MEGA DRIVE ADVANCED GAMING NOVEMBER'92 • ISSUE 3

NEW USER GROUP LAUNCH

elp may be at hand for Sega users tired of shoddily run user groups. A new group called Power Play Club has been launched recently in Chichester with the proper financial backing to prevent it turning into a black hole of swapped cartridges that never get seen again.

Backed by well-respected Acorn developer Vertical Twist, the club offers a fully computerised cartridge swap service, a discount purchase scheme for hardware and software. an

opportunity to place advance orders for

elp may be at hand for Sega carts and an up-to-date import users tired of shoddily run user information service. All of this for only groups. A new group called £11 a year.

The membership pack includes swap slips, discount vouchers and an awfully bright yellow plastic membership card that you can flash at your friends and use to impress the girlies or boys – possibly. They also plan to send a regular newsletter to all members.

Call (0243) 531194 for more details.

STEEL TALONS

Let's face it, so far most of the 3D polygon based games are pretty crap, being very slow and sluggish.

With any luck though, Tengen's conversion of this Atari arcade classic should give flight/combat sims a much needed kick up the botty when it appears just after Christmas. Taking control of an advanced combat chopper you must fly behind enemy lines and knock out all manner of targets in order to complete the numerous missions. It's not yet clear whether or not the game has the superb two-player feature of the arcade machine, but as soon as we find out we'll let you know!

GAUNTLET CONTROLLER

As Tengen plans its release of Gauntlet there has been some moaning going on in the games press that it will only be for two players. Well, we can reveal that this is not the case.

Currently in development is an adapter which plugs into the Mega Drive that doubles up the number of joystick ports. Ace or what?

All being well this unit will be packaged with the game when it is released later in the year.

LAND STALKER

rom the house that brought us Shining in the Darkness comes a new and innovative RPG, Land Stalker – Emperor's Treasures.

Utilizing a revolutionary new graphics system known as DDS520 you are presented with an beautifully drawn isometric view of the landscape as you move your noble warrior from location to location. This new system enables the game to be incredibly fast and smooth.

To make things even more spectacular, when the game finally arrives at the end of September it will be released as a 16-megabit cart – at present the only other game of this size is Streets of Rage II.

All this extra memory space means that there are more meanies and locations than in any other MD game.

Expect some of the graphics and animation to be extra specially fabby and the animation to be something else!

WOLFCHILD

After making quite an impression on Amiga owners about a year ago it would seem that Wolfchild from Core Design is to see the light of day on the Mega Drive.

Playing the part of a young man out to avenge the death of his father, you must move through eight levels of alien infested territory. Our hero has the ability to transform into a werewolf at will and knock out the opposition using both his immense strength and phenomenally bad breath.

The game promises to be startlingly presented and should be available in Japan and the States just before Crimbo.

GOLDEN AXE III

After making an almighty balls-up with Golden Axe II it looks as if Sega is finally trying to get things right by releasing another sequel.

Using the same scenario as before – running along and hitting people with large sharp objects – the game should be considerably different presentationwise.

The game will be slightly more involved than a basic beat'em-up, incorporating a smidgen of role-playing and adventure.

If you're curious as to what the MD version will play like, pop down to the arcade and check out the new arcade unit. Don't hold your breath for the console game though, you know what Sega can be like!

RIOT POLICE PATORABER

A Japanese comic is to get its very own role-playing game on the Mega Drive.

Sharing its title with the comic, Riot Police Patoraber has as its hero a rookie cop who finds himself in a spot of bother on his first night when rioters take over three police stations

and it seems he's the only copper left on the streets.

Missions include finding transport, obeying orders from superiors and ultimately rescuing the city from the stranglehold of violence.

The game is due out in Japan during the next month.

bout time really! It's been converted to just about every conceivable format and it's only now toddling over to the Mega Drive.

Unfortunately, at present the only way any of you lot are going to be able to play it is if you invest in a Mega CD unit.

It looks darged impressive though! The whole

It looks darned impressive though! The whole arcade game has been faithfully reproduced in its entirety. All three characters are present, unlike the Super NES version where there are only two. As

far as we can tell it looks as though it's going to help establish the Mega CD user base outside Japan.

At present the game is only about 10 per cent complete so it'll probably be ready around February or March next year. Start saving those pennies!

8

Cyberpunk racing games are somewhat of a rarity on the Mega Drive, but it would seem that Victor Musical Industries has high hopes for its new product due for Japanese release this month.

Looking like a hybrid of Gremlin's Supercars and Psygnosis' Nitro the game places you in a futuristic arena where you must race against a number of rather strange looking fellows!

In order to make your cars much more advanced you can gamble your winnings to try and go for the megabucks!

The 8-megabit game promises to be filled to the brim with digitized graphics and sampled sounds that should add greatly to the futuristic cyberpunky presentation of the game.

Watch for it soon on grey import. As for an official release...who knows when that will be!

THE TURBO TOUCH 360

hat's the biggest pain about bloomin' Mega Drive joypads eh? It's the way the sods cut into the side of your thumb after you've been playing for a couple of hours. Well, fret no longer as US based Triax Controllers has come up with a rather snazzy touch sensitive pad that requires little effort in the old thumb department.

Although not available in the UK at the moment, Hornby Hobbies is currently looking into distributing the charming little black and yellow number.

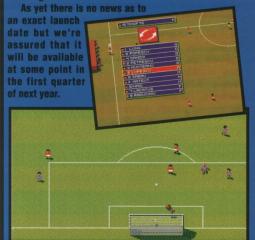

Although it doesn't sound like a very good idea the unit does make playing games considerably more comfortable to play. The touch pad is fast and responsive and quite incredibly easy on the fingers. After trying it with games like Sonic and Streets of Rage there were no signs of thumb fatigue. Sounds good to me! Watch out for a review next month.

SENSIBLE SOCCER

uality soccer games are certainly few and far between on the Mega Drive at the moment with only a couple of titles worthy of being taken seriously. Fortunately though, all this is about to change because the acclaimed Amiga and ST title Sensible Soccer is being converted to the Mega Drive.

Based on the more recent Soccer v1.1 update, the console game will have all of the best bits from the original computer game along with the enhanced features of the new data disk, such as intelligent goalies.

With 130 teams ranging from basic international and regional teams to those made up of famous artists, cartoon stars and guitar heroes, the game certainly injects a much needed sense of humour into computer soccer games.

VIRGIN GAMES APPEAR

Speedball II, Corporation and Xenon II the heavily delayed Virgin Mega Drive titles, all previewed in issue one, are finally to appear during the fourth quarter of the year.

Speedball II is due to appear in October and the other two are set for a November release. The difficulties leading to this four month delay lie with problems in production of the cartridges in

December will bring with it the release of Mega-Io-Mania and Superman. Both will be reviewed not too far off in the future.

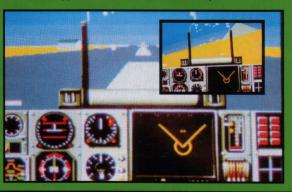

Talons, Domark will be releasing a fully fledged flight sim, based around arguably the finest air superiority fighter in world, the Mig-29 Fulcrum.

It is set to be slightly more action orientated than the version that appeared on home

ollowing on from Steel formats last year. The 3D system is certainly the smoothest and fastest we've seen. Whether this will remain as fast when there are other planes flying about and objects moving on the ground remains

> We'll keep you posted of any further developments.

Domark is hoping that its forthcoming title, International Rugby, will cut it in the worldwide market of the Mega Drive.

Based on the Amiga version that appeared around the time of the 1991 World Cup, and squeezed onto a 4MB cartridge, it will be the first rugby game to arrive on the MD. This may be the best selling Mega Drive title ever in

ACCOLADE INJUCTIO

Accolade was celebrating last week as the injunction brought by Sega preventing the company from publishing Sega titles was lifted by an American court.

The injunction was part of the action brought by Sega who is claiming copyright infringement against Accolade for its use of the Backwards Engineering technique to find out how to program Mega Drive games.

The case still goes on, but in the meantime Accolade intends to make hay while the sun shines. Its next title will be Universal Soldier on the Ballistic label

If Accolade does win its case it will open the floodgates for anyone to publish on the Mega Drive without needing to seek permission from Sega, which was Accolade's original intention.

With the first series pulling in four million viewers every week it was a foregone conclusion that Gamesmaster would return. John popped down to London to check out some of the filming.

LIGHTS, CAMERA...

"Here we are, Gamesmaster. Just push this button and fame

HOBNOBBING W GAMESMAST long way up. It feels like I've been sitting here for ages. The

location in the centre of Soho it soon became apparent that this telly lark is a popular thing among budding journos. Everyone was there from mag editors, to a few lucky punters chosen from numerous applicants.

Everyone was crammed into one tiny recording studio where each reviewer in turn sat in an awkward position beneath a solitary camera, in front of a blackened backdrop.

Strange lighting, coupled with one of the most ludicrous sitting positions ever seen ensures that these Gamesmaster reviews will be both moody and different.

It warms your heart to see that the staff of Gamesmaster get along so well!

Watched over by a number of

Dominik, each reviewer had a couple of minutes in which to quickly assess games from a number of genres including simulations, Hollywood games (film licences) and roleplaying games.

DER, I'M JOHN!

For some loony reason they wanted me to comment on 'brain games'! -quite why I don't know, but three games including the Mega Drive version of Krusty's Funhouse were expertly reviewed by MAG's resident hairy yob!

Those of you who can't wait for the new series will be more than pleased to discover that the second

The make-up

of your poncey

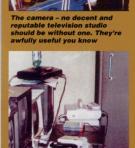

"Oh my God! I'm about to go on television!" The nerves were definitely setting in upon entering the studio for the first time!

series of Gamesmaster will begin on 1 October on Channel 4. Expect to see a large number of changes this time round. A new location has been chosen and you can look forward to a greater number of reviews

Come on loveys, look up at the camera. Yes that's it crane your neck, we don't want you to look like you're at all comfortable

The Gamesmaster 'in-studio games assessment station. All the latest stuff is here ready for the punters and reviewers to have a quick go with before going on camera

RISKY WOODS

isky Woods is a fast and furious arcade platform game already available on the Amiga. The good news for Mega Drive owners is that it is due to appear on their machine.

The player takes on the role of a wee chap named Roham who must negotiate 12 levels that take him through a fantasy world of forests, villages and caverns, all of which are filled to overflowing with the forces of evil.

Apparently the game includes 20 different types of enemies, huge great big whopping end-of-level guardians (just for a change eh?), plus loads of hidden bonus bits 'n' bobs to keep you chirpy as you move from level to level.

Initially developed by a Spanish mob named Zeus Software the game has been converted to the Mega Drive by Electronic Arts' in-house programmer, Steve Wetherill.

ven

more

stuff from

the chaps at

No release date is clear at the moment, but we have reason to believe that it will hit the shelves in time for Christmas.

SHADOW OF THE BEAST II

ue in November for £39.99 Shadow of the Beast is the fourth Psygnosis licensed product to be distributed by Electronic Arts.

Those who have seen the Amiga version of this game will doubtless be jumping up and down with glee at the prospect of seeing it on the Mega Drive.

Basically the game picks up where the first game left off. Having returned to your human form you are happily living in a pleasant little medieval suburban cottage in the middle of the Yorkshire dales. Unfortunately, although the big nasty Beast Lord is dead his loyal servant the Beast Mage has returned to seek revenge. Kidnapping your baby sister the mage escapes

to a hidden stronghold in the middle of nowhere. All you have to do now is run off through level after level of puzzle filled platforms.

Visually more impressive than the first

Beast game, Beast II looks set to stretch the boundaries of presentation on the Mega Drive as it did on the Amiga. Watch out for a preview in next month's issue.

JOHN DDEN '93

In keeping with its recent series of updates, the EA Sports Network has announced the release of John Madden '93. Using updated player statistics and a revised playbook, the game looks like it's going to set the standards of American football simulators.

The new game promises to include improved animation on all of the players. New moves include taunting, head-butting, one-handed catches, stumbling, and face masking (whatever that is!) and we are assured that this adds to the game's realism.

Sound is also an area that has been enhanced further. All of the speech in the game has been improved as have the sound effects.

The game will be released on an 8 meg cart in December for a price of £39.99.

racing game with a beat'em-up element and expands upon it.

Now we have simultaneous twoplayer action by means of a split screen, as well as piles of new weapons.

More of the same really but if you loved the first one this one will definitely blow your socks off.

It takes the basic idea of a motorcycle

THIS MONTH JOHNNY HERBERT PLAYS SUPER MONACO GP ||

After
exercising his

it didn't blow
up there and
then

the best of the premier league footballers. He seems delighted with the state his car's in though, "That's quite good as well, the wheel bouncing off".

So it's back to the start. Johhny finds first gear without any trouble at all, in fact he seems to have got the knack of the gear changing quite quickly, sliding up and down like a good un.

Then he susses that you don't really need to change gear at all, "I always find with games like this that you can just leave it in a high gear and it goes much better anyway".

SPEED AWAY

So off he whizzes around Spa. Watching him, the way he changes gear and hits the brakes so quickly makes you realise the kind of reactions that an F1 driver must cultivate and maintain, permanently concentrating and always on the edge of your reflexes. What a life!

I ask him about the realism. "It handles very well, probably too forgiving actually, a bit too easy. It seems to quide you around a bit."

seems to guide you around a bit."
What about the track itself?
"This is normally a first gear
hairpin on the real track," he says
whizzing round it at some 280km/h.
"I've just taken it in seventh, it's
not quite as hard as the real thing."
Something of an understatement

there from the young F1 driver.

About this stage, his talents

showing as he hits the apex on every corner, he starts enjoying himself and rams a competitor off the road. "Brrmm! Yeah! Ha haaa! Oh he

That 'realistic' first gear hairpi being taken in seventh

more realistic than some because of the view from the cockpit." Famous last words as he then proceeds to crash into a pile of

The delight he had in this wanton destruction of a car was quite remarkable

Someone chirps up, "I hope you're not like this on the track" Johnny replies acting the innocent, "Me? Moi? Moi?" Some three laps later Johnny

is closing on the first place man but he's only got half a lap left to catch up. Over to Johnny for the live commentary. "He's pulling away. I could do it, I could do it. Aaah!" No more than 200m behind he comes in a very respectable second. He afforded himself a wry smile, "If only the real thing could be like this"

FRENZY?

Overall Johnny Herbert liked the game, but I'll let him explain. "You don't spin, which is a shame. Your wheel flies off when you hit the tyre wall, which is good, stuff like that adds realism to the game. It would be better if you spun if you went too fast like on that first gear hairpin you can take in seventh.

Gear changing's good once you get used to it. With the A button for the accelerator and the B button for brakes you can just roll your thumb between the two which I like.

The graphics are really nice on this, it really looks like a circuit. It's good with the driver's hands as well, they move as you steer and you can make it look like the hands are fighting with the wheel.

It's playable, but it is a bit too easy, too forgiving."

ADRENALINE

LAP 8/8 POSITION: eb da da

didn't blow up, oh you'd think

he would have blown up!"

slowed him considerably and

someone whizzes past, "No

you don't! You swine!". Some

consolation is taken from the fact

that the previously rammed chap is

way behind and smoking badly.

The disappointment in

his voice is all too evident, but the impact

ond place was all the best he Id manage, but he'd be ghted with such a result on the

PERSONALITY PROFILE: JOHNNY HERBERT

Here Johnny (swoon) let me help. You need a woman's touch

One of the up and coming British

One of the up and coming British drivers who've done it the hard way, from karting for the under 10s to winning Le Mans in 1991 as part of the Mazda team. Now at 28 years old he's driving for the fast improving Lotus team along with teammate Mika Hakkinen. This isn't his first crack at Formula One but a broken ankle early in the 1989 season put him out of the Benetton team and his first drive This season he's back, giving some determined, promising performances, and to top it all he's actually a nice bloke.

LIGHTNING REACTIONS!

"So you drive for a living, right Johnny? You're a pro so this driving lark should be a doddle, right?"

"Look, stop it! I'm trying to concentrate on the lights, leave me alone! Now is it the green ones that mean I can go or the red ones?"

"That's the car Johnny, the grey bit's the road and you have to stay on that without hitting all the other cars. Got it?"

"Right. No problem here we go. Oh sod, that's reverse! I never have this problem in my Lotus you know. I know I don't always get around...

Once you get over 30 miles an hour, you can really feel the speed. It's like the real thing, except not as bumpy, or dangerous, or as fast. Nothing like the real thing at all actually. Cor look it's a little bunny rabbit"

my cheek muscles, my face could be stuck like this for hours!

Medically known as **Racing Driver's** Grimace this can be extremely painful. it has been known to affect driving instructors as well

All you have to do to win the actual control pad used by the incredibly famous Johnny Herbert complete with his autograph - is predict his finishing position in the World Championship at the end of the season. To make things difficult get you entries to us by Monday 2 November which is just before the end of the season!

THE GAME GENIE

The ability to rip into a game and cheat has always been something of a Holy Grail for games players. We look at the latest cheat device and find out if the Game Genie really grants your wishes with the minimum of elbow-grease.

o date nearly every MD game has some kind of cheat giving an infinite something or other. But the last 18 months has seen a new breed of cheat device. the latest of which is the Game Genie from Hornby Hobbies, designed in the UK by Codemasters.

The first of this type of gadget

was the Action Replay. It wasn't programmable and the codes that were released came in a dribble in assorted publications.

Its successor, the Action Replay Pro, is programmable but it isn't the most user-friendly system. Anything more than infinite lives or energy takes ages and often it won't get down to more than 20 different possibilities, which you'll have to test individually.

THREE WISHES
The third one to come onto the market is the Game Genie from Hornby Hobbies. Codes can be guessed, but Hornby has set up a helpline that is updated every day to provide new codes for all the latest UK releases.

For new games the codes will appear some three weeks after

R H 9 T - 8 6 0 E R E 1 A - A A G G B E 1 A - A A D C A M L T - A A 4 4

release, to allow time for the game to be played properly.

Also the Game Genie comes with code book containing over 1,500 effects for 79 official games. For example Desert Strike has some 43 codes ranging from infinite weapons, to reducing fuel consumption.

HANDS ON
All of these could probably be done on the Action Replay Pro. but the more subtle variations among them would probably take a long time to work out.

The beauty of the Game Genie is that it is all there for you, in the manual or on the other end of the helpline. You won't have to worry about fiddling with memory locations to get the desired effect, you can go right to it.

The supplied codes can be altered to offer some weird and wacky effects, if you are lucky.

Neither device is very flexible, but the Game Genie more than makes up for this with the unstoppable supply of cheats and tweaks JOOLS from Hornby. Overall this is the best cheat

GAME GENIE VS REPLAY PRO

PROGRAMMABLE?

Through trial and error based on existing codes, but can't chase codes with a definite end in mind.

The Action Replay Pro will search for a number of things but it can't do some of the more complex Game Genie stuff.

USEFULNESS

If you have the codes it is extremely useful and loads are supplied - though some games have up to 50 codes.

Action Replay Pro The Pro is also of use to play import games, unlike the Game Genie. Effects like infinite lives are very easy to get on Pro.

OVERALL

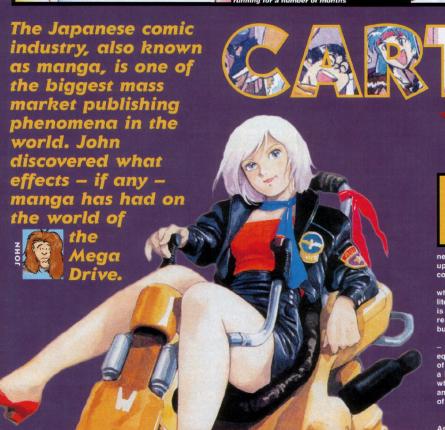

Game Genie
If you just buy official games and want everything handed to you on a plate then the Game Genie is

Action Replay Pro If you want to cheat on import games or do most of what you want on any game, then you must have the Pro.

device available.

FEATURE: JAPAN'S CARTOON CULTURE

The demand for Japanese comics has been rising considerably over the last few years. The translation process however, is much more complicated than just changing all of the text around.

panese comics are printed backwards, so that left! To translate a mag, all the pages from an For starters all Japa they read from right to oust be photographed and then flipped over original manga issue

before the artists and etters are let anywhere near them. The problems with changing the actual text are also quite extraordinary. To start with, many Japanese symbols represent whole they are translated they take up a lot of room. t and accent can be easily represented in expressions so when

Secondly, dialect Japanese, this isn't ea sy in English. Also the translators will have to do a lot of research because e the subject matter is often quite obscure Titles such as Orion inclu le references to Tantric Buddhism and also

Titles such as Orion include references to imitic Buddhism and also feature invented words using-strange symbol combinations!

As you can see, the process 1sn't easy and so many manga issues do not arrive in English-speaking nations. Things are getting better though, so keep an eye on your local comic shop for new titles.

FEATURE

year Japanese comic industry manages to churn out one and a half billion comics and magazines. With tens of millions of devoted readers, a new manga issue can expect to sell

upwards of two and a half million copies in a single week! Unlike the rest of the world, where comics are belittled by the

literary snobs, the Japanese market is enjoyed by a wide spectrum of readers, from school children to business executives.

The top four children's comics the Jap Beano and Dandy equivalents - have combined sales of over 10 million, while Big Comic, a bi-weekly adult orientated tome which embraces horror, politics and eroticism boasts a circulation of over a million!

COMIC RELIEF

As you are undoubtedly aware, this thriving industry has also spawned a thriving film and video market where all the most famous comics are transformed into animated epics such as Akira or Dominion both of which are distributed in the UK by Manga Video/Island World

Television is also given the full manga treatment, with at least 30 new episodes of various series being broadcast every week. Seen Battle of the Planets, Thundercats or Thunderbirds 2084? If you have, you too have been exposed to

With all this being such an integral part of Japanese life, it is inevitable that the characters and

FEATURE: JAPAN'S CARTOON CULTURE

One of the more recent blasts on the Mega Drive, Gley Lancer, includes a long and exceptionally well-drawn introduction quence that tells the story of the characters in true manga style

scenarios will bleed across to the video games market.

Already we have seen games utilizing the manga art style, these include the Flaming Dodgeball Kid, Gley Lancer, Fighting Masters, the Phantasy Star trilogy and Wonderboy.

More often than not this only applies in the introduction sequences of the games, but things are changing as the carts get larger and more advanced.

As the video game culture continues to grow, many of the game characters are beginning to appear in comics. Sonic is already the star of his own strip, as is Mario (ptuey) and many others.

video Japanese magazines such as Mega Drive Beep and Tushkin all have comic sections in the centre that use characters such as those from the Phantasy Star series and the upcoming 'Lunar the Silver Star' which is apparently an RPG of quite epic proportions. So it would seem that video games and comic strips go hand in hand, but what can we expect over the next few years?

GO FORTH
In future, especially as the Mega CD is making multimedia an ongoing concern in the Mega Drive market, we can expect to see games with animated intros by famous comic artists.

Dark Wizard, an RPG due any day now, boasts an intro produced by an ex-Thundercats animator with speech and music recorded by famous actors and rock stars!

On the cartridge front, the

TOON FACTS

- In Japan, the weekly equivalents of 2000AD or Megazine are often nearly an inch thick with a print run of over a million. They'll regularly sell out in less than a week.
- Comics cater for every sector of Japanese society. Men. women and children all have publications designed for them. Subjects range from sports to horror and pornography.
- Japanese society has accepted comics as a normal form of literature and fiction. Seeing a middle-aged business executive reading a comic on the train is not unusual!
- Many of the comic artists have been elevated in status to something not dissimilar to that of a rock star. One in particular, Asumi Shira (who was responsible for Dominion) is often mobbed by adoring fans.
- Violence on TV is acceptable in Japan with films such as Akira (an 18 certificate in the UK) being on prime time Japanese television.

Many would question the morality of this, but Japan has the lowest crime rate in the world. Obviously these cartoons don't encourage antisocial behaviour.

Japanese developers are sure to latch onto the sudden worldwide interest in their comic strips and we can expect more games using this style. Fist of the North Star has already appeared in the shape of Fighting Masters, albeit in a very loose representation. Rumours also abound of an Akira game.

Only time will tell how things progress, but as this contemporary Japanese culture becomes more popular worldwide, we can expect to see some very interesting developments over the next few

The Mega CD, one of the most eagerly awaited MD peripherals, has been available for some time in Japan and it looks like a UK release is imminent.

FEATURE

asically, the CD unit is a mass storage device through which you can load much larger games into your Mega Drive. It's actually possible

to have games of around 200 megabytes sitting on a single disk, this is considerably more than your average cartridge which is only 1 or 2 megabytes (an 8 megabit game such as Terminator is only 1 megabyte).

Obviously having this much more storage space to hand means the games can be more complex but also it's also possible to have proper digital sound. Rather than loading music and sound effects data into the Mega Drive, real recordings can be played back at the appropriate time.

As if all this isn't enough, Sega has also taken this opportunity to upgrade the hardware capabilities of the basic machine.

As you are probably aware, the release on the Super NES has illustrated a number of limitations of the Sega's custom graphics hardware. Obviously, this isn't on, so there are loads of new fancy bits stuffed into the bland looking black

The CD unit (which is plugged into that mysterious edge connector

Thunder Storm FX is one of the advantage of the Mega CD's por

under the right-hand side of the Mega Drive casing) includes an extra CPU which enhances the basic code crunching capabilities of the Sega.

To help this along a wodge of extra memory (about 600k) acts as a buffer for the data going from the CD into the Mega Drive so there's always a steady flow of information.

Lastly, a custom graphics chip lets the machine do all the flash things a Super NES can do including graphics scaling, rotation and high speed polygon manipulation. This means that future games will be able to use high speed 3D effects without eating up memory.

At present an imported machine costs £250 to £300 but it's hoped that the official UK machine, to be known as Sega CD, will cost in the region of £200.

OH REALLY!

1. CDs play from the inside towards the outside edge

2. The top surface of a CD is the delicate one. The light passes all the way through the clear plastic and reflects back off the aluminium coated top surface.

3. At the equator and the poles CDs wobble very little. This effect varies depending whether you're in the northern or southern hemisphere. This is caused by the Earth's rotation.

4. CDs cost less than a pound to manufacture when over 1000 are being produced.

5. The laser used to access the information on a CD is infrared. It is thus totally invisible to the human. If you see a light in your player, it's only there for show.

6. A unit such as the Mega CD is also perfectly capable of playing domestic CDs as well as the new CDG format where music is accompanied by simple teletext style graphics.

THUNDER STORM FX

This is the first game to be released on Mega CD that truly unleashes the potential of the machine. It's one of the most stunning looking games ever!

REVIEW

ho out there can remember the old laser disc arcade machines? The original Dragon's Lair and others like it caused a stir by using real film to enhance the presentation of the game. All these are long gone now, but the method in which they worked is being employed by CD-ROM products.

What happens is that the machine acts as a buffer for all the information that is coming off the laser disc. The effect created is a long animation that's permanently supplied with new frames from the huge resource on the CD.

This process continues until certain points are reached where a decision must be made by the player. This could be anything from a change of direction, to firing.

If the decision is made correctly, the machine continues playing back the animation, if a mistake is made it skips to an animation of the player dying.

LIGHTNING SPEED

The old arcade machines simply played back true video images, whereas the Mega Drive actually processes huge amounts of code and squirts the graphics onto the screen.

As far as I'm aware, Thunder Storm is the first Mega CD product to employ this method. Past games such as Sol Feace

and Earnest Evans have been giant games with fancy soundtracks, but this is the first to

really take advantage of the CD.

The game works on the principle that it tells you when to do

something. For example

When you have moved out over the Pacific Ocean one of the most stunning scenes is when this huge nuclear submarine emerges from beneath the waves

Big bang. Er...This tends to happen rather a lot at first. Make a wrong decision and BOOM. Bye bye cruel world

make sure you get it before it gets you!

As soon as you've succeeded here you've got to pull up quickly so you don't hit the statue. If you don't move your cursor to the top of the screen when it tells you to, you'll crash and burn.

WHOPPER OF A CHOPPER The whole game works on this

reaction principle and later on the number of reactions required is ridiculous. You have planes and tanks all shooting at you and you have to make sure you knock them out when the game says. The pattern is always the same so you can learn where to leave your cursor at set times.

Being on CD the game is quite

phenomenally huge and all of the levels have superb graphics. can quite honestly say I've never seen anything like it before.

The movement as your chopper careers down the streets and passageways of the various enemy infested areas is smooth and lifelike and to be quite honest it looks just like a Japanese cartoon.

The sound, as you would expect, is another area in which this game excels. Throughout the levels you are treated to a pumping soundtrack along with stereo sound

effects and speech from your copilot as he informs you of what's coming up next. Through monitor speakers it sounds great but plug in a set of headphones and the effect is utterly gobsmacking!

Gameplay, although initially very exciting has its downfalls. As mentioned earlier, it is possible to learn the attack patterns of the enemy and this can make things a bit boring after a while. It's a shame about this really as there are many

MANHATTAN MASSACRE

NOVEMBER '92 . ISSUE :

This month sees the release of two movie

conversions; both monster films and both sequels.

After the let-down of Alien 3 some salvation was expected with Predator 2...

t has been 18 months since the cinema release of Predator 2 and now a Mega Drive cartridge bearing the same name has reared its ugly head. Remember the plot of the movie? No, well here's a quick reminder.

After big Arnie laid waste to Central America in the first Predator film the alien hunters moved out west to California. No self-respecting Predator's front room was complete without the head of a Los Angeles drug cartel member.

Step forward tough cop Danny Glover, alias Lt Harrigan, to spoil the fun and show those Predators what a real American male is made of. The Mega Drive version of Predator 2 bears no resemblance to the old Amiga version, but no sleep will be lost over that because the Amiga version was pretty bad.

NOW YOU SEE ME...

The MD conversion is a one-player game that places you in the role of Lt Harrigan. The object of the game is to save a number of hostages before the Predator claims another trophy for his collection.

Not as easy as it sounds because running round the streets are narcotic crazed members of drug gangs. These nice chaps shoot anything that moves, their prime target is usually Harrigan.

The game sticks to the locations used in the film, the first level throws Harrigan into the middle of a major drug war on the streets of LA while level two is set on the roofs of skyscrapers.

All this way for what?

A bloody pistol. Hardly winning the

pools is it?

What can I say? No problem. Beat that if you can Dave

The game has seven levels in all, each increasing in difficulty as Harrigan closes in on the Predator's lair. A large object, which is usually some type of vehicle, has to be destroyed before entry to the next level is permitted.

...NOW YOU DON'T

A totally original piece of programming enables our hero to pick up extra powerful weapons along the way, the type of thing often found when taking a casual stroll. You know, rocket launchers, M16s and so on.

The game is completed after the Predator is tracked to the alien ship. Hordes of pissed off Predators then attack, some of them use the old 'turn

invisible' trick to add to the confusion.

After all the hostages are rescued Harrigan must fight what I assume is the Predator version of Captain Kirk. If successful the Predators reward your bravery in the form of an old pistol – a few quid would suit me.

The main fault with Predator 2 has to be the size of the game, or rather the lack of size. Each level can be completed in under 10 minutes. Difficulty hardly figures except when

Harrigan saves Bart Simpson (?) from the clutches of some unsavoury types

actually fighting with the Predator, even then his moves become fantastically predictable.

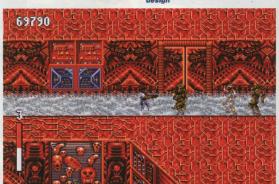

Level seven causes problems, but nothing an experienced player wouldn't be able to work out after intensive play. Graphics are very average and the usual gun shot sounds are as expected with this type of game, again nothing to become excited about.

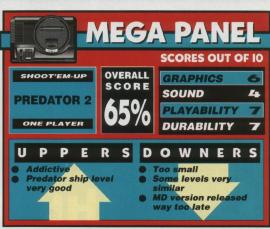

For some reason Predator 2 had me totally addicted. Having played numerous games of this type and being thoroughly fed up with the majority it made for a pleasant change. I found that I really wanted to complete the game, perhaps that can explain

that can explain why I managed to finish each level so quickly.

(Below) Predators may be great hunters but they fall flat on their faces when it comes to interior design

Given its European premier at the Sega Euro Championships last month, Greendog impressed all who saw it. Is it as good as 🕸 first impressions suggest or are those superb graphics just a cover for a naff game?

he fact that Sega never misses an opportunity to bung out another platform game cannot be denied. After the immense success of Taz-Mania it would seem that everyone is a sucker for a game presented with wicked cartoon

Although this latest release doesn't tie in with a specific cartoon character Sega has decided to produce it cartoon-style.

If you top this with the number of times the words 'dude' and 'shreddin' are mentioned it would seem that Sega is trying to appeal to the Bill and Ted fan or surf junkie

WOAH, MAN! Greendog is the tale of a haples

surfer dude who experiences a turn

of bad luck while out surfing in the Caribbean. After performing a particularly stylish manoeuvre he is pounded by a huge wave that dazes him before throwing him onto the

When he regains consciousness he finds a strange pendant stuck around his neck and a buxom leggy blonde hanging around waiting to inform him of his fate.

As it turns out, the pendant is part of an ancient Aztec curse that causes all creatures to go absolutely bonkers whenever the bearer is within range.

To break the curse Greendog must trundle around six Caribbean islands collecting parts of the mystic 'Surfboard of the Ancients'. Only when the surfboard is put together will the curse be lifted. So Aztec priests liked to indulge in a spot of wave riding as well did

Being a fairly basic platform game Greendog has much in common with TazMania. You begin the game armed with nothing but a Frisbee, a clean bill of health and an unusual grasp of the English language.

Moving through the levels bonus weapons, such as super Frisbees and

The Frisbee is Greendog's only weapon against the animals sent crazy by his pendant

Hitting the Panic **Button will only** work if you have picked up one of the special items

CLOCK This freezes enemies giving the chance to get away, but even when frozen the enemies will still

Keep stocked up on these. Hitting the panic button sends this whizzing about homing

UMBRELLA HAT With the hat

you can go anywhere and do anything without fear of being molested by piranhas

THE LIFE OF A SURFER DUDE IN THE JUNGLE IS NEVER DULL...

...Dangle beneath friendly birds to avoid certain death...

He'll have to leap from log to log and avoid piranhas...

...And cope with doing the odd **Tarzan impression** with all sorts of creatures nipping at his heels

invulnerability umbrella hats can be found by hitting certain creatures very carefully. Unfortunately though, actual contact with any of these inhabitants will ensure that you health depletes at a disturbing rate!

To keep bumping it up to a reasonable level junk food must be collected by lobbing your Frisbee at specific objects, such as totempoles and treasure chests. Burgers, coke and cheesecake can be found in the strangest of places!

MOST TRIUMPHANT OR TRULY BOGUS?

The levels aren't all about jumping from platform to platform munching nosh though because between each of the islands a pedalcopter must be used to fly across the sea.

During the brief flight bonus food can be collected by bopping frenzied fish and sea birds with a telescopic boxing glove attached to the front of the copter.

Later in the game you'll find that walking and jumping around is not enough to reach the all-important chunks of surfboard. Upon reaching the island of Curacao it's necessary to don scuba gear and swim through a number of underwater

crypts before travelling on to Jamaica.

Once at the tourist centre of the Caribbean either a skateboard or pair of in-line skates is essential to whiz through the danger filled passageways.

Despite all the clever little extras Greendog is far from being a

ground breaking product. Admittedly the graphics are stunning, the backgrounds are all extremely well drawn and the sprites are amusing and superbly presented. Greendog cuts a mean pose at the best of times but unfortunately a great sprite does not a great game maketh.

The biggest problem seems to be that the game is so damn easy. When will Sega learn that people can storm through levels at a tremendous rate?

After one go everyone in the office had managed to reach at least the last but one level, meaning that within hours the end-of-game sequence was well within sight. Taz-Mania suffered from this very same problem as did Sonic before that. When are we going to start seeing games with a little more depth? Maybe a few more puzzles would help? Or even just a couple of extra levels?

I was expecting great things of Greendog, the amount of hype that surrounded it forced great expectations. Unfortunately I'm afraid to say that it's somewhat of a disappointment.

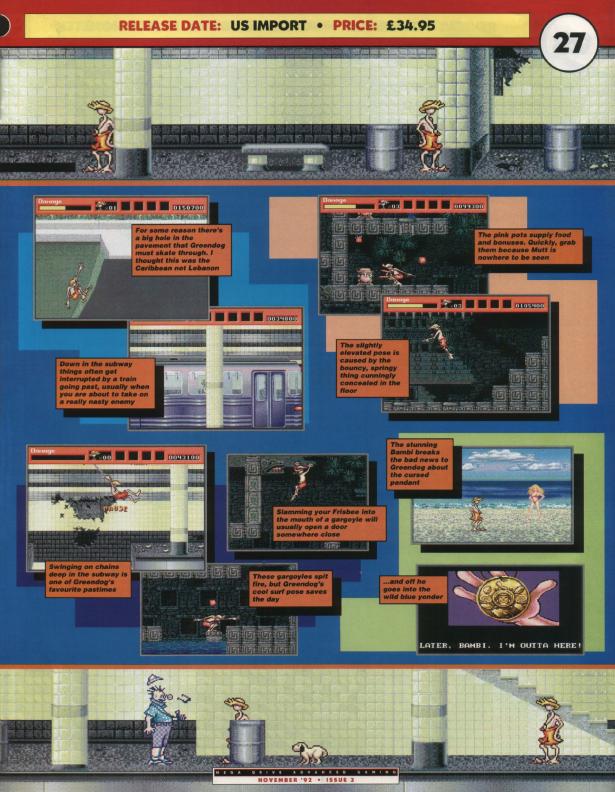

As an introduction to platform games I'm sure it's fine, younger players will doubtless enjoy it tremendously, but if you've been playing games a while you'll tire of it very quickly. There's only so long

you can swoon over slick graphics. It's a shame because Greendog had such enormous potential.

28

As soon as a decent game appears you can guarantee that there will be at least one copycat software house that's peddling some subtly different duplicate. Seen Speedball II? Well here's Namco's Powerball. Even the name sounds the same!

his is nothing more than your bogstandard futuristic football game including a scenario where violence and corruption have distorted the true nature of organized sports. Pretty old concept don't you think? I seem to remember seeing it somewhere before — can't think where!

Teams from around the world are drawn together to compete in a game where only the strongest survive. There are two teams of 11, each of which must enter the arena and get the ball past the opponent's goal-line in order to score a touchdown.

Dead simple, just a group of big hairy blokes in full body armour going hell-bent for leather from one end of a pitch to the other, trampling anything that gets in the way. Sort of a cross between American and Australian Rules football.

After slapping the cart in and watching the mediocre introduction sequence – possibly the best thing about the whole game – there are a number of options to take. You can choose to play a one or two-player exhibition match or you can try your hand at working your team through the league.

TEAM TALK

Next choose which team to control. This can be any one of 12 that come from all over the world, each with their own strengths and weaknesses. Some are excellent in offence, while others have strong defensive qualities. No team is perfect, but all can be enhanced with training bought with the winnings from matches.

Once all options have been made you are then unceremoniously dumped into the middle of the pitch where you must battle it out with the opposition for possession of the ball.

From this point on, it is pure and simple joypad dexterity that will ensure any kind of victory. Your

players have six different moves available, three each for offence and defence. You can kick or throw the ball as well as use a special attack known as the flying bomb which is a little like the WWF-style bellyflop.

As with just about every other

The arrow indicates which player is currently under your control. In theory this is supposed to jump about according to which sprite is nearest the ball. In practice it doesn't really work all that well:

POWERE

NOVEMBER '92 + ISSUE 3

RELEASE DATE: US IMPORT • PRICE: £34.99

team-based sport that has been ported to video game format, the computer has a certain amount of control over your team. You simply look after the character which is nearest to the ball.

While this system works very well on most games, for some strange reason it is a bit shoddy on Powerball. Very often you'll find yourself in a position where control switches back and forth from player to player very rapidly indeed. It is a simple problem that I feel could have been rectified if the game had been properly playtested. Most annoying!

LOAD OF BALLS

If forced to sum this game up in one word, I'm afraid that the word would have to be 'crap'. The graphics are very naff indeed, comprising of badly drawn sprites and backgrounds. coupled with some very poor use of colour. Sound is also extremely weak with the sampled effects being scratchy and the music nothing more than annoying.

Gameplay is tedious (and more than a little boring) to say the least. In one-player mode the computer has a distressing habit of hammering you into the ground at every available opportunity. The only saving grace is

You have eight different teams to choose from in all. Each has its own strengths and weaknesses and it's up to you to weigh up the pros and cons of each **EFAZIL** JAPAN KOREB GEEECE Your players proceeds to be onto the hearest available of

gap existing for a pool sim.

REVIEW

Paul Newman did his bit of hustling over 30 years ago pool halls, particularly American variety, have always had something of a malevolent mystique.

Even if the guys in them are the nicest you could hope to meet, they always look like evil bastards who'd wrap a pool cue round your head as soon as spit on you. Side Pocket manages to convey absolutely none of this.

The atmosphere is that of a high-rolling gambling tournament; male competitors dressed in expensive DJs play pool in exclusive clubs and get drooled over by expensive, but beautifully

drawn women. Sexism is rife in this game! The one-player game has the competitor attempting to pot six or nine balls in order to score enough points to get to the next round in the next city.

BALLS ON THE TABLE

The player begins with a stock of 16 shots. Each time a shot is missed the player loses one of the stock, should the white ball go down then two are dropped.

This stock is represented by

eight white balls in the top left one representing two shots. Once this stock runs out however, it is game over and it's back to the start city of LA

The view of the table is topdown with the player using a line of dots coming from the cue to line up the shot. This gets a bit tricky on some of diagonal shots and we found everyone who played it always ended up tilting their head to one side on a regular basis, like one of those pathetic dogs trying to look cute.

in two ways; the same as the one-player game where you pot the balls in order to get as many points as possible, or nine ball pool. Nine ball insists that you hit the lowest number ball first, but the first player to pot the nine ball by following this rule wins. The trick shot game gives you

19 trick shots already set up and you have to work out how to do them. Each one you complete reveals a portion of a jumbled picture. Rearrange all 19 like one of those tile puzzles and the picture is presumably the reward if you think a picture of a bimbo beaming at you is a just reward, then fair enough! The sound consists of around

20 remarkably naff examples of elevator music - a seedy elevator in an extremely crap hotel.

The 'kerplunk' sound effects as you pot a ball are the same ones that have been accompanying pool games for approximately eight years. The sound seems to have been specifically designed not to be listened to.

DRIVE ADVANCED GAMING

As for the gameplay it's dull, irritating, awkward, pretty damn awful in fact. The two-player game is OK because of the element of competition, but it needs a player Vs computer option to work for the single player.

It looks as though Mega Drive

It looks as though Mega Drive owners will have to wait longer for a

decent conversion of one of the more leisurely sports.

CUE ACTION

- A: The score and stock of shots
- B: Spin or 'English' on the next shot
- The next ball in sequence Power of shot
- D: Power of sho E: The player
- F: Erm, the table

In space no one can hear you scream. Meanwhile back on Earth no one is capable of designing an original platform game.

he movie Alien 3 received mixed reviews. After the dizzy heights reached by Aliens many people were expecting a stunning sequel. However, the film relied more on suspense and claustrophobia than special effects. thus disappointing the average blood-and-guts movie buff.

The player acts out the role of Ripley who has crash-landed on a

A vegetarian's nightmare. Lots of dead things hanging around. I thought that the Predator was the type to hang bodies around, not

penal colony, bringing with her a stowaway alien - oh shit!

The game has 15 levels which are accessed very easily by ladders dotted all over the landscape. Once inside the prison the object is to save the prisoners from becoming the breeding-ground for aliens.

I'm sure most people could guess what happens during the rest of the game. Yep, Ripley collects items such as ammunition and firstaid, while blowing aliens away.

The network of tunnels adds enjoyment to the game especially where the lack of visibility severely hampers speed - you know something is waiting around the next corner!

Another nice touch is that before play commences you are given the choice of one to nine

TRIGGER ACTION

Ripley carries around an assortment of weapons which everyone who saw Aliens will instantly recognise; the pulsar rifle, grenade launcher and flame-

The different types of weapons have their own characteristics. Grenades are ideal for lobbing into tunnels, while flame-throwers seem the least effective weapon for killing aliens. The gun providing the greatest pleasure (eh?) is undoubtedly the grenade launcher.

Sometimes fun has to be ruled

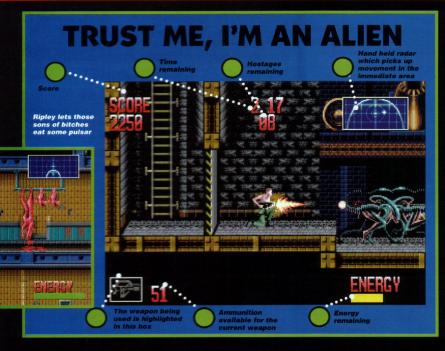

Having never been house-trained the aliens use the floor. I bet

these guys are a big hit at

The object of the complete fiasco - bloodthirsty criminals captured by aliens. Why oh why Ripley wastes her life on chaps of this calibre is beyond me

The maze of tunnels where death...actually alien sprites...lurk around every corner and at the bottom of every ladder. Arghh!

out in favour of sheer firepower and this is where the pulsar rifle earns its money. The bullet bursts cause the aliens to turn to pulp leaving acid over everything.

OO-ER THAT'S A BIT NASTY

In fact when any of these babies hit anything the results are either brilliant or sickeningly disgusting and really show the graphics off at their best. Other gruesome scenes are found throughout the levels, for example if you fail to rescue prisoners the aliens burst through their chests, leaving the poor humans screaming horribly.

Bearing in mind that the UK computer game industry is principally aimed at the younger market a question has to be raised as to whether detail such as this really has a place in computer games.

On the plus side the sound includes very realistic gun shots which make a hell of a difference in this type of game.

THE BAD NEWS

So what's new about the game then? Unfortunately not very much, just substitute the alien sprites for those in almost any other game of this genre and there it you have it.

Apart from the total lack of originality the game has several other faults. The controls don't respond very well, with the option permitting the player to change button features having no effect whatsoever.

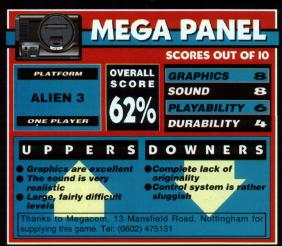

When you take into account that each level runs on a timer this fault is pretty serious when you find a rather large alien bearing down you, time is running out and your gun has less fire power than you thought!

The other fault is the sheer inaccuracy of the conversion from film to game. The humans in the movie have to rely on sheer brain power to survive, not high velocity weapons. This would have made a far superior type of game.

However, instead Acclaim opted for yet another platform shoot'em-up. An area already

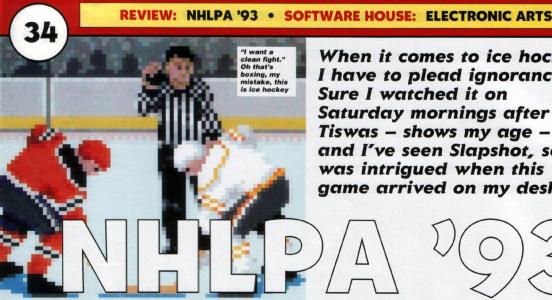

overcrowded with superior games to Alien 3. Take Terminator as one good example.

MEGA DRIVE ADVANCED GAMING
NOVEMBER 192 . ISSUE 3

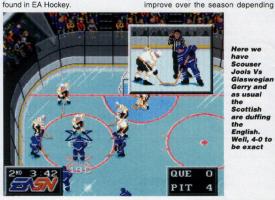

When it comes to ice hockey I have to plead ignorance. Sure I watched it on Saturday mornings after Tiswas - shows my age and I've seen Slapshot, so I was intriqued when this game arrived on my desk.

he whole idea of ice hockey seemed to be hooligans on ice with the occasional goal thrown in to justify having a goalkeeper. This was until EA released the superb sports cunningly titled Electronic Arts Hockey.

When first released many games players claimed it was the best game of this genre and now EA has released an improved version. How has this been achieved and why bother changing a great game?

The gameplay remains identical to the original as do playing fixtures. The view of the action is also the same; from behind the goal. The excellent graphics are also identical to those found in EA Hockey

intelligence level in the old version

was very good, proving to be difficult

to beat thus providing a challenge.

NHLPA goes a step further by

increasing the difficulty level, making

for even better one-player games.

Oops. Not being familiar with the controls (no instruction manual. that's my excuse) the opposing team score

on the overall performance. When the team play at home the home-team player stats increase because the crowd gives a morale booster. This feature can work to your advantage or disadvantage

Teams can now be changed. You

are able to drop players depending on their current form and replace them with younger more talented players from the reserve teams. This enables you to choose a team best suited to attack the weak points found in opposition sides.

> A vast array of TV features also figure with commentators adding the humour element missing from the original.

> It has to be said that the game is always at its best when played in two-player mode...that is when halfdecent opponents can be found, eh Jools?

All in all NHLPA is a great game, but if you happen to own a copy of the

original EA Hockey it may take more than some nice little extras to justify spending an extra £40.

DRIVE ADVANCED GAMING NOVEMBER '92 . ISSUE 3

DOUBLE THE TROUBLE

The LHX is a sleek and streamlined helicopter of incredible power. Its existence has only recently been

acknowledged by the US authorities and it is reputedly the most technologically advanced helicopter in the world

The apache may not look as impressive as the LHX but it is currently one of the most powerful operational helicopters

in the United States. Possessing awesome firepower it is an ideal craft for low level strike missions

LHX is the first chopper sim to be released on the MD. How does the humble console cope?

(Below) The map is provided at any point during the game. Simply pause the action and you can plan your route to and from the target area

exceeding mated speed not a purply struck (Above) The LHX gracefully lifts off from the desert base. This is one of the

many external views that are available in the game

REVIEW

lectronic Arts' first flight simulator, F22 Interceptor, managed to quash all the talk that the Mega Drive was incapable of running a half decent flight simulator

It incorporated a reasonable 3D perspective blast'emup with a few of the features you'd expect to find in a grown-up flight sim.

LHX manages to take this idea even further by incorp-

orating many of the best bits from an established PC flight simulator and using them in a more game orientated scenario.

You are an ace helicopter pilot (as always) who must take one of two

incredibly smart US choppers out into the war zone and complete missions in various different locations. The Libyans, the Eastern Europeans and the Vietnamese are all in need of a good tanning so your work is definitely

DESERT MISSION

Beginning your career as a humble second lieutenant you must work through the missions in order to be promoted through the ranks

Each mission is randomly created within a basic scenario, so whereas the Libyan missions will always have the same goal, the primary targets will be in a different place each time you play. This is a good idea, as one of the biggest problems with F22 was that it got boring whenever you went back to the beginning.

The basic goals are very similar for each mission you fly. Take off from your base, knock out a strategic location or rescue a comrade, turn

APACHE COCKPIT

The polygon graphics are surprisingly advanced. When you shoot something it explodes into tiny triangular shards that fly away from the explosion in a most convincing manner

turn around and fly home.
There is nothing too troublesome really.

Along the route you'll be harassed by numerous ground and air based defences that can all be easily knocked out with the help of your incredibly clever combat computer. Simply point the 'copter at whatever you want to destroy, select either a cannon, hellfire missile or sidewinder

Unfortunately the biggest problem with the game is this 'between targets' combat. On the easier levels you can practically fly around without taking any notice of the ground based

and let 'em fly!

defences whatsoever. They almost appear to be present for the sole reason of making the game look pretty.

INVISIBLE DANGER

On the harder levels though, the defence systems become incredibly active and very often you'll find yourself destroyed by a target that you were unaware existed!

Maybe a compromise between the two extremes would have been a good idea. Even though there are five skill levels the 'very easy' and 'easy' seem to be identical!

The most impressive feature of LHX is the speed at which the 3D

When one of your missiles (either hellfire or sidewinder) locks onto a target, you are shown a diamond shaped box under which is a percentage that shows the certainty of a direct hit

MEGA DRIVE ADVANCED GAMING NOVEMBER '92 . ISSUE 3

The apache has a similar tracking camera system

FROM THE OUTSIDE LOOKING IN

The game offers numerous external views so you can watch the action from all over the place. For example you can look from the side...

...Alternatively you can look towards the front of the chopper...

MEGA PANEL

...Or you can track your gunship in a chase plane from behind

polygon graphics are manipulated. OK, so it's not quite up to the standard of your average PC or Amiga simulator, but bearing in mind that the Mega Drive hardware is not really equipped for this sort of thing, it's quite impressive.

The ground features, although few and far between, slide along very smoothly, and the reasonably simple enemy vehicles and emplacements are all animated very quickly.

DID YOU SEE THAT?

On top of this, the external views of both choppers are really very well donel When selecting an external view you see the helicopter, complete with both its main and tall rotors spinning. An unexpected little extra.

Sonically the game has all the expected bangs, crashes and whistles, along with some reasonably well implemented speech from your co-pilot that tells you when a target is locked on and you're hit.

The game is filled with some very thoughtful features, and it's this that

SCORES OUT OF IO OVERALL FLIGHT SIM GRAPHICS SCORE HX ATTACI SOUND CHOPPER PLAYABILITY ONE PLAYER DURABILITY DOWNERS R Fast 3D polygon Very game orientated Won't appeal to an

goes to show what a quality product it really is. Although only a one-player game, there is a form of pseudo two-

Varied gameplay

through random

mission creation

player game where a second player can use a joypad in port two to control the weapons systems. This means that

enormously wide

audience

on the higher levels you have the added advantage of two brains taking on the enemy!

Overall I have to say that I was most impressed with LHX Attack Chopper. To be honest I wasn't expecting much of it as I really didn't believe the Mega Drive could do justice to such a superb PC game.

Obviously the console game has been simplified something rotten, but the developers have managed to include all of the best bits thus ensuring that you find it both playable and addictive.

If you're looking for the definitive Mega Drive combat flight simulation, this may well be it. However, its glory may be short lived as there are two more similar games being released very shortly in the shape of Steel Talon and Mig-29 from Domark. Both of these will employ similar simulation

style graphical techniques in the game environment and only time will tell if LHX will remain the king.

The biggest problem with your targeting computer is that it will lock onto anything – including camels!

One of the best demonstrations of the LHX 3D graphics engine is the 'circiliang view'. Here the view moves all the way around the chopper and updates the background at a tremendous rate

Blowing away a few fuel tanks ensures that the enemy will struggle to keep their ground assault going. Use either your cannon or hellfires to smash them

The apache is a very different looking beast from the LHX. It's much more angular and far less streamlined. It's still a formidable fighting machine though!

REVIEW: GODS • SOFTWARE HOUSE: SEGA

Acclaimed by many as the best platform game ever, the Bitmap's Gods arrives on the Mega Drive souped up, wigged out and coloured in

The long headed pygmy tribe plays a fairly important role in your downfall, they fire energy beams, walk into you and generally sneer in a derogatory manner.

ot content with just porting the original code across from the Amiga, Renegade insisted that the game be improved and tweaked to take

full advantage of the Mega Drive's capabilities.

So no longer will your hero wimp out with the axes because the machine can only handle 12 on screen at a time, on the Mega Drive he can fling as many about as he likes, no problem.

"But, what's this Gods thing all about then?" I hear some of you cry. Well, yer man wants to be a god. So he sends off his application form to Olympus central, waits for a few decades and then gets accepted, pending his physical.

The physical is where you come in. It takes the form of four Herculean tasks that have to be completed by le hero before he'll receive his pass for the Universal Union of Deities. Each task is a level, with each level made up of three worlds plus a guardian.

It's not all shooting and jumping, levers play a fairly crucial part in all these hi-jinks, inbetween molestations by mutant monkeys that is!

CRUCIAL COMBINATIONS

For the first few levels all you'll have to do is a pull all the levers in sight and you're sorted; walls fall down, enemies vanish, jewels drop from the heavens, beautiful women leap into your arms, that kind of thing.

Later levels however, see it getting just a smidgen trickier. You might find a door that won't open and three levers to be pulled, but in what

MEGA DRIVE ADVANCED

order? Three levers means six combinations, and you can bet that if you get it wrong you won't just be able to shrug it off and give it another go. The wrong combination will more than likely bring a horde of sweaty nasty things determined to rip your head off and eat it.

Time limits add a certain 'bastard!'

among us, with on-screen hints and the like, it will only let you get so far through the later levels unless you've picked the time bonuses by being quick. The game shows you what do if

The game shows you what do if you really are awful, but you'll have to do it properly if you want to get all the way through the game. Even with this assistance it is still one of the

Level three is naturally a bit on the tricky side; flying gargoyles, hidden traps, more levers to pull than you know what to do with. It's hard work trying to be a god you know

ON THE PULL

Pull this lever second to reveal the treasure box and the key...

...Straight through the door, pick up the goodies...

...Up around the top, open the door and you've finished with time to spare

a long time, none of your 'finished it an afternoon' here. This will take you a long time to complete.

Throughout the game you will be required to carry things; keys to enter the next level, an item to be exchanged for the key to the next area and so on. You

can carry up to four

items at a time,

each in its

select and use an item, merely get to the right place and it does it all for you.

MUTANT MASSACRE

This lever pulling is all very well

own window at the bottom of the

screen. Very rarely will you have

This lever pulling is all very well if you've got the time to do it, but what I haven't mentioned as yet is the fact that all the while you are being swamped by veritable hordes of mutants who not only chase after you but fire things at you as well.

The one big irritation that I found

The one big irritation that I found is that while you crouch to duck the enemy's energy beams you cannot fire as well, meaning that you have got to be bloody quick at turning and

shooting and ducking... all at the same time!

Some of the enemies are 'intelligent' as well. Not intelligent enough, for example, to explain the theory of relativity, but brainy enough to realise you are walking behind them and so turn and start chasing you. Not all are like

this though, with the majority on the early levels just doing the standard walking back and forth along a platform sort of thing. Even so the game moves so fast they are all a real pain.

Frantic is probably a good word to describe this game with the speed it runs at on the Mega Drive. Not only does it incorporate the exploration and pseudo

puzzle elements of a game like Wonderboy in Monster World, but it also has the manic battles with legions of angry uglies of

Nasty sticky-uppy things, but will this lever save your wedding tackle from a serious case of fatal injury?

Morris dancing is a little known talent that all the gods possess. They feel looking stupid gives them a certain humanity

Precision ladder climbing is the order of the day here, but have you performed well enough to get the treasure?

They're really ugly on level two

Levers can bring trouble and strife

MEGA DRIVE ADVANCED GAMING NOVEMBER'92 • ISSUE 3

Shinobi. It does however, manage to do both better than either of these games.

Presentation can't be faulted, except for the main sprite that always looked a bit stunted to me on the original versions, and certainly hasn't improved here.

They have managed to include some 64 colours on screen, as opposed to the original 32 that gives a great amount of detail in the walls and all the objects, like the pots and the

There's also a rather sexy parallax scroll behind the main play area giving the screen some depth. The enemies have a nicely gruesome feel as they all look intent on drinking your blood under the full moon, no matter what the cost.

TUNE IN, IT'S THUMPING

There are eight thumping tunes based on John Foxx's music for the PC Soundblaster. These have been specially remixed by Jason Page for the Mega Drive. Sticking the soundtrack through headphones or a hi-fi really beefs up the experience. Unusually for the Mega Drive the music and sound effects really drive you on, instead of pissing you off within half an hour.

Here comes the bad news folks, this game will not be on official release in Europe. It'll be out in Japan, it'll be out in the States and

I've even been told that the Jap playtesters play it in their lunch hour!

It seems to be a crime that a superlative demonstration of what a Mega Drive game should be like good-looking, infinitely playable and long lasting - will only be available on

grey import. It's often said that the future is never certain, let's hope that this is right in this case.

It isn't just your main objective that you're interested in. Whalloping many of the boxes that are lying around will produce valuable coins or health potions

Does the Mega Drive need another platform game where you trundle around hitting things with a big sword? Maybe it does if said game is a conversion of a classic Psygnosis Amiga title.

On the second stage you'll have to thumb a lift on the back of a horse and cart to be able to reach your destination. This whopping great big sprite is very nicely animated

The hounds of hell can be a real pain in the arse as you're looking through the caverns on the hillside!

ELLUNKING

On most of the levels the object of your mission will be hidden deep within a cave, the entrance to which is a simple black decrease.

Inside the caves there are some fairly unpleasant traps that must be overcome. Huge stone statues swing heavy balls back and forth to block your path

Many of the caves are huge and are filled with hostile creatures who will do anything to ensure you don't reach your goal

43

GALAHAD

REVIEW

aving made a name for itself on the 16 bit computer market Psygnosis is now proving that it is more than capable of producing some excellent Mega Drive titles. Many of you will have already played Fatal Rewind or Shadow of the Beast, but the best is yet to come. Yep, Galahad - previously known as Leander on the Amiga - is one of Psygnosis' alltime classic games.

games.

Taking
on the role of
a noble and
brave warrior,
named Galahad
surprisingly enough,
you must travel the
lands in the service of your
master, the great

K i n g Arthur. For years you have served this great leader but now you've got to head off on a real stonker of a mission.

LEGENDS IN THE MAKING

Way up on a big mountain in the middle of nowhere lives a wizard with a serious kleptomania problem. Apparently he's been causing all manner of trouble for the past couple of years, but this time he's just gone too far!

Arthur can cope with all his gold and jewels being nicked, but when a beautiful princess such as the gorgeous and well-horny Leandra of Psygnosia is kidnapped, big Art gets narked.

Your mission is to nip off up the hill and rescue Leandra from the wizard's castle while liberating all of Arthur's artefacts along the way. Doddle.

Beginning

bottom you have to jump a roun d loads of platforms

hitting any-

that

moves, while collecting everything that looks even remotely valuable. Each stage of the game has a set

at the

task that must be completed and these can be anything from retrieving a

giant jewel encrusted spider's egg to seeking out an ancient mystical spell book.

Your journey will take you through villages, caverns and fortresses and is fraught with danger at every turn. Dragons, zombies, warriors, giant spiders and hell hounds are all trained to sniff out and destroy all strangers that

cross their paths.

Fortunately though, you are well armed. You begin with standard guardsman's clobber, but this can be added to by visiting shops

that are

dotted around the hillside. If you've bashed enough meanies you should have nicked sufficient dosh (by ferreting through

their pockets) to be able to buy some well-hard goodies at the first shop.

Magical armour (with varying hit point protection spells) is available at a cost, as are some of the hardest looking swords you've ever sen.

If you're absolutely loaded you'll be able to buy swords that blast out buge waves of energy allowing you to shoot at your assailants as well as thwacking 'em with a sword. By the final level of the game you'll have enough dosh to buy a sword so hard that just letting the bad guys look at it will make them keel over.

CONVERSION OR IMPROVEMENT?

Those of you that have seen the Amiga original will doubtless be aware that it was a superb product. In my opinion though, this new Mega Drive conversion significantly improves on the original.

The first and most obvious difference is the graphic quality. There are now far more colours on screen and the parallax scrolling effect is quite

The wizard's minions seem to go in for the 'lumps of rock hanging on chains' approach to hiliside defence. They're not really a problem, it's all a matter of timing

Every now and then you'll come across a huge bloody great dragon. A few well aimed smacks in the mush will make him disappear in a puff of

MEGA DRIVE ADVANCED GAMING
NOVEMBER'92 • ISSUE 3

REVIEW: GALAHAD • SOFTWARE HOUSE: ELECTRONIC ARTS

Here's the first enemy that you will encounter. He is the bog-standard boring and dreary guard who meanders around poking things with his spear. Oo-er missis!

This huge bloke spends his whole life performing

an admirable impression of Donkey Kong. He picks up a barrel, rolls it along the ground, picks up another and keeps going indefinitely

After coming out of the shop you'll be all powered up and raring to go! Shiny new armour and a whopping great big weapon with which to smack the baddies in the face

superb! Take a look at the screenshots throughout this review and you'll notice that they are consistently superb. The sprites are all very well animated, and the larger end-oflevel guardians such as the dragons and spiders are extremely well rendered

It's not just the graphics that have been snazzed up in this conversion though. The gameplay has also gone through a bit of an upheaval. Many people complained that the original Amiga version wasn't altogether consistent in the way the puzzles and traps were arranged. Very often there'd be some very easy ones on early levels that were then followed by an absolutely rock hard problem.

The Mega Drive version has sorted this problem out quite considerably and as a result it is an extremely playable game.

IT'S ENORMOUS

The game is pretty big too! There are three basic levels all of which can be accessed by a password system given when you complete each stage. Each level contains seven large stages you're definitely going to have your work cut out getting through that lot. Some of the later stages are absolutely huge!

Overall I have to say that I am very impressed with Galahad. It is one of the best examples of a conversion across the formats that I've seen. The development team has used the

basic game structure and tailored it perfectly to take advantage of the Mega Drive's abilities.

The giant spiders patrol many of the caverns. If you think these look big, there's one later on that's about twice the size! Yuck!

Every three or four stages you'll find a shop in which you can purchase weapons and armour. If you've collected enough money (by opening boxes and killing guards) you'll be able to afford all manner of goodies

SPIDERS

very effective patrolling guards and can only be killed by slashing into their tails with your sword

GUARDSMEN

many forms. Initially they trot around spiking

things. later levels their armour becomes very tough and it takes many hits to kill them

NOV '92

The last time a fish sprouted legs and walked out of the water it was called evolution, but this time it's called The Aquatic Games.

he Mega Drive's cutest hero has traded his fins for limbs so he can take part in a sports tournament.

One to four

people can compete in eight different, and decidedly wacky events. The 100 metre splash; hop, skip and jump; tour de grass and leap-frog are based around manipulating the joypad quickly in some manner or other.

Added to this base are jumps and bonuses giving life to these events.

The excellent graphics do a lot for the game anyway without little things having to be added.

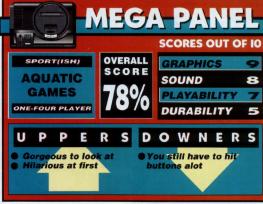

The other four events are a little more esoteric, kipper watching has you in control of a seal trying to protect six sleeping 'Dougal look-alike' seals from a barrage of bouncing beach-balls.

The bouncy castle sees

Pond bouncing off sponges and receiving points for all the tumbles and rotations he manages in mid-air.

Feeding time has Freddy the starfish feeding the fish with sweets to keep them underwater and stop the nasty fishermen from catching them.

Like kipper watching, it doesn't sound much, but when the fish start popping up all over the place and the

beach-balls rain down in their hundreds both events get very frantic.

Shell shooting is possibly the most bizarre of the lot. Pond is in a room with six balloons and two machines that pump out limpets. He must jump over the limpets but as he comes down he has to flick the

impets into the air. He then has to catch them in a dustbin lid and fling them into the air to burst the balloons. Bonkers!
Absolutely stark-staring, tie-me-up-in-a-nice-linenjacket-with-padlocks-on-the-

sleeves, bonkers!
There are bonus stages which include a juggling penguin, and a high jumping frog just for starters.

With all this madness, brilliantly appealing graphics and a hatful of bouncy tunes The Aquatic Games more than makes up

IOOLS

for its basic gameplay. The problem is that the novelty will wear off.

The jump bit of the hop, skip and jump is all down to timing and getting the angle just right

Pond, trying to protect his knackers from a nasty shock, frolics his way over an electric eel

Mark the shark (groan) unicycles his way over what could easily be the Green Hill Zone

THE LAST CRUSA

ome three years after the arrival of the final Indy film on our cinema screens, Gold has almost got around to releasing Indy III for the 16-bit Sega machine. It is being produced by Tiertex, the team which was responsible for programming the game on all formats, from C64 to Amiga.

It is closely based on the original, but after the Master System version US Gold decided that it wouldn't do justice to the Mega Drive to use the same graphics and as a result ordered sweeping changes.

From the screenshots we've seen it's been made more colourful, far crisper and can now stand alongside the latest Mega

A REAL MAN

The game design is based very closely on the film. Indy's dad has been kidnapped by the Germans who want him to tell them the location of the Holy Grail. This secret is kept in a book that he sent to Indy for safekeeping, but Indy's coming to look for his father complete with said book.

So over five levels of platform whip'em-up Indy leaps, swings, crawls, punches, jumps and climbs

Following its 'enormous success' on the Master System, Indy III is buckling up his swash for the Mega Drive.

Scandal! Indiana Jones in horrific giraffe mugging shocker!

his way through underground mines and along the top of trains all to save his Dad. Ahh!

Indy will have a whip as his ultimate weapon but he can only use it a limited number of times, then he has to find another one. He will also be

carrying a gun, but again ammo is in limited supply. Dotted around the game are other items to be picked up such

as extra lives and bonus

class title, the hope is that Indiana Jones and the Last Crusade

will live up to the

success of the film.

In keeping with the console style Indy III contains a number of short cuts and hidden bonuses in an attempt to give the game a

longer life. With this and the obvious

efforts of US Gold to produce a top

Something tells me that by shunning the ropes, our Indy may well be going swimming

Just one small leap for Indy and he finds himself careering down a mineshaft in an ore truck

Indy nearly gets toasted as he tries to whip the fire-breather

> exceptionally athletic Indy flinging himself about without a thought for his safety

Here we see the population at a stage of development which has much in common with the Romans. Defending their ornate villas with swords and shields, this is the first of the more advanced tech-levels in the game

MEGA-lo-MANIA was without a doubt one of the most successful Amiga games of last year. Blending God-like control with a certain amount of violence and humour the game enchanted everyone who played it. Now the game is finally set to hit the Mega Drive...

MEGA

hose of you out there who have played other God-like strategy games such as Populous or Powermonger will have some sort of an idea of what Sensible Software's MEGA-lo-MANIA is about.

In the game you take on the role of one of four different demigods who are out to prove their worth by developing a race of humanoids. To do this you must take your race from its roots in the

Stone Age through the Industrial Revolution and out the other end to the space age.

Each stage of the game is

Sensible

SENSIBLY SOFT

Sensible Software is a development team that has certainly been about a bit. In the past few years it has been responsible for such classics as Shoot'emup Construction Kit on the Commodore 64, Wizball, Microprose Soccer and more recently Sensible Soccer on the Amiga and ST.

Released last year, MEGA-lo-MANIA was its first major 16-bit project and quite fittingly it was an enormous success. Now, as the company spreads its wings further it is beginning to dabble with the pleasures of 16-bit consoles, and more specifically, the Mega Drive.

MEGA-Io-MANIA is to be its first Mega Drive release and it will be distributed by those ever so friendly chaps at Virgin in December this year.

NOVEMBER '92 . ISSUE

After choosing either an offensive or defensive weapon from the list of possibilities you can then set as many men as you like on the development and subsequent building of this weapon. The more men you assign, the quicker the weapon is built

The superbly drawn introduction descibes the the demigods as they manipulate the worlds

Most will have travelled through many light years to witness this godly contest.

played out on different sized islands where your collection of humanoids begin as simple brainless thugs

Your job at this point is to send groups of characters off to have a good think about something so that they can come up with a decent

More often than not these inventions are defence orientated and will help your community fend off attacks from the people under the control of the opposing gods.

INFORMATION FRENZY

As you progress the characters become more aware of their surroundings. Also your population increases at a geometric rate meaning that there are more people numerous objects that you may need to progress

In the Stone Age your little

chaps simply manufacture clubs move through the Roman period and eventually on to the Industrial Revolution. After here it's on

through the twentieth century and onto the twenty-first where they develop nuclear weapons and space age technology.

Management of resources becomes increasingly important as you progress and you'll soon have all sorts of decisions to make to ensure that your race doesn't get completely wiped out! How much emphasis do you place on mining for minerals and on developing

CHATTY CHAPPY

The Amiga version was renowned for its superb presentation and this has been suitably ported over to the Mega Drive

All of the sampled sounds of the original are present including a library of 33 different sampled

messages that inform you of important events. Apparently all of these have been recorded by renowned radio actors, as well as the odd grunt and groan from the

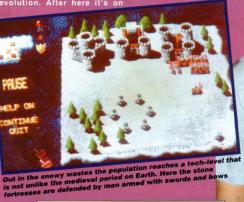

lads at Sensible.
Sega and Virgin release slots permitting, you should be able to find MEGA-Io-MANIA on the shelves just in time for Christmas, so look

out for a review in a future issue of

Here we have Mr Jon Hare, Sensible Software's supremo boss type person. Hmm. interesting T-shirt!

GA DRIVE ADVANCED GAMING
NOVEMBER 192 • ISSUE 3

received hundreds of limericks about joypads, sexual innuendoes disgraceful heathens! I love you all. For those of you who are obviously quite mind-numbingly stupid a limerick has five lines.

Not four, not 23, but five Anyway, here are the winners.. First up is Stuart Sell from Cardiff. There was a young fellow named Shamus, Whose gameplay was really quite famous,

He would turn about face.

And play Sonic just using his anus. Wow. Literary genius or what?

This next one is from Sergeant Mark Elcocks from 72 Squadron at RAF Aldergrove.

There was a young girl from Nantucket, Whose joypad was big as a bucket,

Gerry is quite concerned that people like Sgt Elcocks are actually defending the country!

THE OTHER WINNERS ARE: Jamie Baldaro, Dorking, Surrey.

Graham Berry, Bridgend, Mid Glamorgan.

Lee Bowman, London.

Yong Mark Branston from Birmingham is obviously in a bit of a pickle at the moment. (Hee hee, couldn't help it...sorry.)

Lee Corsi from Marshfield, Cardiff is one of the few who didn't make any smutty remarks at all.

Neil Cotton, Shropshire.

Steven Eagling from Wymondham is one of the many berks who used 'knob' in his limerick.

John Galbraith, Banffshire, Scotland.

Paul Murphy, Herts.

Dave Richardson from West Yorkshire got a couple of our compos mixed up. We are going to give him a prize though, cause we feel dead sorry for him. Luke Romney, Strood, Kent.

Mr P Shilling from Parkstone, Dorset is one of the many who realised that Bagdad actually rhymes

with joypad.

Andrew Ward from Ecton Brook, Northants sent in a number of entries, most of which were crap.

he chance to win one of the ludicrously overpriced Sega Simulator Chairs was obviously something that appealed to an enormous number of you. The winner is David Stirling of

Kilsyth who put an awful lot of work into his spherical remote control joypad replacement

There were some others which were good, but not good enough. Ha, tough life innit!

Sonic 3, the controller came from Andrew Steele of County Down in Northern Ireland

A rather novel anti-gravity unit came from Ricky Wilson of West Yorkshire.

Stephen Blair from Northampton sent us a novel 'Vertistick' for use with skiing sims (a lot of those aren't there?) and beat'em-ups

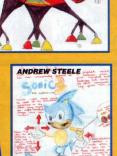

A Duck's Arse Quackshot control

Park, Oldham. The 'Backstick' came from Gareth Julien from Woolwich.

YOUR WISH IS MY COMMAN

Win! 10 Game Genies from Hornby Hobbies.

The Game Genie is about to be launched on an eager Mega Drive owning public. To celebrate the launch Hornby Hobbies is offering to give away 10 of these marvels of modern science to the lucky people who win this scandalously simple competition.

HOME SWEET HOME

All you have to do to stand a chance of winning is take a look at the puzzle and decide which lamp (1, 2 or 3) each of the three genies (A, B and C) appeared from. Simple right?

Send your answers on the back of a postcard to:

Rub me three times and I'll

MAG, Maverick Magazines, Waters Green House, Waters Green, Macclesfield

All entries for the compo must be received by 21 October and the 10 winners will be notified by post. If you do not hear from us by 31 October then you have not won and must therefore rush out and buy one instead!

No employees of Maverick Magazines or Hornby Hobbies are allowed to enter. Oh, also the editor's decision is final.

NOVEMBER '92 . ISSUE 3

WAYNE CREEGAN

his 15-year-old favours official releases and has never bought a grey import. When I asked him why, he said he preferred to have English nuals. He's looking forward to, "Maybe buying Desert Strike or any platform game that comes out".

He's heard several rumours saying that Sonic II is, "The same as the original". God knows where he got his info from. Maybe he's a prophet!

Would he buy any add-ons like the Game Genie or Action Replay Pro? "No. If you spend £40 on a cartridge and use them to finish a game the same day, it takes the fun out of it.

nd my, they were young. They've had a Mega Drive for six months, but have only managed to accumulate four games. Mind you the combined income of an eight-year-old and a five-year-old can't be an awful lot.

They are looking forward to Sonic II, but there are very few MD owners who aren't. They don't have any grey import cartridges and have no interest in cheat devices.

I think it was WC Fields who said "Never work with children and animals".

This month: Virgin, London

THE MANAGER Glenn Davis

o what about grey imports? "There's always the demand for them, but it's not something we've ever considered because there's always plenty of available UK stock. People expect us to provide

hardware to run the imported games on and we don't. I mean the time may come where it's necessary to sell import stock, but it's such a contentious issue in the industry that it really isn't worth making any comment on

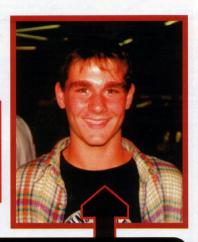

"Any new release of a good quality will sell on the Mega Drive at the moment. Chuck Rock and obviously Euro Champ Soccer have done well. Terminator has sold OK, it wasn't as big a smash as we thought it would be. There's not enough of the kind of product that people want to buy."

We visited the Virgin **Games Centre** in Oxford St. It is the UK's premier games retailing centre, selling not only computer games but also every other kind of game you'd care to name.

MEGA DRIVE ADVANCED GAMING
NOVEMBER '92 . ISSUE 3

Brian Hulse

nother Essex teenager, and apparently Ashton's mate He's had his Mega Drive for about a year and prefers grey imports to official releases because they are newer and more up to date.

Like many others he believes that these cheat devices, "Make it too easy I'd prefer to finish a game off my own bat. If it's a hard game and you complete it with one of them it's not really right." He's not too clued up on the latest releases but says he fancies the look of Jordan Vs Bird for his next purchase.

"15, um, 16-year-old" from Essex - make your mind up! The last game he bought was Gynoug and said that he favoured official releases because, "If I get them from a shop I've got a guarantee, but you're not sure where you are with some of these mail-order places". Each to their own.

When I mentioned the Action Replay Pro he told me he borrowed one from a friend occasionally but he thought, "It's a waste of money because there is no point buying a game then completing it the same day you got it".

He's looking forward to Alien 3 being released but he is going to wait for reviews of Sonic II to see if it's worth picking up or not.

t 37 David is one of the growing number of older Mega Drive owners. He is a big Desert Strike fan and is looking forward greatly to LHX Attack Chopper.

He didn't know a lot about the grey import scene, but he said, "Obviously price has got a lot to do with it. My mate has got this cartridge with a Japanese manual, which is a bit of a bummer really. No, I wouldn't buy game with a Jap manual, what would be the use? To be honest I'd rather stick with the official releases".

As far as cheat devices are concerned he didn't see them as his thang. "You're defeating the element of the game really. So I don't think I'd want one". It looks as if the marketing departments behind these cheat devices have got a lot of work to do.

Paul Hurst

e is approximately 28 he wouldn't have his picture taken. He's got loads of games and had just spent the entire day wandering around the West End of London trying to find a copy of Taz-Mania. If he'd tried the Virgin Games Centre first he would have found some 20-odd copies. Still he's here now.

"I just get the ones that come through the shop and don't worry about this grey import nonsense, it all seems a little too expensive." Fine.

He's quite keen on these little cheat lists you get in some of the mags so would see an Action Replay Pro or a Game Genie as "Useful". Shame he didn't vant his 15 minutes of fame that's all.

THE SILENT **TYPES**

The people who would not allow themselves to be hassled for too long will find their words entered below. Ha!

"Bugger off I'm in a hurry."

"Yeah, definitely, yeah."

There was a lot of very gallant "I wouldn't use one of them cheat devices, it's not fair is it?".

The Foreigner

rm, this chap was Spanish and called something like Cabille. I didn't take Spanish 'O' level so there was a slight communication barrier, but

here goes!

Apparently he's got 11 games and has had his Mega Drive for five months.

He would rather play the game himself than make use of a cheat device. That was about all I managed to get from him. Oh, he did mention that he wants to buy a sport game next.

This is the first official MD TSR role-playing game. Gerry and Dave have played this game for days to bring you part one of the complete solution. Part two will be next month.

I. THE CASTLE

where a plus one axe can be found. A very handy implement to carry around

12

The tower of Marmillian the duke's advisor who is the person to exchange any old goods for helpful

Explore the guard towers for extra powerful weapons

The duke's throne room where you receive orders for the Located at the end of the right-hand wall inside the magic shop is a secret passage leading to the laboratory. Inside here nagic scrolls can be found

Ogre gloves giving extra strength can be found in this tower. Beware of the beast warrior lurking in the shadows

2. THE VALLEY

The caravan shop is

very useful for cutting down on travelling time across country

3. THE CAVES

experience

Cut down the creepers from the back wall then enter the large maze. Be especially careful to avoid owl bears and the phobosuchus. Healing potions are to be found and the warriors gain invaluable

Watch out for the bronzed skin woman and the small pit – fall in and the beastmen can bring reinforcements. Take the jewellery and pottery to the castle. Go to the throne room and Marmillian's tower (righthand side) and exchange items for a creeper which cuts through the vines in cave five to

Loads of weapons and spells are found in this cave but again the beastmen are everywhere

enter a secret maze

Apart from a secret wall that seems to go nowhere there isn't a lot in this

leave the cave, re-enter and kill them again. Repeat this process eight to 10 times to gain valuable experience and hit points

Walk straight ahead to find a magic

scroll. Kill the first few beastmen then

6. WATERFALL

- Large blobs of jelly commonly referred to as gelatinous cubes reside in this quiet little corner of the passage. They are no problem
 - Entrance behind the waterfall
 - The first creatures encountered are flying vipers, not too much trouble
 - And again for your pleasure more owl bears. These bloody things get everywhere
 - Things get very tricky as the charge of the tiger beetles takes place. These are tough and gang up on the heroes and cause serious damage. The most effective way to combat them is to run like hell and kill them individually

8. ASCAN LAND

When finally free of the Ascan Maze the group find themselves in the Jungle of Ascan.

The quest is to gather four fire resisting rings needed for protection in the fire world.

These rings are situated in the Pyramid of Ascan. Follow the dirt path to its end, then bear north until you reach the Ascan Pyramid. There are numerous warriors and monsters that will attack along the way so always be on

> The giant scorpions are very difficult to destroy and they have a sting containing very powerful poison. Make sure the mage in the group has memorised a cure disease spell as the chances are it will be needed

The entrance. Be wary of the stone giant that lurks in the shadows. It is strong and can be difficult to kill

A small passageway lined with doors that contain some very vicious monsters such as giant

scorpions, which are very difficult to destroy. Gargoyles also fly around just to add to the confusion. The end door leads to the eastern plateau so avoid it because there is no escape from this place

To pass through this secret wall simply walk into it then prepare your party of heroes for some difficult battles

In this part of the maze dwell more stone giants. As before advance with caution as three hits from a stone giant can be fatal

Now it's on to a meeting with the owl bears After the fun with the stone giants you should have quite an experienced warrior and now is when he will be needed as the team encounter the rather pissed off minetaur. The only way to defeat this is a good old fashioned slugging match

Help save Gotham from the fury of the Joker with our stonking great players' guide covering level three right to the end. Everything

you will need to know should be here.

FLUGELHEIM MUSEUM: LEVEL THREE

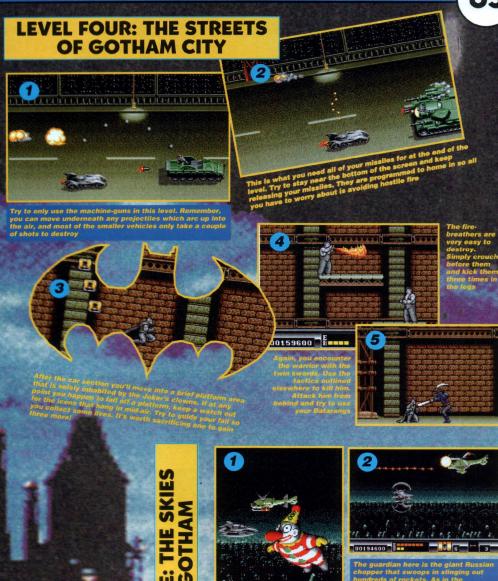

NOVEMBER '92 . ISSUE 3

LEVEL FIVE: THE SKIES OVER GOTHAM

In the Batwing you must employ the same tactics as in the Batmobile in level four, Save as many of your missiles as gossible. Remember, even the larger foes can be destroyed with your machine-guns

ne guardian here is the giant Russian topper that swoops in slinging out undreds of rockets. As in the standbile stage sit towards the botton the screen and let your guided issiles do their work

LEVEL SIX : GOTHAM CITY CATHEDRAL

When you reach this point your final obstacle (before the Joker) is this sliding spiky block. Timing is of paramount importance. Don't cock up your somersault jumps!

Use your grappling hook to get off this step before it falls

Watch out! If you stand on these platforms for too long they end up dissolving! Try to jump off them as quickly as-passible

To get past this gargoyle, use the grappling hook and swoop up past it just after it blows out its deadly

The motion sensitive bombs are unavoidable really. Just make sure you know what they look like to avoid falling all the way to the bottom of the level

Beware of the chaps who lob the dynamite sticks. When approaching one wait for him to make a move to throw the explosives before jumping upwards

appear from time to time and can only be destroyed by punching them three times. Beware because if you move off screen they will reappear if you fall back towards them

When leaping across some of the wider gaps, jump and then jump again very quickly in order to somersault. At this point watch out cos there's nothing to land on below.

CATHEDRAL TOWERS

On the way into the cathedral try to keep hopping up and down between the two floors to ensure that you avoid as many of the meanies as possible as you collect all the goodies

DEFEATING THE JOKER

The Joker has two forms of exceptionally fast attack. Firstly there is the 'blue sparkly lightning thingy' and secondly there is his 'whopping great big weapon'. Try to jump over the blue flashes that fly across the floor and then simply duck under the bullets.

The easiest way to kill the Joker is just keep lobbing Batarangs at him! Alternatively, try to get behind him

Hi ya kids, Krusty the clown's back for more moronic mayhem battling against the rebelling rats. You've probably walked through the first level, but the second is a little trickier. Don't worry, MAG will guide you to the end...

DRIVE ADVANCED

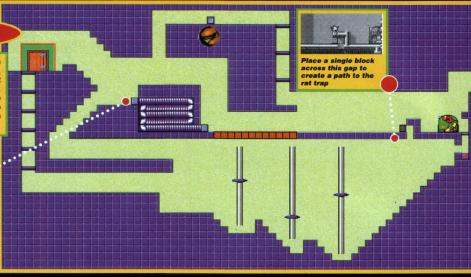

68

ROOM 4

Quickly run and move the first block. Dump this nearby, then jump right and collect the square blocking the pipe. Use this to fill the gap on the right, but make sure you leap over the crumbling floor when you pass.

Act quickly here.
Before the rats get out,
nip down and move the
blocks away from the
pipe allowing them to
walk past

ROOM 6

Grab the block found under the entrance and use it to jump off to the left. Leaving the bonuses until the end, allow the rat to escape using a building block. Place the blower under the pipe as shown, before creating a path over the pipes with three blocks. The rat will end up just below the trap, and can only be released with two squares. A couple more blocks allow the rodent to pass over the pipe. Finally drop the blower to shoot the rat into the trap.

get the rat

nearer the

MEGA DRIVE ADVANCED GAMING

here to

release the rat

It's possible to grab all the bonuses, but you'll have to time your jumps

ROOM 5

Grab the block from the right of the level, and place it by the mouse hole. Wait for all the rodents to escape, then carry it down to the bottom. Use it to make steps to the rat traps, making sure you wipe out the alien guards first. Finally use it to reach the exit door:

Having blasted all of the rascally rodents, dump the block here and jump off it to reach the exit

Wait for the rats to stroll to the right, then place the block here to form a stairway to the trap. You'll have to do this a couple of times before you catch all of the fiends

Pick up the block and place it here first. This will allow the rats to get out of the constant loop of pipes

This block lets the rat out. Before you release him make sure the other building squares are used to block the pipes

ROOM 7

Use two of the blocks to fill the pipe and blower, then drop the remaining one by the entrance. The rat will make his way across to the right, so you'll have to close the other pipe with a block you used previously. Use the blocks to make a path up to the platforms, picking up and replacing squares to fill the gaps as you go.

It's pretty difficult trying to make a path with only a few blocks, but persevere and the rat will be beaten (finally!)

Place this blower here just before the rat reaches you. The fan will blow the rat into the pipe above, which will speed him to his ultimate doom

After allowing the stupid rat to perambulate merrily along your makeshift staircase, pick up just a couple of blocks and lay both of them down here double quick!

ROOM 8

Use a blower and three blocks to make a path to the first platform, then let the rat loose by taking away the last square and placing it at the top of the next platform. Using the previous three blocks, create steps so the rat can be trapped on the second platform, then release it when the final gaps have been plugged. Remember to use the vertical blower to shoot the rat into the trap.

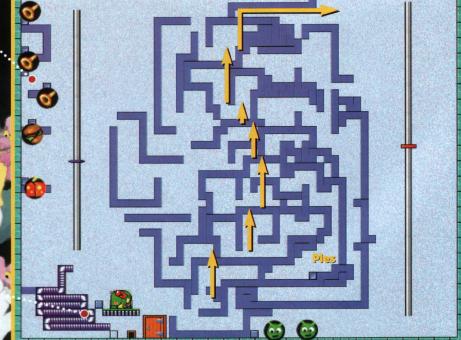

You'll need the superballs to break through the crumbling wall

ROOM 9

First of all make your way through the maze of pipes, using the route indicated. At the top, fall down or use the elevator to drop you down safely. Then kill the pair of guards and pick up the building block. Use this block to guide the rats into the trap, then just grab the bonuses on the left.

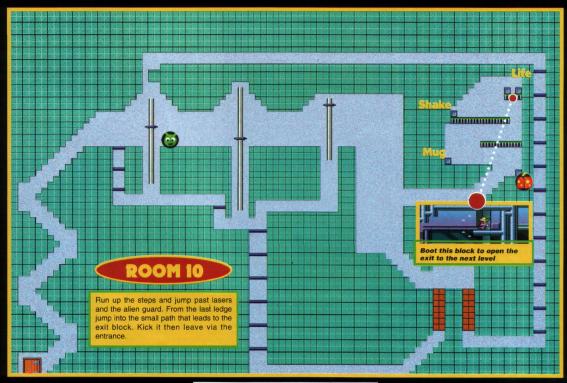

the rats into the trap

Oliver Connoly from Jersey was an immense help with this players' guide. Cheers Oliver there's a game on the way! The following pages

give you the best tactics to use for each of the levels in the game.

LEVEL ONE: 2029

Your objective here is to find your way into the Skynet lab and blow up the time displacement unit. Just before it blows you have to leave the complex and make sure you get into the time travel pod.

The very first obstacle is the ground based MK. This is by no means as difficult as it looks! Move in as close as you can and keep chucking the grenades as fast as possible. If your shots are reasonably accurate you should need to throw about 10 grenades

The flying HK is a hindrance that can be easily avoided with patience. It is possible to destroy it for an extra bonus though. Five grenades are all that is needed to make it crash from the sky. Watch out though, it's immediately replaced by another

Having moved underground you've got to reach the time displacement unit as quickly as possible. As you move right, make sure that at the first set of steps which go down you (the the upper platform where you'll see a number of fans

At the next set of steps make sure you take the lower platform. You'll need to blow out the door with one of your smart bombs at the end of the platform

Once you've blown the time displacement unit move up the steps, left, down the steps, along to the left, up the steps, right, up some more steps and then up the ladder to the curlace The start point is here and you'll find the Terminator walking straight towards you. Shoot once and quickly dash up the steps

GA DRIVE ADVANCED GAMING

Locate Sarah Connor and make sure she doesn't get found by the Terminator first!

When shooting at either the cops or the thugs you'll find it easier to crouch and keep firing as fast as possible. This way you can avoid their shots at all times

t the end of the slight you'll be Tech Noir O.F. Sarah is at ar right and you've just got to o her. The Terminator will have knocked over three times to ou can get past him.

LEVEL THREE: LAPD

Separated from Sarah you must get from the cells in the bottom right of the building up to offices. Although the level is large you don't need a map as there is only one possible

Due to the low ceiling of the police station the thugs cannot throw their Molotov cocktails very far. Get close to them before firing and the explosives should fly straight over your As before you'll have to knock the Terminator over three times before you can get past. Unfortunately there are usually some cops around so you'll have to shoot them as well. Get to the stairs on the left as fast as you possibly can!

the unoccupied you realise that the endoskeleton s. Lead him to the crusher at the still lives. Lead him to the crusher at the far right of the level. Use the map to find the quickest route to safety. safety of factory

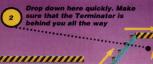

The Terminator starts off in front of you - shoot him and he will fly off the screen. You want to get past him so he walks along slowly behind you. After five shots he breaks in half and is then more difficult to kill

Move slowly to keep the Terminator in view. Walk too fast and he'll disappear and the next thing you know he'll appear in front of you!

Climb down the ladder and the Terminator will move out of view. When he re-appears at the bottom shoot him and then head off up the steps before slowing down again

WITTIII)

Straight up the ladder as quickly 5

through the gap before jumping over

it vourself

sure that the Terminator is following you 8

here. Wait with her and watch as the metal monster is crushed

MEGA DRIVE ADVANCED GAMING NOVEMBER '92 . ISSUE 3

If only I could drive as well on a real track as in the game I'd be a millionaire by now! Anyway, I can still be your driving instructor for the next four pages.

Use the screenshots in conjunction with the text for each of the corners and the championship will be yours no problem!

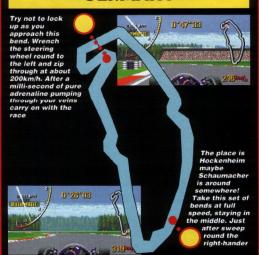

AUSTRALIA

The G-forces mount up when you go flying into this corner. Try to take it at 230km/h while riding the red and white barrier. Don't worry about the car sliding out, you'll make it!

GERMANY

Drive into this bend at approximately 250km/h. Take it nice and easy before whacking on the power as you drive back out

JAPAN

Sweeping bends that can be

conquered by staying in the middle. Try not to be at top

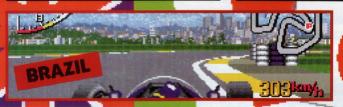

speed. Other cars that may be passing through at the same time can collide with you 0,08,40 An extremely tight left-hand bend that can almost make you spin out, so a low speed is essential. Try to make it round at 170km/h, not track is forgetting very impressive. At this to stay particular corner stay to the near to right at full speed and get ready to blast off on the straight the kerb

MEXICO

Fast part of the course this bit as you go through the gentle right-hander and straight into the double set of bends. There's no limit to your top speed here, so enjoy! 0,00,50 Another double set of bends, but with a twist. Just as you leave the bends you'll be greeted with the sight of a reasonably tight left bend. A speed

A nice double right-hand bend here which can easily be taken at 280km/h. Get to the left of the track, then just before the bend signs show steer to the immediate right

While travelling through the dimly lit tunnel take care not to hit the walls as this would result in a rather nasty accident

possible

SPAIN

The set of bends shown here look very menacing indeed but if you stay to the left and you're travelling at a high velocity you'll survive

A death defying feat is needed here. Approach the hairpin at top speed, then cut into the corner as sharply as possible. Don't worry about skidding off the track as there are no barriers to harm your car

Speeding quite nicely through the difficult left-hand hairpin bend leads straight into the gentle arc of the right-hand bend that follows soon

AMERICA

There are three tight bends here one after the other. Before taking the first one make sure you're to the left of the track and turn your wheel just as you're in the bend. If you do this too soon, you'll probably hit the barriers and wreck the car

270km/h

the trick

should do

left bend which can be easily taken at full speed. It's also a nice way to regain lost time and overtake the other

The double left bend leading to a double right bend are perhaps the trickiest parts of Silverstone. Do your best to go through all corners at 230km/h

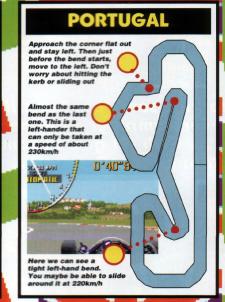

On leaving the final bend the home straight is in sight. So push y engine beyond all limits to impress the

eager crowd

MEGA DRIVE ADVANCED GAMING NOVEMBER '92 . ISSUE 3

Here we are coming out from a tight right. hand bend. The ideal speed for this tricky part is roughly 200km/h. It can be dangerous if there's more than one car travelling through There's no actual danger points to look out for so you may hack it around as much as you like, especially on this straight A fast set of bends here. Just keep to maximum speed and stay in the middle line to

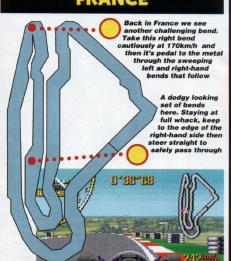

achieve best results. This is a great way to catch up on lost time

Here we can see a tight right leading into a very difficult left. Upon entering the left-hand bend use every ounce of power you can muster

A nice set of bends that leads to a tough right-hander. It is suggested that you take this corner at 210km/h, but if you're a dare devil you can go faster than that! A nice calm track. On leaving a 260km/h bend to the left it's into a full speed bend to the right. Go get A rather smooth right-hander that may be driven round at a speed of 290km/h. Who knows, perhaps you can even go faster if you're incredibly daring...or stupid!

MEGA FILE

For the people who like to kick some ass but still pretend to be nice chaps, those clever computer-type people designed the beat'em-up. As with all genres some games are good and some are plain awful. Read on...

STREETS OF RAGE

SEGA . £34.99

"Two-player...Great graphics, superb sound and fab gameplay...but too easy" was how this was described in our shoot'em-up round-up. After some dispute however,

we've included it as a beat'em-up Now will you

TONGUE OF THE FATMAN

Get thrown into the future then beat up some very unsavoury type people. There are some very nice graphics, but experienced players may find that the challenge is rather simple and is easily completed. ideal game for novices

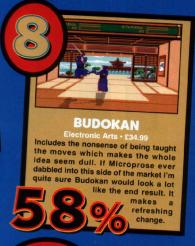

LAST BATTLE

A great disappointment considering the superb graphics which include someone's head being knocked off and blood spurting everywhere - it's horrible! Slow and repetitive

gameplay however tends to most

GET YOUR MUG IN PRINT

Don't scoff at our ratings, write a mini review (60 words) of the games you've played, give them a score and then send em in. If you want your mug in the mag send in a photo too.

It's rather lucky for you lot that we are here to present the all-time top 10 beat'em-ups. However for every goodish game there are 10 complete duffers.

This month every game in the 'Down the Pan' list is a complete golden turkey. Read 'em and weep.

MEGA DRIVE ADVANCED GAMING
NOVEMBER '92 * ISSUE 3

Reveal your darkest secrets to the team at Megaphone, MAG. Maverick Magazines, **Waters Green** House, Waters Green. Macclesfield, Cheshire SK11 6LF.

BAD TASTE

Hugh, I'd just like to say how sorry I feel for you not getting on the contents page of issue one. Your hair is great by the way. My questions:

- 1. What in the hell is Headbangers'
- I've heard the Amiga and ST hit Striker is being released on the Mega Drive in early '93. Is it true?
- Will Sensible Soccer be released for the Mega Drive?
- Do you reckon it's worth waiting for Super Kick Off or should I get Furo Club Soccer?
- Will a cricket game ever come out?

Matt Goldman, Warwick

Hugh: 1.It is MTV's rock programme

2. Nothing has been announced as vet.

3. As revealed in our news pages Sensible Software is in the process of developing it, but it is not signed yet for

4. Super Kick Off is miles off and Euro Club Soccer isn't an office favourite. I'd wait for something decent.

5. As Mega Drive releases are

released for a global market, and cricket isn't especially popular in America and Japan, the chances of Graham Gooch's Cricket (Extra Pakistani Swing Controversy version!) appearing on the Mega Drive are slim.

RAMBLING OLDIE

Sega Force, Sega Power and Sega Pro and you are all the same, you write to a 20-year-old reading public. I seem to belong to a lost legion, even when I go to Dixons or any other computer store to buy games, I get a lot of looks when I say that it is for me. Because I am 65 years old they seem to think that I am an eccentric pensioner, or maybe I'm the only pensioner who plays games or works on a computer.

I like the Mega Drive and Game Gear that I have and I've also got an Amstrad 464 with a memory expander.

Anyway, thanks for a good first mag and letting a pensioner ramble on. Of all the computer mags I buy you are the first one I've written to, it must be a good sign.

Eric Leeming, Blackpool

Jools: Well, Eric I have to admit that you are the first Mega Drive owner I've come across over 65. I'm

sorry you feel our writing is a little too young for you but we do have to appeal to our core readership first and foremost, and though I welcome the day that there are legions of .. Mega

Drive owners who are 60 years old plus, you are something of a rarity at the moment. I'm sure you'll agree though, that we aren't as aggressively vouth orientated as some other mags.

SCROUNGING...

Please times 2,000,000 could you send me a Sega Mega Drive because my cousin has one and I would like one very much. I don't have much money saved up and I long to get one. I got ver magazine last month and I love the transfer of Sonic. I think yer mag is fab. I love the gang and I think Pam Norman is the best.

PS Please send a copy of Sonic too. Joseph Mackey, Killenaule, Co Tipp

Gerry: Pam? Hmm, everyone is entitled to their own opinion! This whinging and grovelling is too much

for me, so here's John. John: I'll have to be restrained 'cause I get

too abusive. It is said that the longing for an item is far better than the actual receiving. Enjoy your desire for this shrine of entertainment and write to us again when you've got yourself a life.

COCKY OR WHAT?

Dave, I have a problem with Mega Drive games - they're too darn easy! You're supposed to be a demon player

MULTICOLOURED?

I'm writing to you after reading an article on the problems black actors have getting parts in films. This brought home an issue very much ignored by games producers, there are no coloured heroes in any games.

This has been evident since almost the beginning of games history. I remember loading Daley Thompson's Decathlon on the Spectrum and looking in disbelief at the white sprite used to depict Daley - this is even more evident today. Take Olympic Gold, despite the fact that most Olympic sprinters were black US Gold give us six white sprinters.

Now I know what you're saying, "Oh yeah another black guy with a chip on his shoulder", but I am actually white. I just think that coloured heroes get a raw deal when it comes to games. George Truesdale, Airdrie

Jools: I totally agree with your sentiments. The Olympic Gold problem was brought home to me when I visited John Regis for issue e's Star Play. I was a little worried about it but John didn't mention it,

maybe we're overreacting a little?
I agree with the facts, but do coloured Mega Drive players see it as a problem? It's easy to make an issue out of nothing in these prejudice-sensitive times. Let's hear some more opinions on the subject.

MEGA DRIVE ADVANCED GAMING

SEND IN YOUR LETTERS, PHOTOS AND (MOST IMPORTANTLY) BRIBES

- well I challenge you, at any game you want. Ha! I bet you don't print this letter cos you're scared of defeat! Any game, any time. Prove your worth.

PS. I hope Sonic II is more challenging than number one.

PPS Your last issue was excellent. Keep it up!

Tom Reardon, Boroughbridge, **North Yorks**

Dave: So you think you're worthy of challenging the ultimate gamesplayer? Well I ask you and all mortals who dare rise to the challenge. If you are serious about this confrontation then we'll arrange a

DEPENDENCY

quick bout with each other.

I am writing to ask you about the Further Adventures of Toejam and Earl. Is there going to be a Toejam and Earl 2? I would also like to know if you can use American and Japanese games on an English Mega Drive and will you be able to use American and Jap CDs on an English Mega CD? Nigel Neilson, Kenilworth

Jools: It would be safe to say that a sequel will appear, although no firm plans have been

a Menacer later this year you'll receive a game featuring Toejam and Earl though this is not a sequel.

If you buy an adapter or use an Action Replay Pro or Game Genie then you will be able to run most US and Jap imports. However Jap games are beginning to introduce chips which check whether the machine is Jap or not and won't run if it isn't. The same will apply to Mega CD games. Megacom will convert both for you if you call (0602) 475151.

TO THE POINT

- 1. When will EA Ice Hockey 2 be released and will it be better than the original?
- 2. When will Streets of Rage 2, Sonic Il and Lotus Turbo Challenge be released?
- 3. Will Street Fighter 2 ever be released on the Mega Drive? John K Fahy, Timperley

Dave: EA Hockey 2 is to be known as NHLPA '93 and will be released in November/December. EA

is marketing it as an update of the existing game and don't expect existing EA Hockey owners to buy the new version.

Streets of Rage II comes out in Japan under the moniker Bare Knuckle II around Christmas. Sonic II hits town 24 November. Lotus Turbo Challenge is pencilled in for an October release.

There are no plans for a MD version of Street Fighter 2, but if it ever did appear it is unlikely to come out in cartridge form, only on the Mega CD.
