop" maneuver that's frustrating to master and permanently anchored on the Y button—but you have to use it to rack up high earnings and successfully pass the Crazy Pyramid mini-games.

Other strengths of the first game have also been diminished—especially the awesome cities in which to do business. Here, the mean streets don't offer as much challenge and become tiresome after a few drive-throughs. Even the new "carpool" feature, which has you collecting several passengers to deliver at different locations, needs tuning, as it wreaks havoc with the guiding arrow at the top of the screen by making it try to point in several directions at once.

"I'LL DO BETTER NEXT TIME"

Although the new play mechanics leave something to be desired, the video/audio package is in working order. Cities are loaded with color and the speedy frame rate never falters, even when the screen is busy. The sound rocks, too, with unique character-voices and other relevant effects, although the driving music seems to consist of the same two songs droning on mercilessly. The controls are the game's most defective standard option in that its lack of a custom configuration makes executing the various tricks, stunts, and jumps a finger-taxing nightmare. It's enough to make you want to re-wire the controller manually.

BUM RIDE?

CT2 had some lofty expectations to meet, but its new innovations and features aren't worth the sticker price. The game is hardly a lemon, it just can't quite make it off the test-drive rental lot. **C**

GRAPHICS SOUND CONTROL FUN FACTOR

PRO TIP: When you approach a fare's destination that's up against a wall, skid and face toward the open road when you stop to earn a few last-minute dollars.

What could be worse than driving around a quartet of chatty backseat drivers? Getting accustomed to Crazy Taxi 2's control scheme.

PRO TIP: When you pick up a fare, execute a jump in order to rack up easy extra bucks.

Crazy Taxi 2 lives up to its name with some seriously goofy hidden vehicles.

PRO TIP: Fares are waiting everywhere in Crazy Taxi 2—even under water.

PRO TIP: In 5-2 Crazy Golf Rule in the Crazy Pyramid, back up on the green and stop when you reach the shadow, then hit the gas to clock the ball for maximum distance.

CRAZY PYRAMID

CABBIE HOT-D & STROLLER 1-1 CRAZY TOUR RULE

1-1 Race around the city within the time limit!

ADVICE Start button

RECORDS	TIME
1	5'30"00
2	5'45"00
3	6'00"00
4
5

EXIT Use the D-pad to select. Press the A button to accept.

PRO TIP: Each row of successfully completed tasks in the Crazy Pyramid yields a bonus item, including city maps and extra vehicles.

GRAPHICS 4.5

The visuals speed by at an unflinching pace, and the two cities are replete with color and atmosphere. The only drawback is occasional blocky polygons.

SOUND 4.0

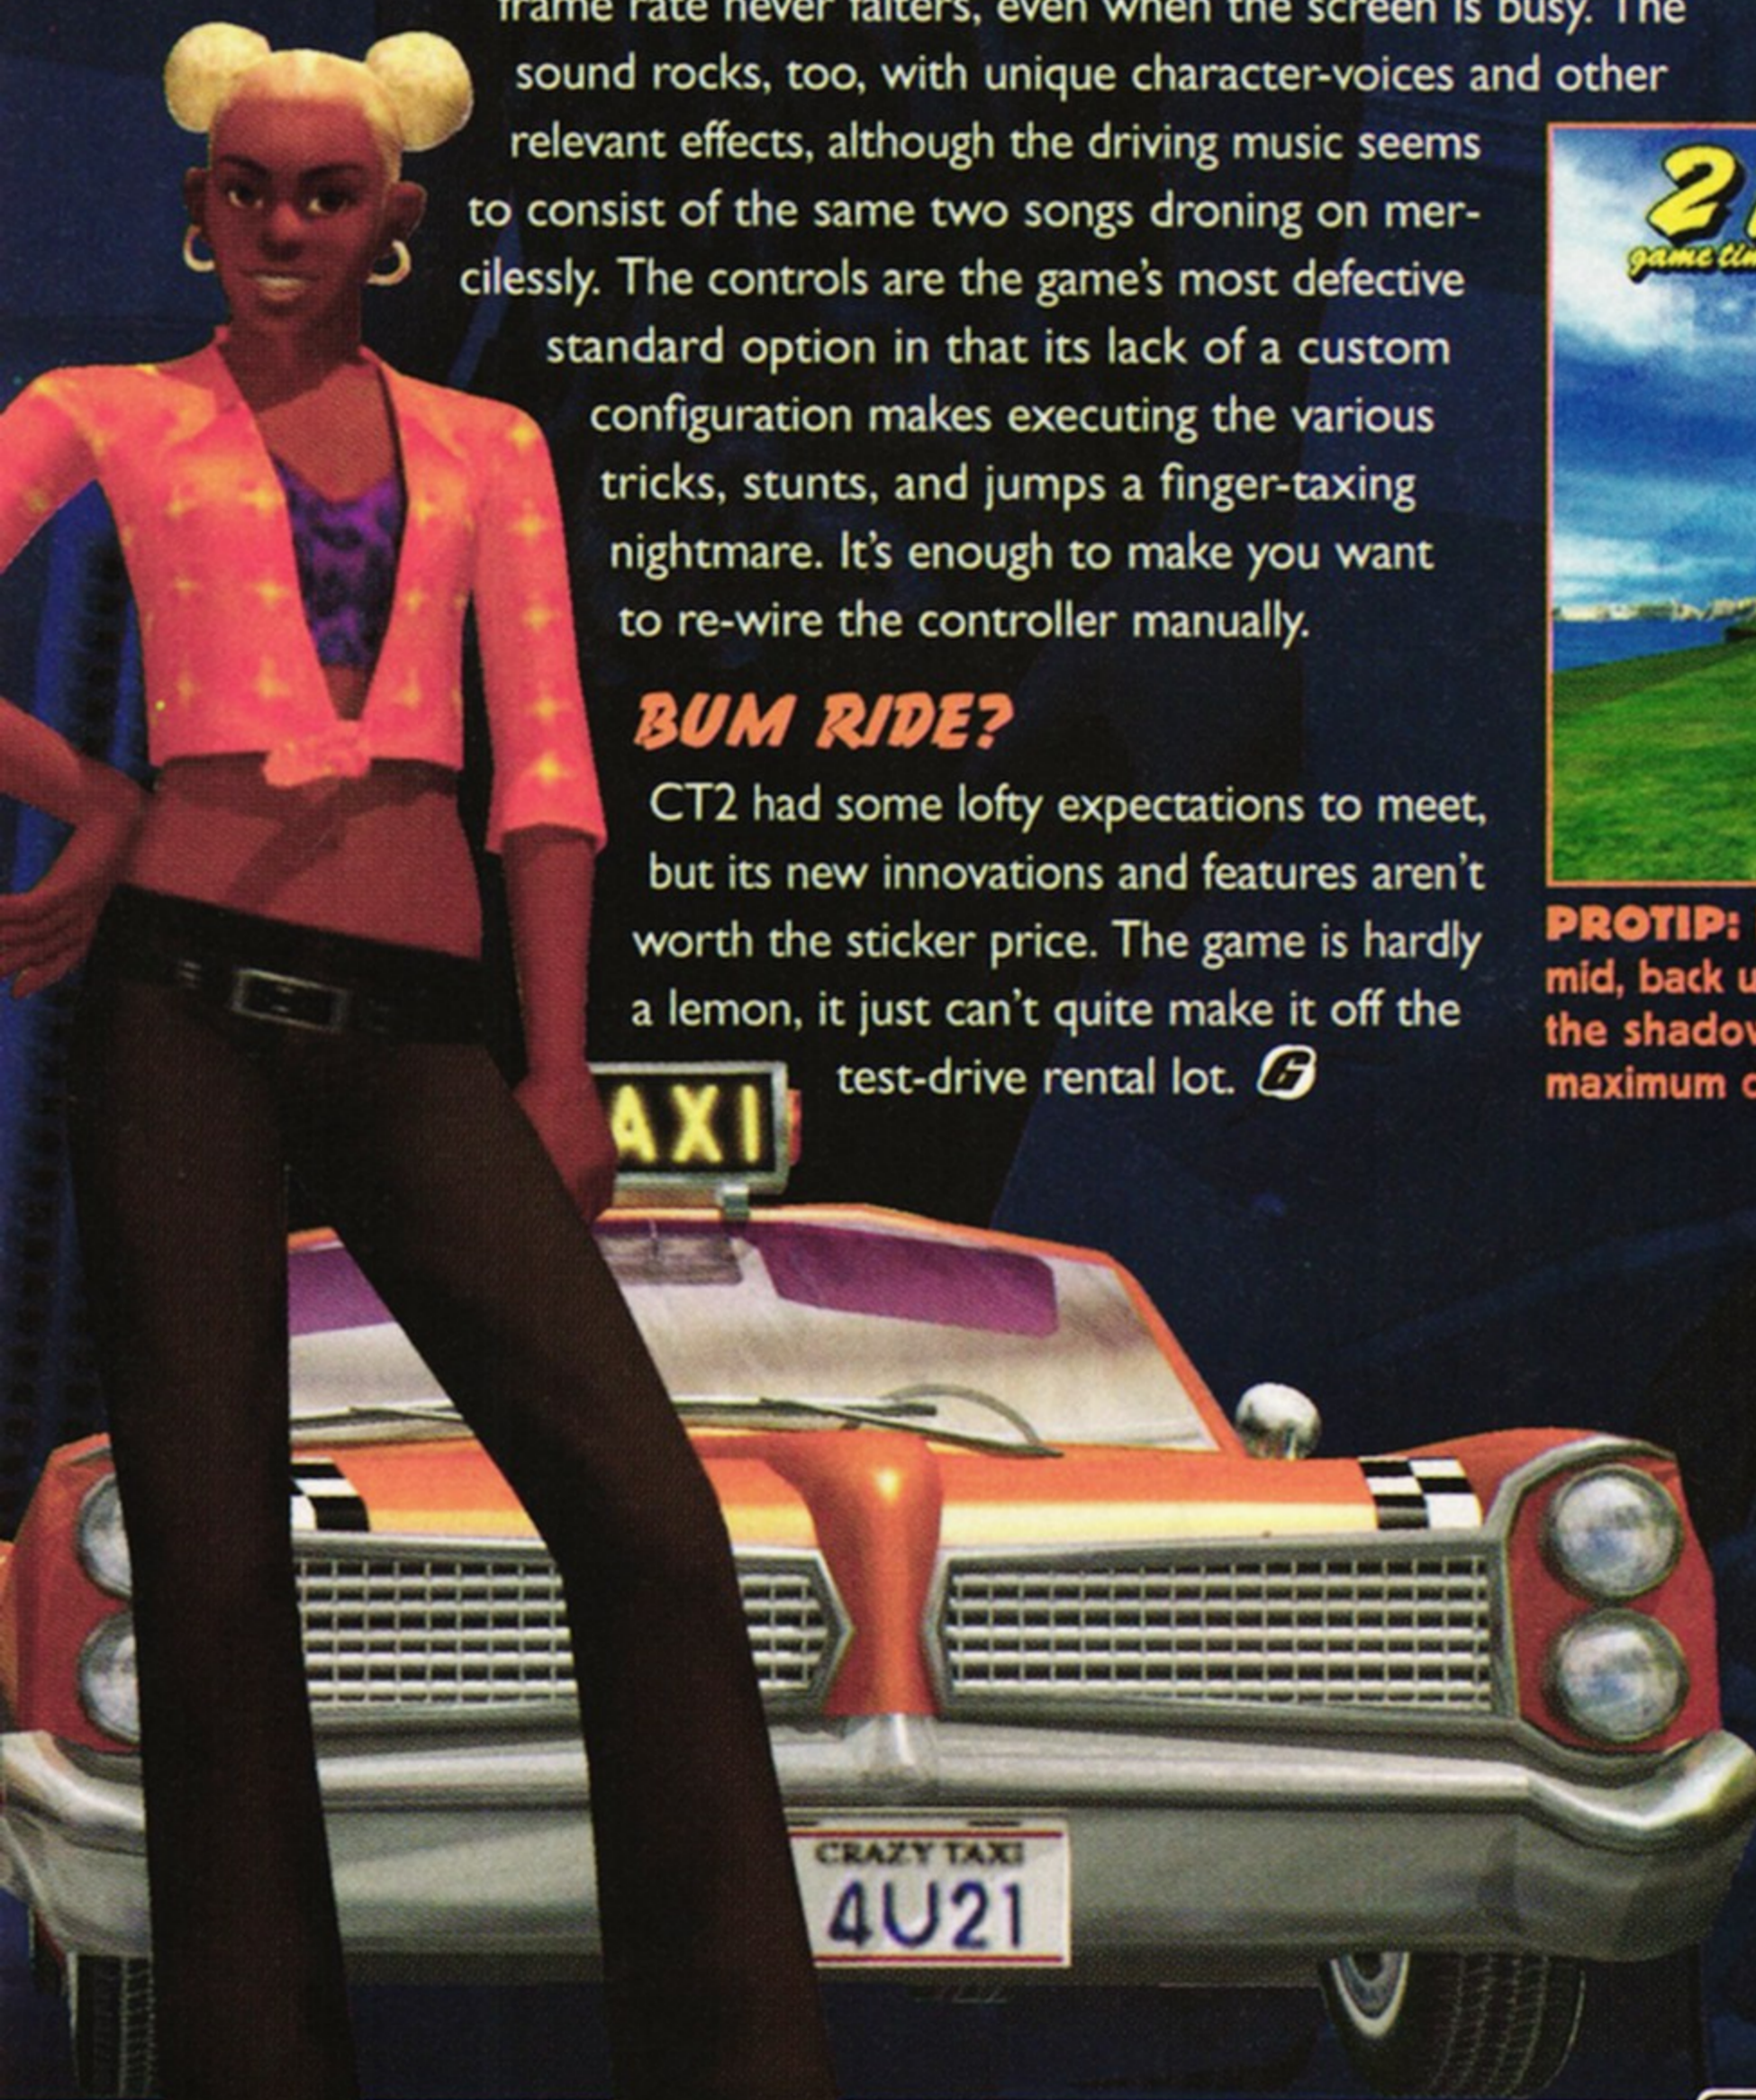

The sound effects are the highlight of the game's audio package, including screeching tires, voices, and crashes. The music works well initially but quickly becomes repetitive.

CONTROL 3.5

CT2's responsive controls are severely hampered by an awkward button configuration that makes this trip a thumb-blistering experience.

FUN FACTOR 3.5

As a sequel, Crazy Taxi 2 falls short of the original. The new additions to the game engine sound cool in theory but in practice stall the fun. In this case, more is less.

CONFIDENTIAL MISSION

WHILE THIS SHOOTER hasn't been a monster hit in the arcades, Confidential Mission is right on target for the Dreamcast.

PROTIP: Unload on the General's tank even if he's hiding inside. The more you hit it, the more points you accumulate.

PROTIP: In the Who's the Enemy training level, there are two almost identical men dressed in tuxedos; the one holding a bouquet of red flowers is a friendly, not an enemy.

From Sega With Love

At least where spies are concerned, the world is in utter peril from violent dictators who long to conquer it. That's where you come in, as an agent of Confidential Mission Force—a group dedicated to stopping these destructive forces. In three fast-paced levels, you dispose of gun-toting baddies whose only objective is to take you out first. Exclusive to the Dreamcast are a slew of mini-games, plus cool training levels where you can practice your reflexes and marksmanship.

CM also has some fine in-game features not found in other shooters: You can hit a target multiple times for combo points or administer a "Justice" shot where you shoot at your opponent's arm and then at his weapon for big bonuses. Meanwhile, a branching level design lets you take alternative paths. Taking aim at crazed villains is a cinch: The game supports every gun peripheral—even the keyboard/mouse combination—with on-the-mark accuracy.

License To Thrill

CM looks identical to its arcade counterpart, including a fast frame rate unhindered by slowdown, along with huge character sprites that arrive on-screen at every turn. The music sets the tone for an espionage thriller, although the voice-overs are as cheesy as the story is thin. Still, with only House of the Dead 2 and Virtua Cop 2 as the other Dreamcast shooters, Confidential Mission nicely fills the void. **G**

TEEN	GRAPHICS	SOUND	CONTROL	FUN FACTOR
T				
	4.5	3.0	5.0	4.0

PROTIP: Don't hesitate to take out chumps who don't yet have a target on them—you'll just end their misery more quickly.

PROTIP: In the Timing training level simulation, you usually have a clear shot before the enemy sets up.

DESPITE ITS NAME, Outtrigger isn't a sailing game (an outrigger—one 't'—is a sailboat part), but it isn't much of a shooting game, either.

Quake Lite

Outtrigger isn't terrible, it's just terribly mediocre and bland. From a third- or first-person perspective, you pick up health, ammo, and weapons, while blasting A.I. bad guys or other gamers online. The single-player game is utterly boring and easy, with short, silly missions, such as killing 10 terrorists, collecting all the coins, or finding and destroying all the bombs in a certain amount of time.

Unreal Tournament, Too

The levels look good, but there are only a handful and they're all very small. The weapons are unimpressive, too—except for a wicked flame-thrower that spouts lifelike fire. The characters look okay, but huge geometric markers surround them so you feel like you're fighting triangles.

The controls allow many configurations—though they're not totally configurable—yet the mouse/keyboard combo is still far superior to the controller. The only reason to play Outtrigger is for its multiplayer and online deathmatches...but when Quake III Arena and Unreal Tournament are already out there, why bother? **G**

PROTIP: On the 12th mission of the Intermediate level, use the Thermographer to see enemies through walls, then ricochet a shot at them without exposing yourself.

PROTIP: Fire your automatic weapon in short bursts so you don't get caught reloading.

PROTIP: In the fourth mission of the Advanced level, approach the medals slowly and don't collect too many too quickly, or they'll explode.

PROTIP: On the second mission of the Intermediate level, run backward along the edge of the arena so you have a clear shot at the missiles without the hostage in the way.

NBA Street Owns the Asphalt

PLATFORM
PlayStation 2

SPORT
Street basketball

PROTIP: The Dinner's Served dunk (simultaneously tap L1 L2 R1 R2 ○) delivers the most trick points but is easy to block, so use it on breakaways.

LIKE *SSX* BEFORE it, EA Sports Big's latest game reinvents a stale genre with the kind of sensational gameplay that made *SSX* one of the superstars of the PlayStation 2 launch. Prepare to spend your summer in front of the TV kickin' asphalt as NBA Street's electrifying b-ball will glue sports fiends and casual gamers alike to their controllers.

Mamma Jamma

If you think you've played this game to death back when it was called NBA Jam, think again. Midway's games are packed with fanciful moves that even an Olympic gymnast couldn't pull off without more wires than the set of *Crouching Tiger, Hidden Dragon*.

NBA Street, though, sticks to more authentic, real-life dunks, fakes, and alley-oops—though admittedly even Michael Jordan in top form would have trouble busting this many sick moves in one game.

Much more important than Street's cred, however, is how smartly and smoothly it plays. In the Jam series, the A.I. alternated between blatant cheating and playing worse than a grade-school newbie, but Street's CPU players play a smart, tough game. If there's a rebound, they're up to nab it; if you make a mistake, they're quick to exploit it. The result is thrilling, addictive gameplay loaded with tough battles and jaw-dropping moves that will lure even the most jaded b-ballers back to the virtual court.

Dinner's Served

Street's game is three-on-three by street rules, so buckets count for one point, outside shots count for two, and the first player to reach 21 wins. You can choose your squad from the top five or so players on each NBA team or even pull Michael Jordan out of retirement to lend a hand for those tough games. The action goes down on a cool selection of streetball courts in locations ranging from NYC to Vancouver to Philly.

Street delivers two innovative modes that break free from the standard sports mold of season or exhibition play. The one-player City Circuit mode is the heart of the game, involving a battle through a fighting-game-style ladder tournament where you face every NBA team and seven "boss" teams made up of gritty streetball players. Winning lets you poach one player from each defeated team, so as you progress through the tournament, you can develop a pretty loaded roster—which helps since the difficulty climbs a notch with each match.

The one- or two-player Hold the Court mode challenges you to set the longest winning streak against the computer, a friend, or a group of friends. Victories here earn you new shoes, player-development points, and other upgrades for your created player. The game also has a Street School mode that offers lessons for newbies.

PROTIP: If the ball is bouncing on the rim, pluck it off before it can tumble in.

PROTIP: Two-point shots can make or break a game—use a good outside shooter, or you'll waste a possession.

PROTIP: Hold any turbo button to dive for a loose ball or to throw elbows after a rebound.

PROTIP: Combos rack up the most points. String together any of these moves: steals, blocks, fake-outs, dishes, dunks, and alley-oops.

PROTIP: If your opponent gives you some room, use the space to bust off tricks and score points.

PROTIP: Stealing is a large part of good D. If your opponent is still for even a second, pound on □.

PROTIP: If you can't bust through the D, tap △ to call for a pick. A teammate will put the smack on one of your opponents to open up a hole.

PROTIP: Blocking shots (a.k.a. goaltending in the NBA) is hugely important, and the key is to jump early. As soon as you anticipate a shot—or even the possibility of one—tap **O**. You can block everything, including dunks, alley-oop passes, and long-distance shots.

Groundshaker

Once you hit the court, responsive, easy-to-use controls make diving into the action pretty effortless. All four shoulder buttons bust out your turbo, which either bumps up your speed or, in combination with the trick button, unleashes an impressive variety of cool fakes and dunks. You can also call for a pick, dive for a loose ball, jump to block a shot, reach in for steal, pump fake, or dish off for an alley-oop.

The cooler the move, the more trick points you get. When your trick meter is full, you have a chance to sink a game-breaker shot that not only earns you the points you'd normally get, but also deducts those points from your opponent's score. Yup, that's huge....

Dunkalicious

A big part of Street's juice comes from its stylish visuals. Remarkable animations and sharp player models make the action exciting, while slick courts convey an authentic streetball atmosphere. It's a shame, though, that the game has no user-controlled replays to let you revel in all the glorious moments.

The audio also amps up the atmosphere with a steady stream of chatter and smack talk. A hip-hop groove rumbles in the background, but licensed music would've added a lot and the announcer, Joe "The Show" Jackson, gets a little too carried away at times.

When the final buzzer sounds, Street gets serious props for breathing a huge blast of fresh air into what had been Midway's stinky old locker room. Street has staked its claim on the court, easily earning the title of this summer's latest must-have PS2 game. **E**

GRAPHICS	SOUND	CONTROL	FUN FACTOR
5.0	4.0	4.5	5.0

PROTIP: You can't just run past an opposing player, or he'll likely steal the ball. Fire off a trick as you go by, and you'll probably knock him on his butt and open a lane to the hoop.

PROTIP: Feroocious D can make an opponent's game-breaker shot time out. If you get ball possession, worry more about running down the game-breaker clock than scoring.

PROTIP: Dish off to teammates whenever they go up for an alley-oop—the payoff in tricks points is too big to pass up.

PROTIP: If you have the rock and are covered by two or more opponents and one of your teammates is open, look to pass.

PROTIP: Uncork game-breaker shots as soon as possible, but choose your moment wisely—they can be blocked.

GRAPHICS 5.0

One of the stars of Street's showtime, the graphics bring a serious "wow" factor to your PlayStation 2. Razzle-dazzle animations, sleek player models, and awesome courts put the pop in NBA Street's shots.

SOUND 4.0

Street's commentator is way too excited in an annoying, over-cafeinated way—but don't let that stop you from digging the amusing, well-varied smack-talk and sound effects.

CONTROL 4.5

These smooth controls keep you on the court without requiring a Ph.D. in hoops. If you're familiar with SSX, the shoulder button/trick combos will come naturally.

FUN FACTOR 5.0

Street hands out lessons on what Midway hasn't accomplished in years: addictive, exciting, and highly playable fantasy hoops. This must-buy game ranks alongside SSX as one of the PS2's stars.

Madden NFL 2002

AFTER OVER A decade of football excellence—and as the top-selling game for the PlayStation 2 last year—what else can possibly be added to the series that would make Madden NFL 2002 so special? Well, if you're EA Sports, you simply throw in even more incredible graphical detail, making player faces and bodies so real, you'll be able to recognize them immediately. Madden is still the only game with real-life coaches on the sidelines, yet EA Sports is coming

up with tons of new coach animations as well.

New play modes will include Two-Minute Drill—where players earn points on both offense and defense—create-a-team, and Coach's Corner, where the big dog, John Madden himself, will teach you the art of football. Rosters will be up-to-date,

	Rushing	Passing	Total
Ravens	0	19	19
Giants	0	0	0

and you'll even have a chance to draft a team and play as the Houston Texans, the NFL's newest team. With all these extras, Madden NFL 2002 for the PlayStation 2 should be harder to take down than Eddie George in the open field. **G**

TEEN	GRAPHICS	SOUND	CONTROL	FUN FACTOR
T	4.0	2.5	3.5	3.5

PLATFORM
PlayStation 2

WITH GROWING ANTICIPATION and unique gameplay elements, Dark Cloud was set to illuminate the bleak selection of role-playing games for the PlayStation 2. Unfortunately, a spotty story and monotonous gameplay keep Dark Cloud from shining forth.

Back to the Dark Ages

Dark Cloud offers a unique take on RPGs by including a Sim City-like game mode where players must reconstruct the hero's village after it's been destroyed by a demon. You play as a young warrior named Toan (who bears a striking resemblance to Link from the Legend of Zelda series), wandering through dungeons, forests, and other locales, gathering up the pieces of your town (and then the pieces belonging to additional villages) all in classic action/adventure RPG style. Then you return home to rebuild, slowly putting clues together to restore everything to normal before saving the world from destruction.

The integration of city-building and RPG elements is seamless, but the game falters drastically in both pace and story. You ask the same questions of every person you meet, and there is no real flow—Dark Cloud feels more like a game of Clue. Occasionally, there are more developed story elements (when you complete all the pieces of a building, for example), but they still don't tie things together smoothly.

A better, more involved battle system could've picked up the slack. But monotony quickly sets in again as you hack-n-slash boring enemies moving in obvious patterns. Weapon and character building doesn't add much to the affair, either. The game's painful combination of dull combat and piecemeal storytelling just doesn't allow Dark Cloud to gel—and, worse, doesn't provide nearly enough motivation to entice gamers to keep playing.

Head in the Clouds

The presentation of Dark Cloud also leaves a lot to be desired. Both sound and graphics are sparse: You'll search through areas with just a few monsters and very little music—and this repeats ad nauseam. The character designs, while not wholly inspired or original, are decent. The lackluster music and the absence of voice-overs, however, leave a gaping hole in the game. Dark Cloud's battle system and visuals are obviously styled on Nintendo's stellar Zelda series, which serves only to highlight its shortcomings.

The Wait Continues

Dark Cloud scores points for originality but doesn't do the basics right. With this disappointing showing, it still leaves PS2 owners without a killer RPG. Gamers really hungry for a Zelda-style adventure would be better off with Link's two new adventures on the Game Boy Color (see Game Boy Advances, this issue), rather than being stuck in the gloom of Dark Cloud. **G**

PROTIP: When in real-time Event Battles (which play like dance games), pay no attention to what your character is doing and just follow the icons.

DARK CLOUD

PROTIP: Once you've acquired enough river pieces to connect the river throughout Matataki Village, immediately speak to Treant.

PROTIP: The trick to fishing is trying out all your baits and not pulling on your rod until the bobber is completely underwater.

PROTIP: Use Xiao's slingshots to kill projectile-throwing enemies; it's easier to dodge their attacks from afar.

PROTIP: Re-sell extra weapon attachments to earn extra money—otherwise, you'll always be short on cash.

PROTIP: Return to the village after each dungeon level to construct all you can. Then search buildings for items.

PROTIP: When facing these nasty Earth Diggers, keep your distance until they breathe poison gas, then run to the side and attack.

GRAPHICS 4.0

Characters are well done but lack originality. Environments are sparse and repetitious—the PS2 can do much more elaborate and engaging visuals.

SOUND 2.5

Even more vacant than the empty dungeons is the soundtrack, with no voice-overs and annoying, repetitious, and totally uninspired music.

CONTROL 3.5

The action-oriented battle system is sufficiently engaging yet lacks depth. City-building controls are adequate-to-frustrating, while menus are cumbersome to navigate.

FUN FACTOR 3.5

What could've been a killer game instead drags on and on, never fulfilling its potential. Add Dark Cloud to the long list of mediocre PS2 RPGs.

Kingdom Hearts

ONE OF THE big surprises of this year's E³ was the joint venture of SquareSoft and the wonderful world of Disney Interactive—Kingdom Hearts. Gamers will immediately recognize characters designed in classic Square-style by Tetsuya Nomura, but this time they'll

co-exist with Goofy and Donald Duck for a quest through worlds filled with various Disney characters, such as Dumbo, Pinocchio, Jafar, and Ursula. This historic cooperative project will also mark the first time that characters from multiple Disney classics will appear in a single game.

The game's lead character, Sora, along with help from his Disney pals, must rescue his friends Riku and Kairi from the shape-changing Heartless. Gamers can expect turn-based combat, deep character customization, and other elements common to Square RPGs, along with an extra dose of magic from the inhabitants of the Magic Kingdom. However, role-players won't get the key to this Kingdom until fall 2002...hopefully, this gaming union will be worth the wait. **G**

PLAYSTATION 2

FIRST LOOK

Final Fantasy Chronicles

ALTHOUGH FINAL FANTASY X is receiving all the attention these days, that PlayStation 2 title wouldn't even exist if games like FFIV had never been created. The preview version of FFIV, as included in Final Fantasy Chronicles (along with Chrono Trigger), unraveled a gripping—and, this time, totally unedited—narrative that immediately involves you in the quest. The graphics, while only simple 16-bit sprites, hold up well, and FFIV's active-time battle system is featured in FF offerings to this day. The music may be a tad tinny but it still cranks out the familiar epic tones. FFIV should not only deliver a nostalgic treat for diehard FF fans, but should also clearly exhibit the impressive roots of the stellar series to newcomers. **G**

PLAYSTATION 2

FIRST LOOK

AS PLAYSTATION 2 owners await the first killer role-playing game for their powerful new system, Konami is readying its shot at the crown with the upcoming Ephemeral Fantasia. You'll assume the role of a traveling musician on his way to a royal wedding—but before you get there, an evil spell causes the days before the wedding to repeat themselves. A unique aspect will be the game's surround-battlefield system that enables

the 160-plus monsters to attack players from all angles. Promising to feature a colorful and lush visual style, Ephemeral Fantasia will hopefully break the spell that has cursed RPGs so far on the PlayStation 2.

Dragon Warrior VII

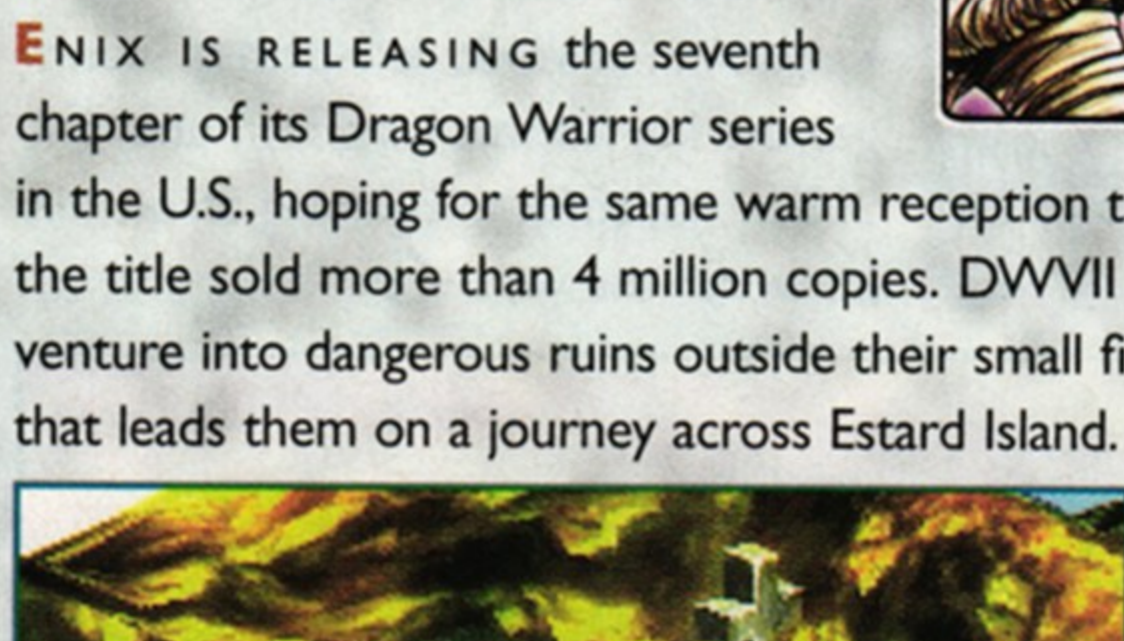

BY UNCLE DUST

- Developed and published by Enix
- Target release date: August

PLAYSTATION

FIRST LOOK

ENIX IS RELEASING the seventh chapter of its Dragon Warrior series in the U.S., hoping for the same warm reception this massive RPG received when it first appeared in Japan—where the title sold more than 4 million copies. DWWVII tells the story of three kids—Kiefer, Maribel, and Aluse—who venture into dangerous ruins outside their small fishing village. There, they uncover strange artifacts and find a map that leads them on a journey across Estard Island. While the game's graphics are old-school, Dragon Warrior VII's excellent character designs and gripping story are what really made it a smash hit in Japan.

Saiyuki: Journey West

BY UNCLE DUST

- Developed and published by Koei
- Target release date: August

PLAYSTATION

HANDS-ON

BASED ON A popular Chinese legend, Koei's latest RPG, Saiyuki: Journey West, recounts the story of a monk named Sanzo who must travel from China to India and back. While you're traveling as Sanzo, you must collect heaven's guardians, who will assist you on your long trip. In the preview version, the game looked and played similar to FF Tactics. The addition of the WereForms, the forms into which the guardians transform during battles, added an extra dimension of magic and power.

Win an exclusive GamePro T-shirt!

Hey, can you take a few minutes to answer some questions for us? Please fill out the following survey and fax, e-mail, or mail it (or a copy) to *GamePro* by August 31, 2001. Or go to gamepro.com and enter online! You'll be entered in a contest to win the prizes listed.

20 WINNERS!

MAT HOFFMAN'S PRO BMX

Get a handle on your handlebars in Mat Hoffman's Pro BMX! Rack up the points, collect the covers, and unlock the secrets with GamePro's ProStrategy Guide. By Dan Elektro

CONTROLLER LEGEND

Note: These buttons represent the default configuration, but player controls are customizable via the Options menu. Special tricks may be subject to change.

THE BASICS

Landing Fakie

"Fakie" is the term used in BMX and skateboarding when you land a trick backwards—in this case, on your back wheel, rolling in reverse. The longer you coast when you land a fakie, the higher your special meter climbs. Normally, your meter is green; when you land a fakie, you'll see the level creep up in blue. When you resume pedaling, the blue changes to green—or the whole meter changes yellow if you've achieved Special status. In short, always try to land a fakie early on in a run to get that puppy climbin'.

Manuals

A manual is a little wheelie, and it's essential for stringing combos along. Use manuals between grinds—if you simply land your bike after a grind or aerial trick, your combo will end. However, tapping ↑, ↓ or ↓, ↑ while you're in the air will enable you to land with a manual, thereby extending your combo streak. If you want to get those score-based covers, practice your manuals.

Equipment

You earn a new bike after you collect five covers and another at 16 covers. As soon as you gain access to a new

ride, use it! The better the bike, the easier it is to pull off tricks. Feel free to adjust your forks and tires as you see fit—there's no wrong way to set them up, but, obviously, certain kinds of tweaks assist you in doing certain kinds of tricks.

Order, Order!

You can collect/knock over/destroy items in any order—the paths detailed in this ProStrategy Guide are merely suggestions, but they're usually the most efficient ways to do things. On a similar note, when collecting the letters to spell "TRICK," it's a good idea to do those in order, and not only for the sake of avoiding confusion—they're usually laid out for easiest collection in order.

Cleared for Landing

Often times, the hardest part of getting high scores is sticking your landings after stunt combos. Always be aware of the angle of your bike in relation to your landing surface. You can usually get away with about a 15-degree difference, but if you lean too far to the front, back, or to either side, you'll bail and lose all your points. It's not very forgiving—so be ready.

Smash the Lights

You can hit these lights in any order, but the best way to tackle them is to take out the toughest light first. Turn around 180 degrees and bunnyhop off the platform—straight into a grind on the pipe. At the end of the pipe, hop off diagonally and smash into the light.

From here on out, it's pretty easy. Head across the room to the opposite wall and smash the second light.

The third light is just above the "R" in "TRICK"—in the middle of that wall. It's best to ride diagonally up the small ramp in front of it and smash it on an angle.

As soon as you land, head right and crash into the fourth light.

The fifth light is the first one you saw at the beginning of your run—in the corner of the half-pipe. Build up a little speed in the half-pipe and take it out for a cover.

Get T-R-I-C-K

From the starting point, drop down and head diagonally forward to the right. The "T" is waiting just outside the half-pipe.

As you land, look for the "R," which should be just in front of you—near the wall to your left. It's easy pickins.

The "I" is smack in the middle of the room, hovering over the small fun-box. As you land from the "R," the "I" should be almost immediately in front of you.

Chances are you spotted the "C" just beyond the "I." Pedal forward into the shallow bowl and grab it.

Double-back for the "K," which is fairly high in the middle section of the wall where you found the "R"—roughly opposite of where the "I" was located. Be sure your aim is true, and you shouldn't have trouble.

Hidden Cover

See that giant switch in the rectangular bowl in the middle of the room? Grind past it to activate it. It opens the garage door on the wall in the corner and gives you access to the great outdoors.

Note: Commands in parentheses are performed simultaneously.

Out in the dirt yard, build your Special meter until it's yellow. Use the dirt whoop-de-dos to launch yourself up to the shed on the back of the building.

When you land, be ready to bunny-hop through the plate glass window almost immediately—and prepare to grind!

If you land the grind and have decent balance, the hard part is over. Grind on the large pipe that spans the ceiling and collect the hidden cover that floats in the middle of it.

Construction Yard

Topple Toilets

The first Porta-Pottie is literally right in front of you from the start. Just run into it to knock it over.

Either use the dirt clump to jump over the grassy embankment, or head right through the whoop-de-do passage. You should see another blue toilet just ahead, next to the gray bowl.

Land in the bowl or come straight down; either way, you should cross the area you're in to find the third toilet just opposite the gray bowl.

Continue on to the bridge area. You don't have to do these two in order, but let's leave the hard one for last. There's a toilet on the lower level not far from the half-pipe. Jump down and bump it.

The final "portaloo" is on the other side of the broken bridge. You need a little bit of speed to jump it at the left, or you can link grinds on the right. Either way, spanning the gap is harder than hitting the toilet.

Get T-R-I-C-K

Straight ahead from the start, jump onto the small buildings and grind the central rail for the "T."

Drop down and continue forward over the whoop-de-dos into the next segment of the yard. Grind up the diagonal girder into the pool and snag the "R."

Exit the pool to your left, grinding on the long suspended pole. The "I" is toward the end of that pole.

Continue forward to the incomplete bridge on the upper level of the next

segment. Use the white ramp to jump the gap and collect the "C."

Drop down to the lower level and enter the half-pipe. The "K" hangs in the air there.

Hidden Cover

From the starting point, bear left and ride up the dirt hill to the grassy area. If you prefer, grind up the girder to your immediate left instead. Just get up there somehow.

Aim for the left of the gray ramp. Get ready for a big jump!

This one has to be a lengthy leap as well as a specific one. You need to land on the left long girder. If you land too short, you'll grind into a point bonus—or miss altogether. If you land too far to the right, you'll hit the wrong girder—but you can switch if you're quick.

Once you're grinding on the left, stay there—your grind automatically switches direction when you reach the crosspiece, and the hidden cover should be right in front of you. A little bunnyhop off the end of the girder secures the cover.

Vending Machines

The first machine is to the left as you come down the very first flight of stairs. If you grind that staircase's rail, you'll need to jump off a little early—otherwise, you'll fly past your target.

Head to the right and down the escalators. The next vending machine is on the right wall at the bottom.

Don't blink—immediately pull a tight right turn after you hit the second machine, and you should find the third hidden around the same corner.

Another passageway (this time, the sloping ramp—up and to your left), another vending machine. Watch for it at the bottom of the passageway on the left wall.

Make a left before crossing the tracks, and you should spot the fifth and final machine up against the wall.

Get T-R-I-C-K

Head down the starting staircase and ride to the left. The "T" is near the far corner of the room, hovering over the quarter-pipe wall.

Continue on to the escalators and grind on the rail before them to collect the "R."

Follow the escalators down and then make a quick left at the bottom; the "I" is floating above the railing on the platform.

Bear left again and ride down the pedestrian ramp. Cross the tracks and crash through the glass room. The "C" is inside!

Jump over the tracks again—this time bearing left. You should spot the "K" just above a quarter-pipe ramp.

Hidden Cover

Get your special meter up and grind on the "R" rail—right before the escalator.

When you crash through the barrier, stay perfectly straight and hit the small wooden ramp in the center of the escalators.

This launches you up into the air; be ready to grind on the large pipe.

It's sometimes tricky to get the timing right, but you have to bunnyhop off the rail and through the rusty grate—the Hidden Hall gap—and be ready to jump one last time at the other end.

HOFFMAN

Leap out of the other side of the Hidden Hall with a big bunnyhop. Try to aim yourself just to the left of the center of the small metal ramps.

Ride straight and drop off the cliff, toward the greenhouse. Turn right when you land and stick to the asphalt path. The second stand is just ahead on the left side of the bridge.

Hang a left and hit the wooden ramp to the fountain. Cross the fountain area and head up the ramp to the swing sets. To the right of the swing sets is the fourth shwarma stand.

Turn left and head for the asphalt path—back toward the fountain entrance steps. Either use the dirt incline to the right railing, or grind that railing and bunnyhop off to collect the "I" floating in mid-air.

Land on that pipe with a grind, and you're home free—the hidden cover is yours. You'll also pick up the Tight Pipe gap bonus if you land on the ground again safely.

Continue and make a right at the fountain gate. Pedal diagonally across the lawn, and you should bump into the third stand hiding behind a tree.

Turn back around and head for the asphalt path. The final shwarma cart is to the left—on your way back to the fountain gate. Shwarma, in case you were wondering, is a shredded meat sandwich and an NYC institution.

There are two ways to get the "C" hanging over the fountain. The easy way: Make a left and aim for the tree, grind on its branch, then bunnyhop off at the end of the grind to grab the letter.

The Shwarma Stands

From the starting point, pivot to the left before you start pedaling. Look! There's the first one right in front of you!

Get T-R-I-C-K

Don't follow the asphalt path from the start. Veer to the right—toward the tree and planters—and look for the gray bumps surrounded by black fencing. Grind on the right fence and bunnyhop off to collect the "T."

The hard way: Use the fountain's outer edge as a ramp to reach the center bowl, then jump out of the center bowl to collect the letter. Either way takes timing and practice.

Hop into the fountain area with the small wooden kicker ramp and cross over to the playground on the opposite side. Grind on top of the swingset as you enter for the "R."

For the final letter, return to the playground and follow the asphalt path to the three-way intersection. When you see the skating rink, bear left and ride up the hill onto the roof. You can find the "K" on the top of the rink's building—an easy jump or grind.

Hidden Cover

This one's easier than it looks. From the start point, pivot left and ride up the dirt embankment—just behind the big tree.

Use the dirt at the edge as a ramp and jump through the tree's fork.

Land with a grind, and you should slide down the big branch—straight into the hidden cover. That's it!

Hit Waste Barrels

From the starting point, go straight and ride the Hoffman Bikes graffiti logo ramp. On your way down, bear right; the first set of barrels is just before the small wall.

Follow that wall—grind it, why not?—around to the back of your starting point, where you will find another set of barrels.

Continue straight, with the barbed-wire fence to your right. Between the two closest canal pools is barrel set #3.

Follow the right-hand fence and make a left at the corner of the level. It isn't far until you spot the fourth collection of barrels—next to the long gray building.

Just a few feet ahead—near the gray quarter-pipe wall and brown dirt mounds—lies the fifth and final barrel set. Smash it!

Get T-R-I-C-K

As above, go straight and stunt on the Hoffman Bikes graffiti logo ramp. When you come down, head to the left and grind on the short wall. You'll run into the "T."

If you stay on the course, you'll find the "R" just ahead—near the first whoop-de-do.

Grind the long quarter-pipe wall that runs behind your starting point. At the end of the wall, bunnyhop out of the grind and sail through the suspended "I."

Hang a left and ride back toward the Hoffman graffiti ramp. See that platform built on three red cylindrical tanks? Ride up its pathway, grind the left rail on top, and collect the "C."

When you land, turn left—or just pull a trick on the quarter-pipe wall—and you'll find two small dirt mounds. The final letter, "K," hangs above there. Just jump into the air to grab it.

Hidden Cover

This one's not too hard if you know where to look...and if you can grind well. Head to the tank platform—where you found the “C” in “TRICK”—and grind to the adjacent rooftop.

Continue your grind—or pick it up and start a new one—on to the rail that bends to the right. Your goal is the next rooftop.

When you land, one more rail sits before you—you know what to do. You can snag the hidden cover as you grind the end of the rail.

Hit Satellite Dishes

There's no one clean line to collect all five dishes in a row, but this path is as good as any. From the start, ride straight ahead and get on the roof—you can use the grass whoop-de-dos to get there fairly easily. You should see the first dish on your way. Ride

to the opposite end of the roof, turn around, and jump the two sloped roofs to get to the dish.

As soon as you collect the first one, grind the power cable over to the second dish on the opposite building.

Drop down into the blue half-pipes (a.k.a. Luna's Ramp) and head over to the house. Your third dish is mounted on the roof.

The last two are a pain to get—they're both located on the outside edges of steep drops. Turn right to leave the blue area and jump the green kickers near the brown fence. Skate diagonally across the street toward the parked white car (the “I” in “TRICK”). To the right are two green kicker ramps that take you to the roof.

Once you're on the roof, make a sharp right and grind on the edge of the building to hit the fourth dish.

Return to the kickers and get back on the roof. Grind or jump to the other building, where you can find the final dish on the same right-hand corner as the fourth one. Or you can hop to the second roof, turn around, grind on both building edges, and get both of these dishes in one run. You need a good amount of speed on your grind to do it.

Get T-R-I-C-K

This is the one level where you shouldn't collect the letters in order. Instead, work from the back—start with the “K,” which you'll find if you ride straight from your start point and head over the grassy hills. The letter is in the corner of the building.

Follow the building around to the right, and then make a diagonal line to the left through the planters. The “C” is just above a blue/gray ramp—next to the red brick wall.

Continue around the buildings, passing through the mini-half-pipe corridor. On your way out—when you come to the green ramps—bear left, and you should see the “I” floating over the parked car.

Do a quick 180 and use the green kickers to launch yourself up to the rooftop, where you found the satellite dishes. The “T” hovers over the gap between the buildings. One good jump, and the letter is all yours.

The “R” is very close to the level's starting point. Drop off the roof and head back to the higher level of the blue Luna ramps—near the satellite dish. Use the half-pipe to get up to the brown wooden fence and grind it. The “R” awaits at the end.

Hidden Cover

Go to the roof where you hit the first satellite dish and grind across the lengthy power cable.

As you come off the grind, turn left and use the house roof as a ramp. The hidden cover is just above the chimney stack. There you have it—you're now a BMX pro!

If Your Parents Think Playing Video Games is a Waste of Your Time, Just Wait Till They See You Reading MAD!!!

While you're waiting for the feeling in your thumbs to come back between games, pick up a copy of MAD!

Laugh along as we rank on everything you hate:

RUMBLE RACING

You're not just racing for points and glory—you're racing for Easter eggs! If you locate these secret treats in single-player races, you'll be rewarded with fresh new cars. By Dan Elektro

The Basics

This is your goal. Look for these little eggs hidden throughout the tracks. Eggs don't appear in Championships—you must collect them in Single Race games.

While this guide assumes you're driving the track forward as normal (for the sake of recognizable landmarks), many of the eggs become more obvious if you drive the track backwards. Also, note the map on the screenshots as a confirmer to let you know you're in the right area.

Once you've found the egg, you can quit the race and move on. If you can't find the egg, you can unlock the cars with the passwords provided. However, it's more fun to find them on your own. The only track without a hidden egg is Circus Minimus.

The Tracks

True Grits

Car: Revolution
Password: PTOATRTOI

Don't take the train track shortcut; follow the main road instead and drive through the barn shortcut. Just before the big gray ramp, turn to your left and you'll see a brightly painted egg sitting in the corner.

Flip Out

Car: High Roller
Password: HGIROLREL

When the track forces you to drive through one of three large pipes, do so—but when you emerge, turn around and you'll find an egg sitting below the middle pipe's exit.

Car Go

Car: Sporticus
Password: OPSRTISUC

See where the submarine is docked? There's a long line of red cargo containers on the left of that straightaway. Tucked in the corner of the very last one (near the underground tunnel entrance) is the egg.

So Refined

Car: Van Itty
Password: VTYANIYTT

From the starting line, turn completely around and drive behind the gray buildings. Green barrels block the path; pay them no mind. Just get behind the large building with a power-up on its roof, and you should spot the egg.

Passing Through

Car: Buck Shot
Password: UBTKSTOH

Ah, racing on the beach—but when you reach the sandy stretch of the track, why not go for a swim instead? Make a right into the water, look to your right, and you should find that there's a little alcove back there. Eggs love alcoves.

Sun Burn

Car: Gamecus
Password: BSUIGASUM

Just after the starting line, you should see a glass billboard to your right, marking a shortcut over a swimming pool. To the left of that pool is this track's egg!

you should come to an area with yellow steel plates at the bottom of gray trapezoid-shaped bridge supports. The egg is behind the second of those supports. If you come to the red arrow ramp with raised corners, you've gone too far.

Falls Down

Car: Road Trip
Password: ABOGOBOGA

This one's a little tricky. The first glass billboard leads to a stone tunnel, but don't take it—just use it as a landmark. Instead, go to the right and drive through the green shrubs—in other words, over the waterfall. The egg is sitting on a small rock ledge on the left wall, so you have to aim for it and cross your fingers. Try using one of the longer cars like the Mandrake or Road Kill. Still, it ain't easy.

The Gauntlet

Car: Vortex
Password: 1AREXT1AR

Watch for the conveyor belt that dumps steel into the pit of rotating spikes. Around the next corner is another set of red and blue ramps, and some cargo containers in the middle of the track. The egg is nestled in the cranny of the last container.

Touch and Go

Car: Redneck Rocket
Password: KCEROCYTEK

Go to the cargo plane shortcut (the one you can drive through, marked by the red trucks), but don't drive through it. Instead, head up the ramp behind it and enter the terminal. Head left at the snack shop, crash through the window, and use the small roof as a ramp to get to the second building just ahead. In that building, make a hard right and you should find the egg in front of a plate-glass window.

Surf and Turf

Car: Cobalt
Password: TLAGOBTLA

The eighth turn on the track features a dark gray stone building; it's a parking garage adjacent to the light-blue theater. Instead of zipping through it (it does count as a shortcut), explore it—you should find an egg tucked in the corner. If you see signs that say, "Now Playing" with the Rumble Racing logo and a billboard for Robo Wars, turn around—you've just passed it.

Coal Cuts

Car: Stinger
Password: AMHBRAAMH

This one's not too hard. Just after the first coal piles, there's a row of brown buildings to your right as you pass under several wooden bridges. There's an egg tucked behind the last of those buildings.

Wild Kingdom

Car: XXS-TOMCAT
Password: NALDSHHSD

After the extremely hilly part of the course shortly after the starting line,

Over Easy

Car: Interceptor
Password: CDAAPTNIA

When you come into town, you'll make two 90-degree lefts and two 90-degree rights. That second right turn is near a small blue house—and an egg is hidden next to that house.

Outer Limits

Car: Thor
Password: THTORHROT

Toward the end of the lap, you'll see some moss-covered round rock formations on your left. Peek behind the first one, and you should find the last egg. 

S.W.A.T. PRO

Submit your hottest S.W.A.T.Pro tips! Each month, the reader with the winning tip will receive a product from Capcom, which features such high-quality games as *Power Stone 2* for the Dreamcast! Runners-up receive a *GamePro* T-shirt.

AEM INTERCEPT PURSUIT VEHICLE GIVEAWAY SWEEPSTAKES OFFICIAL RULES

1. No Purchase or Online Access Necessary: You may enter one of two ways: 1. To enter online: Navigate the Internet to www.pursuitvehicle.com and click on the Sweepstakes link to be connected to the Official Entry Form. Complete all the requested information, then send your entry by clicking on the sweepstakes submit link. 2. To enter via mail: On an Official Entry Form, or a 3" x 5" piece of paper, complete by hand your name, address, (no P.O. Box addresses), telephone number, and e-mail address (if available). Mail your entry in an envelope with proper postage to: Pursuit Vehicle Giveaway Sweepstakes, P. O. Box 963, Southport, CT 06490.

Entries for each drawing must be received no later than 11:59 AM ET (USA) on the applicable drawing date listed in rule #2 to be eligible for that drawing. All entries must be e-mailed or postmarked by December 31, 2001 to be eligible for the Grand Prize, when the sweepstakes ends. Limit one (1) entry per person, per drawing period.

2. Selection of Winner/Validations: Winners will be selected at random from all valid entries received by Catalyst Marketing, an independent judging organization, whose decisions are final. A total of three (3) random drawings will occur as follows: August 31, 2001, November 30, 2001, and a final Grand Prize drawing on January 7, 2002. **The final Grand Prize drawing will include all entries received via e-mail or postmarked by December 31, 2001.** To be declared a winner, any Canadian resident selected will be required to correctly answer without assistance of any kind, whether mechanical or other, a time-limited mathematical question. The question will be administered by telephone at a mutually convenient time. Entrants agree to be bound by these rules and all decisions of the judging organization, whose decisions are final on all aspects of the Sweepstakes. Potential winners will be notified by e-mail and/or mail and may be required to sign, notarize and return within 14 days of delivery to his/her address an Affidavit of Eligibility and a Travel and/or Prize and Publicity Release, unless prohibited by law. Grand Prize winner's travel companion also must sign a Travel Release. Failure to sign and return these forms within the time requested may result in forfeiture of prize and the selection of an alternate winner. No responsibility is assumed for lost, stolen, late, or misdirected entries or mail. Sweepstakes materials void if incomplete, not legible or if they contain errors.

If for any reason the Internet portion of this Sweepstakes is not capable of running as planned, including infection by computer virus, bugs, tampering, unauthorized intervention, fraud, technical failure or other causes which corrupt or affect the administration, security, fairness, integrity or proper conduct of the Sweepstakes, Activision Publishing, Inc. ("Sponsor") reserves the right, at its sole discretion, to disqualify any individual who tampers with the entry process and to cancel, terminate, modify and/or suspend the Sweepstakes. No responsibility is assumed for: any error, omission, interruption, deletion, defect, delay in operation or transmission, communications line failure, theft or destruction or unauthorized access to or alteration of, entries; or any problems or technical malfunctions of any telephone network or lines, computer online systems, servers, or providers, computer equipment, software, failure of any e-mail or electronic entry to be received on account of technical problems or traffic congestion on the Internet or at any Web site or any combination thereof, including any injury or damage to participant's or any other person's computer related to, or resulting from, participation in or downloading any materials from this Sweepstakes. All submissions become the property of Sponsor.

3. Participation: Sweepstakes begins June 1, 2001, ends December 31, 2001 and is open to legal residents of the 49 United States, (Void in Florida), Washington, D.C., including APO/FPO addresses and Canada, except the Province of Quebec, who are 18 years of age or older. Void in Florida, Quebec, Puerto Rico and where prohibited. Employees and their immediate families and households of Sponsor, 20th Century Fox, Advanced Engine Management, Inc., Emap, USA, Big Sky Brands, Inc., PlanetHollywood.com, Inc., Wicked Fashions, Inc., their parents, subsidiaries, advertising and promotion agencies, licensees and assigns, and anyone involved in this Sweepstakes' production, development or handling are not eligible. Acceptance of prize constitutes consent to use winner's names and like-

ness for editorial, advertising and publicity purposes without further compensation, except where prohibited. By entering, you agree to release, discharge and hold harmless Sponsor, 20th Century Fox, Advanced Engine Management, Inc., Emap, USA, Big Sky Brands, Inc., PlanetHollywood.com, Inc., Wicked Fashions, Inc., their parents, subsidiaries, affiliates, advertising and promotional agencies and prize suppliers from any and all claims, damages, liabilities, injuries and expenses arising from or relating to an entrant's participation in the Sweepstakes and/or acceptance or use of any prize. All federal, state and local laws and regulations apply.

4. Prizes and Odds: The following prizes will be awarded: **January 7, 2002 Drawing: One (1) Grand Prize:** A model year 2000 AEM Intercept Honda Civic Si Showcar (i.e., with mileage), equipped with MTX audio equipment, a video game system and a copy of "The World's Scariest Police Chases" game, a South Pole racing jacket, Dinner for two (2) at Planet Hollywood, (\$50.00 gift certificate), a Meguiar's Car Care Buffer Kit, a case of Warp Mints, a Hot Import Nights t-shirt or hat and 1 year subscriptions to *Super Street*, *Max Power* and *GamePro* magazines. Also included is a trip for two (2) to the Frank Hawley Drag Racing School. Trip includes round-trip coach air transportation between Ontario, California and major airport in continental U. S. nearest winner's home, airport transfers, 4-days/3-nights double occupancy hotel accommodations, driving school and on-track driving, (a Monday-Tuesday stay required for driving school), (approx. retail value \$53,000.00).

August 31, 2001 and November 30 Drawings: One (1) First Prize: An MTX Thunder 4202 2-channel Amplifier and a Thunder6000 subwoofer, dinner for two (2) at Planet Hollywood, (a \$50.00 gift certificate), a Meguiar's Car Care Buffer Kit, a South Pole Racing Jacket, a video game system, a copy of "The World's Scariest Police Chases" game, a 10 yr. Supply of Warp Mints (12 cases a yr. for 10 yrs.), a "Dude, Where's My Car" DVD from Fox, (approx. retail value \$3,980.00); **Ten (10) Second Prizes:** Dinner for two (2) at Planet Hollywood, (\$50.00 gift certificate), a Meguiar's Car Care Kit, a South Pole Racing Jacket and backpack, a copy of "The World's Scariest Police Chases" game, 1 year subscriptions to *Super Street*, *Max Power* & *GamePro* and 1 case of Warp Mints, (approx. retail value \$345.00); **Twenty (20) Third Prizes:** A copy of "The World's Scariest Police Chases" game, a "Dude, Where's My Car" DVD from Fox, a Hot Import Nights t-shirt or hat, one issue of *Max Power*, *Super Street* & *GamePro*, a tin of Warp Mints and Emap merchandise, (approx. retail value \$92.00). Automobile delivered at Racing School; title, license, registration, insurance and sales tax, if any are the sole responsibility of winner. Winner must meet Racing School physical and health requirements. Winner's selection of dates and flight times will be accommodated, if possible, subject to availability. Trip subject to certain blackout dates. A 60 day advance registration required for the driving school; trip must be completed by 9/30/02. No substitution or transfer of prizes except the Drag Racing School portion, or with Sponsor's permission, or where required by law. Odds of winning depend on the number of valid entries received. Sweepstakes open to over 30 million Internet users. Allow 6-8 weeks after validation for receipt, or arrangement of receipt of prize. Limit one (1) prize per household, per drawing. In the event any prize becomes unavailable, Sponsor reserves the right to substitute a prize of equal value or greater than the value listed in these rules. All taxes are the responsibility of winner. In case of dispute as to identity of a winner who entered online, the winner will be deemed to be the person who is the registered user of the e-mail address submitted in the winning entry.

5. Prize Winner List: Visit www.pursuitvehicle.com after January 31, 2002 for a winners list, or send a self-addressed, stamped envelope (VT and Canadian residents may omit return postage) to: **Pursuit Giveaway Winners**, P. O. Box 804, Southport, CT 06490 by January 7, 2002.

6. Use of Information: Any personal information (e.g. name, address and telephone number, age, e-mail address) received by mail-in entries will only be used to fulfill the prizes and will not be used for any other purpose. The use and/or sharing of any personal information received by entering over the Internet shall be governed by the rules and instructions given on the sweepstakes page, located at www.pursuitvehicle.com.
