Aim for the orange asteroid in the middle and wait until it is almost upon you. At the last second when it is right in front of you, fire your lasers and destroy it. There are 3 sets of these asteroid groups. Do the same for all of these. After you shoot out the orange asteroid in the third spinning group, you will come across a grey asteroid with a face on it located slightly to the mid-left of the screen. While the curve meter is going back and forth, stop it on the red arrows, or all the way to the far left. When the power meter appears, stop it when the brackets are the furthest apart (full power). FIRE 'N ICE - *Play Hidden Levels* - Here is a great code that appears after completing Round 10-10 and beating the last boss. If you let the Nintendo keep running after "The End" screen, this incredible code will appear, which says: At the Title screen, press and hold the SELECT button and then press the B button 10 times. After you do this, a screen will appear that tells you that you can play the hidden levels (11-1 to 15-10)! Next, a Round Select screen will appear and you will be able to choose from any round in the higher levels in stages 101 to 150. There is also a Sound Select option so you can hear any of the great tunes of the game! Just choose your new levels from the Hidden Round select and you will be on your way to even more brain teasers than before!
