You're trapped in a deadly Asteroid belt. Surrounded by more rock than a heavy metal roadie. Armed with powerful photon cannons you must blast your way to freedom.

Beware alien spacecraft with lasers more dangerous than a kiss from your granny. They're out to mash your ship into metal mincemeat. Use your rocket thrusters wisely and when the heat's really on hit "hyperwarp" and watch them wallow in your wake.

Challenge the computer on your own or with an ally. Alternatively, challenge a friend and blow them into the next galaxy.

'Asteroids,'™ the game that made them barricade the arcade, is now on Game Boy.® With digital sound and graphics so good they'll send your eyeballs into orbit. It's the game that's tougher than a ten year old rock cake.

COMING SOON

You are the Supreme Defence minister and doom is on your doorstep. Thousands of not so cuddly scudly missiles are falling from the sky. As the boys bite their nails in the bunkers, the real men man the missile bases. Your job, blast the enemy's bombardment out of the blue.

Defend one attack and another starts, these boys fire more missiles than a Trafalgar Square pigeon. They've got satellites, stealth bombers and very clever smart bombs.

Defend 16 cities from New York to Moscow. Make a slip of the thumb and the east gets blown west.

'Missile Command'™ is the arcade classic now available on Game Boy,® with digital sound and graphics so real they'll blast your head off. It's the game for people who carry sandbags not handbags.

MEAN MACHINES JUNE ISSUE 21

THE TERMINATOR: MASTER SYSTEM AND MEGADRIVE REVIEWS IN THIS ISSUE!

EDITORIAL

Yet more excitement from Jazza Rignall as he unveils more exciting comments, amazing insults and bizarre UFO sightings. If you feel you can add something to these entertaining pages, just send it in! Even if we don't print it, it might still give us a laugh. But then, maybe we'll just throw it in the bin. We're funny like that, you see.

NEWS

MEAN MACHINES strikes gold yet again with the complete lowdown of exciting consoles-related events and announcements. As we like to say, if it's important it's here, and if it isn't, it's probably restricted information that we don't want to tell you.

MEAN YOB

Once again, the MEAN YOB has compiled an entertaining section full of deep, incisive opinions and probing comment. Actually the chances are that the letters this month are sad to the extreme and the YOB's special insult-related talents are tested to the max!

Q+A

We receive many hundreds of letters per month, packed with amazing, exciting questions for the man known as Julian Rignall. This three-page extravaganza shows the cream of the crop which is really saying something, we can tell you!

TIPS

MEAN MACHINES stays at the top again with eleven packed pages of tip-related tomfoolery! Look out for mega tips specials on Ranma for the Super NES and a complete solution to Shadow of the Beast on the Sega Master System. Add the usual assortment of amazing little tips and cheats and you have a bumper spectacular of some note.

CHARTS

60

Ooh ooh! Drama! Nintendo actually sent us two charts this month, so we actually had to write this section twice! That meant that the charts took a record six minutes to write this month. Now there's a thing.

THE HOTLINES

65

MEAN MACHINES spares no expense in bringing the latest console technology to its readers through a series of simple 'phone-in competitions. Join in the fun and get dialling - NOW!

WIN A TRIP TO THE EUROPEAN CUP FINAL

68

Thanks to Konami, you could win a trip with Jazza to the European Championship Final! All you have to do is turn to page 68 and examine the text printed on it and who knows? You could be the lucky one!

ANOTHER FINE COMPO 101

Want to win £500 worth of add-ons from Nuby? Well, turn to page 101 and enter the comp then.

MEGAMART

118

Have you ever wanted to get your greasy mitts on some cut-price console gear? Fancy letting MEAN MACHINES readers know about some important event? Do you want to start a long term literary relationship with someone? Well, check out the Megamart. It's all this and lots, lots more (so we're told).

PREVIEWS

124

So, you want to know about all the latest console releases before anyone else, eh? Well, check out the MEAN MACHINES previews section - the most informative, up-to-date lowdown on the latest games!

NEXT MONTH

120

MEAN MACHINES is so quick and up-to-date with everything in the consoles world that telling you what is going to be in next month's issue is impossible. So, instead, what we have here is a nice piece of artwork and some rubbish text.

I haven't got a lot to say this month, mainly because the office is boiling hot (we're in the middle of a heatwave) and can't be bothered to think of anything. Oh, except that we've got some unbelievable free gifts lined up for the Summer - and something very special happening soon. There'll be further announcements next month, so keep watching this space!

Our legal people once again have asked us to remind you that any copying, transmitting or reproduction of this magazine without the express permission of the publishers will result in legal action. And as a result you could lose a lot more than just your job, house, nest egg, girlfriend, dog and life...

COMPETITION RULES

EMAP Images employees or their immediate family aren't allowed to enter any of our comps, because it would be unfair if they were to do so. Everyone else is perfectly entitled to, everyone other than Dwayne Minton of West Wormwood and his relations. We hate him because once upon a time he rang us up and wasted a few seconds of our time...

JAZZA'S FINAL BIT

Wheee! I'm bored. So bored in fact, that I want you to entertain me. Write in with a funny and true anecdote about your life. The more amusing it is, the better the chance of you winning the Game Gear I'm willing to give to the sender of the most amusing story. Make your tale no more than 150 words and send it off to: THIS'LL MAKE YOUR CHIN SPIN JAZZA, MEAN MACHINES. PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

More supernatural malarkey as we print two pictures that irrefutably prove the existence of ghosts. First is the creepy apparition that appeared in the chair of MEGATECH Deputy Editor Mark Patterson. We've heard of ghost writers, but this is ridiculous! And then there's the truly frightening picture sent in by Ranjit Doroszkiewicz (eh?) from Manchester of a ghastly apparition playing on a ghostly Gameboy. Once again, if you've got any bizzare pics of ghosts, headless corpses or anything that's fun, yet strangely spooky, send 'em in to: OPEN THIS WITHOUT TAKING A DEEP BREATH AND YOU'RE LIKELY TO SPILL THE GRAVY IN YOUR PANTS, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON I ANE. LONDON, EC1R 3AU.

AND STILL

THEY COME...

Aaarggh! It's another ugly Welsh person. This time it's Rhys Cadwallader of Caerphilly, who looks like a retard's painting of a face on the backside of a rhino with diarrhoea.

Yes, here's another load of readers who reckon they can take a MEAN MACHINES insult! Can you? If so. write in to: WARNING: CONTAINED IN THIS ENVELOPE IS A PICTURE OF AN EXTREMELY UGLY AND REVOLTING PERSON, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU.

Wow! There IS life on other planets and you MEAN MACHINES readers have got the pictures to prove it! First of all is a picture that has confounded skeptics everywhere - a shot of an Imperial Star Cruiser snapped by Jaron Colley of Birmingham on his holidays in France! Then there's a top-notch shot of an X-Wing seen flying over Manchester, presumably on its way to intercept and shoot down the Star Cruiser seen in the previous picture. Geoffrey Hinkley of Dulwich, London also has a cracking shot of a saucer seen over his garden! Wowzer! And finally Paul Glancey of MEGATECH managed to grab a picture of a UFO flying past the church outside our office. If you have any more UFO snaps, send 'em in to: I'VE IDENTIFIED AND UNIDENTIFIED FLYING OBJET D'ART, MEAN MACHINES, PRIORY COURT 30-32 FARRINGDON LANE, LONDON, EC1R SAU.

We don't really know what's more revolting about this picture of Andrew Mulley of Cardiff - his disgusting, pasty moon face or the tasteless decor of the stinking pit which he's lying in.

JULIAN "NEVER GOT THERE" RIGNALL

"Like Rich, British Rail kindly gave me the most boring experience of my life. Stuck on a rush-hour train in the height of summer for three hours with absolutely nothing to amuse myself with except listening to fat, sweaty businessmen whining and stating the obvious is not what I'd call a fun time. And I paid £13.00 for the privilege. What a heap of

CURRENT FAVE GAMES: SUPER ALESTE. STREETFIGHTER II, PARODY

"British Rail were at the root of my most boring experience. A 40-minute rush-hour train journey was turned into two and three quarter hour nightmare when the train broke down. I was completely helpless and my portable CD ran out of power after an hour. I had to sit there and listen to all these middle-aged executives whingeing. It was

CURRENT FAVE GAMES: PARODY, STREETFIGHTER II

"I remember the time when I had to sit and listen to my brother's band, the Clodhoppers, practice for four hours. Not only were they particularly crap, but the hall they practiced in was stone cold arctic conditions and I had nothing to do at all except cover my ears and my nether regions to stop 'em from freezing off."

CURRENT FAVE GAMES: STREETFIGHTER II, SUPER ALESTE, CHUCK ROCK

"My most boring experience was when I went to see the Sergeant Pepper movie which starred the Bee Gees. I thought it would be like Grease, but in fact it was the most boring and awful film ever. Two hours of non-stop tedium! I fell asleep towards the end!"

CURRENT FAVE GAMES: STREETFIGHTER II

GARY "EN-GER-LAND" HARROD

"Last year, me, Jaz and Paul Rand from CVG went to the England Vs Turkey football match. We were all really excited because it was the first international we'd been to, and had been looking forward to it for weeks. After paying £25.00 each to get in we waiting for a veritable goal feast... and instead were treated to 90 minutes of absolutely crap football. I was bored out of my head by the time the final whistle blew."

CURRENT FAVE GAMES: STREETFIGHTER II. SUPER ALESTE, GIJOE

ROB "NOT VERY" BRIGHT

"When I first went on the dole I had to sit in Borehamwood DSS office for two hours before being seen to by a sad scrote behind six feet of armoured glass. Once he'd taken all my details from my date of birth to the length of the skids in my underpants I had to wait for a further hour before signing on. The saddest thing of all is that 3,000,000 have to do this every week. **CURRENT FAVE GAMES: LEMMINGS, SUPER** ALESTE, STREETFIGHTER II

Super NES owners spoiling for some one-on-one fisticuffs will no doubt soil their underwear with excitement when they hear about Battle Blaze.

This Swords and Sorcery style beat 'em up casts you as a barbarian out to rid the land of a series of horrific overlords. One player can face the might of the overlords, or perhaps face up to a mate in a two-player bout to the death!

In short, Battle Blaze is a sad, laughable excuse for a beat 'em up, with pathetic graphics and sound.

There are only three attack moves as well, making Battle Blaze grow very dull very quickly. So, avoid it at all costs.

CONSOLE CARRY CASES

Nuby, the carry case merchants, have released some more products which should appeal to anyone who enjoys carrying their consoles, or their carts about.

Look out for the Megadrive attache case. This fine item, retailing at £49.99, enables you to carry your Megadrive and some games about. With a bit of "structural alteration", it's also possible to fit in your power supply as well. Hurrah!

Super Extendo Cables (as they are known) are also available that enable you to extend the length of your joypad cables. Nuby have yet to announce a price for this invaluable piece of kit.

Also available are numerous accessories for the Gameboy, including carry cases, lights, holsters (!) and magnifiers!

If you fancy getting hold if some of this gear, check out your local console stockist like Boots or Dixons.

SUPER NES 32-MEG BOARDS

Rumours suggest that Nintendo are planning to revolutionise console gaming by introducing 32-meg games on a new cartridge system called the Memory Map. This means that games could have the potential to be four times the size of Super Mario IV! In fact, a 32-meg cartridge would have the memory capacity of four Amigas! We waited with bated breath...

SEGA LOCK-OUT CHIP SHOCK

Sega Europe have announced that forthcoming Megadrive titles are to include a security chip that makes it impossible to run import titles on a British machine, or official games on a Japanese model. The first game to be protected in this way is Artyon Senna's Super Monaco GP II, reviewed on page 20.

A similar system is used by Nintendo with their official UK Super NES system, and a converter has been developed to neutralise the protection. Enterprising importers will probably find a way around the new Sega protection too. We'll keep you posted.

SUPER SCOPE BUNDLE PACKAGE

Nintendo has launched a new Super NES bundle, incorporating the smash hit 16-bit machine along with the best Light Phaser available for a console - the Nintendo Super Scope. The price for this bundle is a bargain £169.99, as opposed to £149.99 for the stand-alone console.

If you fancy the looks of the Super Scope, check out page 96 for a definitive review of both the hardware and the bundled software.

Super NES owning scrolling shoot 'em up fans are likely to wet their pants in frenzied excitement when they play Super Aleste, available now as a Japanese import.

This vertically scrolling blaster is very reminiscent of Gunhed on the PC Engine, in that it's packed to the brim with baddies to kill with some of the greatest power-up weaponry yet seen on a console game!

YOU TO THE HEART OF THE ACTION

BEFORE YOU CAN SAY "SCHWARZKOPF".

One of the Middle East's craziest dictators has finally achieved nuclear capability and is threatening to zap anyone who stands in the way of his mad ambitions.

Without warning, the Madman invades a small, but very rich neighbouring Arab state and the U.S President assigns to you the 'covert' mission of piloting an Apache helicopter to neutralise his offensive capability.

In "Desert Strike" you'll need all the lightning reactions to cope with white hot action, plus the intelligence to plot a successful attack strategy.

You'll be in complete control of the action from a unique 3/4 top down perspective, flying 27 different missions including, rescuing POW's and 'human shields', defending oil fields and taking out SCUD missile launchers and nuclear reactor plants.

To help you negotiate the alien landscape and calculate the location of enemy armies and weaponry, you have an on-board battle map with satellite-generated data.

If you defeat and destroy the Madman's plans, the U.S. Government will want to reward you.

And who knows, you too may even get an honorary knighthood and a hero's nickname!

THE MAGIC IS BACK... N THE SUPER NES!

Ocean Software are getting well into the swing of their console development and are currently putting the finishing touches to one of their hottest movie licenses - Lethal Weapon!

The game allows players to take control of either Martin Riggs or Roger Murtaugh, each with their own special strengths and weaknesses which you must master in order to conquer the game. This game looks like being a really impressive platform shoot 'em up, with cute sprites (that bear little resemblance to the movie stars because of licensing difficulties) and non-stop action.

Released for the Super NES only, this looks like being a game to watch out for. Look out for more details and screenshots soon.

STAY OUT OF TROUBLE!

In last month's Megadrive versus Super NES article, we stated that Super NES game would be retailing at £45.00 and upwards. Happily, we can reveal that at the eleventh hour, Nintendo changed their minds, and that the cheapest Super NES titles now sell at £39.99 bringing them well into line with Megadrive titles.

Keep your eyes peeled for Robocop III on the Super NES. This fast, super-smooth arcade-style platform game bears quite a strong resemblance to the Data East Robocop coin-op. However, it features all-new stages based on the forthcoming movie, including a vertically scrolling shoot 'em up section where Robo takes to the skies with his jet-pack and blows airborne foes into oblivion. As you can see from the screenshots, Robocop III is looking "right tasty" as we like to say. Stay with MEAN MACHINES for the latest

GAMESMASTER RETURNS!

Gamesmaster, the cult TV games programme, is reappearing on our screens in the autumn following the runaway success of its premiere series on Channel Four.

The show, with its average viewing figures of around 3 million, is to run for 26 episodes with the possibility of a fab one hour special around Christmas time. Once again, Dominik Diamond and Patrick Moore are presenting the series.

Gamesmaster is being filmed as we speak and the producers are anxious to get hold of people of all ages to appear as contestants, reviewers and to enter Gamesmaster's "Consoletation Zone".

To apply for your five minutes of TV stardom write off to GAMESMASTER STARDOM, PO Box 91, London, E14 9GT. You need to include details of your favourite games (and maybe highscores), background details (age, phone number and address) and a recent photograph.

Anyone wanting tickets to watch one of Gamesmaster's live challenges should write to the same address asking for details.

GREMLIN GOODIES!

Gremlin are currently hard at work on a veritable goodie bag of spanking new console titles.

First is Nigel Mansell's Grand Prix, currently being developed on NES and Super NES. As the title suggests, it's a racing game in which you take the wheel of the current Grand Prix Championship leader's Williams Renault and race an entire Grand Prix season. Options allow you to adjust the car's parameters to suit the course and there's also a practice mode. From what we've seen of it, it's looking extraordinarily good, with one of the best road routines seen on console! The game is out in September and we'll be bringing you further exclusive reports over the Summer.

Another racing game currently being developed by Gremlin for Electronic Arts is Lotus Challenge, based on the massively successful Amiga game, Lotus Challenge II. This one's for the Megadrive and once again, the title explains it all, with the player being given the opportunity to drive either a Lotus Esprit or Elan like a nutter around a variety of circuits. There's single and split screen simultaneous two-player options, plus a variety of championship modes. The early demo we saw of the game is looking very tasty, and if the end result is anything like the Amiga version it could well be the greatest Megadrive racing game yet seen!

Finally, Utopia is another up 'n' coming Super NES title. It's a Populous-style game that lets you take control of a massive space colony and do battle with alien invaders. It's a complicated game, but offers loads of depth and literally months of play. Once again, reports on this highly original game will be appearing throughout the summer.

Sensible Software's fab Populous-style God game, Mega-Lo-Mania is heading for the Megadrive courtesy of Virgin Games. This amazingly successful Amiga game is being coded by Sensible Software as we speak, and promises to be even more entertaining and involving than the original game. We'll be previewing the game in an up-coming issue, but in the meanwhile, feast your eyes on these exclusive screenshots!

MEGADRIVE

ollowing the phenomenal success of the original Megadrive conversion of the Super Monaco Grand Prix coin-op, a console-only follow up has now been designed.

Once again you are thrown into the hot seat as a hopeful unknown on the world racing scene aiming for global victory by the end of the season. However, you are not alone in your quest for world tarmac domination. That wily old racer, Ayrton Senna, from whom the game is licensed is having a crack at yet another global title and doesn't want any race virgins standing in his way. Thus he has singled you out as his rival to publicly ridicule your failures and generally make you look like an utter dimwit. Can you reverse the compliment by dusting Ayrton's monkey exhaust pipe?

Racing thrills and spills abound.

The man himself briefs the player.

- Rear-end rubber action in evidence.
- Still more motor fun and frolics.

Exciting straight frivolity here.

REVIEW

SEEING YOUR GP

If you'd rather forget about this personal vendetta between you and the boy Senna, there is a world championship to be won. You compete against fifteen other drivers across sixteen gruelling courses - each based on a real-life circuit. As in a proper GP, points are awarded according to your finishing position in each race. At the end of the season he with the most points wins. This stops you being eliminated from the competition every time you lose a race, although you may find yourself consistently at the bottom of the table.

DNE-ON-ONE RUBBER

Such is Ayrton's desire to have you on a slab that he has actually set up a special tournament for the two of you. Ayrton has selected his three favourite courses from around the world and challenged you to a one-on-one series of races upon them. Beat Ayrton across two or more of these and his head should hang in the shame of defeat.

COMMENT

It must be said that great though this is, it's far too much like the original Super Monaco GP for its own good. The programmers have obviously used large chunks of the original Super Monaco GP program and simply added a few extra features. The in-game graphics are virtually identical, it plays in exactly the same way and even the sound is very similar indeed. When

JULIAN you consider what could have been done to the game - new graphics, an F1 Exhaust Heat-style car setup system, record tables, maybe even a split screen two-player mode - it's painfully obvious that Ayrton Senna's Super Monaco GP II is an opportunity missed in a big way. At the end of the day, it's a fun and exciting race game, one of the best available on the Megadrive, but it's definitely nowhere near different enough to be worth buying if you've already got Super Monaco GP. If you haven't, though, check it out.

Despite being your rival, before every race, Ayrton

himself imparts to you some information and advice

on the course awaiting you. This might be something utterly useless like "I designed this course for go-carts. I look forward to seeing my son race on it someday." Or it could be much needed words of wisdom about which corners to be wary of and where to change gear.

same tracks, the same graphics and pretty much the same gameplay. Herein lies the problem with Super Monaco II. Although there are some new tracks and the Senna GP option, there really isn't much difference between this and the original. In fact the Super Challenge option which appeared in the first game has been left out! That's not to say Super Monaco II is a bad game. because it's really very good. The problem is if you own the original, there's nothing here which would warrant the extra expense of buying the follow-up. if you don't have the first title this might be worth a look, but to be quite honest the original provided better value for money.

A very good racing game - but if you've already got Super Monaco GP, this simply isn't different enough to be worth buying.

onaco is famous for two things - the motor racing Grand Prix and Princess Stephanie. Interestingly enough, a game involving Princess Stephanie doesn't exist, so we'll just have to settle for another game about the Grand Prix.

The sequel to Super Monaco GP, cleverly named Ayrton Senna's Super Monaco GP II, comes with some dazzling new features. There's a construction option which gives the driver the chance to build the kind of car that suits him. Any self-respecting racing driver can tell you that in wet weather hard grip tyres are essential. The gears, wings and transmission can also be changed. Once the car is set, qualifying for pole position is the next priority. Getting a good lap time improves your grid position, giving the driver a greater chance of being first past the chequered flag.

If there is one man who is more likely to get his hands on the cup, it's Ayrton Senna, who endorses the game and offers advice on how to tackle the exhausting circuits. Total concentration is necessary to successfully negotiate the bends and take full advantage of the straights. But if Senna does win there is one consolation - he's being thrashed by Mansell this season!

When you feel you're ready to challenge the nifty Brazilian, it's time to enter the World Championship. There are 16 circuits which span the globe, and getting used to each one is important. It is possible to go straight into a race but it means starting in last position on the grid. If the qualify option is chosen the lap times of the driver are recorded. The better they are the better the arid position

QUICK FIT

Get those spanners out because it's time to construct the car. The procedures are fairly simple so don't worry about not being mechanically minded. Tyres are probably the most important part of the car - the weather dictates which type to use. Another dilemma is whether to use manual or automatic gear change. Manual gear change takes more time to master but ultimately vields better results

In the World Championship consistently good performances are necessary to be in with a chance of winning. Your placing is displayed in the centre of the screen. First place earns the driver ten points, and second place earns six. Beware when passing other drivers because if there is a collision valuable seconds are lost. Taking the correct approach when overtaking or negotiating bends requires fine judgement.

COMMENT

hugs along like a knackered

still is the jarring, grating sound. It's truly dire and had me reaching for the volume knob within a few seconds. Finally, the challenge level is very low. It takes very little practice to master how the car handles, and once you've got used to banging it down one gear for a 90 degree right and two gears for anything tighter and then changing up as you exit the bend you'll never crash and win all the time. If you're a speed freak after some excitement, check out the original Super Monaco GP. Chase HQ, Battle Outrun, Outrun... anything, really, except this hopeless travesty.

COMMENT

First impressions are promising. The range of options is more impressive than the Megadrive version, and although the idea of constructing the car is nothing new, it's still a useful option, as is Senna's advice corner. Once I started racing though it was a different story. The speedometer might claim the car is doing 300 kph, but I found myself expecting the vicar to come wheeling past on

his bicycle. Basically, the whole concept of speed is unrealistic. Some of the blame for this can be directed at the graphics which, while not disastrous, do little to enhance the Formula One atmosphere. The music and sound effects contribute nothing to the Grand Prix experience either - the engine sounds like psychotic hair-dryer! Super Monaco GP II is a big disappointment and isn't a game I can recommend at all - even to the most inept of drivers.

HUNT THE BRAZILIAN

In the top right of the screen is a map of the entire course. It plots where you are and where Senna is. Although Senna gives advice on how to take advantage of the course, regular glances at the map are important in order to prepare for tight bends and chicanes. Every Grand Prix tends to have five or six laps so a mistake could snatch defeat from the jaws of victory.

The spaceship had come from afar. Many millions of years had it travelled, its inhabitants contained in cryogenic chambers. When they awoke, only three had survived, but they nevertheless prepared themselves as they neared their destination - Earth. When they landed, the three walked out of the craft and instantly melted. For they were Snowmen from the planet Fre-eze and it was ruddy hot. Meanwhile across town YOB was answering letters as he normally does at this time of month. WRITES...

Dear YOB.

Last month you made a big mistake related to the Wondermega. You said that the picture was an artist's impression. If someone drew that I'll smack myself around the face ten times with a large haddock.

Why did you bring out that book with reviews from issues 1-5 in it? Most people have already got these issues and therefore won't buy it, doh!

YOB, you are so thick that you

went past Texas DIY store and thought you were in America! James O'Connel, Horley, Surrey YOB: You'd better start smacking yourself in the face with a large haddock, because it WAS an artist's impression - it was drawn up on a computer. **Doh! MEAN MACHINES issue 1** sold around 28,000 copies. By issue 5 we were selling around

50,000 copies. These days we sell around 110,000 copies per issue - that means (because you're obviously too stupid to work it out for yourself) that there are now 60,000 MEAN MACHINES readers who never saw any of those issues. James O'Connel, you are so thick if you found a dog turd on the floor you'd eat it because you'd

think it was a Mars bar.

MORE DRIVEL

Dear YOB

Firstly we think your magazine is excellent, keep up the good work. But now onto a serious matter, recently while working in our lab, we came up with a great invention, the Super Drive Convertor. this

A somewhat morbid effort from Alex Bampton.

ingenious device allows you to play SNES games on your Megadrive and we are now working on a similar device that allows you to play Megadrive games on your SNES. We think they will sell brilliantly and we will send you one as soon as we come up with the finished product.

On our recent visit to the very chilly but scenic south pole, we came across a pair of stinking, steaming, sweaty undies (maybe they are yours?) in which we discovered a 64-Bit handheld made by the leading company Cinos (!?). It came with a vast variety of games which included

the likes of: James Pond 3, Toe Jam and Earl 2 and yes, even we couldn't believe it, Sonic versus Mario

Bob and the scientific men, Huddersfield

YOB: It's definitely one of those months, isn't it. All I've had so far is letters from idiots, imbeciles, morons and twerps, and now we've sunk even lower with this mindless drivel. Have people lost the art of decent letterwriting? Has anyone got anything interesting to say?

ON THE ROCKS ALREADY!

Dear YOB

I wonder if you can help me make a very important decision which could affect the rest of my life. I have recently sold my Amiga and am currently waiting for the SNES to be launched so I can purchase it with the money raised from my Amiga.

A fine effort from Gideon Reid.

The trouble is that my girlfriend thinks this money should go towards our future life together and threatens to leave me if I buy one. I am staining my pants with worry, is it lonely days with my SNES or married bliss? Paul Colgate, Staines, Middx

YOB: Hmmm. Well, if your girlfriend is that tight, leave her.

A QUICK **ONE-TWO**

Dear Meanest YOB I don't know why I'm writing to you but I just want to make a few points clear.

1. Last month I had the misfortune to read Total, the Nintendo mag. When I read an article which stated that Sonic might be coming out on the SNES. Surely they're wrong

2. I have a dumb friend called Grant who believes that the IBM PC has better graphics than the Megadrive. Is this true or is he as stupid as a mental baboon? Peter Hersee, Rugby YOB: Yes times two.

WOW! SOMEONE **INTELLIGENT!**

Dear YOB

I'm tired of turning your fab pages every month and reading one or two letters from complete idiots. Why on earth do people say that **MEAN MACHINES prefer** Nintendo games and give them good reviews, don't they know that you gauge NES games by other NES games. If one NES game is given a favourable review it's because it's better than most NES

games, didn't anyone see the 9% Road Fighter review? And why oh why do people keep comparing consoles and computers can't they just buy the one they prefer? I think you should insult people for being complete pillocks and for being stupid enough to insult you, why bother insulting someone who can answer your questions? Just to finish off, Why don't you give away a SNES for the star letter? I wouldn't complain.

Justin Jeffries, Streatham, London YOB: What you say is true. And I do insult people who are complete pillocks, and those who aren't, such as yourself. remain unscathed. Should someone send in the best letter of the month and want a Super NES instead of £150.00 worth of

software, I'd be more than happy to send them one.

A brilliant montage based on Street Fighter II.

MATTHEW STAUNT. LEICESTER: Get a job you lazy git and buy it yourself.

BEN CULVERHOUSE, LANGFORD: You're so utterly pathetic and feeble that you're not even worth insulting.

PETER BORG, CLAPHAM: You can't draw and you can't write. What kind of remedial are you?

ANDREW GALVIN: Don't then.

HARRY LEDWITH, OXFORD: Don't wait for us to ask you, send one in immediately.

KC BAKER, WEST WATFORD: You ARE a little teapot and the men in white coats should be with you soon.

LEE POVEY, CLAPHAM: Nothing at all you retarded runt.

TOBY HUDSON, BATH: I bet you're best mates with Jeremy

N PATEL, BOLTON: Don't give up your day job.

It's as simple as that...

SEE AN OLD GX4000...

Dear Jazza

Please could you answer a few questions with your extreme intellect:

- 1. I have seen a picture of a device called a Gameboy plus which you attatch to your Gameboy and it enables you to use six fire buttons. I am eager to know when it will be released
 - 2. How much will it cost?
- 3. I have also seen a picture of Streetfighter 2 on the Gameboy and would like to know when it will

be released.

4. Some of the kids at our school reckon that Gameboys are crud because they are not in colour, please put them straight about this brill machine. Ian Herries, Felixtowe, Suffolk JAZ: 1, 2 and 3. That's CVG's April fool you're talking about Suckaaaaaaah! 4. Have those idiots actually played them?

THAT'S YOURS, THAT IS

Dear Jazza

with regards to the SNES, I have a few questions which are puzzling

- 1. Will there ever be a keyboard and/or disk drive for the SNES? I ask this because the machine has great potential in the graphics and sound departments.
- 2. If Electronic Arts do not start making excellent games for the SNES then I will go mad because they are definitely the best programming team around. So please Electronic Arts, start making SNES games and make this SNES owner a happier one.
- 3. Finally, will my favourite arcade blast, Metal Hawk, be released on this wonderful machine?

C Wilson, Tunbridge Wells, Kent

JAZ: 1. Possibly in the future we'll let you know when we have more information. 2. Well, EA, you've heard the man - get on with it! 3. It would make an ideal conversion, but at the moment there are no plans to release it.

IT'S YOUR **FAVOURITE** CONSOLE

Dear Jaz

With the likes of Populous, Sim City and soon, Powermonger on console, will we ever see games like Mega-lo-mania or Space Crusade converted from computer? Also, will there be an add-on for the SNES that will allow you to play NES games? Rob Collier, Leominster, Herefordshire

JAZ: Mega-lo-mania might possibly appear, and Innovation are working on a NES/SNES adaptor as we speak.

SEE ROAD FIGHTER...

Jazza

Please answer these questions as it is essential that I know them:

- 1. It mentions at the end of Turrican 2 that Super Turrican is going to be released on the SNES, is this true?
- 2. In ACE, the computer magazine, it says that Mario 5 is going to be packed full of all the previous Mario games, all of this crammed into a SNES cartridge. ACE have been known to lie, so could you set the record straight?
- 3. WWF looks and sounds fantastic, but all the other games like Gameboy WWF and Wrestling Challenge have been easy to complete. Wrestlefest is even worse, I completed Royal Rumble on my second go, so is Super WWF easy to complete?
- 4. Just one more thing, tell my Mother and Father to get me a

SNES for my birthday, I have been working hard to get one.

Ben Williams, Douglas Isle of Man

JAZ: 1. Yes - we'll have a report on it in the Summer. 2. We've heard nothing about it as yet, so I'd treat it with a lot of skepticism. 3. Yep. 4. No.

YOU WROTE THAT,

Dear Jaz

I own a Megadrive and am thinking of upgrading it to a SNES when it comes out. Please could you answer these questions before I take this big step:

- 1. Does the UK PAL SNES heat up when you have been playing for a while like the Japanese one does?
- 2. Will the UK SNES games cost £35 like it said on Gamesmaster?
- 3. If I get a SCART SNES will it connect up to my PAL television with a SCART lead? If not, what does a SCART lead do?
- 4. Will all the great US and Japanese SNES games get simultaneous release in the UK? Phil Dalton, Driffield, North Humberside

JAZ: 1. Naaah. 2. No, £45.00. 3. No. SCARTs are higher quality than PAL. 4. No.

YOU LOVE THAT GAME

Dear Jazza

I have just taken time out from writing my final year project, which will hopefully guarantee my BSc degree (not all console users are 12 year old kids), to ask you a few questions about the SNES.

1. Why is it that Nintendo have made the official British SNES non-compatible with either the US or Japanese models? When the US SNES was released it was only the size of the carts that was different, but with the British model they have included a protection chip in both the machine and the cart. This stops British machines using imported software and vice versa. Have Nintendo done this to spite all the people who bought the Famicom before it's official release, when all we were doing was supporting a machine that we felt was superior over the available competition. The main answer I require is will there be a convertor made that will be able to tackle the problem of the protection chip?

- 2. Have Nintendo pencilled in a release date for the CD-ROM system, and will the system be compatible with all the machines?
- 3. Do you know if there will be a four-player adaptor or machine link cable for the SNES? And if so when?

Matthew Birkin, Newthorpe, Notts

JAZ: 1. There are loads of companies working on them as we speak, and I'm sure that one will inevitably appear. 2. No and no. 3. Not at the moment.

YOU KNOW A FLATULENT BABOON...

Dear Jazza

Could you please answer these questions as I am desperate to know and if you don't answer I'll be upset!

- 1. Is the Simpsons on the SNES the same as the arcade game, and is it any good?
- 2. Is the CD for the SNES better than the Mega CD?
- 3. Are the games Midnight Wanderers, Rad Mobile and Fatal Fury coming out on the SNES?
- 4. Are there going to be any more racing games? I have heard

THAT'S YOUR MOTHER, THAT IS

Dear Jaz

I am writing to complain about your lack of reviews of software for the Game Gear. Please could you answer some questions to compensate?

- 1. Are any of the following games coming out for the Game Gear: Tetris, Revenge of Shinobi, Bart versus the Space Mutants and the Turtles coin-op?
- 2. Can you still get Punch Out for the UK NES?
- 3. Is Mario 4 going to come out on the NES?
- 4. Is it true that there is a game called Super Wonder Boy for the Game Gear?

Alex Brown, London JAZ: 1. All no. 2. Yes - it's great. 3. No 4. Yes.

IT'S YOUR GIRLFRIEND

Dear Jazza

Me and my sister have a Japanese Megadrive and we spend many sleepless nights playing with it together. We hope you don't mind us asking a few questions.

How do you take
 photographs of the Bosses on

that Hyperzone is going to appear is it any good?

- 5. Are there going to be any Disney games on the SNES?
- 6. Are there going to be any art programs on the SNES?

 Alex Healy, Broad Green, Liverpool JAZ: 1. No and I don't know because I haven't played the finished version yet. 2. From what I've heard, yes. 3. No. 4. Hyperzone is crap. 5. No. 6. I doubt it console art packages are rather pointless.

Spiderman?

- 2. When will the Megadrive be officially released in the UK?
- 3. Will there be a TV tuner for the Gameboy? As I have heard that there is one coming out for the Game Gear.
- 4. Is there a convertor for the Megadrive which enables it to play SNES games? If so how much does it cost?

Please answer these questions as we are new to consoles and we haven't a great deal of knowledge about them

Daniel and Louise Riley, Loughton, Essex

JAZ: 1. With a ruddy expensive camera and loads of gamesplaying skill. 2. It has been for 18 months you dozy nits. 3. No. 4. No.

SORRY, I'M TOO BUSY ON MY SNES...

Dear Mr Jazza

This is my third letter to you. If you print this letter in the totally skill pages of MEAN MACHINES I will persuade my big sister to give you a big wet frenchy.

- Is Lemmings appearing on the Game Boy?
- 2. Are there plans for an NBA five on five?

game be in the shops?

4. In your opinion, what are the best Mega Drive sports and racing

Neil Rae, Uphall, Scotland JAZ: 1. Yes - later this summer. 2. No. 3. Later this year. 4. John Madden's 92 and Road Rash.

IT'S MY SNES

Dear Jaz

Hello mate, please answer these questions for me:

- 1. Will the original Star Wars shoot 'em up or the awesome Chase HQ ever be released for the **SNES** or Megadrive?
- 2. The Megadrive's Streets of Rage has some excellent music. Will the SNES ever lay eggs of this standard?
- 3. When the Mega-CD or SNES-CD finally come out of hiding will they create games with real music like you can hear on a normal CD?
- 4. Please supply me with the Chairman of Nintendo's personal address, I've got lots of questions for him.
- 5. Finally, will we all be brought together one day in a brothel of love with a luxurious soapy orgy of tenderness and joy? If not, why?

I leave these questions with you in the name of Jesus Christ, amen.

An Evil person from Norwich in Norfolk

JAZ: 1. Nope. 2. Eh? 3. Yep. 4. No. Anyway he wouldn't be able to understand them because he can't read or speak English. 5. Only if you died.

AND YOU **CAN'T PLAY** ON IT

Dear Jaz

I've been reading your mag for ages and I think it is excellent. I have a few questions for you:

- 1. I purchased a SCART lead from my local Virgin Megastore. When I got home I connected it to my Official Megadrive and then to my TV with it's SCART/Euro connector lead. After half an hour of hell I discovered that I couldn't get a picture at all. I tried to tune it through the video but to no success. Please help me.
- 2. When will Speedball 2 be on the shelves?
- 3. It has been said that Electronic Arts are working in a game called Space Hulk. Do you know anything about this? If so, will it be out on the Megadrive?
- 4. When will Aliens 3 be available? Alan Robertson, Dumbarton, Scotland

JAZ: 1. Sounds like one or the other is shagged. 2. It's out now. 3. It's one of those massive

Buck Rogers type games. There'll be more news about it later on this year, 4. Around October/November time.

I DON'T CARE...

Dear Jaz

Please answer my questions, they are really important to me.

- 1. Once upon a time I was playing on John Madden '92. I chose a play action and passed it to the quarterback, he mysteriously shrunk to 1/4 of his normal size and turned into the referee(I know it sounds crazy but it's true). Please explain what happened.
- 2. I'm selling my Megadrive and getting a SNES in a few days. Do you know if It Came From The Desert or Ant Heads are coming out for it? And if so, when?
- 3. When will Super Contra be officially released in the UK?
- 4. In issue 16 you reviewed Mario Lemieux Ice Hockey. It Showed three players but they were wearing roller skates, and instead of a puck there is a red ball I've never tried Ice Hockey with

roller boots on, sounds fun! Gareth Davies, Fulwell, Sunderland JAZ: 1. The program went wrong and crashed. It occasionally happens, so don't worry about it. 2. It's coming out on PC Engine CD-ROM I'm afraid. 3. Not for yonks. 4. Yuk!

'COS IT'S YOURS

Dearest Jazza

About half a year ago I bought Snake Rattle & Roll for my NES. I was amazed by the quality of it's gameplay. After months of hard practicing I finally completed it. I watched the end of game sequence and it indicated there would be a sequel called Snakes In Space, I was absolutely delighted but I've noticed you haven't mentioned anything about it. Have you any information on this game? Please, please print this letter because I'm the biggest Rattle & Roll fan.

Jake "The Snake" Roberts, Stone Mountain, Georgia, USA JAZ: It's still being programmed and won't appear for another 12 months or so.

I THINK YOUR SNES IS **SMELLY**

Dear Jazza

Could you answer some questions about the Mega CD please?

- 1. Is it true that the official Mega-CD will not be released until early 1993?
- 2. If so, why? Because I think it is unfair on official Megadrive
- 3. Will Streetfighter 2 or '92 be coming out for the Mega-CD?

Because the complete guide to Megadrive magazine showed some early screenshots.

- 4. If so, when?
- 5. Why haven't you previewed CD games like Dark Wizard and Aisle Lord? Because another mag has and they look brill! Just what Mega CD players are waiting for. A McCandlish, Shadwell, Leeds JAZ: 1. It might well appear before Xmas. 2. So what? There's nothing to play on it anyway! 3 and 4. Not that I know of. 5. You can't play them 'cos they're all in Japanese.

Matthew Martin from Lowestoft in Suffolk has sent in this cunning tip to avoid the sensor room on level five of this excellent RPG

First of all, buy the shrink potion and return to the first room. Drink the potion and wait for it to wear off. Now wait until you die. After dying, you will continue in the room after the sensor room. The egg you're carrying will hatch. Avoid the slime and drop the bait. Walk away and pick it up again.

Aha! Here's a useful tip to get some extra lives on this extremely difficult Sega title now officially withdrawn from the shops.

First, fight your way through the first part and locate the 1-UP on the top set of

you get to a

TIPS

Here's an interesting tip for this groovy wrestling game, sent in by the person known as Jamie Matthews, who hails from Harefield in Middlesex.

If you have an arcade power stick (or any Megadrive autofire pad), turn on the autofire. When you grapple you should have no problems in dealing with your opponent! Just keep the button for your desired move pressed down and you should be away!

TIPS

RESCUE RANGERS

Pete Greathead from County Durham has sent in this extremely devious set of tips that should help you defeat the first few end-of-level bosses in this excellent platform romp.

CLEANING MACHINE BOSS

Run for the red ball and pick it up and scarper over to the right hand-side of the screen. When the lightning appears, jump over it and run to the middle of the screen and shoot the red ball up to the green ball on the machine. The machine will flash. Dodge the falling ball and run to the right of the screen. Now just repeat the process.

THE OWL

Get the red ball, collect it and dodge the owl's feathers. Wait until he comes back down and then throw the ball at him, Dodge the ball as it falls, collect it and repeat the process.

THE UFO

Easy! Just dodge the little green men that are propelled towards you and collect the ball. When the UFO is above you, press **UP** and **B** to hit it. Continue this plan of action to defeat this extra terrestrial nasty.

THE BONUS GAME

The best way to deal with this game is to start getting the boxes from the left side of the screen. That makes it possible to get the extra life from the top box.

Here's what could be described as a very strange tip, sent into the MEAN MACHINES office by Richard Lee from Ascot.

After completing the game, press the A button to return to the title screen. Now press UP, UP, DOWN, DOWN, LEFT, RIGHT, LEFT, RIGHT, B, A and START. You'll begin the game with 28 Magic Wings. Cool!

Here are a number of useful hints for this good arcade adventure game based on the funniest TV show around at the moment.

- 1. Stand outside the cinema until the timer reads 400. A kid should come out wearing purple. Spray him.
- 2. Use the 'phone and Moe from Moe's Tavern should chase you. Again, spray him.
- 3. Buy the whistle and when you get to the end of the retirement home, use it and Grandpa Simpson should give some cash.
- 4. On level two, when you get to the floating platforms, jump on to the second one three times. It will carry you across the level. On your way down jump diagonally right to receive invincibility!
- 5. On level three, use the magnet from level one on the wheel of fortune and you'll automatically win.
- 6. When you get to the big Krusty the Klown face, jump up into his mouth and you are teleported to a long corridor packed with coins. Yeah!

The mysteriously named D Towers sent in these groovy tips to liven up your WWF matches.

When you're playing a tag match or survivor series press **SELECT** and **A**. Your partner will jump into the ring and help you kick the cack out of your opponent.

Pressing SELECT and B makes your partner walk around the outside of the ring and slap your opponent's partner around.

Hold down SELECT and A and B to make your partner climb the ropes and jumping into the ring, laying into your opponent.

This should enable you to get much more fun from this game, especially in two-player mode!

SUPER NES

In two-player mode, when one player has died, he can trade in his smart bombs for extra lives by using the red button on his joypad.

SUPER MARIO BROS IV

We've had a couple of irate 'phone callers, whingeing because our Super Tennis tips are no good for the official UK version of the game. Check out this little tip courtesy of Richard Robinson from Scarborough.

On the player select screen, press the LEFT button five times, then the X button once, then press RIGHT seven times and then press the X button on controller two.

The music should change telling you that the cheat has been installed. Now, when you select a player, he will have the best possible abilities available! So now you should be able to beat any of the computers players, even if you choose the worst woman participant! Yowzers!

Jonathon Carter, amongst others, came up with a decent tip for perhaps the greatest game ever!

After completing Forest of Illusion IV, try the next few levels and if you are running out of lives, go back to Forest of Illusion IV and nick the 1-UP off the Koopa in the cloud. Press START and SELECT, which takes you back to the map. Keep doing this to stock up on your lives!

There are a number of other little "cheats" like this found within the game.

However, you can only do this as

long as the other player is still in

the game, so be guick!

THE ADDAMS FAMILY

"Hi!" writes Kieron Chapman from Cannock. "Here are a few tips for The Addams Family on the Super NES."

 On the continue screen, go to the extreme left, passing the continue door where four lives are yours for the taking.

2. Wait until the game enters DEMO MODE and wait for Gomez to pick up a power-up. Start the game at this point and you will begin carrying the same power-up! Hurrah!

3. For anyone who's dying to see the last level, just enter BLS1T as the password. As an added bonus, you'll get five energy hearts to help you out.

4. This code (from Andrew Guy, who hails from Stonnal) is especially useful. Type IIII (if that doesn't work try 1111) for 100 lives!

SUPER EDF

Thanks to Mr Unknown, you too can sample a different intro to the sad shambles that is Super EDF. Just turn the machine off and hold down UP and START when you power-up your Super NES.

Also, to become invincible (which isn't really required because this game is so ridiculously simple) pause the game and press A, B, X, Y, L, R, UP, DOWN, LEFT and RIGHT. Unpause the game and you should be indestructible.

THE HUNT FOR

Here's an invaluable little tip, sent in by tipster extraordinaire, Robert Cooper from Dudley. This amazing cheat enables you to start the game with a massive 25 submarines!

On the map screen, press A and B at the same time and follow that up by holding down UP and then DOWN. Hey presto! A large amount of submarines are yours for the wasting.

SKATE OR DIE: TOUR DE THRA

If, for some strange reason, you wish to get to some o the later levels of this skateboarding game, examine the following codes sent to our humble office by Paul Elmore

LEVEL ONE: GNBF LEVEL TWO: MTGP LEVEL THREE: PVFS LEVEL FOUR: FVCH LEVEL FIVE: BXHN LEVEL SIX: GFTQ LEVEL SEVEN: JZWC

Paul Elmore sent in loads of juicy little tip-bits this month, including this fab cheat that grants you invincibility on this very difficult game.

On the title screen, press LEFT, UP, RIGHT, UP. LEFT, LEFT, UP, RIGHT, UP, LEFT, UP, LEFT and START. The cheat should now become active, making it a doddle to finish off the game

It's that man again, Paul Elmore! This tip for the classic Konami platform game enables you to get into a secret room and plunder its many treasures. On the first level, go all the way up the fifth rope and you should enter a secret room! Easy, or what?

Crikey! Is Paul Elmore some kind of Gameboy genius or something? Check out this novel level select cheat for this cool game.

Wait until the music on the title screen has finished. Now hold down A, B and press them all down five times. Now you will start to hear musical tones. After the first one, press START to begin level one. Or if you prefer, press the button after the second tone to enter level two. Alternatively, just let the tones go on until you feel like starting a really high level and press START. Amazing, eh?

TERMINATOR 2 JUDGMENT DAY

Once again, it's that man Paul Elmore with some more excellent Gameboy tips and codes. Try out these for the brilliant platform romp, Bubble Bobble

4LL1 **IGBF HTB3** K₂B_J VLT1 VLT3

This game has prompted a couple of games players to send in their stuff. First of all, Marc J Gilbert from Newark reckons that you should hold down SELECT during play to slow the action down. This especially comes in handy during the reprogramming levels.

Here are some excellent tips to help you get through the first four levels of Acclaim's cool game, supplied by Paul Moore from Danbury Common in Essex.

LEVEL ONE

Shoot the beacons in this order: fourth, first, fifth, second, third.

LEVEL TWO

At the end of this level, jump onto the middle platform Stand in front of the door and press UP.

LEVEL THREE

This is simple. Just re-program all of the readouts to

LEVEL FOUR

On this level, drive along the top of the screen until the T-1000 appears. You skip all of the obstacles that way.

If you're a Super NES owner into a little bit of beat 'em up action, you could do a lot worse than check out Ranma Nibunnoighi 1/2 - a one-on-one combat game that could be described as a sort of cut-down version of Street Fighter II with its own inimitable graphic style. These tips were sent in by Mike Moore from Hull and they should help out anyone who fancies mastering each character. Read on...

Sometimes a simple attack amidst many more complex moves pays off.

RANGE ATTACK: Fireball.

This character is a good all-rounder who is able to execute a double jump with ease. This is especially handy for jumping behind your opponents and then throwing them, a cunning tactic indeed!

MAGIC ATTACK: Spin punch. SPECIAL ATTACK: Laser beam. RANGE ATTACK: None

Ranma's male counterpart has all the skills of your male pal, but is a bit short and can duck under fireballs. She can also jump away from her opponent after a flying kick. Ranma is speedier than the male counterpart, but doesn't hit quite as hard.

MAGIC ATTACK: Spin punch. SPECIAL ATTACK: Laser beam. RANGE ATTACK: None.

He's also known as the Man with the Stick - for obvious reasons. He is a good characters for beginners to start with, but any character with a double jump can get in close and dust his monkey ass (preferably by throwing him). He cannot throw as he uses both hands using his stick.

MAGIC ATTACK: Ground lightning. SPECIAL ATTACK: Mini-earthquake. RANGE ATTACK: Mini-earthquake.

КОНСНОН

With his skateboard and loud shirt, this radical dude is a deadly opponent. Once you've mastered his many different forms of offense, you will be difficult to defeat. His only real weakness is his slow speed. The best tactic is to use flying kicks against him.

MAGIC ATTACK: Coconut bombs.

SPECIAL ATTACK: None.

RANGE ATTACKS: Flying lobsters, bombs.

KODACHI

The leotarded wonder is very fast, with many tricks up her leotard to watch out for. Her range attacks are unparalled, but she is pretty simple to defeat in close quarters. Press PUNCH and UP to make use of the best range attack in the whole game.

MAGIC ATTACK: Jump spin. SPECIAL ATTACK: Killer roses. RANGE ATTACKS: Bouncing ball, ribbon laser, stick.

The bitter taste of defeat as Genma defeats the male version of Ranma. Genma rubs salt in the wound by changing into a panda (?).

ROYHGA

The last opponent in the one-player game is perhaps the deadliest. His power punches are almost twice as effective as any other character's and his fireball powers are second to none. Pressing PUNCH very quickly unleashes a deadly explosive punch. Very impressive.

MAGIC ATTACK: Fireball.
SPECIAL ATTACK: Ground shaker.
RANGE ATTACKS: Fireball.

SUPER NES

SHAMPOO

She may look helpless, but she can kick the excrement out of anyone given half a chance. She has an evil double jump kick just like Ranma's, which is useful for jumping in, attacking and then retreating quickly. She's fast and deadly, but has no range weapon. Exploit this as the weakness that it is.

MAGIC ATTACK: Spin punch. SPECIAL ATTACK: Running charge.

RANGE ATTACKS: None.

TEN USEFUL HINTS

These ten useful hints should improve your Ranma combat style immensely. Check them out...

- For two-player games, try each character out to see which suits your playing style. Always have a second choice in case your mate pinches your favourite player.
- 2. Throwing your opponent whenever possible is a good tip. This is the most powerful type of move.
- Don't just rely on long range weapons or attacks, as any half decent player will then be able to thrash you.
- Use the two-player mode on your own to master each character's moves.
- 5. Remember that if you block for too long, your opponent can throw you, but if he gets too close, you can throw him!
- A good defence is always instrumental in order to be victorious.
- 7. It's sometimes possible to get new attack moves by using directions in conjuction with the attack buttons.
- 8. Be careful. In one-player mode, if the computer is losing, he will suddenly get a lot better!
- 9. Vary your attack manoeuvres the last few computer players seem to memorise any patterns you develop and then proceed to beat you to pulp should you use those tactics again.
- 10. If computer opponents block *everything* you do, block yourself and wait for him to attack. You should now be able to get in a quick blow.

One of the better releases of late for the Master System has been Shadow of the Beast by Tecmagik. Here,

MEAN MACHINES offers you the exclusive full solution to this massive game courtesy of Tecmagik themselves!

At the start of the game, go left past the tree with "HOME" written on it and punch the rock pile to collect the key. Run back to the "HOME" tree and select the key to enter the underground domain.

It's the Beast!

Once inside, beware of the flame which shoots across the floor. Go right, down the ladder, left, down, right, down, left, down. Travel left to collect a long jump potion from the chest. Walk down the ladder and jump left to get hold of a secret extra life potion. Leap back quickly and go right, down, left and drop off the platform. Continue left and leap over the gap to fight the quardian of the orb. Punch the blue ball he holds, avoiding the flame, until you defeat him. This gives you a plasma bolt punch.

Walk right a little and drop down the gap to get the round yellow key. Go right a little and collect the energy restoring potion and fall down the gap. Run right as far as possible, avoiding the spikes on the floor. Now go up, right, up, right, up, left (get the red potion to increase your strength), up, left, up, left and up. Walk right to confront Death Skeleton. The best tip here is just to keep zapping him as quickly as possible.

Guide the Beast right and then up the first ladder, and then left until

Get the key first, then come

you reach a lever, ignoring the ladder you pass. Throw the lever and go right and up the previously ignored ladder. Walk left and collect the key and then travel right, down the ladder, down, right,

Run right, up the ladder and move right, watching out for the snail. Go down all the way and then travel left, jumping over the slime. Follow these directions: down, right, down, right, down, right, down, left, down, left, down, left, up, left, down, left and then up. Collect the green key to the right.

Retrace your steps left and go back down the ladder, right a little and then down. Go right (avoiding the slime and spikes) until you reach Hydrassas the Dragon. Defeat him by punching the horn on the lower head a number of times (trying to avoid the spitting flames). Run right and use the yellow key to enter the well.

Climb up the well to reach a position just right of the starting location. Now you will have the key to the castle, so begin the journey to the right. Punch rocks to collect extra energy. Make sure you get a

torch to see what you're doing in the castle. If you take the coin to the well and select it, you will get an extra life. When you reach King Gargoyle, you are transported to the outside of the castle where you must use the square white key to enter and find a dragon's egg. This egg is used later on in the game.

Once inside the castle, run left a little, up, right, down, right and then up all the way. Go left and drop down (use the white invulnerability potion or the long-jump potion, or you die a horrific death). Go left and up and then travel all the way right to pick up a spanner. Now return all the way left, ignoring the first ladder down. Walk down, right, down and left to collect a round white key. Go right and fall down being careful not be impale yourself on the swords. Travel left and then down, right, down and left to the chest marked "BLASTER". Select this and you will have a weapon to use against the monsters. Go right to the forcefield and select the spanner to disable it, allowing you to progress.

Ne could claim that the Megatech 1-shirt stops .303 bullets fired from a Lee Enfield rifle, but that wouldn't be true. So we won't.

We could claim that the Megatech T-shirt will make you more attractive to the opposite sex, but that couldn't be guaranteed in writing. So we won't.

We could claim that the Megatech T-shirt provides the wearer with the ability to fly through the use of psychokinesis, but strictly speaking, it doesn't. So we won't.

What we could honestly claim is that the Megatech Tshirt is a smart bit of gear which is good value for money and has a big skull on the front that ensures you don't look soft when you wear it in the street.

I'm not interested in being bullet-proof, attracting persons of the opposing gender or having superhuman psychic abilities, but I do fancy one of those smart MegaTech T-shirts with the big skull on the front. So send me one, and quick about it!

EGADRIVE

any years ago in prehistoric times there lived a race of giant flying reptiles, legendary for the huge eggs they laid - one of which was capable of feeding a family of Tasmanian Devils for a whole year! Legend also has it that somewhere, in a lost valley, these creatures live on. Naturally, these eggs seem very appealing to young Taz, who sets his heart on a couple. Sadly, Tasmania is not known for its specialist delicatessens and it becomes apparent to the hapless young Devil that he will have to sally forth and find the valley himself.

Unfortunately, Taz has two major problems. First of all, he doesn't have the foggiest idea where to start his search - so it's up to you to help guide him around the platform-style land of Tasmania. Secondly, everyone else in Tasmania loathes and detests Tasmanian Devils - which leads them to attack Taz with no provocation. Still, Taz has his mighty spinning and leaping abilities to depend on, as well as a healthy tendency to eat anything in his path!

Watch out Taz!

Yum yum yum!

TAKING A STUFFING

The cartoon incarnation of Taz is known for his voracious appetite. Likewise, eating everything in sight plays a fundamental role in the Megadrive game. Every time Taz comes into contact with an inert object or living creature smaller than he is, Taz is prone to shove it straight down his cakehole. Naturally, this can be a good thing when it comes to replenishing energy with goodies such as roast chicken, but Taz must also beware of harmful things, such as bombs, which have a tendency to explode once eaten - severely draining his energy bar.

LIGHTS, CAMERA ...

There are times when Taz encounters a problem that no amount of chewing or spinning will solve. It is then that the ACTION command comes into its own. This button has varying effects depending upon the circumstances Taz finds himself in. For instance, in fiery-breath mode it causes Taz to spit a gout of flame, whereas in the Factory zone it is mostly used to switch levers on and off. If there's nothing better for Taz to do though, ACTION makes Taz pull off a pretty impressive growl

COMMENT

Once again another cartoon character gets the Megadrive treatment, and once again the end result is a graphically stunning platform game. Zero out of ten for originality, but at least the game is great fun to play. As I've said, the graphics are truly wonderful, with Taz stonking around the screen just like he does in his cartoons.

The sound is also good, although JULIAN must admit to being disappointed by his roar - it's nothing like the manic screaming and shouting fit he has in the cartoon. Gameplay-wise, Taz is better than Donald Duck insomuch as the action is less rigid and a lot faster, but even so it suffers the same problems of difficulty - or rather, the lack of it. Even on HARD there's no real challenge, and anyone who's played a few platform games of this type will finish the game much sooner than they'd like. I must say that this problem is really beginning to cheese me off - how many Megadrive games have we seen that are superb, all but for the difficulty setting? When will Sega get the message?

EGADRIVE

the thought of another Megadrive platform game still wasn't all that appealing. True, the first couple of levels are pretty standard stuff, although the action is less linear than usual and Taz must find his own way through. After this, however, things get a bit more interesting and there is a stronger puzzle element to the game. The wide range of actions available to Taz also help sustain interest. The only flaw with Taz Mania is that it's a mite too easy. Although some of the fifteen levels provide a real challenge, a lot of them are a little too short to fully test your gaming abilities. Taz Mania is a very good game with fantastic graphics and some really smart gameplay, but when it comes to the

ultimate in Megadrive platform thrills Robocod is

still the one to go for.

Some options and gorgeous intros as well as superb in-game presentation.

Easily some of the best Megadrive graphics yet - superlative sprites, animation and backgrounds in glorious Technicolour.

Effects as true to the cartoons as you could expect, as well as some suitable tunes.

There's lots to do and loads of variety. The action moves at a decent speed and it's a lot of fun to play.

Sadly, although Taz Mania is entertaining, it's too easy - even on HARD, platform fans won't find a really decent challenge.

An enjoyable and visually exciting platform game which may not be tough enough for hardened platform veterans. but is still worth a look.

REVIEW

Here we see a Lemming from "up north" doing what he knows best! As the sweat accumulates in his cloth cap, it becomes obvious that his toils could lead to disaster. Judging correctly where to dig is of vital importance, so plan your excavations wisely!

COMMENT

Be warned, Lemmings can seriously screw you up! I'm currently enduring agonising withdrawal symptoms from this highly addictive game. The SNES retains all of the elements that went to make the Amiga version so popular. You soon find yourself developing a schizophrenic relationship with these animals. One minute you're determined to ROB save their furry little lives, and the

next minute, nuking every one of them fills you with malicious glee. Difficulty settings range from fun to mayhem, and later levels become mind-numbingly tough. The two-player facility is good fun, giving you the opportunity to sabotage your opponent's efforts while trying to preserve your own. Lemmings is a very clever game and you've got to be clever with it, otherwise you're as dead as a... Lemming!

As you progress through the levels the landscapes become more complicated. On top of this you're given fewer options and are required to get a higher percentage of your fluffy chums home, which means one mistake could result in THE END OF **EVERYTHING!**

The statistics at the bottom of the screen tell you how many times you can use particular skills/tasks on each level. It also displays the time you have left to complete the level and the percentage of Lemmings home and dry. The nuke option is there as well.

DATE: JULY GAME DIFFICULTY: MEDIUM LIVES: N/A

CONTINUES: NONE SKILL LEVELS: 4 **RESPONSIVENESS: GREAT**

The opening screens are entertaining and the all-essential password system is included.

The Lemmings are well animated and the landscapes and backdrops are both well drawn and colourful.

There is a whole range of happy-go-lucky tunes, and the cute death cries of the Lemmings are excellent.

As soon as you're used to the icons, you're hooked...

...and with 132 levels in the single-player mode and four difficulty settings you'll be kept busy for a very long time.

A classic and original puzzle game with plenty of options. It won't fail to entertain, so don't fail to get your hands

I really enjoyed the Amiga version of Lemmings when I first saw it I personally ranked it as one of the most brilliantly original games of all time. It's not the graphics

RICH

or sound. I think it must be something to do with the fact that the task you are charged with is mentally stimulating and taxes your brains in different ways in each level. The two-player mode is truly superb; inflicting various forms of hideous death on to your opponent's Lemmings is a real laugh! Although audio/visually it could be better, Lemmings has the gameplay and the challenge to make it a very worthwhile buy.

GAMEBOY: SUPER MARIO LAND (yet again!)

here's no rest for the wicked so they say, and where this bunch is concerned it couldn't be more true. Hell's most wholesome family are in quite a pickle, and for once it's not their fault. Abigail Craven is trying to get her hands on the family fortune, and with the assistance of her cohorts, Tully and The Judge, she has so far managed to lock up everyone apart from Gomez. Morticia is imprisoned somewhere apart from Gomez. Morticia is imprisoned somewhere in the lower vaults of the mansion, Uncle Fester has lost his memory and is suffering a bad case of demonic possession, and Granny and the kids have also become victims of Abigail's diabolical behaviour. So it's up to Gomez to hunt down Pugsley, Wednesday and Granny, restore the memory of Uncle Fester, and then see to the rescue of his wife.

With places to explore inside and outside the vast mansion, rooms which seem inordinately capacious, secret passages and doors which lead to anywhere

secret passages and doors which lead to anywhere and nowhere and lots of baddies desperate to make sure you stay right where you are, this really is a nightmare - even for the Addams Family!

A VERY HANDY THING

Every now and then, when Gomez enters a room he's confronted by a box with the letter A printed on it. If he headbutts it, Thing pops up to reveal a clue which can prove very useful to him.

SECRET CENTRAL

The Addams Family is packed full of secret rooms! Nearly every screen has a hidden area full of bonuses - but the real biggie is very near the beginning. Inside this secret screen is a load of power-ups and ANOTHER secret screen containing no less than 27 extra lives! Great eh? The only problem is finding it...

Gomez Addams finds his way to the Old Tree rounds of the Addams mansion.

COMMENT

This game certainly has a lot going for it. To begin with the quality of the graphics are excellent, with well defined sprites and backdrops. Be prepared for a game that is fast and, at times, very difficult. In fact I was quite fearful that I might finish the game with a lot less hair than when I started it, such is the frustration it arouses! Don't expect to have tired of The Addams Family in a couple of days

either. There are always new rooms, passages and puzzles to solve, and the password system ensures that your efforts are preserved. If I'm going to get grouchy about anything it's that this is yet another platform game, treading the same path as those before it with nothing particularly new to offer. But if you haven't bought a platform game for a while, The Addams Family should bring you some of the best graphics and most frantic gameplay you can expect these days.

PLAYS THE BLUES MUST CHOOL

Enter the Music Room and you ind what looks like a decrepit Richard Stilgoe tinkling the ivories. When Gomez saves a member of he family from the clutches of an end of level bad guy, they are mmediately transported to this oom. When Granny, the kids and Incle Fester are all present and correct, Gomez can set about the engthy task of saving his Morticia.

Plenty of collectables await Gomez in this location.

nomez faces up to one of the ame's lethal guardians! Jump on his head many times to ee this icy demon off.

When I first played The Addams Family,! must admit to not being overly impressed. The graphics and sound are both superb, but the gameplay seemed a bit

N bland. However, he more I played it the more I ot into it. There's loads to discover, and there are more secret screens than even a Mario game! It's tough too and ou really need to polish your latform skills to get anywhere on later levels things get extremely tricky and the final evel certainly takes some loing! C. P. P. Lander

Having just released Hyper Soccer, one of the best soccer games yet seen on the Nintendo, Konami have decided to celebrate by giving away a trip for two to see the European Cup final in Gothenburg, Sweden on the 26th June! Are they generous or what?

The trip is completely fab and includes the air flight to Sweden, buffet lunch when you get to your four-star hotel, overnight accommodation, executive coach transfer to the match, top seats at the stadium AND an after-match dinner at one of the finest Scandinavian restaurants! Amazing, eh?

And that's not all! As an added bonus (or not, as is your view on the subject), you and your companion will visit the match with MEAN MACHINES editor Jazza Rignall who will no doubt teach you a few choice Southend terrace songs to help cheer England ('cos they're bound to be in the final) to victory.

So what have you got to do to stand a chance of winning this once-in-a-lifetime competition? Well, we want you answer the three dead easy questions below and then fill out the form. Once you've done that, stick it in an envelope and send it off to: LET ME WIN THE TRIP BECAUSE I DON'T SMELL MUCH AND I DO HAVE A PASSPORT, MEAN MACHINES, PRIORY COURT, 30-32 FARRINGDON LANE, LONDON, EC1R 3AU. The closing date of the competition is June 15th - so make sure your entry arrives by then, or it won't be included in the grand draw when we'll pick the winner.

REVIEW

o, you like the occasional game of marbles eh? Well, perhaps you should try out Marble Madness for the ultimate in small sphere-related activities!

This isometric 3D game puts you in control of what must be the toughest marble of all time, and it's your job to guide the orb-like item around the many hazards that make up the Marble Madness course. Your objective is simply to reach the end of the stage before your time limit expires. Rather helpfully, the end of the course is marked GOAL! So, you know what to look out for. Any remaining seconds you have are added on to the time limit of the next level, so storing up time on the easy levels is a good tactic.

There are six levels of arcade action in Marble Madness, packed with strange meanies, cunning traps and hazardous landscapes. Do you reckon you can handle the action?

As you travel through the game you come across many weird hazards including a rampant wave machine, a dangerous whirlpool and lethal, almost unpredictable vacuum cleaners! Not surprisingly, all of your sphere-controlling cunning is required to progress past these hazards.

COMMENT

Marble Madness has been converted to most other consoles and just about every version has been completely brilliant. While this version is graphically superb, the

.

RICH control method ruins the game. The control system is just not intuitive enough - one tiny press of the D-pad sends your marble flying across the playing area. The game is also very easy even with the difficult controls. I saw most of the levels in my first setting, and it doesn't take a games playing genius to finish the game very quickly. Another thing I noted was that game was quite a lot slower than the original. The easiness of the game is a problem on most of the other versions too, but at least they were fast and enjoyable to play. Unfortunately,

strangest assortment of baddies yet found in a video game. Look out for evil black marbles, pools of living acid, hammers and suction-cap creatures that eat you whole! Most of these creatures should be avoided at all costs or you die! Some creatures, like the black marbles can be ricocheted off the edge of the landscape and into oblivion!

Marble Madness must be one of the most converted coin-ops of all time! Versions of this classic Atari coin-op are available for the Nintendo (programmed by Rare for MB Games), the Megadrive (courtesy of Electronic Arts) and the Gameboy (produced by Mindscape). Just about every version is a spot-on adaptation of the coin-op. Who knows? Perhaps on the Game Gear too.

COMMENT

Graphically this is as close to the arcade original as you could hope. Sadly, though, the gameplay doesn't quite live up to the same standards. The control method is rather fiddly and lacks the "feel" that made the coin-op original and other console conversions such a joy to play. The game also lacks challenge - it's just too easy to go all the way through the game. I still

JULIAN went back to it to try and notch up near perfect scores, but didn't enjoy it as much as I had done with other versions. Marble Madness fiends are bound to enjoy what's on offer, but at the end of the day you're left feeling that just a little bit more polishing in the gameplay department would have resulted in this being a perfect conversion, rather than just a good one.

▲ Excitement from level two.

the best platform game seen this year and is a game that Megadrive players are thoroughly recommended to

MEGADRIVE DEVIEW (A)

 Hoisting a rock above his head, Chuck is invulnerable to falling debris.

Chuck hitches a ride on a helpful brontosaurus. This comes in handy for negotiating swamps.

ROCK AND ROLL

Rocks are a caveman's best friend (in this game at least). Chuck Rock is capable of lifting boulders and these are used to crush any enemies that cross his path. Rocks are also useful shields to protect Chuck's head from any falling debris or enemy sprites. Boulders are also excellent for jumping on to get some extra height - this is often the only way to get your hands on some juicy bonuses.

CONVERSION CAPERS

Just like Corporation (reviewed last issue), Chuck Rock was originally an Atari ST and Amiga game released by an independent company called Core Design. For the Megadrive conversion, Core's original programming team were called in to perform the coding honours. This version is actually quite a bit faster and smoother than the original 16-bit games, and has a larger scrolling screen too. Cor!

CHEEKY SAMPLING

To add to that all-important humorous atmosphere, Chuck Rock has many stone age samples, all cheekily snatched from Hanna Barbera cartoons! So, ready your ears for an aural overload as you thrill to sound taken from the likes of The Flintstones and Captain Caveman!

Watch out Chuck!

Belly-butting that strange green creature creates a useful platform used to reach later parts of the level. Essential.

STONE AGE PUZZLIN

There are a number of mini-puzzles incorporated into Chuck Rock to tax the old grey matter as well as your arcade reflexes. For example, at one point in the game, Chuck reaches a massive wall which seems impassable. However, there is a seesaw type arrangement waiting at the foot of the wall. By clambering onto one end and chucking a boulder onto the other, Chuck Rock is propelled into space and it's up to you to guide him to a safe landing!

More dinosaurs helping out.

Watch out Chuck!

COMMENT

I reviewed the Amiga version of this version when I worked at C+VG, and although I liked it quite a bit then, I think it's even better now it's

made its way over to the Megadrive. It's just got so much to offer with its superlative audio/visuals and its addictive gameplay. Most platform games are just a test of your skill, but Chuck Rock is actually something of a brain teaser. Solving all of the mini-puzzles, along with making the best use of your rocks adds a new dimension to the gameplay. Most Megadrive platform games are completed very quickly, but not so Chuck Rock. Its fifteen levels are packed with challenge and I guarantee that this cart will last a long time. Overall then, I'd recommend that you invest your pounds sterling in this game immediately - it's the best platform game since Robocod!

Some excitement from level one.

Poor old Chuck Rock! His missus has been mercilessly kidnapped by the evil Gary Gritter! In his quest to rescue Ophelia, his lady love, he has to follow Gritter through some of the most treacherous areas of prehistoric Earth until he faces his arch-nemesis in the final showdown!

What this generally entails is screen after scrolling screen of platform fun as Chuck uses his incredible cunning along with his massive belly-butting and rock-throwing abilities against the many stone age

Have you got what it takes to rescue Chuck Rock's wife from the clutches of evil?

The Gary Harrod lookalike struts around prehistoric Earth admiring the scenery.

Chuck Rock lurks behind some undergrowth.

Obviously the excellent graphics and sounds have been somewhat trimmed down during the translation from Megadrive to Master System, but the rest of the game has everything that made the 16-bit version such a laugh, and the end result is one of the best platform games available on the Master System. There's a real sense of fun running throughout

 AN the game, and the highly enjoyable platform action combined with the logical puzzle solving adds up to a Master System game that you'd be daft to miss.

RIENDLY

Not all of the dinosaurs in the game are after Chuck's blood. Indeed, some of the lizard-related creatures actually aid Chuck in his quest to locate his true love. For example, at several stages in the game, Chuck cannot progress unless he enlists the aid of a flying

COMMENT

Okay, so the graphics aren't as good as the Megadrive version. However, Chuck

Rock is still as playable as the 16-bit version with the same great fusion of reaction-testing

and mini-puzzle solving. The game is really challenging as well. The first couple of levels may be quite simple to complete, but after that it's a completely different story and many hours will spent as you try to get closer to Gary Gritter's lair. I had a lot of fun with Chuck Rock - it's definitely the most fun I've had with the Master System for ages. Highly

A nice intro screen, but that's really about it.

Some highly detailed graphics for the backdrops and smooth, well-defined sprites.

Groovy tunes and some sampled effects make up the soundtrack for the game.

The game is very addictive from the outset, with lots of action to keep you occupied ...

...and the tough challenge should have you coming back to this for ages.

Chuck Rock is a great cartoon-style platform game that should be checked out very soon.

MEGADRIVE

y the year 2028, man's war with machines is aimost at an end. This grim holocaust was caused in the first place by the super defence mainframe Skynet, an artificially intelligent system which thought the easiest way to protect the planet was to wipe out the entire human race and replace them with robots.

Thus a nuclear war was initiated which killed billions, and machines everywhere declared war on the survivors - even people's Megadrives and electric toothbrushes turned against them. Luckily for us humans the man John Connor was on hand to lead the human race to victory. In a last ditch attempt to ensure victory, Skynet decided to send a super-hard Terminator cyborg back in time to kill John's mother, Sarah, thus preventing the lad from ever being born! John got wind of this insidious plot however, and sent one of his crack soldiers back to protect his mummy.

In this long-awaited game of the film you play the part of Kyle Reese - hard person extraordinaire. It is your job to destroy that nasty Terminator and thereby save Sarah Connor from a sticky end. There are four levels of platform-based shoot 'em up thrills, each one loosely based on a scene from the movie - including the climactic showdown in an empty machine shop.

infiltrates a Skynet base to destroy a big bubbling tank of gook (at least that's what I looks like), before legging it to the time displacement unit and zipping back to the future. In this level, the boy Reese is aimed with a supply of hand granades, a few time bombs (for biowing open doors and destroying the final target) and, if he can find it, an Uzi sub machine gun. However, he is pitted against Hunter/Killers, huge

Level one is set in the future. Kyle

robots of doom and any number of

cannon-toting terminators!

Level two takes place in the streets of modern day Los Angeles. Kyle must find a phone box (so ne can check Sarah Connor's address in the book) and run to the Tech Noir nightclub in time to stop the Terminator getting his evil clutches on Sarah. However, the police are after Kyle and he has to avoid them especially as they are only lightly stunned by five straight shotgun blasts!

▲ Kyle Reese locates Sarah Connor in the Tech Noir bar. Level three is set in a downtown police station. Kyle has been arrested, and now the Terminator has him trapped Kyle must escape find Sarah and flee before planet Earth is doemed! Along the way are more of LA's indestructo-cops and that pesky Terminater, who must be shot about twenty times before he is stunned enough to let Kyle escape!

More Sarah Connor-related action as Reese searches the police station, but the Terminator is close behind!

The final level is set is set after-hours in an empty factory The Terminator has been badly damaged by crashing a petrol tanker so his human jacade has been shed. Kyle must now use his wits and a supply of home made explosives to lure Terminator into a hydraulic press, thus crushing him into something resembling an ethnic metalwork sculpture. Unfortunately, if the Terminator is hit too many times, he loses his legs which for some reason makes him invincible! Kyle must use all his powers of IQ to save the day!

REVIEW

▼ Reese reaches Skynet's time machines. The Terminator has already left, but the controls have been left set so Reese can follow.

Reese searches the roof of the police station in search of a route through to Sarah Connor's locked room. Both the police and the Terminator cause problems here.

COMMENT

One of my all time-favourite films finally arrives on the Megadrive, and while it looks and sounds absolutely brilliant, it sadly lacks substance. The problem is that there are only four levels to conquer, and it takes very little time to get through them all - half an hour on the easiest level is enough to see you through to the disappointing end screen, and

JULIAN even on the top difficulty setting, a few hours practice is all it takes to defeat the game! While it lasts, the game is great fun. The graphics and sound are both outstanding and generate a superb atmosphere and the shoot 'em up action is thoroughly enjoyable, but in the end it's all over far too quickly and you're left with the distinct impression that the game should have been bigger and tougher. Only complete novices and wimps will get their money's worth here...

MEGADRIVE

 Kyle Reese runs through the mean streets of Los Angeles.

Kyle Reese enters into a vicious one-on-one gunfight with the Cyberdyne Series 101
Terminator. Five or six shots are enough to slow up the killing machine for a while, or if you want, you can just jump over him! Just keep him away from Sarah Connor!

COMMENT

Terminator makes an excellent first impression, with digitised scenes from the movie and an accurate rendition of the theme tune! The in-game graphics are spectacular, sombre, atmospheric, very detailed and beautifully animated. The sound is so-so, some of the effects and tunes are of a very high standard, whereas others are distinctly lacklustre. Sadly, no matter how fab the graphics look

they cannot save the Terminator from mediocrity. On the top difficulty setting the first level seems pretty challenging. Unfortunately, it's downhill all the way from where Kyle picks up his gun. This makes braving the Terminator hordes stupidly easy, and the difficulty level gets no harder from this point. Completing the Terminator should take no more than a few hours, even on the top difficulty level. Once the game is completed, the fairly standard mix of platforming and blasting (mostly the latter) is unlikely to draw you back as it's pretty dull. Given more levels, a higher difficulty setting and a bit more to do in some places the Terminator could have been a classic. As it stands it's just a waste of good money, even for diehard Terminator fans.

Right now, your Master System is your pal. However, the people of the future have a somewhat different outlook on things electronic. This is because of a computer revolution engineered by Skynet, the super-whizzo defence mainframe. The ensuing war all but wiped out the human race, but one man, John Connor, turned the tide of battle and saved everyone. In the final hour, Skynet has launched a desperate bid for victory by sending a rock-hard Cyberdyne series 101 cyborg back in time to prevent John ever being born, by killing his mother. Having intercepted this information, the human forces have sent back their top soldier-type, Kyle Reese, to stop the Terminator, but will it be enough?

In Virgin's 8-bit version of their latest film license, you adopt the mantle of Reese in a five-level bid to save the future. Kyle runs, jumps and shoots his way through a number of different environments, keeping a constant eye out for his cyborg adversary and saving Sarah Connor from the jaws of death. In the final level, as in the film, the Terminator must be destroyed by luring it into a hydraulic press. Earth's future hangs in the balance. Can you save Sarah Connor from the twisted clutches of the Terminator?

COMMENT

I must admit that I was a bit wary about Terminator at first following the debacle that was the Megadrive version. Imagine my surprise and delight when the Master System Terminator turned out to be a hundred times better than the 16-bit effort. Okay, so the graphics can't match up to the stunning Megadrive ones (although they are pretty good), but what really counts is the beefed up difficulty

level. I'd clocked Megadrive Terminator in the same time it took me to get off the first level of the Master System game! The levels have been redesigned and are much longer. The enemies are also more intelligent and there's always enough of them on screen to provide a constant challenge. The game design itself is hardly the most earth-shatteringly original thing to come out of a software house, and with only five levels Terminator may be a little short, but it is easily the best Master System game released in months.

Kyle starts the game with an infinite supply of hand grenades. Although these possess impressive destructive capabilities, Kyle is quite slow at throwing them. There are also aim-related problems, with stair-bound combat being particularly unwieldy. Luckily for the boy Reese, his trusty assault rifle lies at the end of level one. This is a particularly powerful gun which destroys Terminators with a single burst! Unfortunately, he cannot bring this gun back through time with him, so his present-day mission is fought with a comparatively feeble Uzi 9mm.

Entering the Tech Noir bar.

- Kyle Reese runs around the shattered landscape of Los Angeles, 2029. It's his job to infiltrate the Skynet base and shut it down, destroying Terminators on his way.
- Kyle Reese makes his way across the rooftops of Los Angeles, 1984. Here, the objective is to reach a simple telephone box and find out Sarah Connor's address.

REVIEW

There are brain exercises a-plenty in Terminator. For instance, in level two Kyle climbs a series of fire escapes and leaps across rooftops like the athletic chappie he is. It is your job to work out how he can then get down from these buildings without the aid of a ladder and most importantly, without breaking his neck. But this is easy compared to guiding the Terminator into the press on level

COMMENT

Like Rad, I found the Megadrive version of **Terminator** extremely easy and completed within an hour. This superior **Master System** title has much more in the way of lastability. In

fact, it should take quite a while just to get off the first level in this rock hard title. The high difficulty level doesn't put you off though, because the game boasts excellent playability that glues you to the console for ages. The graphics are truly excellent, with sprites and backdrops that make full use of the Master System's 8-bit abilities. Even the sound (something the Master System isn't well equipped for) is good, with atmospheric tunes and effects. Virgin Games have produced an excellent film tie-in that gamesplayers should really enjoy.

very four years the world's finest athletes come together to compete in the Olympic games. On this great occasion they have the opportunity to realise their dreams and return home in triumphant possession of a gold medal. Now you too can realise those dreams, but with this latest sports game you don't have to do any early morning training - all the action happens on-screen.

US Gold's Olympic Gold contains the whole spectacle, from the lighting of the torch to the medal presentations. There's the chance to become the new kid off the blocks in the sprint, be untouchable in the hammer and win Bully's special prize in archery. Four other gold medals can be won in the hurdles, the pole-vault, diving and swimming. Olympic competition can be tough so national or club standard is best for rookie athletes. Beginners can also learn perfect technique from the teaching facility which takes the player, step by step, through the necessary moves of the various disciplines. As talents flower, the challenge is not only to beat the opposition and claim the gold, but to break the Olympic and world records, thus ensuring a place in athletic history!

SINK OR SWIM

The traditional opening event of the games, swimming works in exactly the same way as sprinting. In both events the player races five opponents in a heat and five in the final, providing he gets that far.

COMMENT

When you consider all of the different events that make up the Olympics, US Gold haven't really chosen particularly exciting ones for this game. Only archery and diving are genuinely different and addictive. The rest are fairly run-of-the-mill: running, swimming and hurdles are all mindless button-bashing events, the hammer is plain dull and the pole vault frustratingly fiddly. I'm hat there's no simultaneous two-player

surprised that there's no simultaneous two-player mode. The multi-player option here only allows contestants to take turns, which isn't even half as exciting as competing with one another directly. There are plenty of decent touches throughout the game - the graphics and presentation are both great - but the bottom line is that this simply isn't anywhere near as good as it could have been.

POLE-AXED

Like the diving event, pole-vaulting requires a lot of practice in order to tackle the greater heights. Good speed on the runway and precise judgment with the pole are essential to break the world record.

The thrower must swing the hammer and edge towards the front of the circle. When optimum speed and strength are attained, as indicated in the top right hand corner, it's time to let go!

ROBIN HOOD, ROBIN HOOD...

The whole process of drawing the bow, aiming and firing has to be done quickly. If the archer spends too long aiming while the bow is tensed it becomes harder

It's time to impress the judges with some inverted pike twists and all that caper. Developing perfect dives involves mastering some complicated key-pad manoeuvres. Pulling off the hardest dives ensures the greatest rewards.

COMMENT

With Olympic hype starting to grow, the timing of this release is just about spot on. Add to this my enthusiasm for athletics and you'd think Olympic Gold couldn't fail to particularly appealing about this game. There's a wide variety of disciplines and events such as diving or the pole-vault demand practice and flare. The major drawback is the control method:

getting something right can be a fidgety business ind, at times, I found it difficult to pull off certain moves in the diving and hammer events. After doesn't detract from the game's bland and the arcades and it seems like things just haven't ports games haven't rubbed off on Olympic Gold. As it stands, it's a merely adequate game that only ust about justifies its price tag.

RELEASE DATE: JULY GAME DIFFICULTY: EASY LIVES: N/A

CONTINUES: N/A SKILL LEVELS: 3 **RESPONSIVENESS: OKAY**

Olympic endorsements litter the title screen. Difficulty levels and the teach facility are useful touches.

The animation of the sprites isn't bad, but the backdrops are uninventive and bland.

61º/n

Irritating, weedy tunes and the sound effects are largely non-existent.

The teach mode and largely simplistic nature of the game makes this a breeze to get into...

...but while the desire to break records might keep you plugging away for a while, there's simply not enough depth to sustain interest for a long period.

A largely disappointing game with nothing particularly new or exciting on offer. Only ardent sports fans will be interested.

ver fancied using some "real life" artillery with your Super NES games? Ever felt like scoping out that final enemy boss with a "real" gun and blasting him away by pulling a "real" trigger? Well, all of your dreams have come true with the release of the Nintendo Super Scope - a good-looking piece of kit rather akin to a mini-bazooka.

At the moment there is only game available for the Super Scope, and that's the cartridge that comes "free" with the £79.99 package. There are three different mini-games packed into the one game cartridge, all of which are detailed in this MEAN MACHINES review.

If you like Tetris (like 95% of the population), you should get a kick out of Blastris. This is just like the original, except that instead of positioning blocks, you blow them to pieces in order to make them fit. Like the original, making lines is the order of the day. As time progresses the blocks move a lot quicker, meaning that all your lightning-fast reflexes are required. There are two versions of Blastris available, one played with blocks falling horizontally (Blastris A), the other depicted with the usual vertical well (Blastris B)

LEUEL

Scope out those blocks! You are only allowed two shots per block so be careful!

PACKING OUR PIECE

The bazooka-style light gun itself is powered by six Walkman-sized 1.5v batteries and its photon emissions are detected by a box that rests on top of your telly/monitor. This gets its power from port two of your Super NES. When you first power-up the game, you are required to adjust your aim with the aid of the target displayed on screen. Once this has been primed, you're ready for

COMMENT

vell-presented and easy to get into, but I did find that all of them grew quite boring after a short space of time, especially the three-game Laser Blazer (which is just one game with different graphics for each section). Hopefully, Nintendo will support the Super Scope with some excellent software that makes good use of the decent hardware.

There are three different sections to this game. In Intercept Mode, it's your job to blow away a series of cruise missiles that cross from the right to the left of the screen. In Engage Mode, you destroy enemy fighters and missiles that streak towards you. In Confront mode, you take the battle to the enemy and face up to the most deadly fighting machines they have devised!

A young fellah-me-lad adjusts his sights with the Scope. Make sure your aim is true.

COMMENT

The big 'n' chunky Super Scope is definitely the most impressive liaht aun vet seen, with a truly accurate sight and a very useful set-up screen so

Nave to be right in front of the TV when you play. But there are two big problems. Firstly, the game supplied with the Scope is fun for an hour or so, but gets boring and dull very quickly. Secondly, at present there's no other software to use your gun with. I'm always very cautious when looking at add-ons like these, because with everything I've seen before Sega's 3D glasses and light phaser and Nintendo's ROB robot and light gun - precious little software ever appears for it and what is released is mostly second rate and you end up with literally one or two games that are actually worth buying for the thing. I'd definitely wait to see what software appears for the Super Scope before spending £50.00 on it.

Pebediah the Great isn't a magician in the mould of Paul Daniels or the Great Soprendo. Despite his side show appearance, Zebediah's magic centres more on raining rocks down onto people's heads and giving himself wings. In the interests of aiding humanity, Zebediah has taken on an apprentice, Jake, a typical Californian Bill and Ted clone who can't talk properly. All is not well in Zeb's camp however, as the great wizard has some powerful enemies who reckon the time is ripe for revenge. So one day, whilst Zeb and Jake are out jogging, Jake's girlfriend Allison is kidnapped and taken to the Headquarters of the dastardly villains.

Jake sets out across the platform wilderness leading to the evil doers hideout, using his newly-learned magical powers and amazing athletic abilities to overpower his enemies. If all else fails, there's always his corny surf-speak to fall back on..

One of the most useful things Jako has learnt is how to fire bolts of magic from his fingers. Pressing the button once lets off a smaller beam useful against foot soldiers and Death Spinners. For larger enemies, however, a larger bolt is preferable. One of these is fired by holding down the fire button until Jake's Magic Meter starts to flash. Release the button and watch those nasties explode!

Although Jake has only a limited amount of magic to start with, indicated by his Magic Meter next to his energy bar, there are a multitude of ways he can use this. Firstly, pressing select calls up the menu of magic. From here, any one of twelve magical powers can be chosen. These allow Jake to freeze his enemies, heal himself, blast people to bits and best of all, transform into one of the super-powered beings shown here.

GOBLIN: The goblin is a pretty speedy character with a short-range high power finger blast which destroys any thing with one blast. He is also capable of huge somersaults, during which he is utterly invincible!

ANGEL: This is probably the most useful transformation, as it allows Jake to fly. This makes it much easier to complete levels with a high ground-force and few airborne enemies.

MEGADRIVE

Jump into your 4x4 off-road truck and burn around hazardous dirt tracks along with the greatest off-road racers in the world - including the legendary Ivan "Ironman" Stewart himself!

Super Off-Road is best described as a Super Sprint variant with more tracks, more obstacles and the ability to power-up your truck with better engines, tyres, and shock absorbers. The object of each race is to complete four laps of the off-road circuit before your opponents. Super Off-Road enables one or two players to face up to two or three computer-controlled trucks (one of which is driven by the awesome "Ironman"!). Beat your opponents and the prize money you gain is taken to the "Ironman" speed shop where you customise your truck's abilities by allocating your funds appropriately.

After that, it's back to the off-road circuit, where you indulge in more of the same driving-related tomfoolery.

OFF-ROAD ON CONSOLE

Considering that the coin-op wasn't a major hit, it's quite surprising to see the game crop up on so many different console formats. Tradewest gave NES owners their conversion (programmed by Rare) which actually improved on the coin-op by enabling four players to participate at once (using the Four Score adaptor). Tradewest also released a highly playable, aurally amazing Super NES version. As well as this Megadrive conversion, look out for a Game Gear adaptation coming soon courtesy of Virgin Games.

COIN-OP CAPERS

Super Off-Road is a decent conversion of the popular Leland three-player coin-op with spot-on Megadrive representations of the miniature sprites and detailed backdrops. The coin-op had a little known pseudo-sequel. Off-Road Challenge, which was exactly the same as the original in terms of gameplay but sported tracks not used in the original coin-op.

MEAN MACHINES 102

There are sixteen different tracks in the Megadrive version of Super Off-Road, equalling the Super NES version and actually bettering the arcade version! Each is packed with hazards to slow you up, including mud pools, steep climbs, walls and horrific hairpin turns! Luckily, some tracks have cunning short cuts that you can use to your advantage against the

MEGADRIVE

computer players.

COMMENT

Ballistic should be applauded for releasing a game of this calibre as part of their £29.99 price range. Super Off-Road is an excellent conversion that's all the better when there are two players participating. The graphics are spot-on replicas of the arcade original, with extra tracks not included in the original coin-op (actually, I've a feeling that they're

in the Off-Road Challenge follow-up). The sound effects and music are very dull though and they don't make any use of the Megadrive's sample-playing abilities. However, I can see single players getting a bit bored with this after a while as there isn't much in the way of variety, but if you've got a pal who fancies some two-player racing, get this!

After the race, you take your winnings to the "Ironman" Speed Shop, where you can customise your truck with all manner of interesting add-ons. Better accelerators and engines are available to increase your speed along with superior tyres and shocks - essential for cornering and taking jumps. Extra nitros can also be purchased to give you that winning edge in the next race.

Containing all the features of the arcade game and adding some extra features of its own, this conversion provides loads of two-player thrills and spills. The graphics are

AN excellent, with the tiny cars bombing around nicely drawn tracks, but sadly the sound isn't so hot, with rather weak tunes and effects. What's most important is the playability, and Super Off-Road is very strong in this department, especially in two-player mode where the competitive edge of the proceedings really comes into its own. In one-player mode the game is still fun, but I found after a while it became a bit repetitive - beating the computer opponents is fun, but nothing like playing against another human. If you're after racing fun, this is well worth taking a look at, especially if you've often got a second player at hand to join in the action.

The strip select screen. Using the joypad, all manner of kit combinations are possible.

uro Club Soccer from Virgin is based on their home computer footy sim Manchester United Europe, but with a whole host of updated options. It adopts a horizontally scrolling grandstand-view style of play, with the ball sticking to the players' feet as opposed to being a free-rolling spheroid.

The object of the game is to pick your favourite team from the one hundred and seventy on offer and take them all the way to the finals of the European Cup championship by trouncing fifteen other randomly-selected computer teams. Up to seven tournaments in which up to nine players may participate can be saved on a battery back-up to make the lengthy campaign more palatable.

Presentation-wise , this is superb. The tournaments. save mode and general options are all out of this world. Sadly, though, the gameplay isn't of the same high

N standards. There are several sloppy points which mar the action, namely the poor collision detection, low player intelligence and very awkward controls which make putting together passing moves very tricky and frustrating, It's a shame these are present, because had the game been more rigorously tested and these irritations removed, Euro Club Soccer could have been an outstanding soccer game especially with its excellent graphics. As it is, its flaws means that most players will get more frustration than joy out of this.

Probably the most important aspect of modern football is the strip. Undoubtedly today's league structure would collapse if teams were to play in the wrong colours. Fortunately, Euro Club Soccer saves frustration of the colour mis-coordination kind by including a full kit-design option for each of the one-hundred and seventy different teams on offer. Everything from shirt and shorts to sock and trim are selected from a palette of eight colours. This allows you do dress your least favourite teams in humiliating brown strips and your top team in stylish black with this season's top accessory - purple trim.

Use the crosshairs to position the thrown-in. Watch out for opposition players though!

DEPECHE MODES

Euro Club Soccer has two play modes to challenge would-be champions. The first is Arcade, which is more reminiscent of games such as Tecmo World Cup than real soccer. The ref is a little lax in this mode, the ball travels unfeasible distances and players have a tendency to slide huge distances when they tackle another player. Only friendly matches are played in Arcade mode - for European Cup jiggery-pokery, Simulation mode is the one to choose. As you may expect, things are a little more realistic, with a slower play speed and plenty of rule violation-related horseplay.

Fans of corners, free kicks and throw-ins will be cock-a-hoop at the very sight of Euro Club. As opposed to having the usual tri-directional aiming system for these essential aspects of football, Euro Club operates on a more free-form basis. When faced with a corner, throw-in or free kick, the player in question is allocated a crosshair sight with which to specify the desired landing point of the ball. Each team has their own throwing and kicking abilities which dictate how far up and around the pitch the sights can be moved

Cor! What a shambles! The players are clean avoiding the ball.

COMMENT

The home computer game, Manchester United Europe wasn't all that bad and this Megadrive version promised to make any number of improvements. Sadly, for the poor state of Megadrive footie titles, European Club is in fact worse than its ST predecessor! The graphics aren't

all that bad, with some small but colourful, detailed and fairly well animated sprites and a plethora of

fine intermission screens to gaze at. Sadly, there are a number of gameplay upsets which spoil things. Firstly, the collision detection is very poor, which puts the dampers on activities such as tackling, passing, shooting and generally moving the ball about. Secondly, the players seem to have all the footballing abilities of the Baboon All-Stars second XI, with their passes and goal attempts being particularly feeble, not to mention those frustrating huge slides which masquerade as tackles. This combined with the coma-inducing slow pace produces a piece of software as disappointing as they come.

An original style of goal-keeping..

HALF-BAKED HALF-TIMERS

At half-time the commentator pops up in the company of David Robinson. Together, they are about as expressive as Ray Wilkins and their observations have an uncanny knack of stating the obvious. During this entertaining interlude however, you are given the opportunity to check on your team stats and those of the opposition.

Here's a decent run-up to the opposition's basket.

SUPREME COURT BASKERS COURT

Order! Order! The Supreme Court is now in session and ten men stand in the dock accused of sweating profusely. Their defence? Well, they're basketball players and are in fact perfectly entitled to perspire on the particular court in question.

Get the rack out and stretch those legs because Supreme Court basketball enters the fast, skillful and often frantic world of... well, basketball! There are four teams to choose, each with their fair share of good and bad points. One team might be strong in defence, another might be sharp on the break, but generally they're all evenly matched. Good player selection is essential if opponent's weaknesses are to be exploited, and players too have their good and bad points.

After the jump off it's a matter of effective dribbling, quick passes and accurate shooting on the offence, and determined marking, blocking and stealing on the defence. If a player can get close enough to the basket, a dunk will make sure of two points, but on more desperate occasions the risky three pointer might prove necessary. At the end of the day a can of stay-dry deodorant is recommended!

Plenty of stats to examine in this game.

The Apaches get a free throw,

It's a good shot!

MUG SHOTS

Once you've decided on a team it's time to look at the players. Each of them possess particular skills that could prove useful. Some are good at shooting inside the key, others might be good ball handlers or dunkers. Almost all players have their disadvantages, so it's worth noting these as well, you can't make up your mind try judging on hairstyles or whether their eyebrows meet in the middle

This mean, strutting basketball type introduces the game.

times the switch becomes second

CUT THE ACTION!

Supreme Court basketball uses a cut screen. When the ball crosses the halfway line the angle of vision changes to include more of the court action. This takes a bit of getting used to, since the cut is virtually instantaneous, but once you've played the game a few

When a player gets close enough he has the chance to dunk rather than make a jump shot. There are a number of different and complicated types to enjoy, from the two handed slam to the leaping hook dunk. But whatever the decision is, it must made be quickly, the longer a player waits, the greater chance the opposition have of stealing the ball.

The Tomcats have the ball and the Apaches are supplying no opposition!

If a player commits a foul on an opponent who is attempting to shoot, a free-throw is given. Basically all of the normal rules relating to fouls, charging and travelling apply. Looking through the player's stats reveals the notoriously bad foulers. The problem is that some of them are brilliant shots or great dribblers, so weighing up the pros and cons is

COMMENT

the change in angle. Another gripe of mine is that Supreme Court basketball fails to capture the razzamataz of the game, in the way that Super Real Basketball did. The action is viewed from too far away which means the excitement of dunking is lost. It's a shame because the animation and graphics are excellent, and the sound is spot on, right down to the basketball boots squeaking on the court surface. While the balance between the teams makes the games competitive, I'd have preferred more teams of varying quality so that when you get really good you can try to beat the best sides with the worst. Supreme Court Basketball is good, but if you want the best, get Super Real Basketball or wait for the forthcoming Bulls Vs Lakers from EA.

COMMENT

RAD

Supreme Court Basketball certainly scores highly for innovation, departing from the usual diagonally scrolling view of other Megadrive basketball games. The halfway line screen switch is irritating at first, but once you get used to this the viewpoint works well, and this is complemented by some stunning animation and great effects. The only real problems with Supreme Court are

the poorly worked defensive strategies - it's just a little too tricky to perform pinpoint blocking and stealing. Also the lack of room for a running game is a source of irritation. The only tactic that is really effective is the long-ball pass, which takes some of the excitement out of the game. Supreme Court Basketball is a very good game, it's just a shame that there wasn't a little more thought put into the tactical side of things.

RELEASE DATE: JULY GAME DIFFICULTY: MEDIUM LIVES: N/A

CONTINUES: NONE SKILL LEVELS: 3 **RESPONSIVENESS: GOOD**

There are plenty of options and some nice touches like the half-time chit-chat.

The animation is excellent, the basketball court is well drawn, and option screens are graphically superb.

Very impressive sound effects which create the perfect aural atmosphere. The intro music captures the sports theme perfectly.

Because of the cut screen, play is awkward and the constant ping-pong between angles spoils the excitement.

The gameplay flaws mean that anyone other than a basketball freak might get fed up.

Definitely a could-have-been kind of game. It's got excellent graphics and sound, but loses out somewhat in the all-important playability stakes.

o, you like playing basketball do you? Well Jordan Vs Bird is a digital representation of one-on-one - a sort of cut-down version of Basketball where only two players participate attempting to score more baskets than the opposing player

In this case, only two different players are available, the eponymous Jordan and Bird. Each specialises in different types of basketball plays, be they slam dunks or three-point baskets (that's where they score from outside of the basket area). It's up to you to choose your basketball warrior and go into battle, outwitting and outfoxing the opposition by capitalising on your own strengths and your opponent's weaknesses.

Jordan Vs Bird also gives you the opportunity to develop your basketball skills in a series of practise rounds before your face up to your sporting nemesis in a one-on-one basketball duel!

THREE-POINT CONTEST ACTION

Another of the practise rounds in the game is a third person perspective effort that sees your player attempting to score baskets from outside of the basket area (a three-pointer, as it's known). The A button collects the ball, the B button springs you into the air, while a stab on the C button releases the ball and sends it off to the basket. You get five balls to throw before you move off to another part of the court to attempt this manoeuvre again. You receive your total score at the end, along with a report from the sometimes sarcastic commentators.

One of the practise rounds in Jordan Vs Bird is the Slam Dunk stage. This is viewed from the side and sees your player running straight at the basket. It's your job to control his actions using the A. B, and C buttons on your joypad. You choose the slam dunk manoeuvres you want to attempt at the start of the round, and it's your job to carry them out. Your efforts are then marked by a panel of distinguished judges

tricky shot. Can he pull it off?

- Two shots depicting slam-dunk action. The picture to the right shows the practise round.
- Some lively banter from the commentators.

Some ace slam-dunking thrills here as Jordan tucks the balls away.

ONE-ON-ON This is the main part of the game.

Here, you are thrust head-first into a timed session which sees you trying to score more baskets than your pal. All sorts of dummies and throws are available for use... if you can master them, of course!

COMMENT

This is actually a conversion of a crappy, very limited and boring eight year old C64 computer game called One-on-One Basketball, And even though EA Nave added a

few extra elements and attempted to beef it up, at the end of the day it's still the same old crappy, very limited and boring game. The sound is pretty good, but the animation on the players is appalling (both players run around as though they've got 15 pounds of cack in their trousers) and the gameplay is virtually devoid of excitement - even with two players - due to the frustratingly hopeless control method. The slam dunk competition is laughably easy and really there's little else to keep you playing. If you're a basketball fan either go for Supreme Court Basketball or wait for the forthcoming Bulls Vs Lakers. Both are infinitely better than this tosh.

Some sad scoring for that particular effort. It looks like Jordan is going to need a lot more practise!

COMMENT

I thought Electronic Arts could do no wrong and was really looking forward to Jordan Vs Bird. Unfortunately, something has gone drastically wrong. The main part of the game, the one-on-one section is completely devoid of excitement and boasts severely deformed characters with laughably disabled animation. Also, actually scoring a basket seems to be more of a matter of luck than real skill -

especially the three-pointers. The Slam Dunk Event is more of a non-event. Running up to the basket and performing manoeuvres is incredibly easy and involves little use of skill. The same can be said for the graphically pleasing Three Point Contest. I scored full marks from all positions on my second attempt! Considering that EA are responsible for the likes of the amazing John Madden '92 and EA Hockey, frankly I'm surprised that they released this sub-standard piece of software. Hopefully, the forthcoming Bull Vs Lakers will see a return to the usual high standard we expect from Electronic Arts.

Excellent. Many interesting options to tweak and a great instant replay option.

These range from being superb on the three-point screen, to being rather sad on the main one-on-one section.

Some good effects and great music courtesy of Rob Hubbard.

All three sections are either completely devoid of thrills or are laughably simple to complete.

The lack of variety or longevity on each of the sections make this grow dull extremely quickly.

A substandard sports simulation that won't even appeal to basketball fans. Check out Supreme Court Basketball or wait for Bulls Vs Lakers.

RODLAND

Ever fancied prancing around a platform environment, whacking meanies around with your magic wand? Yes? Perhaps you should check out The Sales Curve's Rodland game, out in the Autumn of this year. In this conversion of the Jaleco coin-op, it's your job to rid each single screen of alien infestation by whipping out your wand and slapping those xenomorphs into oblivion. Each vanquished meanie turns into a special weapon which can be used against the remainder of the alien contingent.

Rodland looks like being a superb coin-op conversion with some excellent graphical effects and groovy simultaneous two-player action. We'll be reviewing this in a few month's time, so look out for that future edition of MEAN MACHINES.

▲ Use your highly useful wand to slap some of your enemies around. Those doorways are used to warp to other parts of the screen (as indicated by those flashing stars between the two doorways).

Owww! The hero of Rodland is viciously cuffed by one of the many meanies. Those flowers in the background are bonuses.

Williams' coin-op of all-out complete carnage is set to appear on a Megadrive near you soon, courtesy of the Flying Edge (a subsidiary company of Acclaim). The basic idea of the game is that you're a contestant in the game show of the future, where the idea is to blast everything in the Smash TV studio - before they kill you! Luckily, you're equipped with a decent blaster

and rocket launchers lying around. Making use of these to blow up the legions of enemy sprites and the vicious end-of-level bosses is essential. Just like the coin-op, Smash TV boasts simultaneous two-player arcade action so you can choose to act as a team or just look out for yourself and pinch the many prizes that litter the Smash TV studio.

and there are plenty of other weapons like grenades

We've had a sneak preview of the Megadrive version of the game but we will reserve judgement until we get round to writing the full review. Watch out for a future issue of MEAN MACHINES.

MEGADRIVE

NEW GAME PREVIEW

Those horrifyingly unfashionable turtles are back for some more martial arts action in their fourth console outing.

Turtles IV: Turtles in Time, boasts super slick beat 'em up action akin to the smash hit coin-op's but has all-new moves and redesigned levels. As well as the usual horizontally scrolling action, there's F-Zero style racing sections and mega scrolling surfing escapades! Add amazing playability and super skill graphics and sound and you've got one top quality product. Konami already have the game and hope to officially release it here in the UK in a few months, after Konami release Castlevania IV and Super Probotector (known as Super Contra everywhere else in the rest of the world). We should be reviewing this cool game next month so look out for that priceless edition of MEAN MACHINES.

SUPER NES

Anyone remember Nebulus, that astoundingly original arcade puzzle game on the home computers? Well, Castellian is an excellent conversion available soon for the Nintendo and Gameboy.

You are cast as Pogo, a strange green creature who is out to save the world by scaling eight peculiar getting up each tower is made all the more difficult to dust Pogo's ass! There is also a plethora of little hero some problems.

1 2 3

One of the many arcade puzzles in Castellian. Use the lift to reach the higher platforms, but beware of lurking monsters - or you're dead!

Super SWIV is a conversion of the ace Amiga classic that put you in charge of either a jeep or a helicopter, and charges you with the task of blowing up an entire defence budget's worth of military hardware.

jeep has more problems. We've had a glimpse at an extremely early version of the game and can report that the game is shaping up really nicely. Don't hold your breath for this one though as the game isn't going to be released until early 1993!

NEW GAME PREVIEW

Based on the gory Namco coin-op, Megadrive Splatterhouse II is a horrific horizontally scrolling beat 'em up in the style of Double Dragon.

The player takes control of a masked marauder (who bears a striking resemblance to Jason from the Friday the 13th movies), out to rescue his girlfriend from a gruesome fiend. Unfortunately, to get to this evil willain, our hero must run the gauntlet of the Splatterhouse, slapping about any undead meanies that cross his path. Helping the hardy hero in his quest are a number of pick-up weapons, including shotguns and wooden poles (you can splat enemies against the wall with these!).

Jaz 'n' Rich have been treated to a sneak preview of Splatterhouse II at the offices of Sega Europe and came away very impressed. You'll be able to sample the sinister delights of Splatterhouse II when it's released this Summer.

▲ The hero of the game comes up against an end-of-level boss. This particular meanie crops up at the end of stage two.
