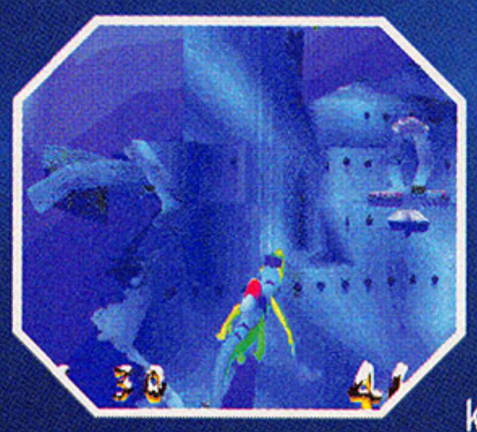
All Hail the Lizard King!

GEX makes his triumphant return in GEX 3: Deep Cover Gecko.



As an international secret agent for hire, GEX's latest adventure involves rescuing the beautiful Agent Xtra, played by Baywatch's Marliece Andrada, who has been kidknapped by who else but GEX's arch nemesis Rez. Along the way GEX must change into a variety of disguises and master loads of cool vehicles to outwit the evil Rez.

All-new Gameplay

While saving the beautiful Agent Xtra is quite enticing, it's the ALL-NEW gameplay that really makes GEX 3 shine. GEX 3 has plenty of gameplay depth and is designed to reward the player at every turn. A variety of cool character disguises with designated gameplay mechanics are just one source of that reward. One example of this is the Clue level where GEX, while dressed as a certain 'Inspector Holmes' fellow, uses his trusty magnifying glass to uncover secret time-based mini-games. Later in the same level GEX solves a puzzle that allows him to turn into 'Count GEXcula'. As The 'Count', GEX uses his cape as a flying device to glide to areas previously unreachable as 'Sherlock GEX'. There are over 25 costumes in all

and not a dud in the bunch.

The collectible system is equally as rewarding. There are 3 types of collectibles: Gold Flies provide your life's blood (free lives) and are necessary for survival, Paw Coins add extra hit points to your health base and help you in later levels and finally, precious Bonus Coins that give you access to play over 15 vehicular based Bonus levels. These twitch-based Bonus levels are not accessible without a set number of Bonus Coins but are well worth their price! Ride bucking burros, slithering crocodiles and jump-happy kangaroos. Then fight evil elves while riding a snowboard, blow up just about everything while controlling a military tank and scuba dive to your hearts content.

In addition, new abilities like shooting gattling guns, spitting fireballs, freezing enemies, discovering secret playable characters and an all-new intuitive camera system make GEX3 one hell of a sequel!

GEX 3 on the Nintendo 64 includes three new levels and an all-new GEX move: the controllable "Tongue Grab". You must spit GEX's extra long tongue to latch onto suspended objects so GEX can swing over treacherous obstacles and enemies. Precise timing is the trick to master this cool new mechanic.

As usual, the graphics in **GEX 3: Deep Cover Gecko** are simply stunning with not one ounce of detail overlooked. Crystal Dynamics has another graphical masterpiece on their hands. The hilarious Media Dimension levels are once again designed as sarcastic parodies of pop culture, movies and television. Including such levels as Saving Private GEX, Twisted North Pole with an evil Santa, Jock GEXsteau's H2O adventure, GEX and the Beanstalk and others.

From the all-new character mechanics to the variety of cool costumes, secret playable characters and fast-paced vehicles to control, GEX 3 is an engaging experience from start to finish.

Editor in Chief **Chris Bieniek** does not own a DVD player, but he's excited about the fact that Sony's "PlayStation 2" may be able to play DVD movies as well as games. "Hey, I never owned a CD player until I got a Sega CD," he explains. "And if Nintendo's next game system has the ability to make ice cubes, I won't need to buy a refrigerator."
Current Favorite Games: Beetle Adventure Racing, Pepsiman, Um Jammer Lammy, Tecmo Cup Soccer

Is it true? Executive Editor **Jim Loftus** has announced that he is leaving *Tips & Tricks* to accept an editorial position with *GameWeek*, the leading video-game industry trade publication. We'd like to thank him for all of his hard work and wish him the best...unless, of course, this is some kind of six-week "vacation" like the one Tyrone took.
Current Favorite Games: Get Bass, Driver, Need for Speed: High Stakes, Zombie Revenge

If **Tyrone Rodriguez** has a weakness, it's his inability to properly digest certain foods. He recently called in sick because he'd had "some bad McDonald's" the previous night. If he takes his Neo•Geo Pocket into the bathroom, you know that he's gonna be in there for a long time...and that the place will be basically uninhabitable after he's finished.
Current Favorite Games: Zombie Revenge, Bust-A-Move 2, The House of the Dead 2, Pocket Alpha

Since he's a guitarist himself, we recently asked **Anatole Brown** to name his favorite guitar solos of all time. The first one that came to mind was Jeff Beck's famous lead in "'Cause We've Ended as Lovers," but Anatole also pointed to the late Randy Rhoads' work on Ozzy Osbourne's "S.A.T.O." and "Tonight" as being particularly inspirational.
Current Favorite Games: Super Mario Bros. Deluxe, Super Smash Bros., Wipeout 64, NBA Live 99

The *Tips & Tricks* staff recently threw an impromptu office party to celebrate the fact that Associate Editor **Jason Wilson** had finally cleared all of the Beanie Babies off his desk and was taking them home. "Those doggone things were everywhere, always watching me," noted an Editor in Chief who wishes to remain anonymous. "I won't miss 'em."
Current Favorite Games: Street Fighter Alpha 3, Spy Hunter, Mario Bros., Zaxxon 3-D

Tips & Tricks Art Director **Ione Flores** is fascinated by Las Vegas; there are days when everything reminds her of "Sin City." When she's in the produce section at the supermarket, all of that fruit makes her think of the spinning wheels of slot machines...and the mess on Tyrone's desk reminds her of the carpeting in her favorite casinos.
Current Favorite Games: Point Blank 2, L.A. Machine Guns, Bust-A-Move 2, Hello Kitty Cube Frenzy

Ara Shirinian has finally found the girl of his dreams: It's Ma-San of the Milk Can band from *Um Jammer Lammy*, the sequel to *Parappa the Rapper*. "Ma-San is the ideal woman," Ara enthuses. "She's two feet tall, plays the drums and speaks complete gibberish. Plus, she's got a live stick of dynamite sticking out of the top of her head."
Current Favorite Games: Puyo Puyo 4, Puyo Puyo 4, Puyo Puyo 4, Puyo Puyo 4

As the world's biggest Mega Man fan, contributor **Pat Reynolds** won't rest until he tracks down a copy of the most obscure Mega Man game ever made: a *Mario Party*-style "board" game called *Wily & Light No Rockboard*, released in 1993 for the Japanese Famicom system (a.k.a. the 8-bit NES).
Current Favorite Games: Armored Core: Masters of Arena, Power Stone, Mega Man Power Battle, Street Fighter Alpha 3

Contributor **Geoff Arnold** is faster than a rolling "O", stronger than silent "E" and is able to leap capital "T" in a single bound. He takes *Flintstones* vitamins every day, wears argyle socks in a variety of fashionable colors and never leaves a gap unfilled...and if you squeeze his belly, he says "Yo quiero Taco Bell" in a scratchy voice.
Current Favorite Games: Street Fighter Alpha 3, Street Fighter III: 3rd Impact, Dr. Chaos, South Park (pinball)

We can't respond to individual letters, but it's always nice to hear from you; we hope *somebody* out there is reading this!

SHARK BITE

Why does your Game Shark section always have more PlayStation Game Shark codes than Nintendo 64 codes?

—Sam Gales
Cleburne, TX

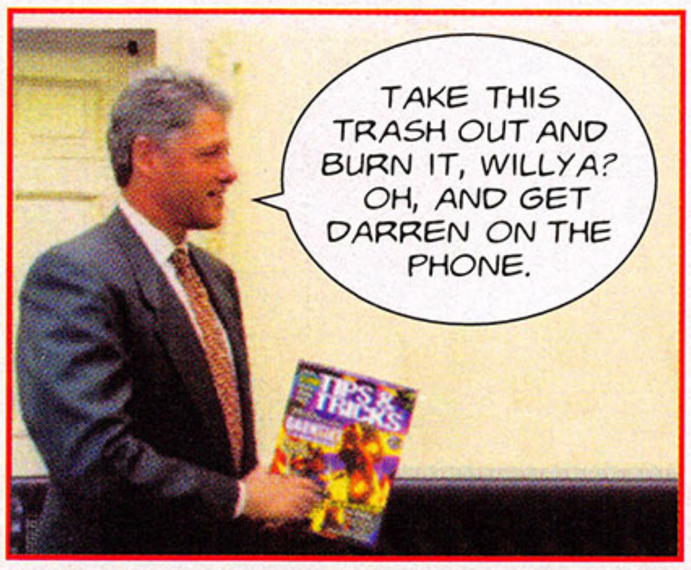
Because there are more PlayStation games than there are Nintendo 64 games.

THERE ONCE WAS A BOY NAMED DARREN...

I've got a couple of things to say. First, if you publish this letter, I would just like to say "hi" to my friends Eric Lane, Joe Barbarrino and Dan Parsons. Second: I love your magazine, but I wish you would put posters in it sometimes like *GamePro*. I have a question about *Resident Evil T&T*, what's it gonna be like? Please put my letter in. Please. It's my dying wish. I'm dying of cancer and I just want to see my letter published. Please.

—Darren Homewood
Limerick, ME

P.S. My uncle is Bill Clinton and he'll have your ass if you don't publish this.



If you're such good friends with Eric, Joe and Dan, why can't you just say "hi" to them in person instead of wasting our time with your fake "Bill-Clinton's-nephew-dying-of-cancer" letter?" You know, there are kids out there who really ARE dying of cancer. You ought to be ashamed of yourself, or something.

And what the heck is "Resident Evil T&T," *anyway? Is it some special version of* Resident Evil *in which the zombies invade the Tips & Tricks offices and Tyrone has to fight them off with a flamethrower?*

VERSUS MODE

First off, *T&T* is the king of all gaming magazines; with that, it shall be served the finest meats and cheeses in the land. I'd like to get your magazine's opinions on the following "who would win in a fight" questions:

1) Beastman (from *Contender*) vs. Muhammad Ali in his prime?
2) Solid Snake vs. Gabriel Logan?
3) Blasto vs. Gex?
4) Leon Kennedy vs. Harry Mason?
5) Yoshi vs. Spyro?
6) And finally, *Tips & Tricks* vs. *GamePro*?

Thanks for your time.

—Andrew Mahoney
Houston, TX

P.S. PRINT THIS LETTER OR DIE BY THE COLD HAND OF THE CURSED TYPER.

You know, all of these "who would win in a fight" letters are starting to get old...and we're not going to mention GamePro *anymore unless you guys start writing* **them** *letters and asking questions about Tips & Tricks. However, we do enjoy fine meats and cheeses, so what the heck:*

1) Are you kidding? No one could touch Ali in his prime; he was the greatest!

2) Snake could sneak up and ice Logan before he even knew anyone was around.

3) Who cares?

4) Leon, easily; he's a trained law-enforcement officer, whereas Harry is just an average guy.

5) We're assuming that Yoshi could probably grab Spyro with his tongue and poop him out inside a cute little egg...but we can't imagine what the trip through Yoshi's digestive system would be like.

6) This could end up as a draw, an epic battle after which both combatants would "die by the cold hand of the cursed typer," or whatever that ridiculous thing was that you just said.

FOR THE HEADSTRONG

I'd like to talk about a certain member of the *Tips & Tricks* editorial staff; namely, Tyrone Rodriguez. He's da bomb! (Not that nobody else isn't.) Anyway, I wonder what it would be like if he ran the show; yeah, actually made a mag. Speaking of mags, yours rocks, yeah, really rocks. Tyrone, tell Chris that he looks like Ken in *Street Frighter*. I wish I could get a subscription, but I'm broke. Tyrone, I'm your biggest fan.

—Jeremy Steiner
Copperas Cove, TX

Street "Frighter"? *Chris says, "Thanks a LOT!"*

Believe it or not, before he started working for Tips & Tricks, Tyrone was the editor of a self-published fanzine called Hardcore. *If he ever gets to be Editor in Chief of Tips & Tricks, we can only imagine that it might end up filled with the kinds of crazy illustrations and socio-political commentary that made* Hardcore *so interesting.*

Super Smash Brothers

SUPER SMASH BROS.

by Anatole Brown

Mario and his friends have left their go-carts and board games behind to take each other on with bare fists! Now we're talkin'! *Super Smash Brothers* pits all our favorite characters against each other to see who's the mightiest in Nintendo-land. Unlike most fighting games, the objective of this game is to try to get your opponent to fly or fall off the platform (kind of like sumo wrestling). The more damage you take, the further you'll fly when you get hit, making it harder to jump back in the "ring." The cute and simple look of the game can be deceiving at first, but a couple of grueling battles should make it apparent that there's a lot of depth and strategy to this game. That's right, put your little Nintendo Beanies away. No more Mr. Nice Guy!

The Characters

All the characters have similar button commands, but the resulting moves and the amount of damage each one can do varies from character to character. The damage level indicated below is the maximum amount of damage that a certain move can do. Remember, if you keep using the same move over and over, the damage level of that move will decrease...so mix it up!

Mario

Naturally, the famous plumber is the most well-balanced character of the bunch. He has damaging attacks, can jump high and even take a few hits. His Headbutt move is a nice way to launch opponents into oblivion to finish them off.

General Tips

- Use the yellow **C** buttons to jump instead of the analog stick; it will give you more precision.
- After two jumps, most characters can do a third by using the **Up** + **B** special move. After the third jump, however, the character will not be able to do another jump or move until after he or she lands on a platform.
- Use the **Z** trigger to activate the shield. The shield will dwindle if it takes too many hits. If it breaks, the character will become dazed, so be careful.
- Using the same move over and over will decrease the damage level of that move. You will also be penalized with negative points for Cheap Play.
- Each stage has a unique set-up which you can always use to your advantage. Learn the tricks and traps of every stage.
- Often, the one who gets to an item first is the winner of the game.
- After you master the basics, try expanding your fighting technique by learning to hit players as they try to recover from a distance. It will add a whole new dimension to the game.

Donkey Kong

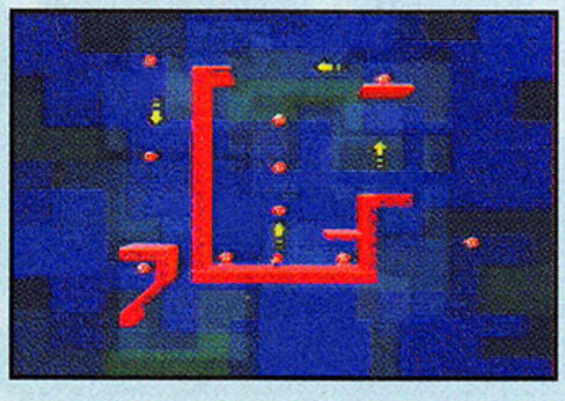
DK packs a lot of power and is pretty hard to blast away since he's the heaviest of the bunch. His size, however, does leave him vulnerable to multiple attacks and he also lacks speed. DK's Wind-up Punch takes a little time, but it'll catapult anyone into the sky!

Super Smash Brothers

Bonus Stages

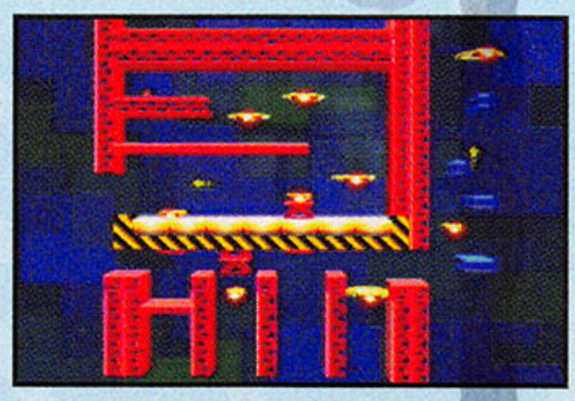
The bonus stages are not essential when it comes to clearing the 1st Player Game. If you want to score high, however, you should go for it. Also, certain hidden features require that you complete the bonus stages (see Hidden Characters and Extras). Listed below are key points in the two bonus stages for each character to help you get through. The triple jump for most characters can be done by jumping twice, then using the Up + **B** move for a third boost.

Mario



Bonus 1

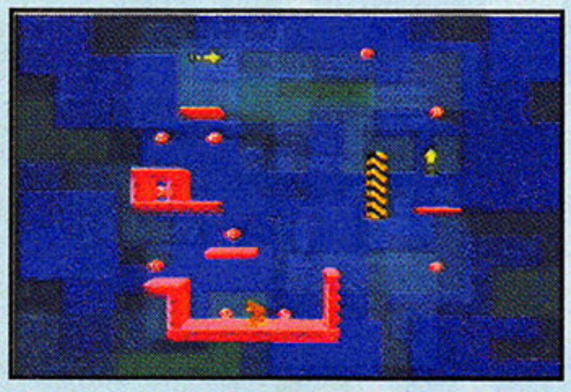
1. Break the four targets around you and do a triple jump up to the high target.
2. Get under the moving platform and use a Fireball on the target off to the right below.
3. Break the target on the moving platform and super jump to the high left platform
4. Break the left targets on the way down, then jump beneath the last platform for the last target.



Bonus 2

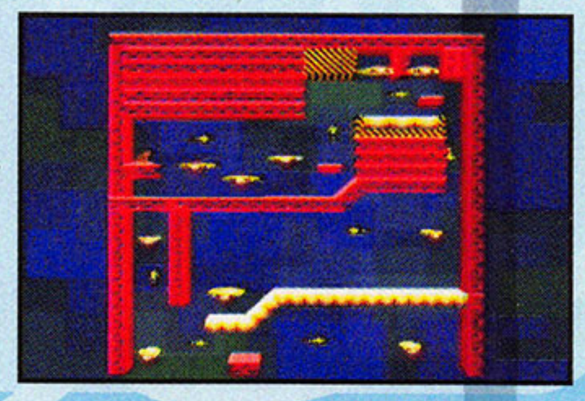
1. Step on the three easy platforms, then quickly jump on the three moving platforms in succession.
2. Fall down to the bottom level, then hit the next two platforms without being pushed down by the moving ceilings.
3. Use the blue platforms to get on the last two platforms using the triple jump..

Donkey Kong



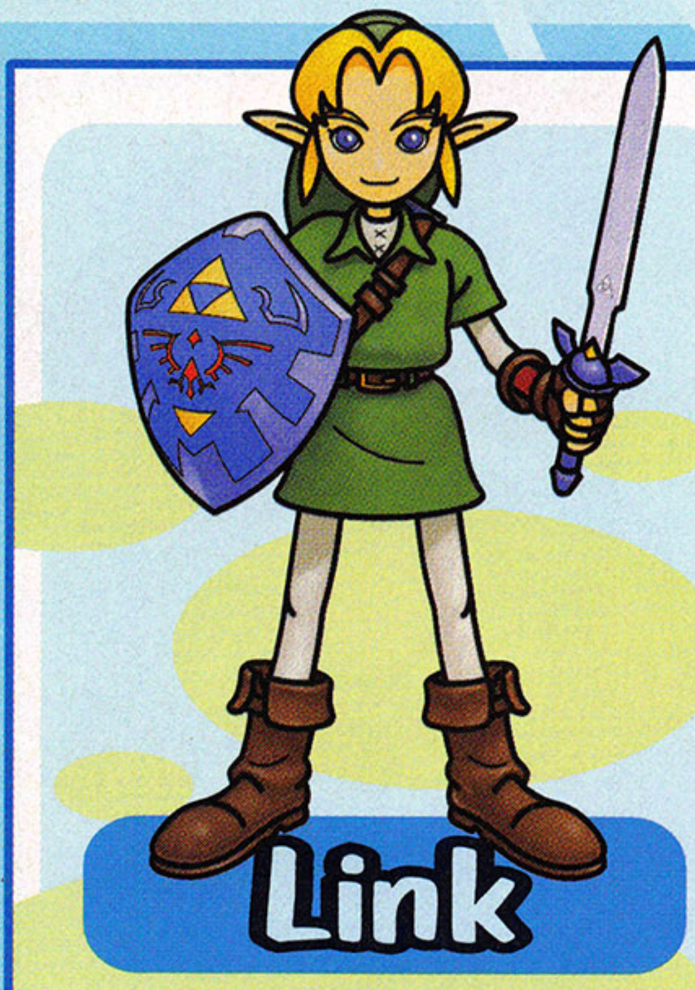
Bonus 1

1. Break the three easy targets and get on the moving platform to hit the fourth.
2. Use the B button to punch through the boxed target and jump up to hit the other two.
3. Get up to the high platform and time your jump so you land perfectly on the narrow yellow and black platform.
4. Triple-jump up to the highest target. Hit the target off to the right and hit the last target as you fall off the last platform.



Bonus 2

1. Step on the three easy platforms and use the moving red platform to jump through the top two platforms.
2. Fall down to the lower platform, then do a triple jump to the next one.
3. Finally, jump under the red divider to the left and quickly jump up to the next platform and triple-jump your way up to the last one.



Adult Link' has a long reach and considerable attack power. His heavy sword makes him a bit sluggish and his jumping height is pretty limited. He has a cool Scorpion-like "get over here!" spear-chain to grab and throw opponents (I guess it was used to climb roofs in *Ocarina of Time*).

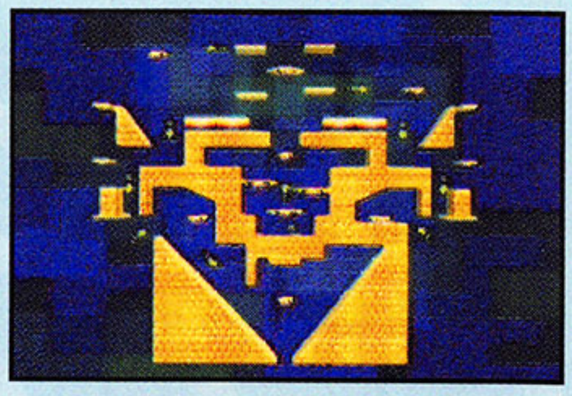
Bonus 1

1. Hit the target next to you and get on the platform to the left. Use your bomb to get the one off to the left.
2. Jump up to the high platform, hit the one there, then do a triple jump up to the top target. Fall down the chute and hit the next two.
3. Get on the moving platform to the right and jump up to the next moving platform for the next target.
4. Triple-jump your way up to the top corner target, then triple-jump and smash the target floating to the right.
5. Fall down to the farthest left platform. Fall directly under the last target and jump up to it.

Bonus 2

1. Jump on the four easy platforms that surround you. Jump up to the rotating platforms and land on the one in the center.
2. Jump to the platform off to the right and fall below. Fall under the gap and triple-jump up into the platform tucked away.
3. Carefully jump back to the top, making sure that you don't get shoved off by the moving block.
4. Now head left and hit the high platform. Fall down to the platform with the moving block without getting shoved off.
5. Jump up to the tucked away platform. Jump off and fall towards the last platform. Jump and triple-jump right when you're under the dividing wall to reach the last one.



Samus Aran

Bonus 1

1. Break the two easy targets. Jump up to the left ledge, quickly jump down, destroy the target below and quickly jump back up to safety.
2. Triple-jump up to the highest target, then hit the target sitting on the middle moving platform.
3. While still on the moving platform, shoot the target immediately to the left.
4. Fall down to the small platform. Quickly jump down, hit the target below and jump back on the platform.
5. Jump up and shoot at the furthest right target. Fall below and hit the last one.

Bonus 2

1. Step on the two easy platforms and do a triple jump to the furthest right platform.
2. Fall down to the moving platform below. When the platform moves to the left, triple-jump to the next platform to the right. Make sure you let yourself fall low before double-jumping so you can make it.
3. Jump up to the left cascading platforms. Keep jumping on them so you can hit two of them.
4. Triple-jump up to the far left platform. Fall down into the gap, then use the Z button and move left to roll under the bumpers. Jump up through the ceiling.
5. At the very top ledge, do a triple jump to the last platform. Again, make sure you fall pretty low before the second and third jump to give you distance.

Samus Aran

Samus' suit protects her from being blown away too easily and her quickness makes her a pesky foe. Her attacks are not the strongest in the game, but a fully charged blaster can send even Giant Donkey Kong flying into the void.

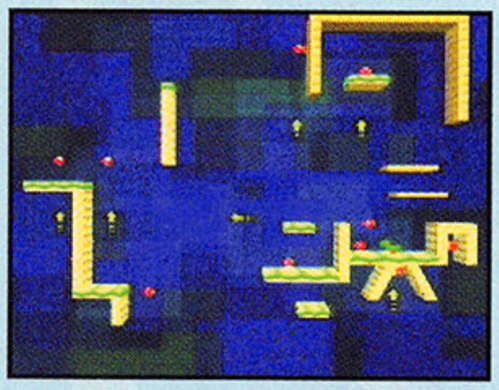
Super Smash Brothers

Yoshi

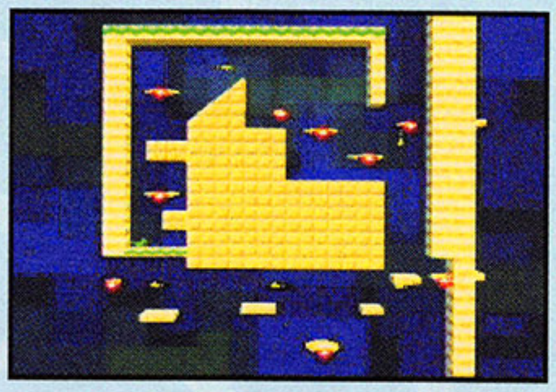


Bonus 1

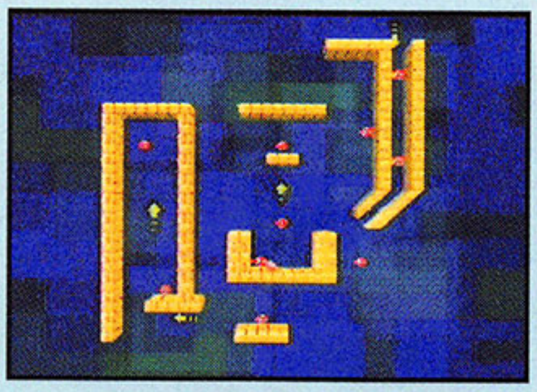
1. Hit the two easy targets next to you. Use the Smash Move to bash through the wall and hit the boxed-in target to the right.
2. Jump up to the two platforms above and triple-jump up to the high target sitting on the platform.
3. Get on the moving platform and do a double jump, then throw an egg at the highest target. Go down and hit the target under the moving platform.
4. Triple-jump all the way across to the right side. Throw an egg and angle it downward so it hits the target to your right.. Throw eggs at the top two targets.
5. Get on the moving platform below and ride it to the far right. Jump right under the last target and jump up to hit it.

Bonus 2

1. Avoid the jutting walls and step on the two platforms above.
2. Jump down to the next three.
3. This is a little tricky: Watch the light-up platform go by and count four regular platforms. When the fourth regular one goes by , jump and the light-up platform will follow. The platform will fall faster than you; when it's right under your feet, press Down and step on it.
4. Immediately jump off to the platform tucked away on the right.
5. Jump to the right to the rotating platforms. Quickly jump in succession so you step on each one. Triple-jump to the last one on the left.

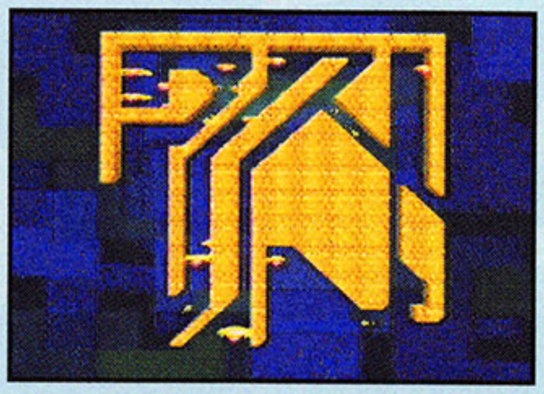


Kirby



Bonus 1

1. Hit the two easy targets next to you. Float up to the platform above and hit the target there and the one to the right.
2. Float all the way to the top and fall down the chute and hit the next three. Fall all the way down to the bottom moving platform below and hit the target.
3. Float under and up to the tucked away target, then do a triple jump up to the last one.



Bonus 2

1. Step on the three easy targets next to you. Float up to the next one, then turn Kirby into a stone block and blast through the bumpers.
2. Wait for the passing platform by floating in the air so when it comes down, you can just slip in between the platforms and press Down to set your feet down (like Yoshi's Bonus 2).
3. Immediately start floating up the chute to the next platform. Take the lifts up to the top and step on the platform up there.
4. Fall down the gap and use the Z button to roll through the bumper. You are able to walk on these slopes without sliding down. Walk to the left and triple-jump up to the target in the far right corner.
5. Fall all the way down the chute and veer left. Once you clear the jutting ceiling overhead, triple jump up to the last platform.

Yoshi lacks a super move that lets him do a third jump, but his regular double jump can give him lots of distance to float back to safety. His double jump also protects him from being blown away! His Multi Kick Combo from the air is the most damaging move in the game. Unfocused players against Yoshi could also find themselves being dropped like an egg.

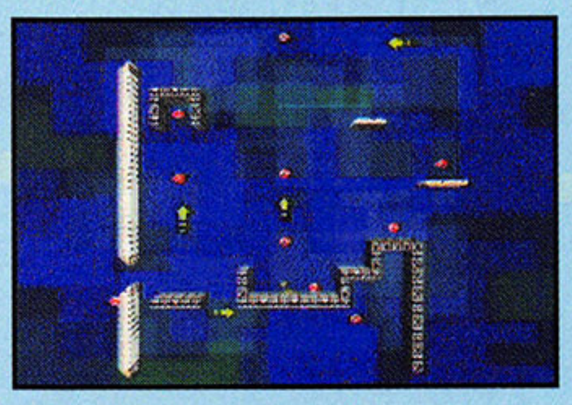
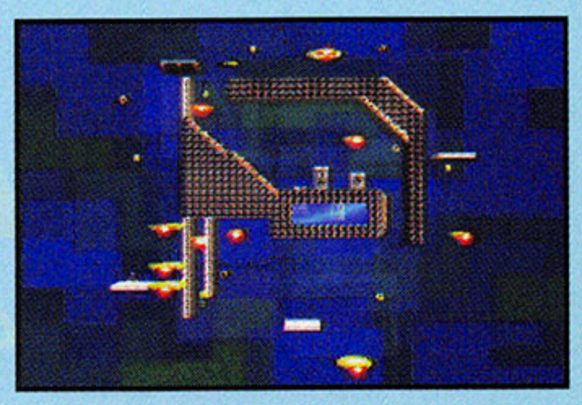
Nintendo 64 strategy

Fox McCloud



Bonus 1

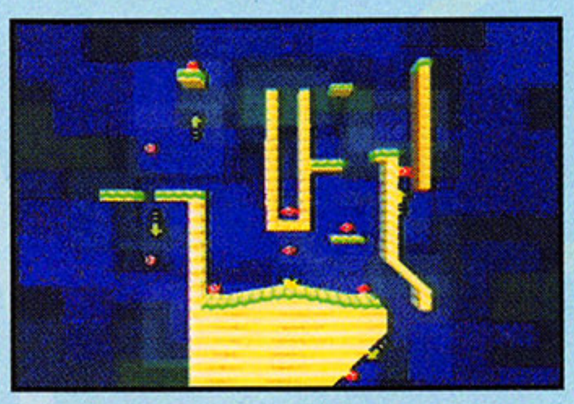
1. Break the surrounding four easy targets, then jump to the floating platform to the right. Hit the target there and jump up to the next platform.
2. Jump, hit the high middle target and Rocket your way to the high left platform.
3. Fall and jump underneath the tucked-away target to hit it. Hit the target under it and fall down.
4. Shoot the target between the moving gap to the left. As you jump off the last platform, shoot the last moving target to the right. If you miss, you'll have to start over!



Bonus 2

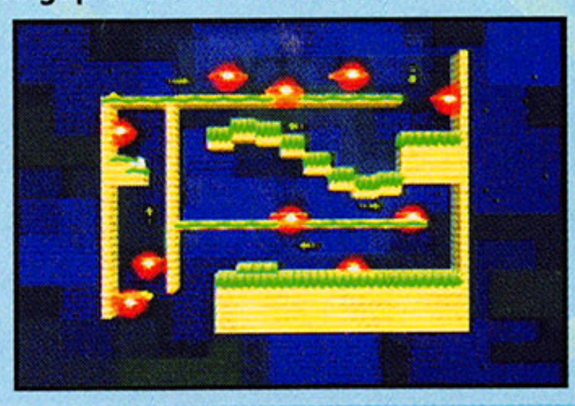
1. Jump on the first three light-up platforms, then get on the moving platform. Avoid the bumpers as you head up.
2. Fall down to the platform below between the gap. Slide down the slope, eventually triple-jumping over the jutting platforms to the next platform.
3. Jump back up to the top and step on the highest platform. Follow the structure down to the right side and drop down to the platform on the far right.
4. Triple jump down to the lowest platform. Next, ride the moving platform up to the next one and jump to it.
5. Wait for the next moving platform and ride it until you're right under the chute to the last platform (beware of the bumper along the way). Triple-jump up the chute for the last one.

Pikachu



Bonus 1

1. Break the three easy targets, then stand on the right edge. Fire a Pikachu lightning attack and the bolt will follow the ledge down to the low target.
2. Jump up to the platform above and break the target. Jump up to the next ledge and throw another bolt down the chute to hit the target below. Next, throw another bolt down the middle chute to hit the target at the bottom.
3. Jump to the left platform and hit the target. Finally, fall down the gap and hit the last two.



Bonus 2

1. Step on the first four easy platforms. Jump down the moving steps and step on the two platforms below.
2. Jump over the irregularly-shaped moving blocks and hit the next moving platform.
3. Jump off the left ledge and jump up onto the next platform as soon as you clear the dividing wall.
4. Jump above to the next platform, then do a double jump and Pikachu's Zapping Jump up to the top. Move the stick to the Right and to the Left while doing the Zapping Jump so you can zap twice.

Kirby

The folks at HAL—developers of *Super Smash Bros.* and creators of Kirby—made sure their own character doesn't get kicked around by the other big-shots by giving him the ability to duplicate any opponent's power moves. He can also jump up to six times, making it difficult to keep him off the platform. His glaring weakness, however, is his feather-light weight, which makes him easy to blow away after just a few hits.

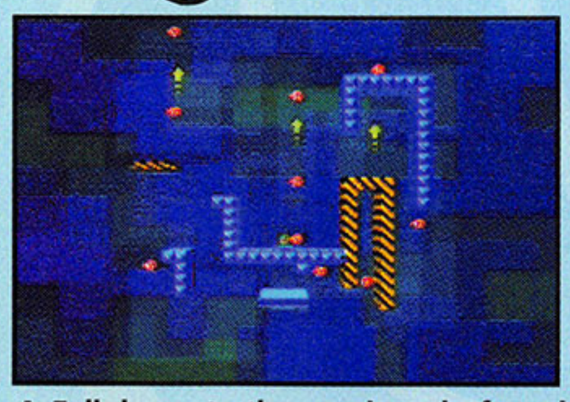
Super Smash Brothers

Luigi



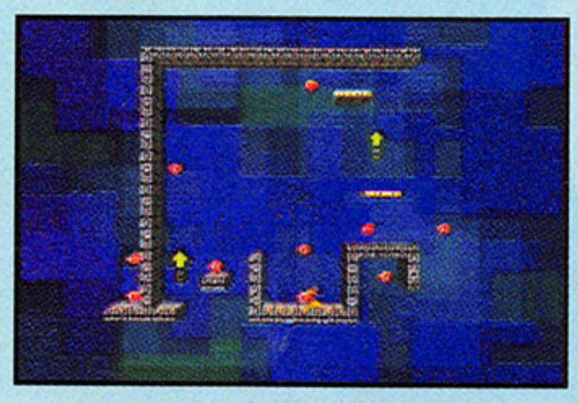
Bonus 1

1. Hit the two targets and triple-jump up to the one above. Jump up onto the yellow and black platform and use it to get to the blue platform above to hit the target.
2. Watch the moving yellow and black platform below. As soon as it goes down and disappears from view, jump off the right side, hit the target below and immediately triple-jump onto the yellow and black platform before it gets too high.
3. Head over to the right side of the course and get on the small yellow and black platform to hit the tow targets above it.
4. Fall down to the moving platform below (ignore the target to the left for now). While standing on the moving platform, shoot a Fireball to hit the target under the yellow and black platform. If you jump up and shoot another Fireball, you should be able to hit the closer target if you time it right.
5. Now go back to the target you ignored earlier, fall and break it.

Bonus 2

1. Step on the four easy targets as they rise out of the green pipes. Slide down the moving slope and fall down to the next platform.
2. Jump under the dividing wall and triple-jump up to the blue platform. Step on the platform to the right and the one above it.
3. Jump up to the platform swinging on the pendulum and use the red platforms to get to the top one.
4. Fall down to the blue platform on the bottom right. Fall under the blue platform and jump up to step on the last platform.

Captain Falcon

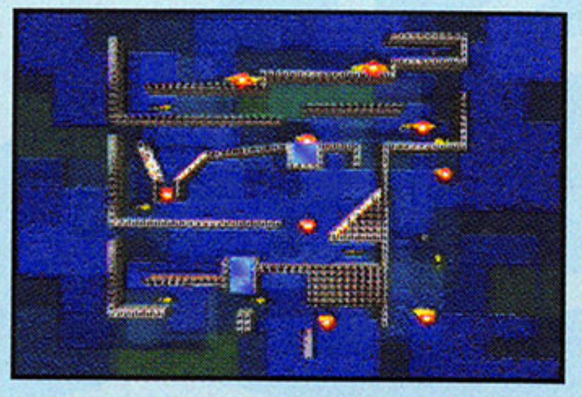


Bonus 1

1. Hit the two easy targets, then jump up to the right ledge and break the third one. Stand on the very edge and do a Falcon Punch to hit the target floating to the right.
2. Triple-jump up to the highest platform and break the target to the left. Jump over to the left side and break the target on the small platform. Triple-jump and hit the one above.
3. Break the two targets behind the left wall by using the Falcon Punch. Now head back to the very right edge, drop down under the last target, then jump up and break it.

Bonus 2

1. Run across the first two platforms. Step on the bobbing platform below. Fall down to the moving platform near the slope, then step on the next bobbing platform below.
2. Head back up to the platform moving up and down between the gap on the right side of the course and step on it. Now jump up to level ground, head to the right, jump over the gap and step on the next platform.
3. Jump up to the narrow right ledge and fall down to the platform directly under. Fall down again to the platform below. Fall under the dividing wall and double-jump onto the last platform.



Fox McCloud

Fox is a little weak when he's outside of the Arwing cockpit, but he is the quickest player in the game. He can also jump really high with the aid of his Rocket Attack. Use the laser gun to blast the Master Hand when it's far away!

3. Fall and jump underneath the tucked-away target to hit it. Hit the target under it and fall down.

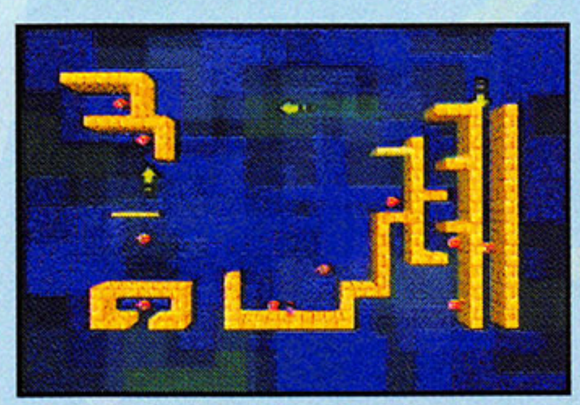
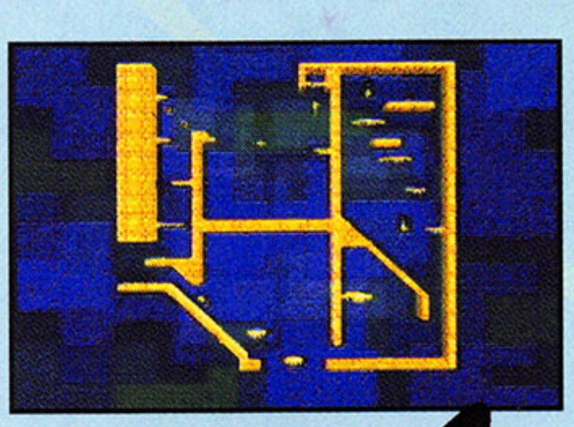
5. Wait for the next moving platform and ride it until you're right under the chute to the last platform (beware of the bumper along the way). Triple-jump up the chute for the last one.

Ness



Bonus 1

1. Break the two close targets, then hop over to the platform to the left. Release a PK Thunder and direct it up into the gap under you to break the target.
2. PK Thunder the two targets above. Send another PK Thunder to the target tucked away up in the corner. You won't see it, but you'll hear it break.
3. Go back to the right side of the course and hit the target up on the high platform. Jump down into the maze and work your way down until you're standing in front of the target. Release a PK Thunder and watch the target burn, fall and smash the target below.
4. Head back up, drop down the chute and hit the last target.



Bonus 2

1. Fall down and hit all four platforms along the way. At the bottom, stand under the next platform, double jump, release a PK Thunder, curve it around to Ness' butt and blast him up to the platform.
2. Step on the next two platforms and again use the PK Thunder to blast yourself up the slope.
3. Jump up through the moving gaps, avoid the bumpers and land on the top platform.
4. Drop down to the next level and PK Thunder yourself up to the next platform. From there, PK Thunder yourself up into the last platform. You may want to jump a little to the left so you have space to curve the thunder around under you, then jolt yourself back into the gap.

Pikachu

Pikachu is quick, pesky and displays a lot of power for a small yellow ball. His Zapping Jump can get you back to safety in a flash, but you can lose control if you get too reckless with it. The lethal Thunder Strike hits the closest surface to its source, so if you're standing under a platform, the thunder will hit whatever is above you instead of anything beside you.

Super Smash Brothers

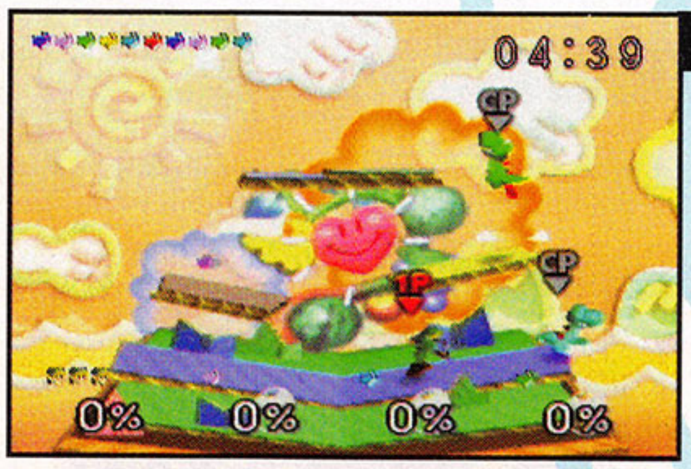
1 Player Game

Bonus 3

There is a third bonus stage toward the end of the 1st Player Game. The third challenge is the same for all characters; you just have to make it to the end of the last floor before the clock expires. You'll start from the top and three CPU enemies will come after you as you make your way down the obstacle. The key to this stage is to move the analog stick Forward twice to make the character run. This one's easy compared to all the others!

1. Link

Link is just a warm-up match. He doesn't even move for the first few seconds! A good old Smash Move should have him out of the picture, since he is rarely successful in getting back. Throw Link into the Tornado to finish him off for a Tornado Clear Bonus!

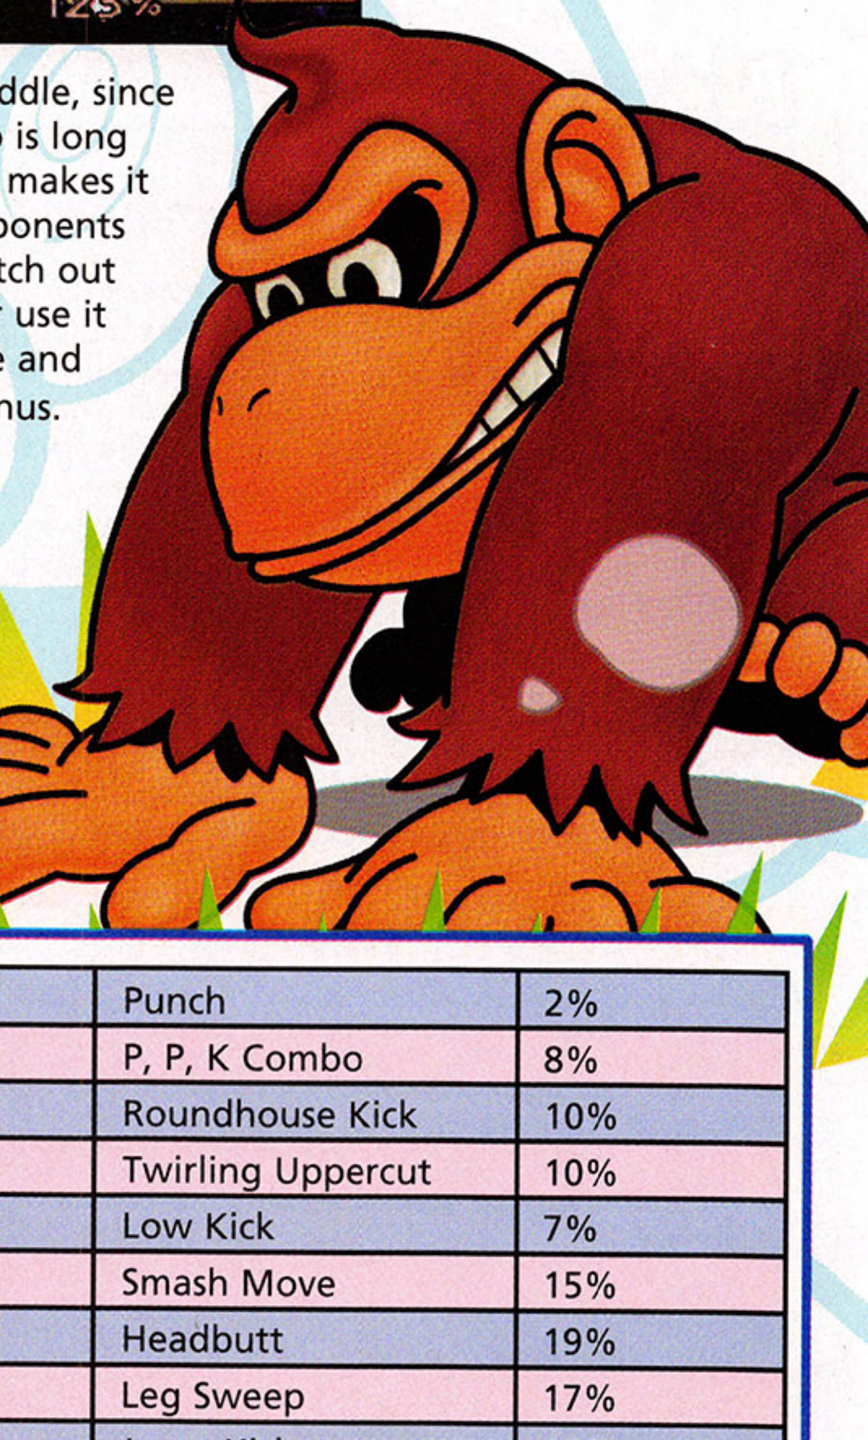


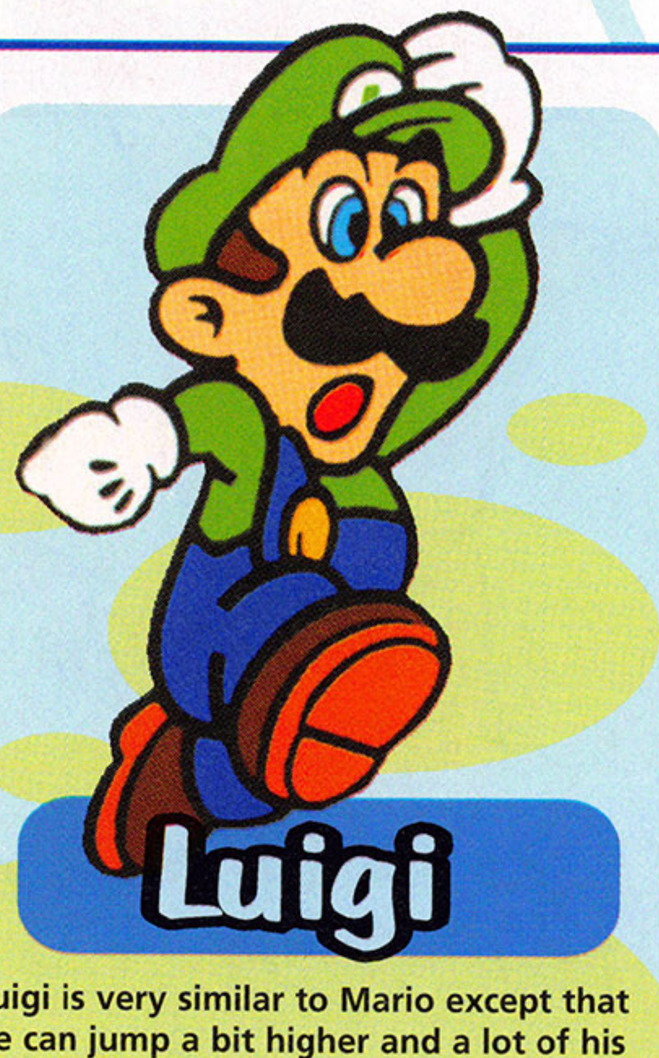
2. Yoshi Team

All it takes is just one or two hits to blast each Yoshi away. Dispense them quickly because they will get aggressive if you let them hang around. Grab a Hammer or a Homerun Bat to make your job easier.

3. Fox McCloud

Fox is a little more of a challenge, since he uses the shield and throws some counter-moves. Keep him away from the middle, since the Great Fox ship is long on both sides and makes it hard to throw opponents off the ledge. Watch out for the Arwing, or use it to your advantage and get an Arwing Bonus.





Luigi

Luigi is very similar to Mario except that he can jump a bit higher and a lot of his moves aren't as powerful. Surprisingly, his Dirt Kick Taunt actually does 1% of damage! Luigi's Headbutt move is also an excellent finisher.

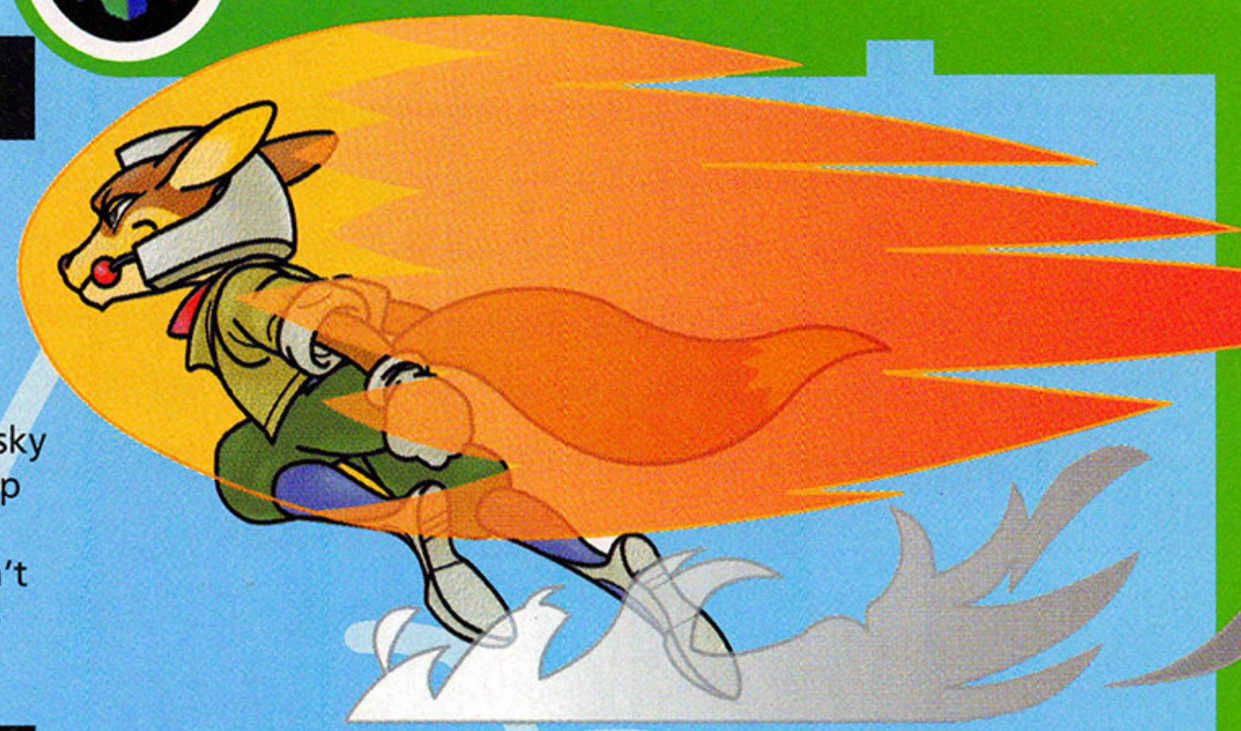
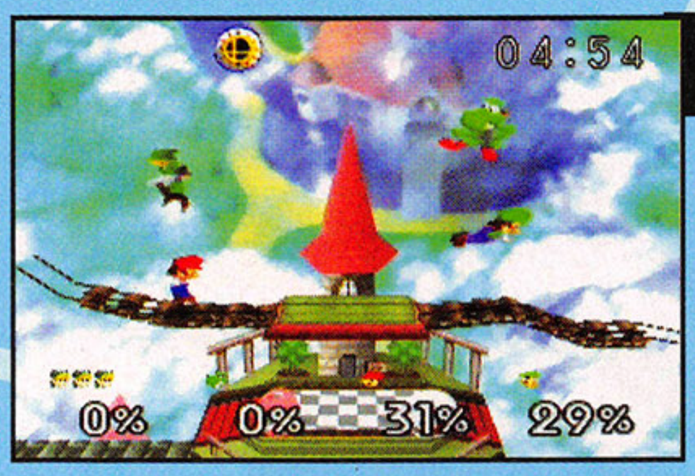
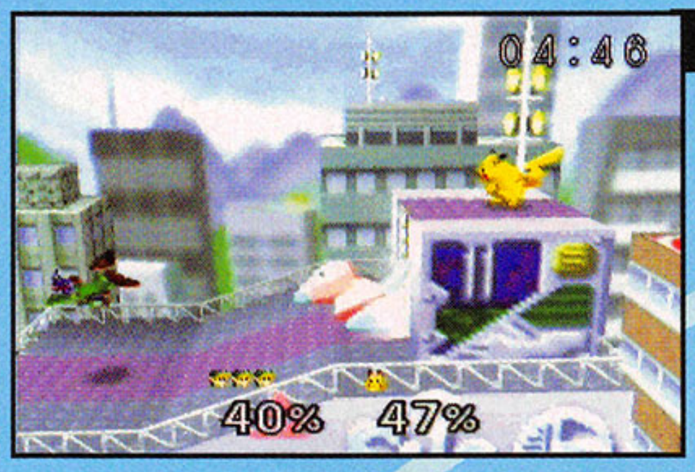
Super Smash Brothers





4. Mario Brothers

You'll get some help from a friend in this round and you'll need it! The Mario Brothers are pesky and will build up your damage meter with Fireballs. Keep an eye on your character; it can get very hectic and sometimes you won't know who's who! They're very good at returning to the platform, so try to blast them away sky-high.



5. Pikachu

Pikachu likes to throw that powerful lightning, but he is a little clumsy. Keep blasting him toward the smaller platforms; he sometimes gets so out-of-control with his Zapping Jump that he will miss them. Watch out for the various Pokémon that pop out of the corner wall!

7. Kirby Team

The Kirby Team has all the moves of all the other characters, so don't take them lightly like the Yoshi Team. Use the Smash Move as much as possible to make sure that you're knocking guys off the platform. The last two can be particularly tenacious, so don't let up!

6. Giant Donkey Kong

Giant Donkey Kong needs to take at least 250% damage before you can even think of shoving him off. You'll have two other friends to help you and plenty of items. You can also get a Kong Defender Bonus if you throw him into the moving barrel below.

8. Samus

The hot lava below will occasionally rise, restricting your fighting area. It's very difficult to blast Samus off the platform, since the lava pit stretches both ways; you'll have to try to blast her sky-high. Basically, it's an endurance match to see who will get blown away by the rising lava pool first.

Captain Falcon

Captain Falcon is another fish-out-of-water like Fox and will have to fight without his vehicle. He has plenty of power and speed, but his aerial moves leave much to be desired. His Falcon Punch move comes in handy during the bonus stages since he can punch targets through walls.

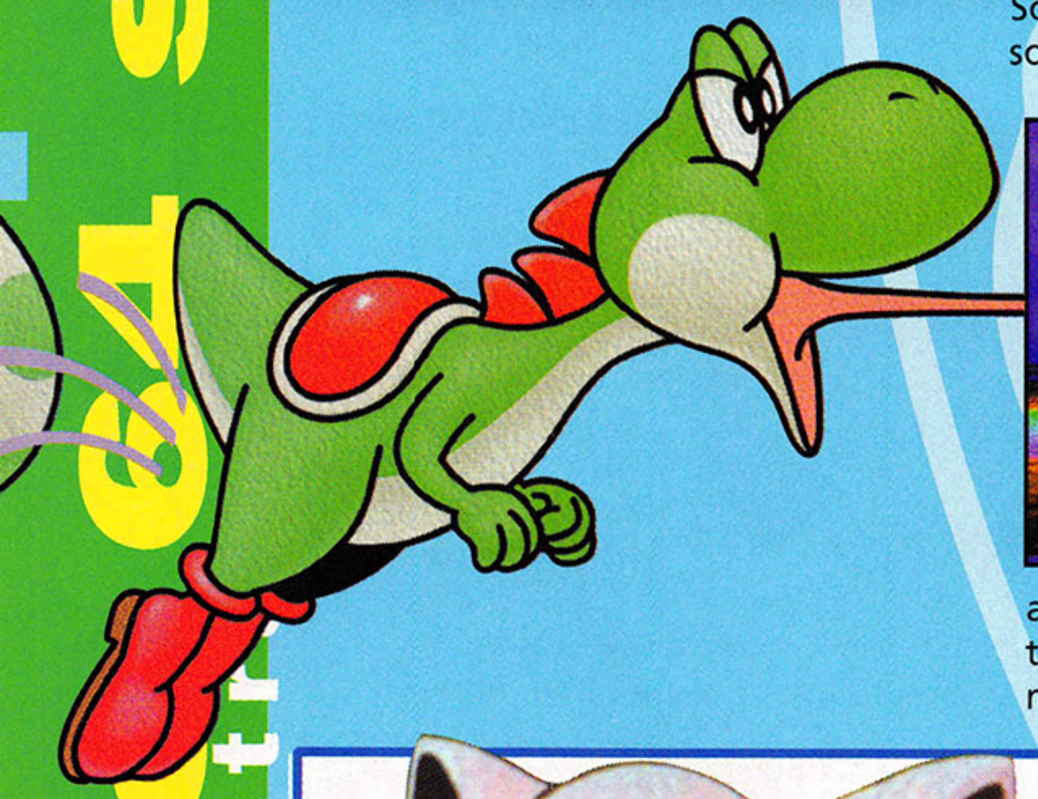
Super Smash Brothers

9. Metal Mario

Patience is the key here. Metal Mario won't attack a whole lot, but he is mighty heavy. You'll need to inflict at least 300% damage on him before he goes down. Once he gets knocked out of the playfield, though, he's lousy at getting back in. There are plenty of items in this round.

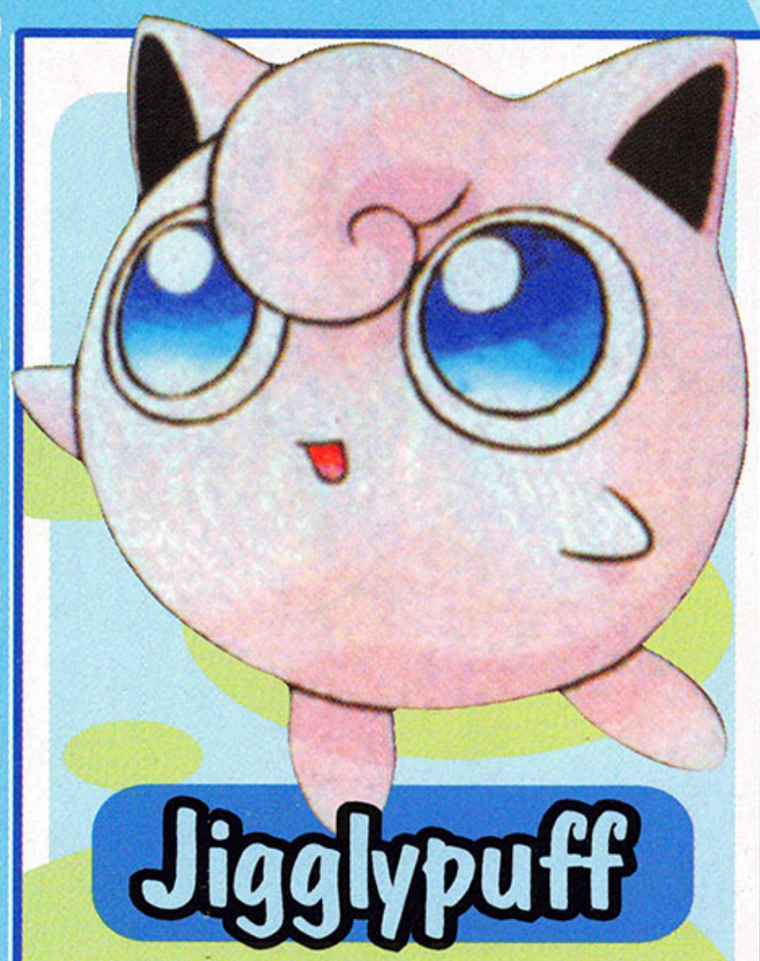
10. Dummy Team

Like the Yoshi and Kirby Team, it's another match with many weak characters. Don't discriminate, just keep smashing away. Some of these guys like to pick up items, so get to them before they do!



11. Master Hand

The Master Hand doesn't have a damage meter; instead, it has 300 hit points and you have to bring it down to zero. The secret to the final battle is that normal **A** button attacks do a lot more damage than the special **B** button attacks. If your character can shoot projectiles, then by all means shoot the Hand when it's far away. Learn the patterns of the different Hand attacks and you should be able defend yourself properly. Be careful about using the shield too much because the Hand can smash through it and get you dizzy. It will get more aggressive as its hit points drop lower than 100.



Jigglypuff

Jigglypuff is in the game for no other reason than she's cute. As a fighter she is the weakest of them all and is easy to blast away. The only things going for her are her ability to put others to sleep and her long-distance jumping skills. Certainly not a winner's choice.

Hidden Characters and Extras

Luigi

Beat the Bonus 1 challenge for all eight default characters. This can simply be done in Practice Mode. Challenge Luigi and beat him.

Ness

Beat the game without continuing with any character, on Normal difficulty and with only three lives in your stock. Challenge Ness after the credits roll and beat him. Another way to get the Ness challenge is to score above 600,000 points (which is very hard to do if you continue).

Jigglypuff

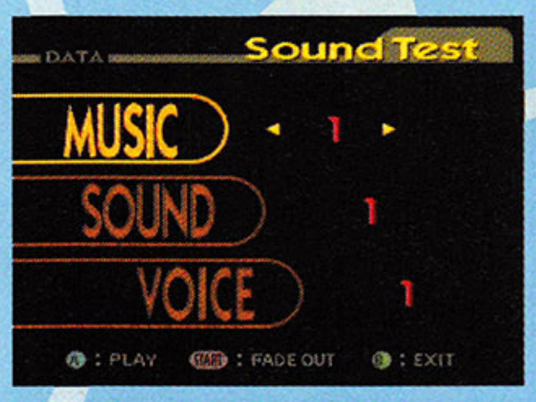
Beat 1 Player Mode with any character, on any difficulty and with any number of lives in your stock. Challenge Jigglypuff after the credits roll and beat her.

Captain Falcon

Beat 1 Player Mode in under 20 minutes with any character, on any difficulty and with any number of lives in your stock. Challenge Captain Falcon after the credits roll and beat him.

Classic *Super Mario Bros.* Stage

Beat the 1 Player Mode using all eight default characters on any difficulty and with any number of lives in your stock. Then battle on all eight stages in VS. Mode (you can just enter each stage and immediately quit out of it). The Classic Super Mario Stage will appear in VS. Mode.



Sound Test

Beat both Bonus 1 and Bonus 2 challenges using all twelve characters. This can also be done in Practice Mode. The Sound Test will become available in the Option Menu. You can listen to all the songs and sound samples in the game!

This character from the Super NES RPG *Earthbound* may be small and light, but his arsenal makes him one scary foe. He's a little sluggish in the air and may be prone to many attacks. Ness has a unique power jump where he can use the PK Thunder attack to light his own butt and blast back to safety! It takes a little practice, but once you master curving the projectile bolt back to Ness, it's impossible to knock him off!

Super Mario Bros. Deluxe

GAME BOY

SUPER MARIO BROS. Deluxe

by Tyrone Rodriguez

Even after almost twenty years, Nintendo's beloved plumber is still in action. With over two dozen games to his credit, the Italian stallion remains a huge video game icon. The release of this revamped *Mario Bros.* adventure comes just in time to celebrate the Game Boy's 10th anniversary. In addition to the original *Super Mario Bros.* game, this cartridge also includes a versus race mode. By linking two Game Boys together, you and a buddy can go head-to-head. The idea is to see which player can complete a given course more quickly. You can foil your opponent by using traps and switches lying throughout the courses. Since the standard game is nothing new, I've put together maps for all of the two-player levels. These will help you get to know a course before you blast through it.

Basic Tips

- Remember that coins are counted when a tie occurs. Try to get as many as possible without going out of your way.
- A happy block signifies that you can pass through a trap, but your opponent can't. If the block is angry, you'll need to switch it.
- The fireballs from the Fire Flower can be used to hit your opponent. They won't kill him, but you might be able to slow him down.

Icons/Items

Mushroom
This friendly fungus will change small Mario into Super Mario.

Fire Flower
If acquired by Super Mario, you will earn the ability to shoot fireballs by pressing the **B** button. If you're small, the fire flower has the same effect as the Mushroom.

Star
Temporary invincibility is granted when Mario grabs this five-point star.

Coin
It's Mario's currency; just good for points. In the event of a tie, the computer will count each player's coins to determine the winner.

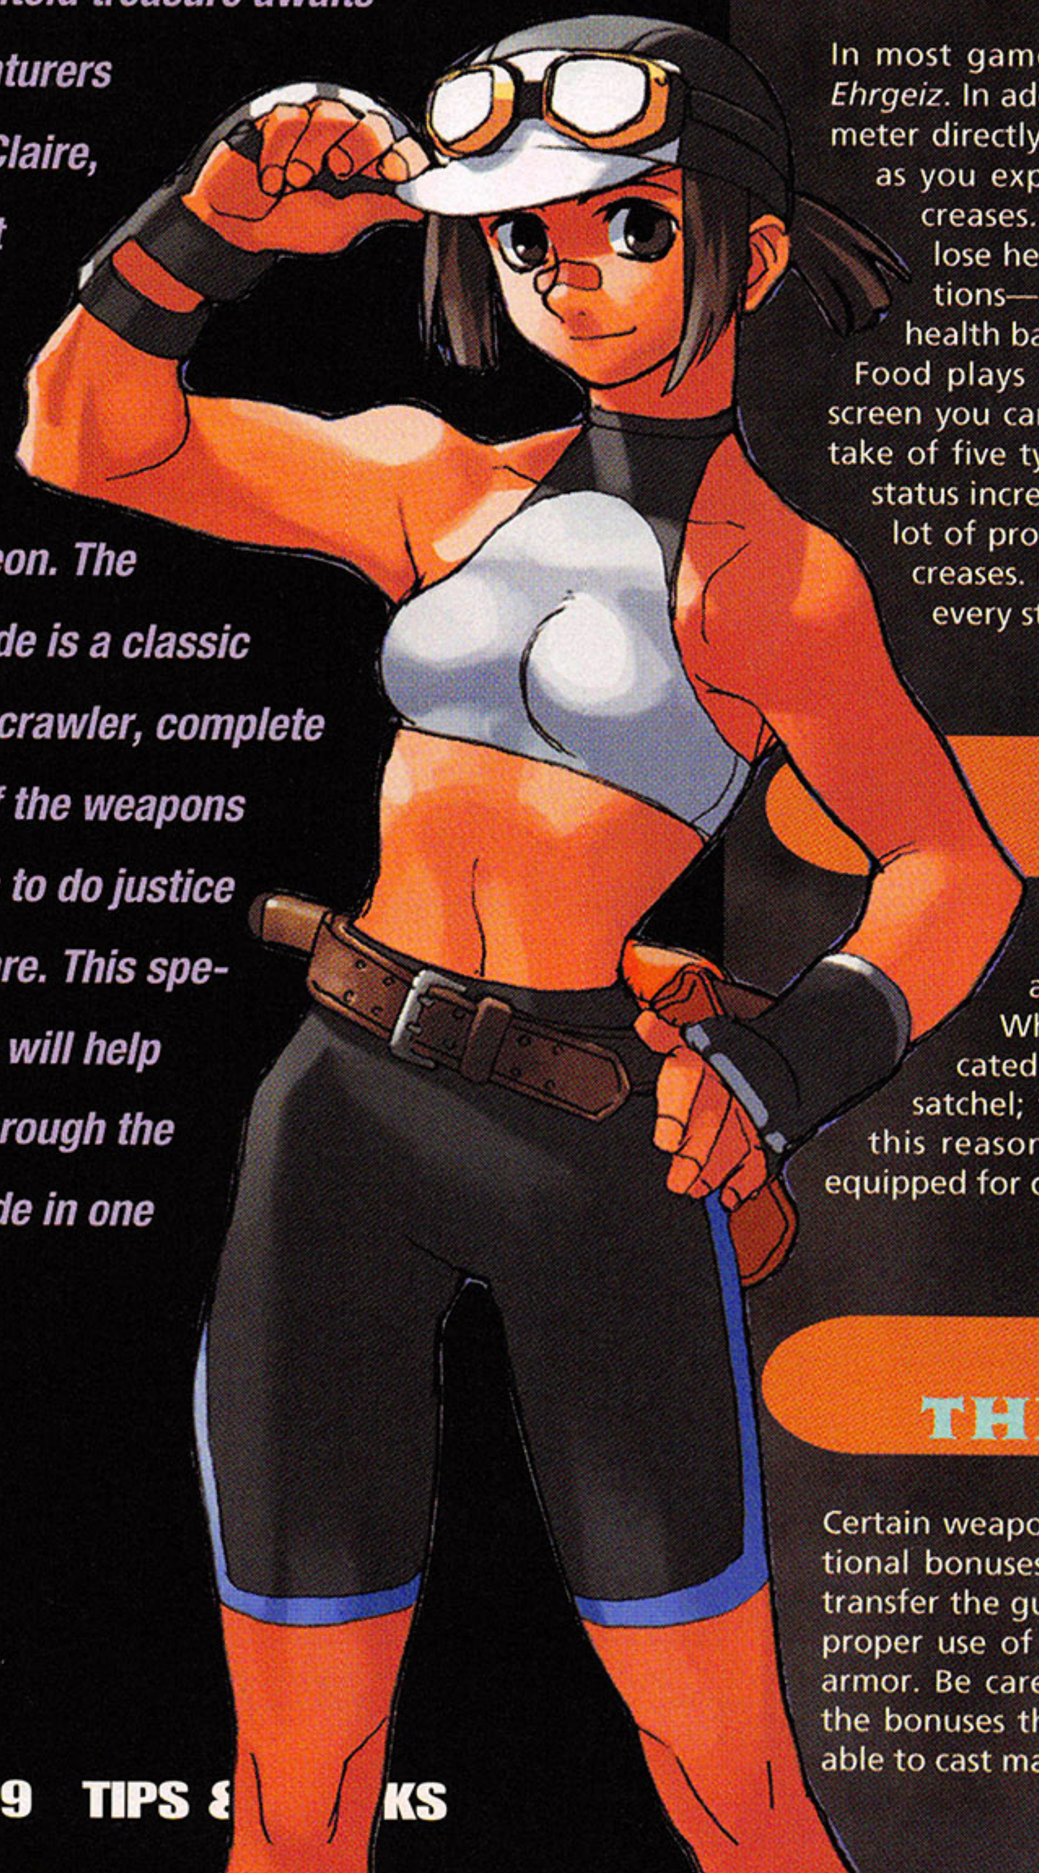
Ehrgeiz

Quest Mode Strategy

by Pat Reynolds

Anyone who has played Diablo will feel right at home with the Quest Mode portion of Squaresoft's Ehrgeiz. Like Diablo, the player is based in a small town from which a 21-level dungeon can be accessed and explored. Untold treasure awaits the adventurers Koji and Claire, who must work together to conquer the dungeon. The Quest Mode is a classic dungeon-crawler, complete with all of the weapons and items to do justice to the genre. This special guide will help you get through the Quest Mode in one piece.



WEAPON LORE

The only difference between Claire and Koji is the weapons they can use. Claire can use staffs and rods while Koji can wield the powerful two-handed weapons and Japanese swords. Both characters can use basic knives, swords, spears and knuckles. The equipped weapon determines the attacks and combos you can use. Knuckles, for example, enable you to strike quickly and pull off a devastatingly effective three-hit spinning kick attack, while a spear allows you to stab from a distance. As an added bonus, Squaresoft has included a variety of weapons and armor from *Final Fantasy VII*, which can be found at random throughout the dungeon. While I don't want to ruin the surprise of discovering these items, I can tell you that the earliest I found one (Cloud's Buster Sword) was level 10. The most powerful weapons, Masamune and Ultima, won't show up until the 19th or 20th floor. It's almost a whole quest in itself to find all of the *FFVII* weapons. Most of these weapons enable special combos by holding down the Attack button and releasing. They are all remarkably strong and very useful. If you find one, I recommend holding onto it and combining your guarded weapons with it to increase its strength.

THE NUTRITION SYSTEM

In most games, meat and other food refills your health. Not so in *Ehrgeiz*. In addition to the standard health meter, there is also a hunger meter directly below it. Your hunger gauge constantly, slowly depletes as you explore the dungeon. As it does, the health bar slowly increases. If you let the hunger gauge fully expire, you'll start to lose health rapidly. Food increases the energy meter. Healing potions—available in three flavors—are the only way to refill your health bar quickly.

Food plays a secondary role in the game as well. From the status screen you can access a nutritional balance chart, which tracks your intake of five types of food. Depending on your nutritional balance, the status increases you receive when you level up will be different. Eat a lot of protein (meats), for example, and you'll get higher attack increases. If you eat a well-balanced variety of foods, you'll increase every stat equally.

THE SATCHEL

Your inventory will hold 30 items, which can be accessed and used only when no monsters are in the same room. When in battle, you cannot change weapons or use items located in the inventory. Up to four items can be placed in your satchel; these can be used any time, including during battle. For this reason, it is important to have a supply of healing potions equipped for quick use at all times.

THE GUARDIAN SYSTEM

Certain weapons and armor are protected by guardians and have additional bonuses or penalties to their stats. The Blacksmith in town can transfer the guardian of one weapon or armor to another. Through the proper use of combining items, you can create a powerful weapon or armor. Be careful, though. Some of the guardians are evil; along with the bonuses they add to an item may come a curse, such as not being able to cast magic.

THE TOWN

The game starts in a hotel room in town. You'll automatically start as Koji. Downstairs the Hotel Manager will brief you on the game controls and give you a set of basic gear. Explore the town to get a feel for the different shops you'll be frequenting during the adventure.

THE HOTEL

This is where you start; you can also switch characters here. I also recommend using the hotel room as your base of operations. If one character falls in the dungeon, the other must rescue him/her. Unfortunately, when you die, everything you are carrying falls to the ground and cannot be used by the rescue character. I strongly recommend leaving a set of gear in the room, including armor, a weapon, at least one Materia orb and lots of healing potions. If you fall in the deep levels and your second character is unprepared...well, it's "Game Over," man. The Hotel Manager will also deposit any money you have with you into a credit account, usable by either character.

THE GROCERY STORE

Here is where you can buy foodstuffs to keep your energy high during your quest. Since food is extremely common in the dungeon, you probably won't be visiting this shop very often. You can sell excess food here for quick cash.

THE MERCHANT SHOP

Although the weapons and armor sold here are randomized every time you approach the counter, your character level determines their worth. The higher your level, the better the equipment you can get. You'll also want to bring any weapons and armor you find in the dungeon here to sell off for cash.

THE BLACKSMITH

You should stop here after each expedition into the dungeon to have your gear repaired. The Blacksmith will also combine any two weapons or armor items together for you, but he won't take cash for this service. Nope, you'll need to pay him with booze. Since beer, wine and other related beverages can only be found in the dungeon—and are somewhat uncommon—be sure to save them. Combining weapons and armor will result in a single item with all of the bonuses of the two chosen pieces. For example, if you combine a long sword with a + 1 Attack and + 2 Defense bonus with an axe (- 1 Attack, + 1 Defense), you'll get a long sword with no Attack adjustment and + 3 to Defense. Even better, you can repeat the process using your newly-combined weapon and another to create an even better product.

THE RESTAURANT

This dining establishment has lost its chef to the dungeon. If you bring the recipe books that you'll find during your adventure here, the waiter will read their contents for you, which usually include information on various aspects of the dungeon. You can also play a simplified stock market game in which you buy and sell red or white wine. It's kind of lame, but you can make a fast buck if you—say it with me, kids—"buy low, sell high." A sword-swinging dungeon crawler and a lesson in economics; what value!

THE MAGIC SHOP

You can play through the entire quest without visiting this shop; it only sells the green magic materia needed to use magic. Paying hard-earned money for this should be a last resort, because you'll find enough of it for free in the dungeon.

THE FORSAKEN DUNGEON

The dungeon is where most of the adventure takes place. It's randomized every time you start a new game, but there are always 21 levels and certain events always take place on the same floor, such as boss battles or locations of special items.

There are three entrances to the dungeon in town. At the highest point is the doorway to the first level, where smart adventurers will want to begin. If you head to the highest plateau in the town, then head down the stone stairs located there, you'll find the door to Level 7. Finally, on the lawn in front of the Weapons Shop is a well which leads all the way to Level 13.

DRAGON WINGS

The most important item in the game, the Dragon Wings let you teleport out of the dungeon to restock in town, then return to the same room you left. You can only hold one Dragon Wing at a time, so never leave it on the ground or you won't find another. Dragon Wings can also be used in a trap as a quick escape, as long as it is in your satchel.

Ehrgeiz

TRAPS

Hidden on the floor in many of the dungeon's chambers are round switches; they cause gates to slam down over the doors and monsters to warp into the room. Depending on the dungeon level, the stream of monsters can be light or intense, and won't let up until it reaches a set limit or until you kill off all of the current enemies very quickly. Being caught in a trap unprepared is the easiest way to die in the game. Be sure to always have healing items and a Dragon Wing equipped in your satchel in case of such an emergency.

ALTARS

You can offer any item to a guardian of your choice at the altars located in the dungeon. Only one guardian resides in an altar at a time, and each time you offer an item, the guardian changes. If you pick the right guardian, any weapons or armor you have which are protected by that guardian receive a bonus. The best way to maximize your chances of getting the right guardian is to use a Dragon Wing to return to town, dump all of your items and stock up on cheap 10g food at the Grocery Store. Return to the Altar and offer it to the same guardian until you get the bonus. This technique can be repeated as often as you like, up to a maximum guardian bonus of +6.

HIDDEN ROOMS

Throughout the dungeon are hidden rooms, which can be accessed by bombing a wall. Look for a hallway that runs left to right with two lit torches on the wall and drop a bomb between the torches. While there won't always be a hidden room, I found one about 80% of them time in these corridors. Hidden rooms generally will contain a powerful monster that will drop a good item, or they can be filled with food, weapons or other items.

DUNGEON TIPS

- Don't hang around the same level for too long unless you want to find monsters filling every room and hallway until you progress to the next level. On the other hand, spending time in the early levels to build up your characters isn't a bad idea.
- Some monsters are nearly immune to physical attacks but may be killed easily with magic. Be sure to have a spell ready at all times to fend off these creatures. I recommend Thunder or Ice, as these spells fire rapidly and travel in a straight line.
- Swap characters frequently. Not only does this maximize your energy and HP for free, but keeping both characters at about the same experience level is highly recommended and makes those rescue missions much easier.
- Head for the well first. There is a chance that you'll find a free high-level item in the corridor at the bottom. If there are enemies in there, hightail it out via the stairs, and don't even think of going through the door at the end of the hallway. If you get lucky and find a powerful sword or armor, it makes the early leg of your journey that much easier.

THE DUNGEON GUARDIANS

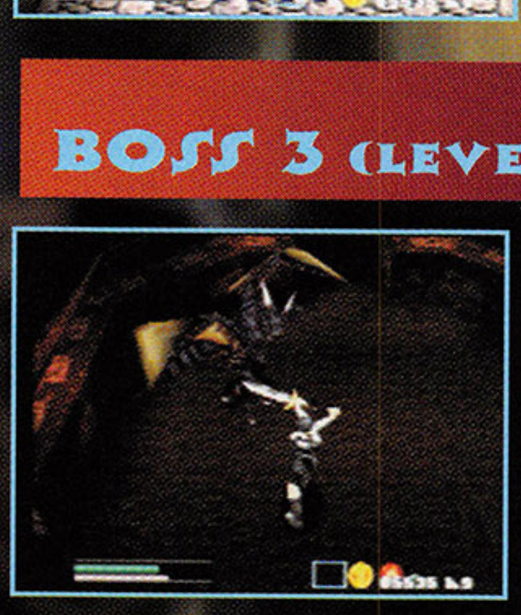
BOSS 1 (LEVEL 3)

There's no way to avoid trading hits with this guy, so just wade in there, block his initial punch and hit him back. He'll nail you immediately after you hit him, no matter how fast you block, so have some healing potions equipped for use and keep at him until he falls. You should be at least Level 5 before you tackle him. If he's doing too much damage, you can always leave the room and come back later.

BOSS 2 (LEVEL 6)

This snake-tailed creature will lunge at you with an extremely quick attack; then follow up with a nasty two-hit slash. Block these attacks and lay into him with a combo of your own.

BOSS 3 (LEVEL 9)

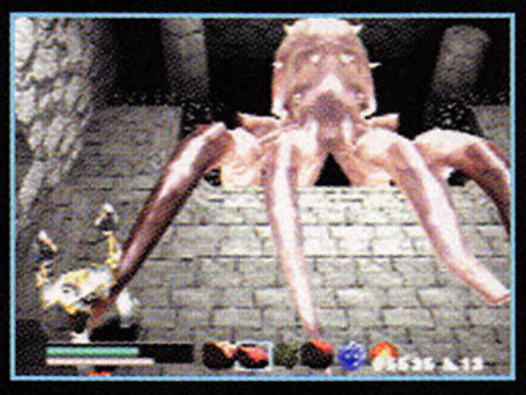


This dragon has a three-hit attack and a diving attack. Try to keep moving around the room and avoiding his lunge, then strike with a combo. Hitting him from the sides seems to work well.

BOSS 4 (LEVEL 12)

The T-Rex is one of the biggest monsters in the game and is very hard to avoid in the confines of the boss room. His tail attack is fast and covers a wide area, while is bite attack is easier to avoid or block because you can see it coming. He can also breath fire, but you shouldn't have any trouble moving out of the way of that attack.

BOSS 5 (LEVEL 13)



If you enter the well in town to access Level 13, you'll have to get past this huge octopus. It's always in the same place, in the room past the corridor at the bottom of the well. Unlike the other bosses in the game, you won't get any items or Materia for defeating it, just experience and the ability to progress into the dungeon. The octopus will lash at you with his tentacles. He's not very tough to beat if you are sufficiently powerful (if you've come all the way down to level 13 from the top of the dungeon, he'll fall easily enough). Basically, he's there to stop low-level characters from exploring Level 13 and maybe getting lucky by finding powerful weapons or armor.

BOSS 6 (LEVEL 18)

This minotaur wields a powerful axe and is faster than he looks. He can strike without warning, so keep your guard up and attack while he's recovering from a swing.

FINAL BATTLE (LEVEL 21)

Level 21 is always monster-free until you reach the boss room, which is always preceded by a long stone hallway with torches on either side. When you reach this point, there are some things you should do in order to ensure your success. First, be sure that your second character is at the same level as the character you plan to fight the boss with. Second, make sure you've left enough gear for that character to get to Level 21 from Level 13 without breaking a sweat and still have enough life left to take on another boss. If you've done all that, it's safe to proceed into the next chamber of the dungeon.

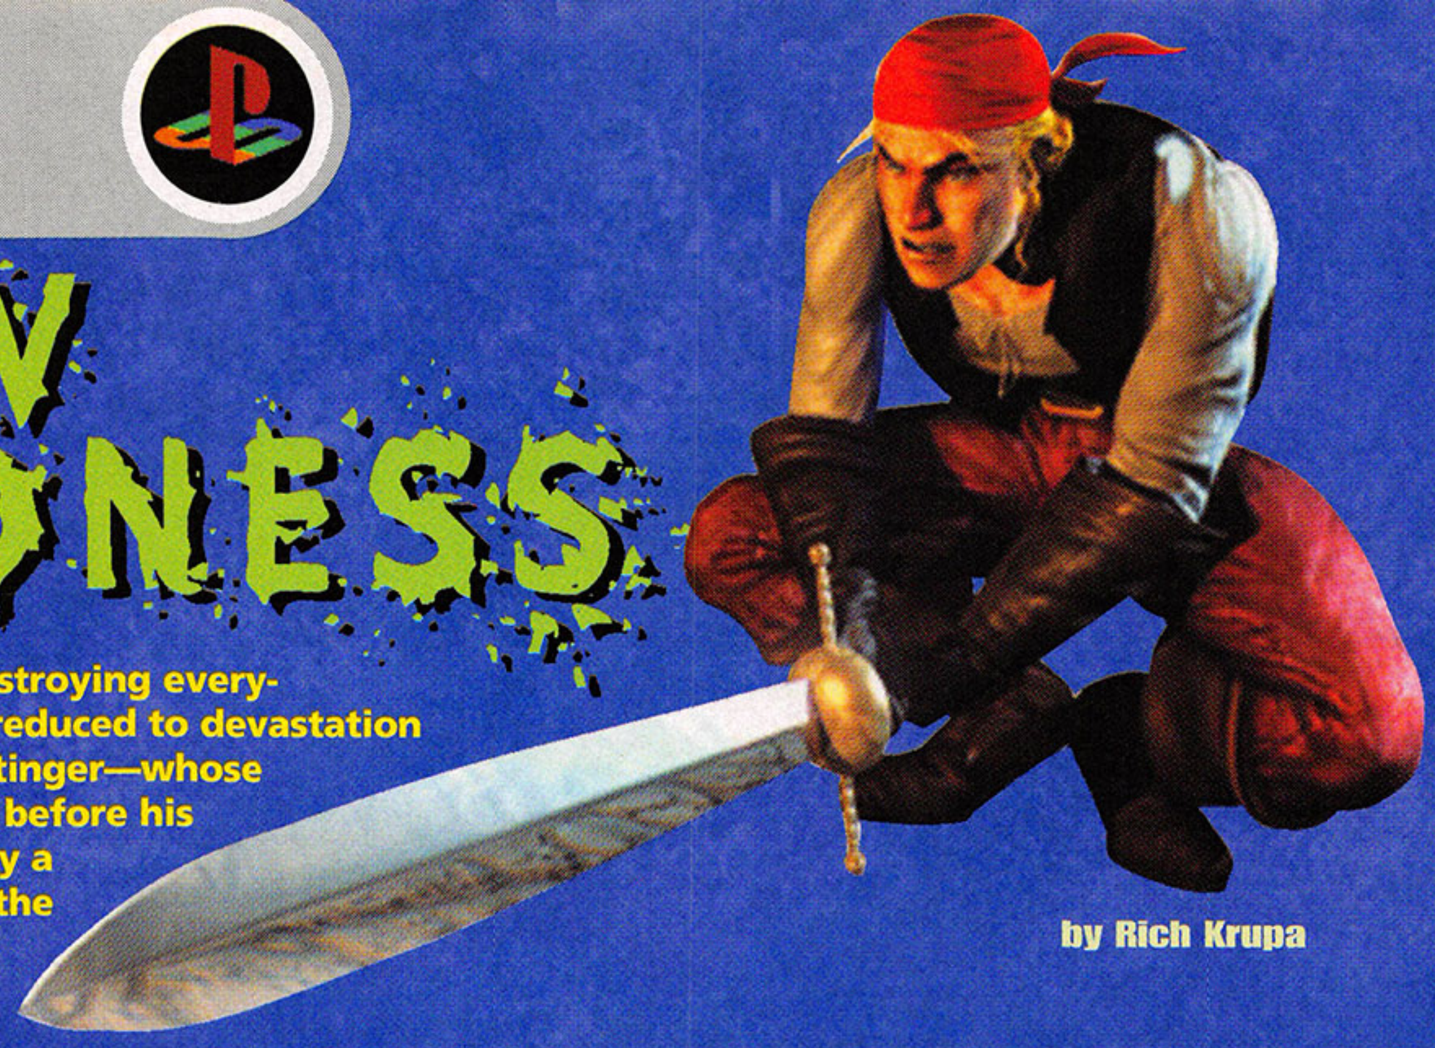
The first boss you'll fight is a gray dragon, which can attack quickly but is fairly easy to avoid. It has a flame breath attack that moves very slowly and is easy to dodge. Wait for the dragon to lunge, then avoid it and attack. After this boss is defeated, be sure to refill your satchel with potions and proceed to the penultimate chamber of the dungeon.

You'll face a lava dragon, which is tougher to avoid than the previous dragon because of its wicked leaping attack and multiple fireball attack. Thankfully, this boss is a little bit easier to defeat than the last one. With some fancy footwork, good blocking technique and maybe a bit of magic thrown in, you'll beat him in no time...only to be killed by a powerful explosion that rips through the room.

Now you must guide your remaining character back down through the dungeon to level 21 to square off against the true final boss, Phoenix. Phoenix is a bit of a disappointment, though. He only has one attack, a sort of hopping kick which can be easily blocked and countered until he's defeated.

The prize for beating Phoenix is none other than Phoenix Down, and if you don't know what that does, you should be ashamed to call yourself a gamer. Return to the room where your first character is still dead on the ground and you'll be given a choice which will determine the ending of the game. Choose wisely...

SHADOW MADNESS



by Rich Krupa

A huge shadow is covering the land, destroying everything in its path. Town after town is reduced to devastation and madness. A young hero named Stinger—whose hometown has been completely destroyed before his eyes—sets out to put an end to it. Joined by a forest girl and a robot made out of wood, the three young warriors set out to save the world from Shadow Madness.
This guide will help you when you are lost, or when you need a suggestion regarding what your next move should be. The dungeons and forests are all pretty easy; each one has a path that will take you where you want to go. The other paths will lead you to treasure chests and other helpful items.

1 Port Lochane

This is where it all begins. Talk to the inhabitants to learn what is going on. Near the ruins in the western part of town, you will meet Windleaf, who joins you on your quest to save the world. Once your are done exploring, head to Fort Khelest in the village of Barleygrove.

2 Mountain Pass

You will have to pass through this area on your way to Barleygrove. Follow the path to the right under the falls to discover your third party member standing motionless within the hut. Further up the path is Stinger's cousin's house; you will have to complete an easy lockpicking game to enter. Once inside, you can rest and save your game.

• NOTE: On your way out of the pass you will come across Red Tom's cave. You do not have to enter here it is entirely optional. If you do choose to take on Black Tom, make sure you have reached at least Level 5. Attack with Stinger and Harv-5 while Windleaf heals; this will be your basic strategy throughout the game.

3 Enclaan

This is what is left of Windleaf's home. This is an optional area where you can talk to the townsfolk for some information. There's not much here except for a few people infected by the madness.

4 Forest Grove

This is another optional area, but it helps to complete the story.

5 Barleygrove

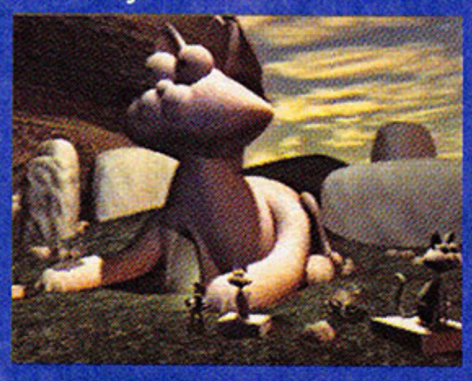
A guy in Barleygrove is asking for Kii nuts (found in Port Lochane). Give them to him if you have any. If you do, he will help you later, but if you do not it has no effect on the outcome of the game. Before you can advance you need to talk to everyone in town.

6 Rockra

If you previously leveled your characters up to fight Red Tom earlier, Rockra should be a breeze. Use the basic attack with Stinger and Harv-5 up front, while Windleaf stays back and picks off the mini-rockmen. Once Rockra is defeated, you're off to Karillon.

7 Cat Man

Here is another optional area where you can stop and receive a history lesson. Offer to clean his litter box and he will let you read his book.

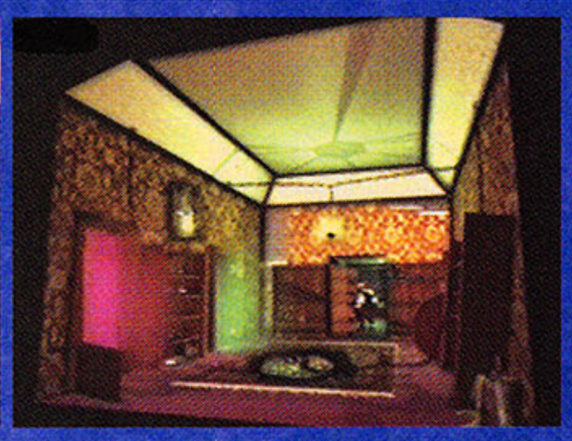


8 Karillon

Welcome to Karillon, the biggest city in the whole game. Become familiar with Karillon; you will be spending a lot of time here. Karillon is divided into three areas: Lower, Middle and Upper.
While in Lower Karillon you can shop, rest and even buy your own shop. You never make any money by owning the shop but it is fun to walk in and see your name on the door.
• NOTE: Hiding behind the graveyard is the Duelist's Place. Here you will have the chance to build up your levels and make some money. There are four thugs who will challenge you to a fight for 100 coins. Take them on as often as you like.
In Middle Karillon you will need to find Captain Willis to set up a meeting with the High Council in Upper Karillon. After meeting with the High Council, they will send you on two tasks. First, you will need to visit the Temple of Wisdom in Middle Karillon to seek advice from the Sages. Second, you must visit Abran's Smithy in Lower Karillon where Windleaf will learn the Shatter spell. Once these tasks are completed, go back to the High Council; they will direct you to the Gogarin Keep.

9 Gogarin Keep

Entering the Keep, you will be confronted by a Knight. Once he is disposed of, work your way to the upper level where you will find some Gogarin armor and a Level 4 skeleton key behind the bookcases. Now work your way to the door with another lockpicking game. This is a long one, so you might want to write down the movements to help you get past it. Behind this lucky door you will find Grimsmeer, who has to be defeated to continue. With Stinger and Harv-5 in front, Grimsmeer has no chance. When he is defeated, you will discover the exit key.



10 Magic Academy

Reaching the Magic Academy, you are greeted by a spirit that explains your next two quests.

11 Anglerville

The object of this town is to clear out all the bad guys. Once you have completed the mission, visit the Pub to collect your bounty.
- NOTE: Be sure to return Emmon's Helm to Emmon at the Inn where he will reward you.
- NOTE: Also, in one of the homes you will find a stray cat; take it to the Cat Man for another reward.

12 Jynx

Entering Jynx, the party must go to the second floor of the Town Hall to speak to the Curator. A Wraith will appear, begging for your help to take his skull to the cemetery in Lower Karillon. When this is done, Jynx will be released from the spell and you can advance to the Magic Academy.

13 Magic Academy

When you are done with Anglerville and Jynx, you will be able to enter the Academy. Once inside, talk to all the Mages as you work your way down the spiral staircase. When you reach the Ether well, the Mages will sent you on a quest to Siltheria to find the Natragor Codex. Stinger and Harv-5 will journey alone this time; Windleaf stays behind to learn the ways of the Magi.

14 Old Gubrath

Old Gubrath is an optional area. Again, stopping here will not change the outcome of the story in any way.

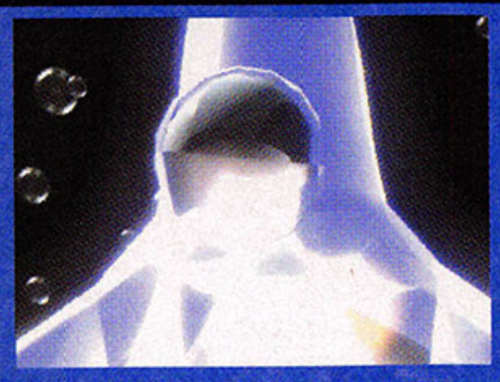
15 Gubrath Woods

On your way through the woods, you will be taken prisoner by cultists. This is where you will find your fourth member, Xero. Once Xero joins your group, you will take on the Shaman and his cultists.

16 Gamathel's Tower

The path to Gamathel is near the entrance to the Cultists village. Inside the Tower you will need to find the Codex, which is behind the bed in the master bedroom.

17 Magic Academy



With the Codex in hand, it is time for your third visit to the Academy. Upon your return, you will be reunited with Windleaf. With four members you are forced to split into two groups to take on different quests. Harv-5 and Xero will go to Bene Brokul, while Stinger and Windleaf travel down under to Wyldern. Before you leave, be sure to divide your items equally between groups.

18 Bene Brokul (Harv-5 and Xero)

Walking to Bene Brokul, you'll be blindsided buy a group of Highwaymen. Using normal attacks, these guys are no challenge. In Bene Brokul, you will have to clean up the town by disposing of all the undead creatures. The last of the undead will appear in the graveyard when all the others have been defeated. After the town is cleared, you will meet with the Windtravelers through a cave on the south side of town.

19 Uhndrashi Plateaus

When you land here, work your way East to the Siltheria Desert.

20 Nomad Camp

In the desert, you will need to find the Nomad camp in one of four random oases. When the camp is found, go to the Old Man's tent, where you will be given the two crystals you need to enter the Ziggurat.

21 Ziggurat (Moon Side)

Here you will need to find and talk to the Moon Goddess. After you receive the Moon Key, go back to the Nomad camp and rest.

22 Ziggurat (Sun Side)

During the day, you must locate the Sun key from the Sun Father. Now that you posses both keys, you can enter Ziggurat.

23 Ziggurat

In the Hall of Spheres, make your way north where you will find Clemett stuck in a giant web. Use Clemett as your pointman to activate the switches and open the path to the Orb of Heavens. Find the Grand Khytynni who will grant you access to the Orb vault. In the Hall of Choices, the party must flip three switches in the proper order (left, right, middle). This will open the door to the vault where you will face the Orb Guardian. As you leave the vault, the Grand Khytynni will confront you. After defeating him, you are up against the clock before the Ziggurat is destroyed. Flee any battles on your way out because the timer continues to count down.

Shadow Madness

24 Artelier

Back in the Uhndrashi Plateaus, you will discover that the windtraveler has ditched you. Locate the giant green door that was locked before. Once inside, climb the wall to the upper level where you can talk to the Sages for an update on the local news. When you are ready, exit through the other side to find yourself in Siltheria.

25 Dobietown

Entering Dobietown, you discover that Velvet Tongue and his gang have taken control. It is your job to rid the town of all the bandits and Velvet Tongue himself. Once you succeed, the town will offer you 2,000 gold pieces as a reward. Give the money back in exchange for armor, which is more valuable than the gold.

26 New Gubrath

Your first stop in New Gubrath is the town lock-up. There you will need to release Clemett's friends from jail. After they have been released, visit them at their homes to receive the items you need to enter Clemett's house. Once inside, use the teleporters to reach the room with the Bog Gate control.

27 The Bog

In the Bog Maze, you have to find three valves that will open the gates to Siltheria. Once out of the maze, head back through the Gubrath Woods and the Chunnel to get to the Magic Academy. This will be the end of the line for this quest.

28 Karillon (Stinger and Windleaf)

Leave the Academy and head to Karillon to deliver a letter to the High Council. After reading the letter, the council will attempt to ring the bells and summon Eyre. You must enter the bell tower and defeat the Deathknoller, which has damaged the bells. After the Deathknoller is defeated, find Liam in Lower Karillon to have him repair the bells. Also stop in at the Hall of Wisdom to pick up the Clockswork Codex. While you are waiting for Eyre to arrive, go to the City Park and beat up on some mimes to gain easy EP points.

29 Eyre

Once Eyre has docked, Stinger and Windleaf need to find the minisub launch site on the Recreation Level. When ready to leave, you will enter the first minigame that Shadow Madness has to offer. Here you will pilot a small sub through corridors, working your way to the exit sign.

30 Diaglo's Dock

Arriving at the dock, you will meet Diaglo, who just yells at you to move your sub.

31 Pay's Hom

Here you will meet the final character in the game. Jirina joins your group to help defeat four guards blocking the entrance to town. Make your way through the town and find the entrance to the Hexite Mines.

32 Hexite Mines

The mines are a time-consuming maze of ladders and levels with only one path to the exit. Entering the mine, you will fight a guard, giving you the Bronze key. This key will lead you to the Bronze 2 level, where you will face the Captain and his troops to gain access to Silver 1. In Silver 1, you will find a ladder that leads to Silver 2 and the Silver key. With this key, access the Gold levels where you will once again face the Captain and his troops. Finally, you will pass through a Gold door into the Ore Processing chamber where you will face the Minelord. Using the same tactics as before, this battle should not be too difficult. After the Minelord is defeated, the mines will crumble and you will be returned to Pay's Hom.

33 The Garrison

Find General Pogras' bedroom and try to attack him while he is asleep. Don't freak when you are captured; you will meet some friends in prison that will help you escape. On your way out you will encounter the General blocking the exit. Once he is defeated, it'll be time to go for a ride in the Gadgeteers Mole Machine.

• **NOTE:** Be sure to search all the rooms here; especially the Torture Room, where you will find a hidden minigame on the computer. You can play this game as many times as you like. Just be sure to complete the whole game because it will unlock something later in the game.

34 Magic Academy

After both quests are accomplished, all six members regroup to be divided once again. Stinger, Windleaf and Harv-5 will make their way to the Deep Forest Sea while Xero, Clemett and Jirina will journey back to Wyldern via the Mole Machine. The crater for the Mole Machine is South of the Magic Academy.

35 Garrison

This time you will meet with the Commander who gives you the Runes of the Org-Ta. The Commander informs you that Michi village is under attack and that you should go help. Your next stop is Michi Village.

36 Michi Village

It won't take long to clear out the village of all the bandits. When you're done, report back to the Commander and hop into your new boat.

37 Banori Caves

Upon entering the caves, you are poisoned and taken to Danshau's lair. After a brief meeting, Clemett suggests building a catapult. While the catapult is being built, you can roam through the caves and talk to the inhabitants. Return to Danshau's lair to start the second minigame. This time you are in control of your own catapult. There's not much to it, so just take aim and let it fly. After the castle has crumbled, you will face General Venal. No worries here; with a couple of normal attacks, the General will fall just like his castle.

38 Banori Trading Post

This is one of many optional areas.

39 Banori Tanglewoods

Once off the boat, Jolena will lead you to the Serene Gardens. While in the gardens, you will discover that Keerg has the Essence of Chaos and that his camp is in the Toparri Woods.

40 Keerg's Camp

The party will be greeted by a fake Priest who leads the group into a trap. After defeating the Priest, you will need to find the Shrine of Keerg and recover the Essence of Chaos.
When you have the Essence of Chaos, head back to the Garrison and take a ride in the Mole Machine. Back on Arkose, head to the Magic Academy to begin the next quest.

41 Karillon (Stinger, Windleaf & Harv-50)

Visit the High council once again to summon the floating city of Eyre.

42 Chiore

Once docked, take a ride on the Skyway to the city of Chiore. At the top, enter the pirate bar all the way to the right. Here you will meet Jacques and Pann who will help you sail to Castle Metaboline.

43 Voltaire Island

While sailing to Castle Metaboline, your ship is sunk and you are stranded on an island. There the party is led to Runke village, where they need to talk to the elders. After talking to the inhabitants, the party is attacked by Manheim, who puts the party to sleep and throws them into a cell. There is nothing you can do to avoid this. While Windleaf and Harv-5 wait in the cell, Stinger is taken to Captain Varley, who gives him the choice to kill the Pirate King for their freedom.

44 Petit Island

Here Stinger will find the Pirate King, only to discover a great secret. They will team up to defeat the evil Captain Varley. When Varley is vanquished, Stinger must sail to Treeside on the Sea Hawk and rescue his friends.

45 Treeside

After Stinger is reunited with Windleaf and Harv-5, they must go to Varley's mansion and search for Manheim. Once the three guards are defeated, you will discover that Manheim has escaped again.

46 Verne Island

This is an optional area—but to see all the tricks in the game, you will want to spend some time here. Inside the Gadgeteer hideout, you will find another hidden minigame on the computer in the lower left corner of the room. Just like in the Garrison, you can play this as much as you like. Be sure to complete these games and collect the item that appears.

47 Castle Metaboline

Here you will make your way through a lava maze in search of the Fire Stalker's Lair. Once the Fire Stalker has been defeated, you will need to escape before the time runs out. Just like before, avoid all attacks to make it out in time. When you awaken outside, you will discover that one of your party members did not make it. Don't cry too much; you will see that character again. Stinger and Windleaf will be taken inside the new Castle and brought before the Queen. After a mandatory rest, you must go to the top of the Castle and talk to the Queen again. This time she will give you the Blood of the Mage King.

48 Chiore

After receiving the Blood of the Mage King, the party must return to the skyway where Eyre is docked.

49 Magic Academy

All the party members are united once again just in time to see the fate of the Magic Academy. Here you will learn about the two final quests before the Spell of Banishment can be cast.

50 Artilier (Xero & Clemett)

Your first stop is Bene Brokul, where you need to contact Davin the windtraveler. Talk to him and he will take you to the Uhndrashi Plateaus. Head for the green door to enter Artilier. Once inside, climb the wall and collect the Scroll of Silence from the Sages. Return to Davin, who is still waiting for you this time.

• **NOTE:** This final quest with Stinger and the group can be somewhat tedious. It involves tons of traveling back and forth between places you have already been to a number of times. I suppose this would be a good time to pick up anything that you missed the first time through.

51 Karillon (Stinger, Windleaf & Jirina)

When you arrive here, visit the Mages within the Hall of Wisdom to collect the Orb of the Heavens. When you have the Orb, you will have to travel to Anglerville to board Eyre again.

52 Chiore

Board the Sea Hawk and sail to Castle Metaboline.

53 Castle Metaboline

Simply visit the Queen to acquire the Tablet of Metaboline. Board the Sea Hawk and return to Eyre.

54 South Cartoff Island

This is the beginning of the home stretch. Stinger and company must work their way to the top of the island, only to be taunted by Manheim one more time as he escapes. After you defeat the Flying Stalker he leaves behind, you must return to Eyre and regroup.

55 Nagruk (Stinger, Windleaf & Jirina)

On your way to Cyl Og Sul, you will have to face General Nagruk. He is a pushover, so just pound on him with normal attacks.

56 Council Building (Xero & Clemett)

Before you may enter the Council Building, you will have to defeat the four guards in the entrance. Once inside, you must find the Lair of Vrita and defeat it. When Vrita is destroyed, proceed to Cyl Og Sul.

57 Cyl Og Sul

Both groups will have to make their way to the Church in the center of town. Once inside the Church, the final attack is planned out. Here you will see the return of your missing comrade.

58 Tyr Og Nor (Stinger, Windleaf & Harv-5)

Make your entrance into the building through the sewer system. Once inside, you will have to find your way to the top of the palace where Grimsmeer greets you for the final time. On the top floor, you will need to search through six huts to find the keys to the talking door. You will be attacked by three guards on the other side of the door; defeat them and there will be no one left between you and Hokum. Hokum is kind of tough, but if you use the same strategy as with any other fight, you will succeed.

59 Tyr Og Nor (Xero, Clemett & Jirina)

These three will have to find a key to open the door to Manheim's lair. Once Manheim is defeated, Xero reclaims his body. Past the door you will encounter the Gauntlet Maze. Run with careful timing between the rolling stones to find the switches that turn off all the electric barriers and obstacles. After you exit the maze you will fight Manheim's head for the final battle before the Darg.

Shadow Madness

60 The Last Round

When both Manheim and Hokum are defeated, it is time to face the Darg. Before casting the Spell of Banishment, you are given one final chance to prepare. Take the time to heal both groups and to save one last time.
In the last battle to save the world, you will face two forms of the Darg. Stinger, Harv-5 and Clemett will face the physical form; Windleaf, Xero and Jirina will face the spiritual form.

• NOTE: The physical Darg is not hard to beat at all. Just keep attacking him with normal attacks. You will face this form three times.

• NOTE: The spiritual Darg will fall easily to Windleaf's Apocalypse spell. You will face this form twice.
After the fall of the Darg, sit back and watch the ending. It's kind of short, but all the story lines come full circle.

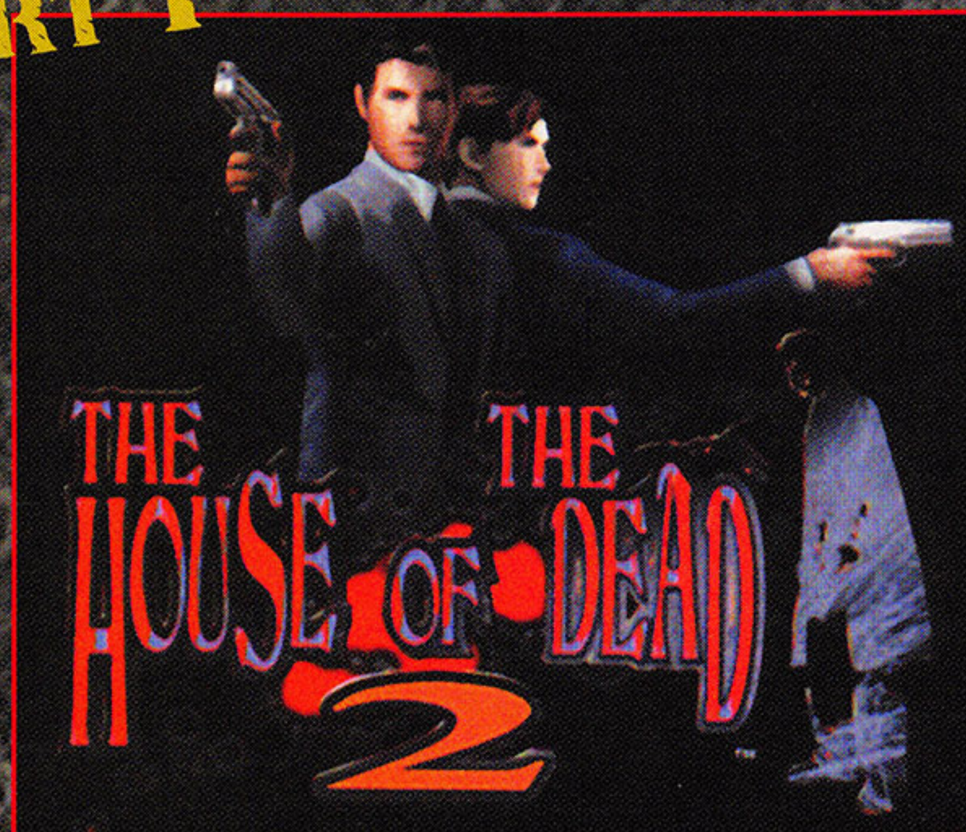
THE SECRETS

The biggest secret in the game is the hidden cinema scene. To unlock it, you first have to find and complete the first-person shooter game in the Garrison. You'll find it on the computer in the torture chamber. The second one is in the Gadgeteer hideout on Verne Island. After completing the minigames, an item will appear that you need to pick up. Check your inventory and you should see Pandora's Cauldron. You can only use this when you fight the spiritual form of the Darg. (Beware: Save before you use it!) Enjoy the show!

The House of the Dead 2

PART 1

by Tyrone Rodriguez



After more than a year of waiting, Sega has released the sequel to one of our all-time favorite arcade gun games. *The House of the Dead 2: Original Sin* continues the first game's story of human experimentation. Once again, you assume the role of an agent attempting to stop the chaos. No longer is Curien the mastermind behind the atrocities. A man named Goldman is responsible for everything going awry. Running on the hybrid Dreamcast board, Naomi, *Original Sin* is a visual masterpiece. If *The House of the Dead* didn't scare you, this one will. The detail on the enemies and environments is remarkable. A few things have been modified in the gameplay department. For starters, the light gun system has been changed from the standard set-up to that used in *The Lost World*. You may notice sensors on the edge of the monitor; these are used to create a more precise signal. The only problem I've found is that light from an outside source can alter the calibration of the gun. *Original Sin* sports more paths than its predecessor; this one is also more difficult. That's not a bad thing until you reach the final boss. I think he might be a distant relative of Baron Von TokenTakker from *CarnEvil*. In any case, this is still a fun game and that's what matters. I've detailed all the points of interest for the first two stages as well as strategy that can guarantee you won't get hit by bosses. Note that this strategy is for a one-player game; more enemies will appear when playing with a partner.

chapter one: a prelude

start

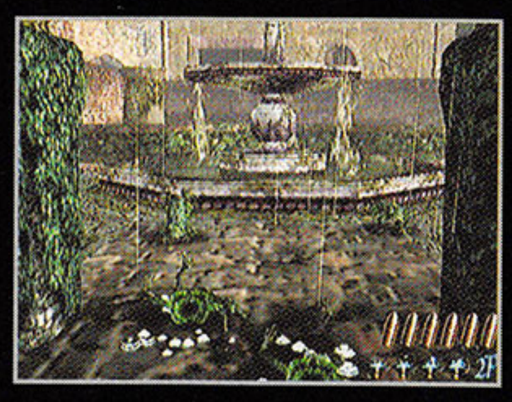
You'll begin Chapter One outside of the library. A shot to the head will kill the zombies wandering the avenue (they're David-type zombies). Inside the structure you'll immediately meet two zombies. The zombie sporting the blue button-up takes two shots to down; the other will go down with one head shot. Three more zombies will approach before you meet G. Your conversation will be cut short as two zombies bust through the door. An axe-wielding zombie takes out a hostage just outside the door; you cannot save this one. The next hostage is part of the only branch in Chapter One. A zombie follows a woman; kill the zombie following her (one of the vases behind the hostage and zombie has a medallion inside.) She pleads with you to save the man by the well behind you. This next one might be tough. Two zombies from the left and one from the right are assaulting him. Go for the head shots to save him. A crate behind the well holds a Health power-up if you need it.

- **Go to Bypass if hostages were saved.**
- **Go to Courtyard if hostages perished.**

the gun

One of the features of the new gun system is the ability to reload without firing off a shot; you simply aim the gun outside the screen to reload. If you can't get used to this method, you can still fire outside the screen to reload without wasting a bullet. If you use the old light gun trick to reload by covering the barrel with your finger, you'll find that the increased size of the barrel makes this technique more difficult. Instead of using one finger, try using the index and middle fingers of your free hand to reload; you won't even have to fire a shot. More on gun technique next month.

courtyard



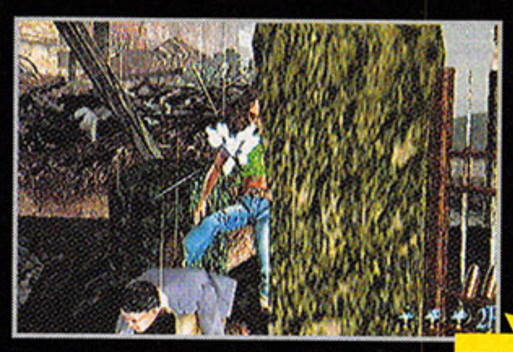
Two zombies will bust the wooden gate open. Once again, a head shot is the best way to finish them off. Turning to the right, you'll have to cap some "ee-vil" frogs. Just as you get to the door after the frogs, two more zombies will greet you. Take out the axe zombie first—two shots to the head is all it takes. The other will go down with one well-placed shot.

- **Go to Backstreet.**

bypass

Saving both hostages will grant you access to the bypass. One of the two barrels here holds a Diamond. But before you collect your prize, save the elderly hostage crawling away from a zombie. Two more zombies will attack when you turn left. The one on the right has an axe; shoot him first, then go for the easy kill.

- **Go to Backstreet.**



backstreet

Some leeches will break out of a floor vent; each one takes one shot. One of the barrels near the little buggers hides a diamond. A zombie with a chainsaw will attack you before you reach a small bridge. He's a tough one! (Note that you won't battle the chainsaw zombie if you come from the Bypass.) From a window above the bridge, another zombie will attack by throwing axes. Still on the bridge, two Evitan zombies will attack. When you've finally crossed the bridge, two more armored enemies will attack. These enemies return from the first game even more powerful than before. After defeating the twin menaces, a door will open. Don't shoot! A boy is attempting to escape two zombies. These zombies

the street

Your first objective is to save the hostage driving wildly. A zombie has latched onto his car. No more than two shots will re-kill this menace. If you save him, he'll regain control of the car and stop. A barrel behind him holds a medallion.

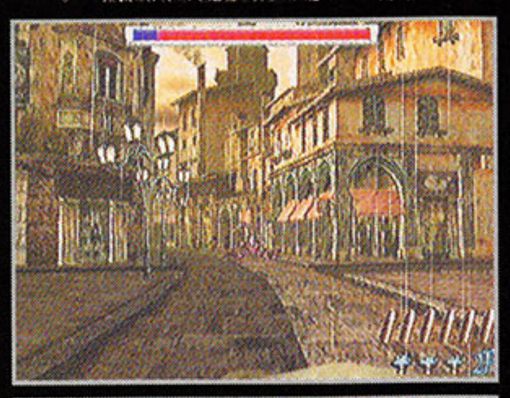
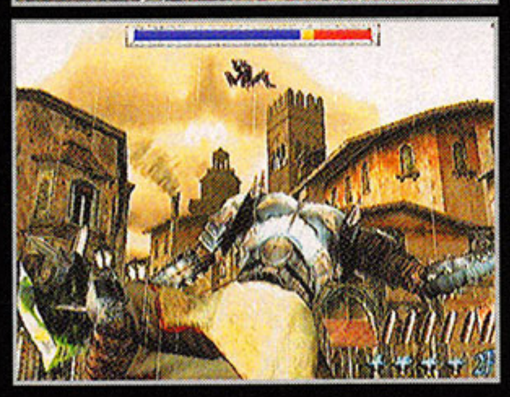
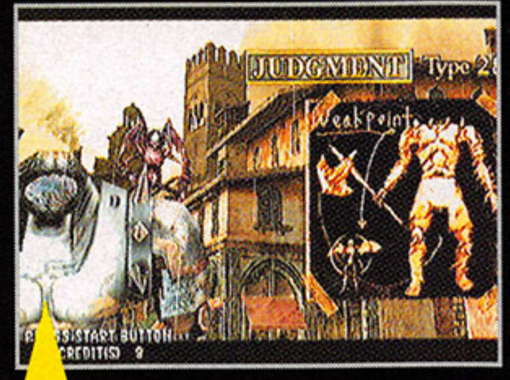
- Go to Watch Store if hostage perished.

boss: judgement type 28

I'd argue that this headless monstrosity is more of a challenge than some of the later boss characters. His entire upper body is impervious to your bullets. The area of his body that's covered with cloth can sustain damage, but not much. If you want to eliminate Judgement quickly, take aim at the flying creature. It flies in figure eight patterns. You'll have a clear shot every couple of seconds when the little guy decides to have Quarl (the big guy) attack. If you don't nail the flying creature at this time, you will take a hit. Seven shots will take down the giant. Now you'll have to contend with the smaller creature. He'll take various passes at you. His main formations are straight flight patterns towards the center of the screen and two formations in which he attacks you from the side. Three shots and he'll be crying for Sir Goldman.





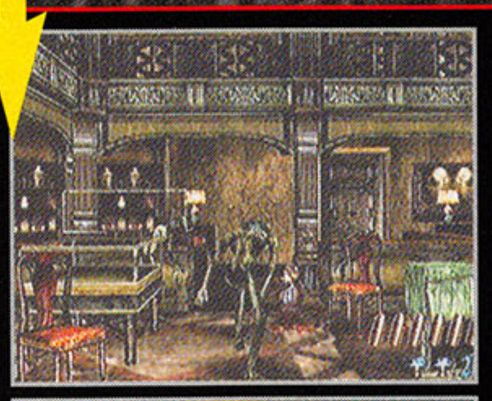


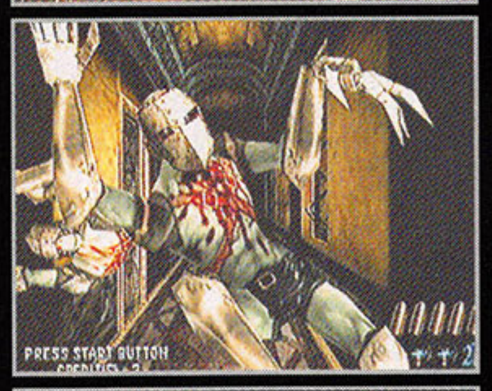
carry axes (one vase here holds another medallion). Four more zombies will attack; two from ground level, two dropping from the walkway above. This is your only chance to collect a golden frog in Chapter One. Two consecutive enemies will attack the last hostage. The first will try to toss a barrel down at her; the second will come from the door to her left.

- Go to Boss: Judgement Type 28

watch store

From the get-go, you'll have your hands full. Two zombies inside the Watch Store plan to have a hostage for lunch; stop them with a head shot each. Be sure to shoot the green crate and get the diamond. In the next hallway, two similar green zombies will attack. Moving down this same hallway, two enemies will break through a window. These are the more resilient armored-type zombies. Don't miss the barrels further down the corridor—a medallion hides within. After spotting the deadman, a chainsaw-wielding adversary will attempt to nail you. About three head shots will kill this monster. Turning back where you were headed you'll meet a David-type zombie accompanied by an undead axe warrior. A room in this hallway has a hostage for you to save and a Kageo zombie to re-kill.





- Go to Sub Street

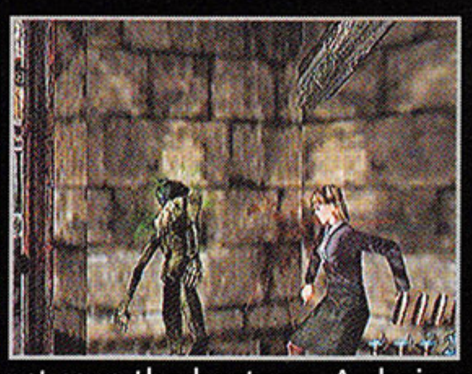
upper road

Two zombies will jump out of the back of a van. As you ascend a flight of stairs, three zombies will attack you from another stationary van. Venturing further down the deserted street, you'll be literally jumped by a knife-tossing zombie. You can eliminate this pest while it's still airborne; a couple of well-placed head shots and he's out like a light. Immediately after the lone attacker, two armored enemies attack. Head shots are good, but they bounce around too much. When the two armored zombies are gone, you'll have a split second to destroy two vases and capture the medallion inside one of them. The reason you won't have much time is because two owls descend upon you. One shot will take out each one. A cry for help will catch your attention. Two zombies attempt to break through a door to reach an off-screen hostage. Two crates just beyond these zombies hold a diamond for you to snag. The man who falls in front of you cannot be saved, but the zombie that killed him can be axed (pun intended). As you walk down the stairs, another killer owl will attack; take him out with prejudice. Before fighting two more knife-toting enemies, try to break the vases which hold a golden frog. When you beat the two aforementioned enemies you'll have to choose which way you want to go. If you shoot the key next to the dead man, you'll enter into one of the largest branches of the game. If you don't shoot the key you'll enter the Clock Tower.

- **Go to Path to Waterway A if you shoot the key.**
- **Go to Clock Tower if you don't shoot the key.**

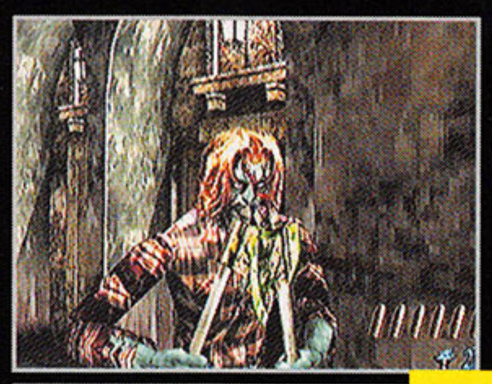
clock tower

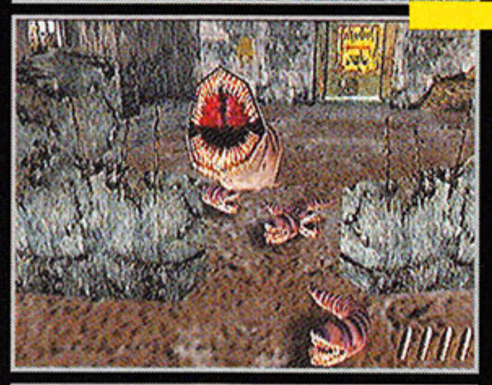


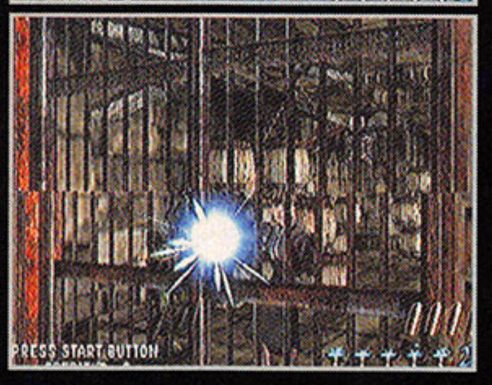
Before you have the chance to enter the tower, two more assailants will attack. Some clean shots while they're diving at you will guarantee they won't hit the ground breathing. A quintet (anyone remember that game?) of Kageo-type zombies will walk towards you as you enter. Looking down the well, you can earn extra points if you shoot two David-type zombies. The slimes that fall from the gear can be eliminated in a same fashion as leeches. It won't be easy killing an axe zombie while climbing the stairs, but you must save the hostage. A chainsaw maniac will run towards you after you've saved the hostage; three shots to the head is all you need. From behind a set of barrels a Kageo-type zombie is about to make a move on a hostage. In this path it won't matter if you save her or not; your next destination will be Waterway C.

- **Go to Waterway C.**

sub street







An enemy bearing two battle axes will open a door ahead of you. Just beyond him another ninja-like enemy will attack. Kill him before he hits the ground. Another duo of easy-to-kill zombies will follow. When you reach what looks to be a dead end, you will encounter a set of leeches. A bonus frog is hidden within one of the crates near the door. From inside the door, someone will cry for help. The body of an unconscious man flies out as the door swings open and a large, tubby zombie will rush you. Go for the head shots before you take a hit. You can't head up the stairs to the right until you kill the two flying owls. A lone ninja-like enemy will attack you while under the arc. You know how to deal with this baddie. The next two hostages will test your mettle. Two enemies will simultaneously attack two different hostages. Take the larger enemy out first, then get a head shot on the second zombie. Walking to the fountain, you will hear and see a hostage in serious need of help. She is trapped behind a large gate with zombies about to take her out.

- **Go to Bar 1st Floor if hostage was saved.**
- **Go to Waterway C if hostage perished.**

A series of Evitan sea monsters will attack relentlessly as you begin this route. A David-type zombie attacks you again after the Evitans. Facing to the right, a female hostage exits a building followed by an axe wielder. You're not out in the clear yet! If you saved her once, two Evitan zombies will try to kill her. These pesky green monsters don't give up; one even pulls you into the river. A duo of sea monsters attack while you're knee deep in water. Three piranhas fly at you after the sea monsters. A lone boat floats to the left of the bridge you walk under. You need to save a hostage who is about to be devoured by an Evitan. One more enemy attacks before you reach the ladder. One chainsaw maniac and a David-type zombie will attack you before you reach Hierophant.

- **Go to Boss: Heirophant**

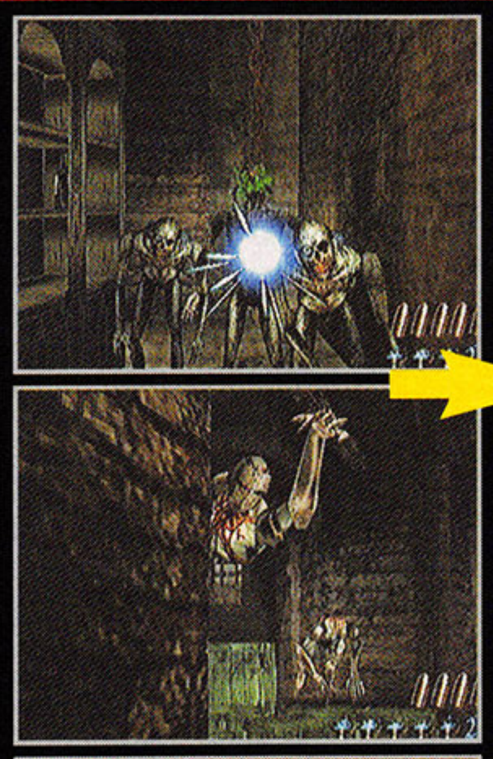
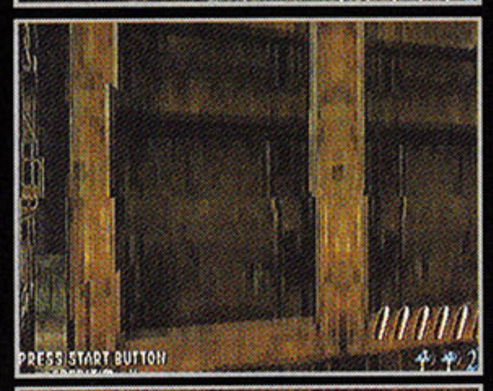
bar 1st floor



The huge stash of barrels surely holds some goods for you. A fat masked enemy will rush you from behind some barrels. Just past the door, three torso-less zombies will try to nip at your heels. Three more zombies (Kageo-type) attack as you enter the storeroom. From behind a corner, you'll be taken by surprise; a chainsaw maniac wants to mince you to pieces. Near a pillar and crates, two armored enemies attack; go for the quick head shot. The door after these two leads to Waterway A if you found the Silver Bar Key. Opening another door, four torso-less monsters confront you. Before you can exit this sewer area, some Piranha fly at your face. Shoot the little buggers. One lone Kageo will strike you from behind a door.



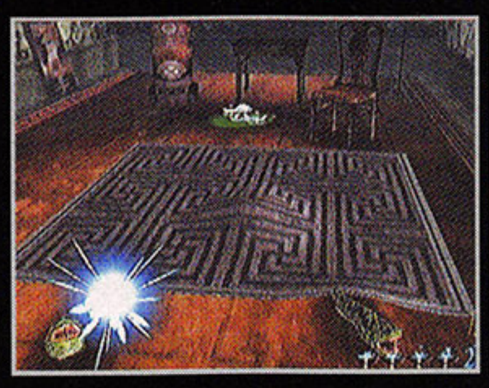
- **Go to Waterway A if you grabbed the Silver Bar Key.**
- **Go to Waterway B if you missed the Silver Bar Key.**

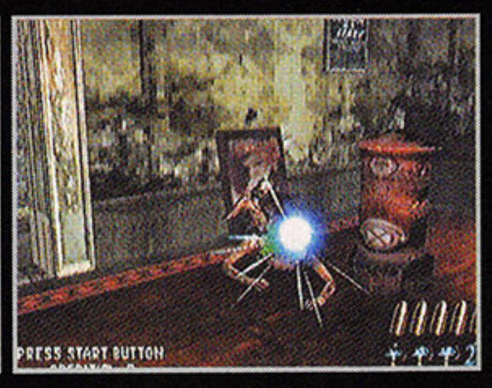
waterway b

A set of three enemies waits for you outside the pub. Behind them is a necklace in a vase; don't miss it. Across the small bridge is a room with a window. Two killers want to axe a hostage. Shoot both of them to save her. Turning the corner from where you saved the hostage, a set of Evitan sea creatures attacks you. You can nail the roaming David-type zombies in the background for extra points. The bridge you need to cross has been broken. As you backtrack, you are sucked into the water by an Evitan monster. Destroy the various Evitan monsters. Soon after, you must kill three zombies that are cruising on a boat. If you don't kill them while they ride, you'll need to kill them when they come at you. One more Evitan attacks just before you climb the ladder.

- **Go to the middle of Waterway A**

alternate path to waterway a





Some obstacles stand (in this case, *lie*) between you and Waterway A. Three leeches will make their way to you. To the right of the exit door, a set of torso-less enemies will crawl towards you. They're not very difficult, but be ready.

- **Go to Waterway A**

path to waterway a

The gate will open after you've shot the key. A portly zombie will throw a barrel at you, then rush you. Shoot him in the head to take out two birds with one stone. The door to the right will bust open; it's a young boy trying to escape death. Kill the masked zombie that's chasing him. Saving the boy will lead you into a building where his father is being held. If the boy dies, you'll proceed to a building across from the one where the boy exited.

- **Go to Tavern if boy is saved.**
- **Go to Path to Watergate if boy perished.**

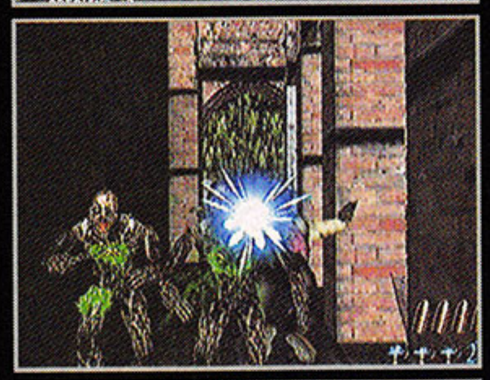
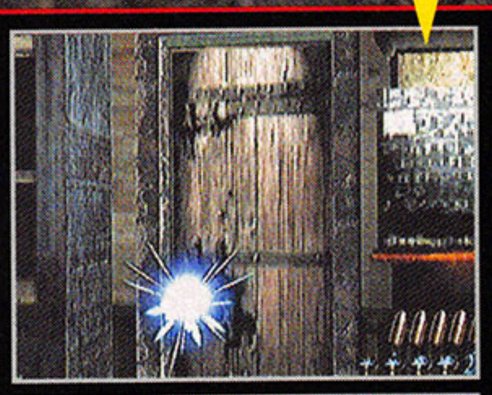
The crate in the corner has a medallion. Pay attention primarily to the hostage that's about to meet his maker. One shot will take out the David-type zombie, but quickness is required if you plan to take out the obese zombie. Three enemies charge from a boat. Take out the two Evitans as well as the Bentley-type zombie. Your sharpshooting skills will be tested as an axe zombie chases close behind a hostage. Take him out from the legs if you don't trust getting a head shot.

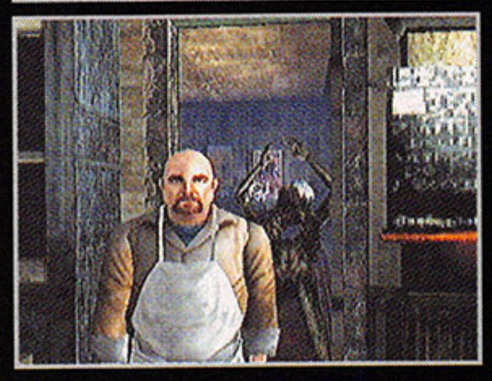
Note: You can branch into this point from Waterway B. A chainsaw maniac exits the corner building; give him some lead. Turning left, an axe zombie will trip to snipe you from a perch. Shoot his projectiles if you can't get to him. When you reach the next corner, a set of Evitan zombies will emerge from the watery depths. Rapid fire will be necessary when climbing the stairs. Two zombies will throw steel barrels at you from above. Shoot the barrels, then go for the undead. The last series of enemies is easy. Four David-type zombies will run at you from afar; nail each one as it comes. From here you'll advance to face the Heirophant.



- **Go to Boss: Heirophant.**

tavern





As you enter the building where the boy's father is, two slow-moving zombies will attack. Two shots and they're gone. If you plan to save the boy's father, you'll need to be quick. Shoot the lock on the door to open it and quickly shoot to the right of the lock to kill the zombie directly behind the man. If you open the door, you'll continue on toward Waterway A. If you open the door, you'll enter an area that leads to Waterway B.

- **Go to Alternate Path to Waterway A if door was opened.**
- **Go to Path to Waterway B if door wasn't opened.**

Three torso-less zombies bust the door open before you can exit the tavern. The half-barrel of apples can be shot. Two Kageo walk to you as you enter the billiard room. One of the barrels behind them holds a medallion. The final enemy in the area is a chainsaw maniac. The vase to his left has a golden cat; grab that. From here you'll head over to Waterway B.

- **Go to Waterway B.**

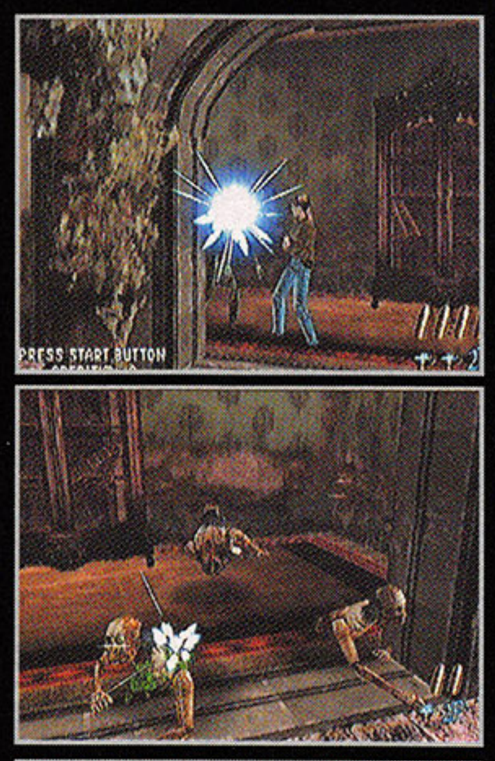
Voices from inside this building cry for help. One hostage has already been slain, but you can save the two women still alive. A Kageo zombie will attack the first. The second helpless victim is being attack by three torso-less zombies. When they've been saved you can concentrate on the two enemies attacking you. The barrel nearest to the fireplace has a health power-up. From here you'll advance to the Watergate route.

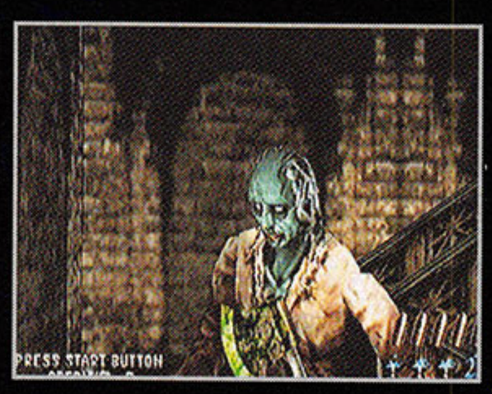
- **Go to Watergate.**

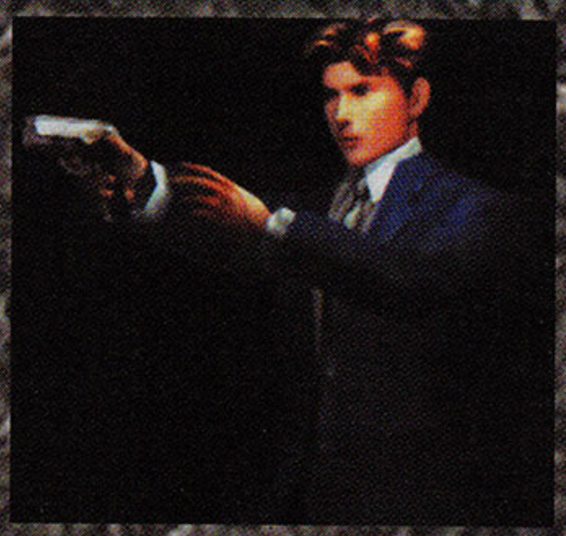


watergate

A vase against the right holds a golden idol. Grabbing it right away might not be possible, since two armored enemies and a masked fatboy will attack in rapid succession. A ninja-type enemy greets you in the Watergate balcony. Back inside the Watergate, the elevator will take you up to a higher level. Upon exiting the elevator, three David-type zombies rush you. An axe-carrying, undead warrior bars your way to the stairs; go for the head shot. As you poke your head out of the hole you came from, a set of leeches attacks. Do your best to break the barrels behind and reveal a necklace. One chain-saw maniac gets in your way before you make it to the hallway. Within the dark corridor, one set of armored enemies and one set of ninja-type enemies make the move on you. Take them out like you have in the past. Just beyond the double doors are two Kageo zombies; all you need are two head shots. The ladder ahead of you leads to Heirophant.

- **Go to Boss: Heirophant.**





boss: heirophant type b 05

This amphibian won't pose too much of a problem if you don't spare the bullets. Going for a higher accuracy rating might not be a good idea in this battle. This boss battle can take place in two different areas of the Chapter Two map. Heirophant's weak spot is dead center: It will open and close its gill-like chest. Only when the pinkish membrane is revealed can you harm this creature. Heirophant will rush you and slice with its large battle axe if you are unsuccessful in firing repeated shots into its chest. Besides the axe swing, this monster has two other main attacks. The first occurs relatively early on in the battle; the beast will dive into the water and send out a legion of flying piranhas. You have an opportunity to attack Heirophant while it sends out the fierce fishies. Don't get hit by the piranhas while shooting Heirophant, though. Its last and possibly most dangerous attack is jumping strike. Heirophant will jump high in the air with its axe extended. During its descent, its chest cavity will open and close. You'll have a split second to lodge a bullet inside. If you miss, the Heirophant will strike with its axe. Even with its multiple attacks, this is a less hectic battle than the one fought against Judgement.

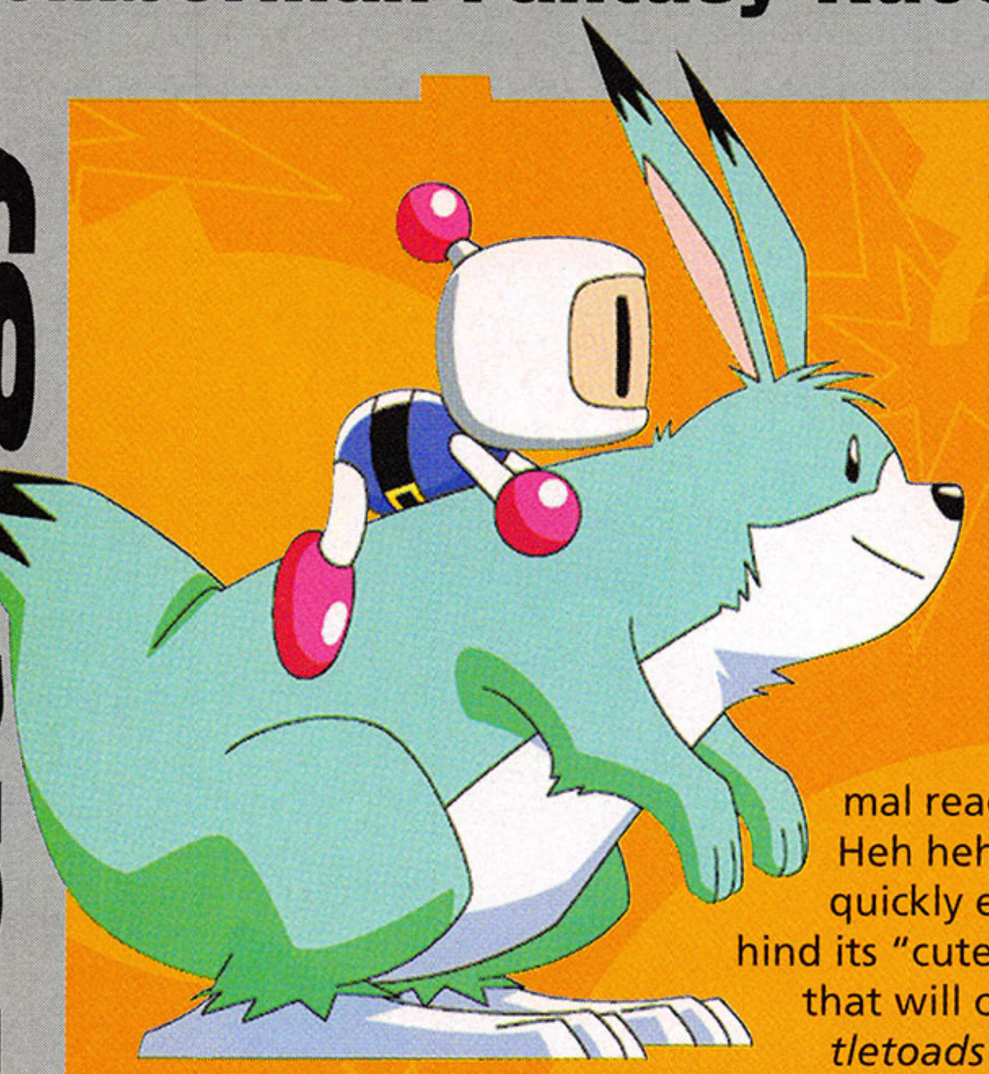
Bomberman Fantasy Race



by Ara Shirinian

Bomberman Fantasy Race is the latest effort in Hudson's long and varied line of *Bomberman* games. Much like many of the recent games in this series, the gamer's normal reaction may be something like, "Oh, here's just another kids' game. Heh heh...too simple for me!" Well, those voicing such opinions will quickly eat their words after getting halfway through the game. Hiding behind its "cute" exterior are a surprisingly sophisticated interface and opponents that will challenge and frustrate even the most expert players. It's not "*Battletoads* difficult," but *BFR* will certainly give players a run for their money.

Animal Handling

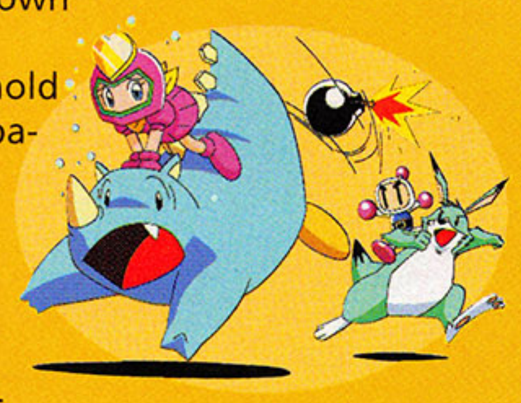
The interface for controlling your animal in *Bomberman Fantasy Race* is quite different from most other racing games. What stands out almost immediately is the number of buttons you'll have to manipulate at once in order to race effectively. There are three buttons which you can use to regulate your speed—which is not a terribly complicated scheme by itself, but with the Jump, Bomb and Item Change buttons to consider, you'll be quickly overwhelmed if you try to do too many things at once. If the controls seem too complex at first, don't worry about changing items and bombing until you get comfortable controlling your animal.

The behavior of your animal during turns is implemented very strangely. More specifically, you'll notice two things as you slow down while turning: First, you will still be able to turn left and right even when you are stopped. Second, unless you are using the rider view, the camera will not turn with you if there's a wall or similar object anywhere nearby. It will only get into the proper orientation after you've moved sufficiently far away. This effectively means that your animal will become considerably more difficult to control at low speeds than at faster ones. It can be really frustrating when you're going slow, but there's not much you can do about it on some turns. The key is to watch the rotation of your character—not the camera—on slow turns to see how much you are really turning.

Aside from turning, the second most important skill to master is the regulation of your animal's speed. You should always be running except when you reach a really sharp corner. The best way to handle such corners is to simply let go of the Run button for a moment to slow down enough and get your animal pointed in the right direction. When dashing, you should never allow your animal's stamina meter to run out, otherwise you'll suffer a considerable loss of speed. Also, it's more efficient to dash while running straight than while turning. If you start dashing while in the middle of a sharp turn, you'll lost stamina but you won't gain much speed until you straighten out.

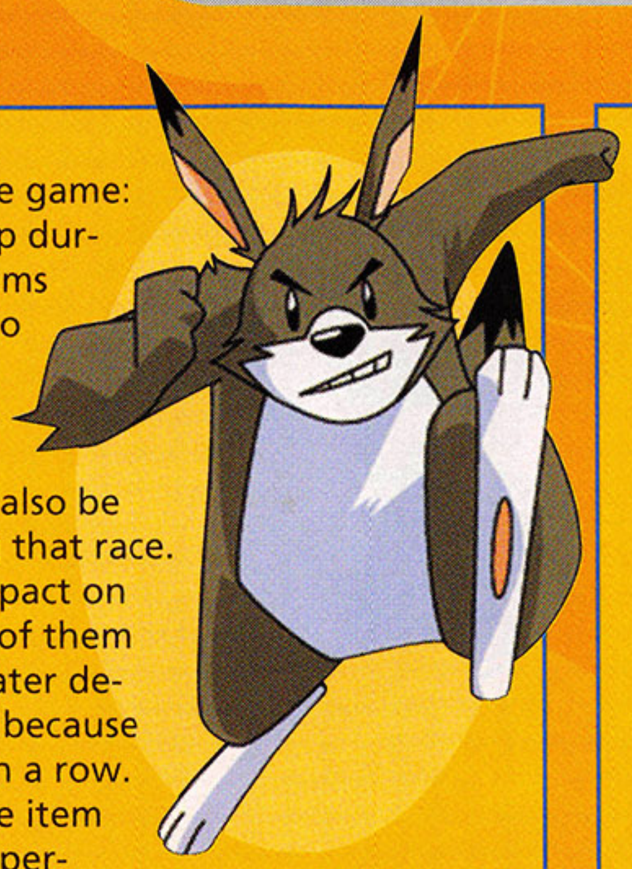
Jumping is mostly straightforward; however, there are a few things you should know. First, you can turn while you jump. It's not very useful when you're airborne, but you can set yourself up for a fast sharp turn once you hit the ground. Secondly, performing wall jumps (press the Jump button a second time as you jump into a wall or jump plate) is crucial to winning races in the second half of the game. You can still hit jump plates even if you're going fairly slow, but you can't do a wall jump on a normal wall at a slow speed.

Last—and least—is bombing. This system of attacking works as follows: You can charge bombs by holding the Bomb button down for a short period for time before letting go. The longer you hold down the button, the farther you'll throw the bomb. If you don't hold down the button at all, you'll basically drop the bomb behind you. If you throw a bomb in front of you and run into it at the right moment, you'll get a boost of speed (watch the game's demo to see this). However, if you're not very skilled at throwing bombs, it's almost not worthwhile to even bother with the whole thing. The problem is that it's very difficult to hit enemies with bombs, unless they are right behind you. Usually you will either throw the bomb too far ahead or behind the enemy you're aiming for. Even if you hit the enemy—especially in the later races—they won't slow down very much unless you're throwing a special bomb. Having to coordinate this action with simply navigating the course means that if you concentrate on bombing, you'll likely make more mistakes on a turn or something else. For this reason, you shouldn't try to bomb if you have any trouble doing it and racing at the same time.



Items

There are two types of items you can use in the game: Those bought before the race and those picked up during the race. During the first half of the game, items will be very expensive, so it's not worth buying too many of them. What's more, most of the items you can buy won't have a huge impact on the outcome of the race anyway. If you can win a race using just a few "bought" items, you should also be able to win using only the items picked up during that race. However, the "picked up" items do have a big impact on your race performance, since you can't buy some of them and they can affect your lap times by a much greater degree. Many times you'll be able to win a race just because you've picked up a number of really good items in a row. Of course, the opposite can also happen. Since the item placement is so random, it's almost impossible to perform consistently well every time you race. Don't be afraid to restart the race a few times if you get stuck with crappy items or if you get off to a bad start.



Opponents

The opponent characters in *Bomberman Fantasy Race* are among the most annoying ever. They don't make mistakes, they're much better at bombing than you are and they can dash and corner much faster than you can. During some races it will seem almost impossible to catch up to first place. Although you can usually buy a faster animal at the stable, it isn't always necessary. Don't be discouraged just because there's a large gap between you and first place early on in the race; when it happens on the *last* lap...well that's the time to get discouraged!

Stage Organization

Bomberman Fantasy Race has seven courses in all. Each course after the first one will require you to buy a ticket to race there (Ticket Cost). After you beat the first six courses, you'll be able to access the seventh, Bomber Castle. Once you beat the last course, Mirror Mode will be unlocked. You'll then have to beat all seven courses again with the left and right directions reversed! Mirror Mode is extremely difficult. The courses are exactly the same, but the opponents will be much faster and more aggressive. You'll have to use at least the Hyper Louie or Super Tirra on even the first course in order to compete.

If you place 1st on any race, you'll be able to play a bonus game, which consists of one lap around the course alone. For each coin on the course you pick up, you'll gain 1 GB. For each second left over on the timer when you finish the lap, you'll be awarded 10 GB. If you pick up all 100 coins on the course and finish before the time limit, you'll be awarded the perfect bonus (see the chart below).

Money Earning Strategies

Once you pass the halfway point of the game, it will become important to amass money as fast as possible; ticket prices will increase dramatically and you'll need even more cash to buy the Black Louie or King Tirra for the last few races in the game. The fastest way to get money is to play the normal Bomber Castle stage over and over, making sure you get both 1st place and the perfect bonus. You can accumulate 100,000 GB in about an hour if you can do this consistently.

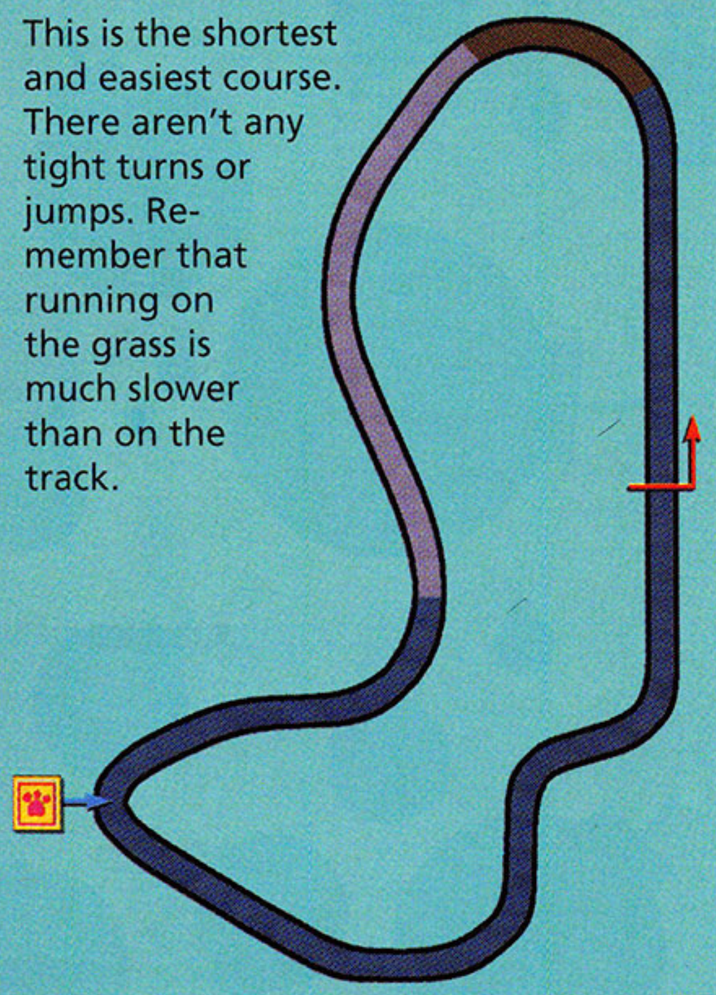
If you already have over 40,000 GB, here's an even easier way to earn money: In Vs. mode, you can wager your own money on a race by loading your own save file as the 2nd player. The bet maximum is either 25% of the poorest player's money or 9,999 GB, whichever is lower. You can "race" against yourself, which will basically transfer 9,999 GB from Player 2 to Player 1. After the race, only save the Player 1 data. You can repeat this process indefinitely to accumulate as much money as you want.

Courses

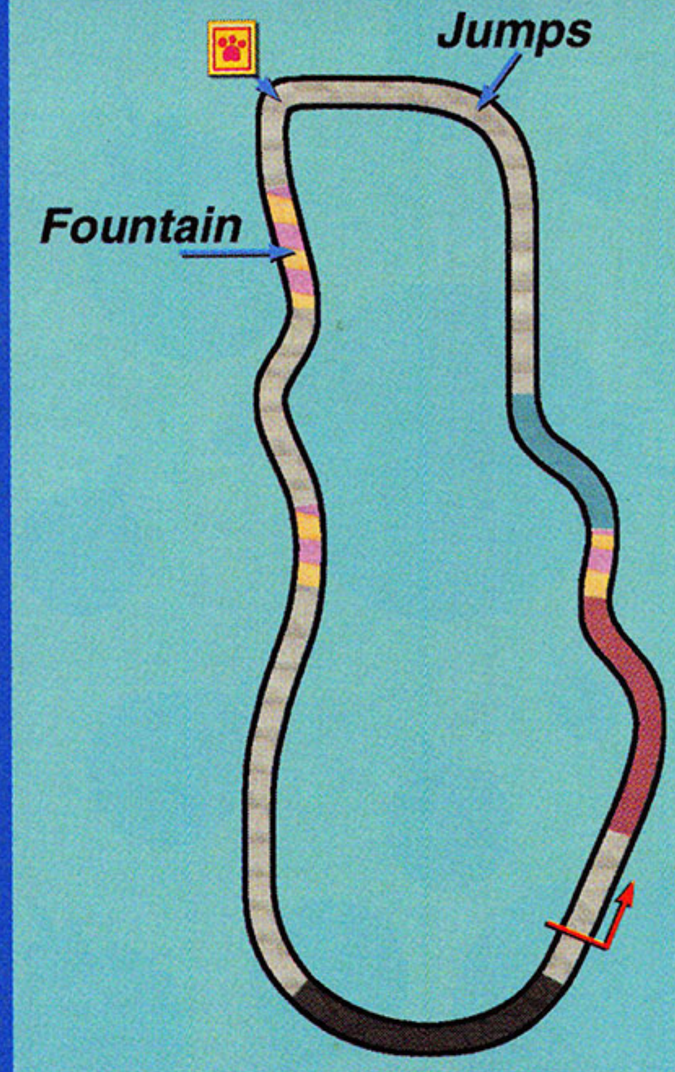
Here's a rundown of all of the courses with some hints on the tricky parts of each. References to the right and left sides of the track apply to the normal courses!

Bomber Circuit

This is the shortest and easiest course. There aren't any tight turns or jumps. Remember that running on the grass is much slower than on the track.



Bomber Coaster Lake



Jumps

Watch out for the sections of the castle wall that are sticking out. If you don't turn sharply enough after the first jump, you can easily run into them.

Fountain

You can jump right over the fountain, even if you're not going fast; the force of the water will carry you to the other side. Don't waste time by running around! If you're going fast enough you can not only make it over the fountain but over the railing beyond it and onto a secret shortcut. The shortcut platform is narrow, though, and if you're not aimed precisely in the right direction, you'll fall into the water.

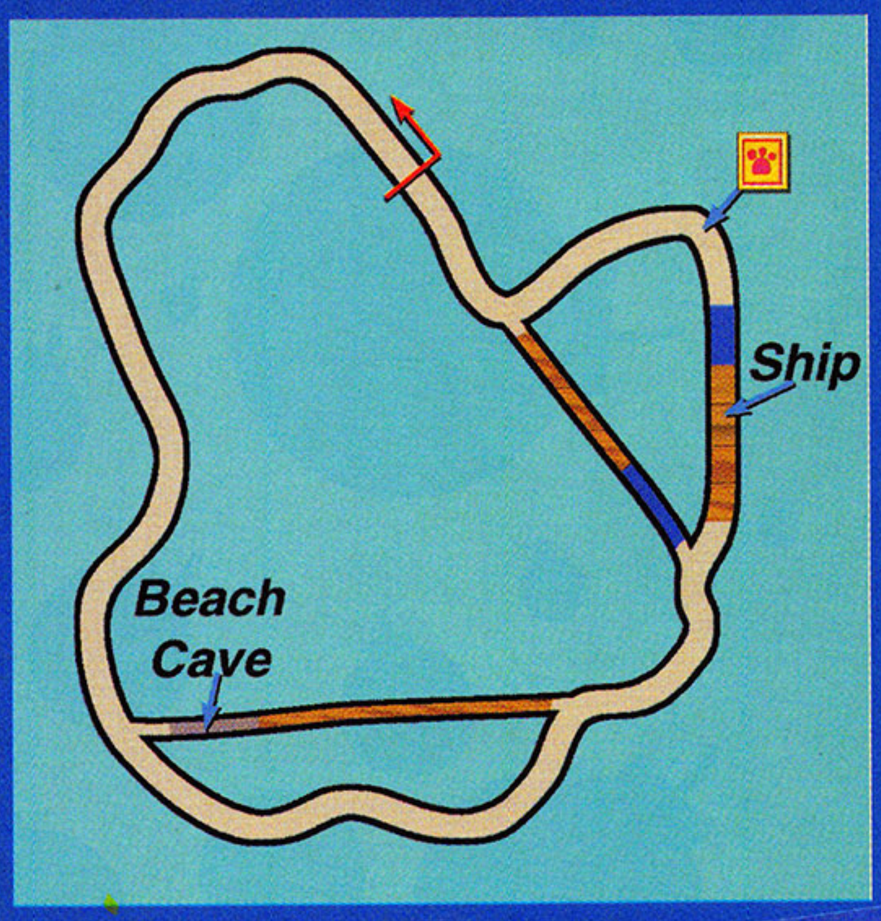
Wacca Isle Beach Side

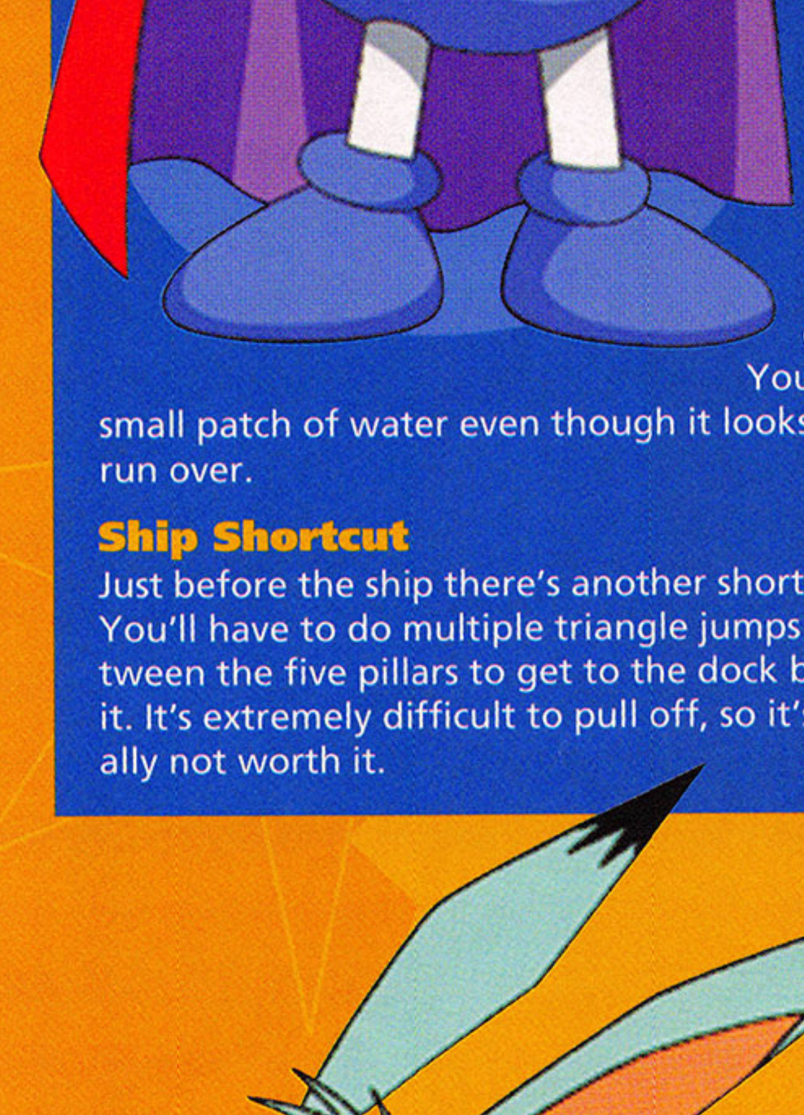
Beach Cave Shortcut

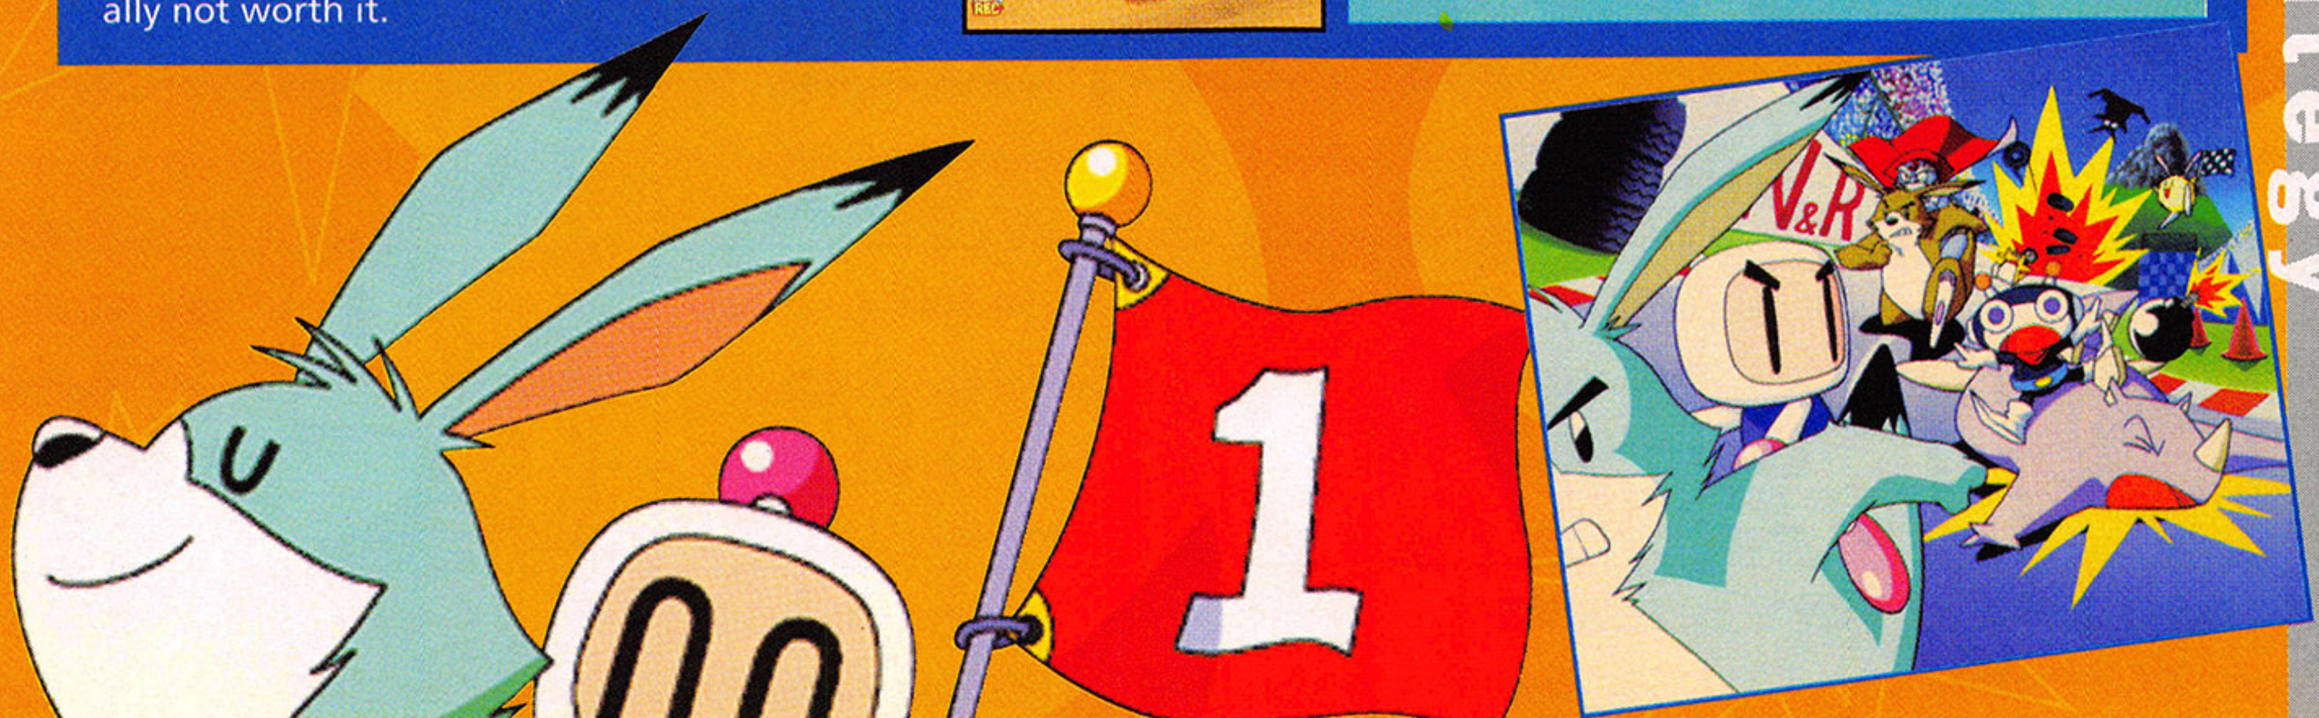
If you jump over the small gap here, you'll discover an easy shortcut. You'll have to jump over the small patch of water even though it looks like it's shallow enough to run over.

Ship Shortcut

Just before the ship there's another shortcut. You'll have to do multiple triangle jumps between the five pillars to get to the dock beyond it. It's extremely difficult to pull off, so it's usually not worth it.

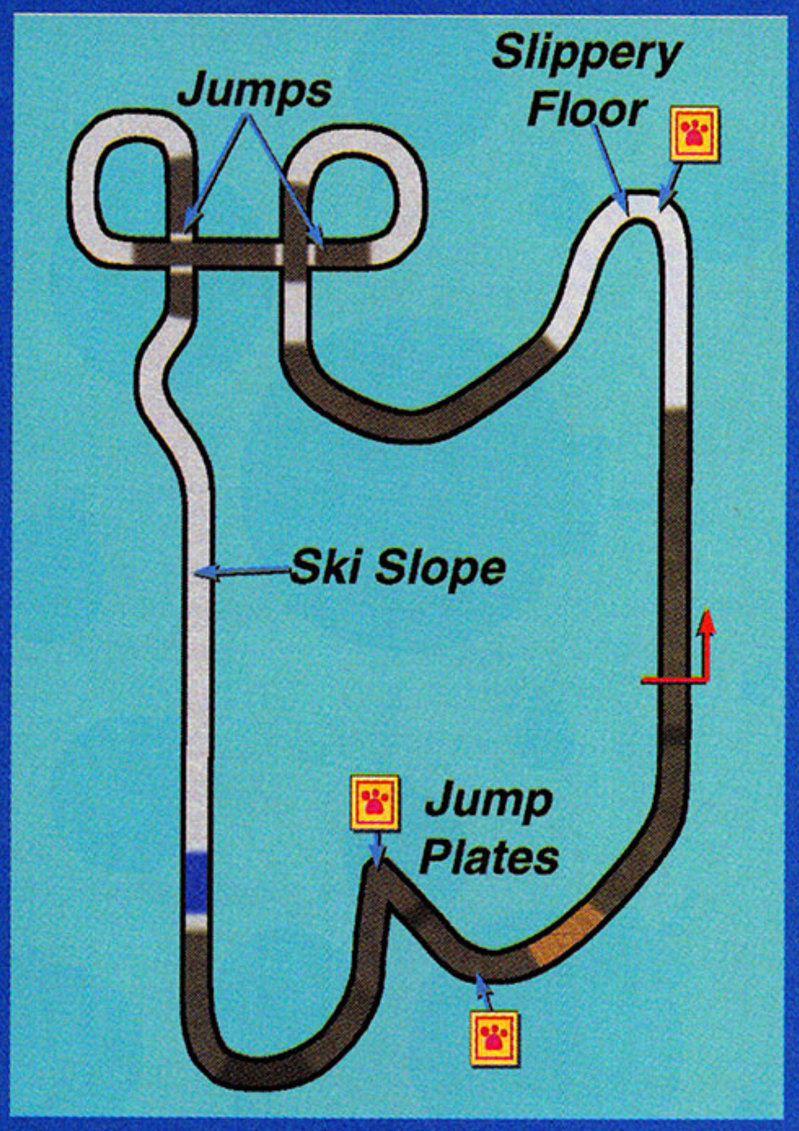






Bomberman Fantasy Race

Bakuzan Ski Course



Slippery Floor

This section here is difficult to navigate at high speeds. The best way to get through it is to hit the jump plate at the corner and turn as little as possible. You'll also want to avoid staying on the snow for too long, since it will slow you down considerably.

Jumps

If you're having trouble with the two jumps before the ski slope, it's probably because you're jumping too soon. It might also be helpful to use an animal with strong jumping abilities.

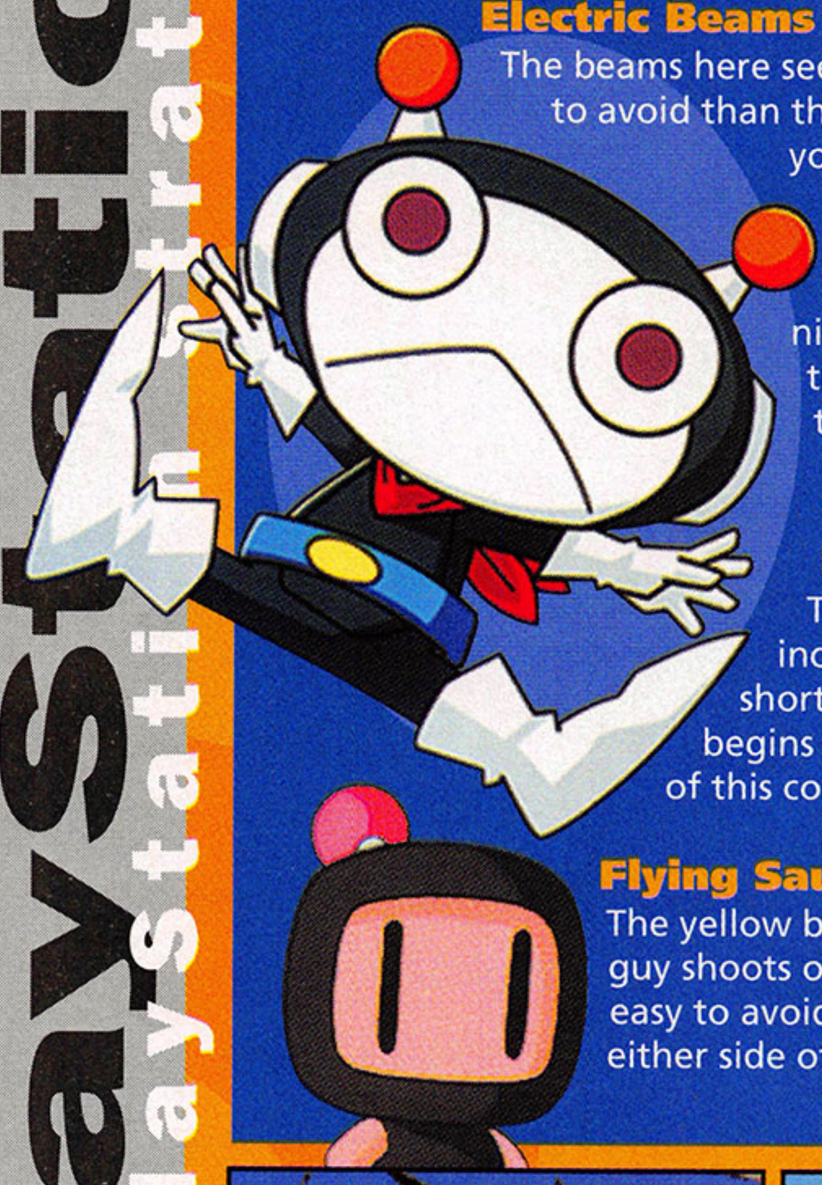
Ski Slope

Stay to the left side of the course here. This will set you up so you can take the following turn properly. If you're going very fast off the ski slope, start turning left a little before you hit the ground, otherwise you won't be able to make it without slowing down.

Jump Plates

There are two jump plates here. If you hit the first one in the center you'll be in the correct orientation to hit the second one. Jump again immediately after you hit the ground from the first jump plate.

Star Express



Electric Beams

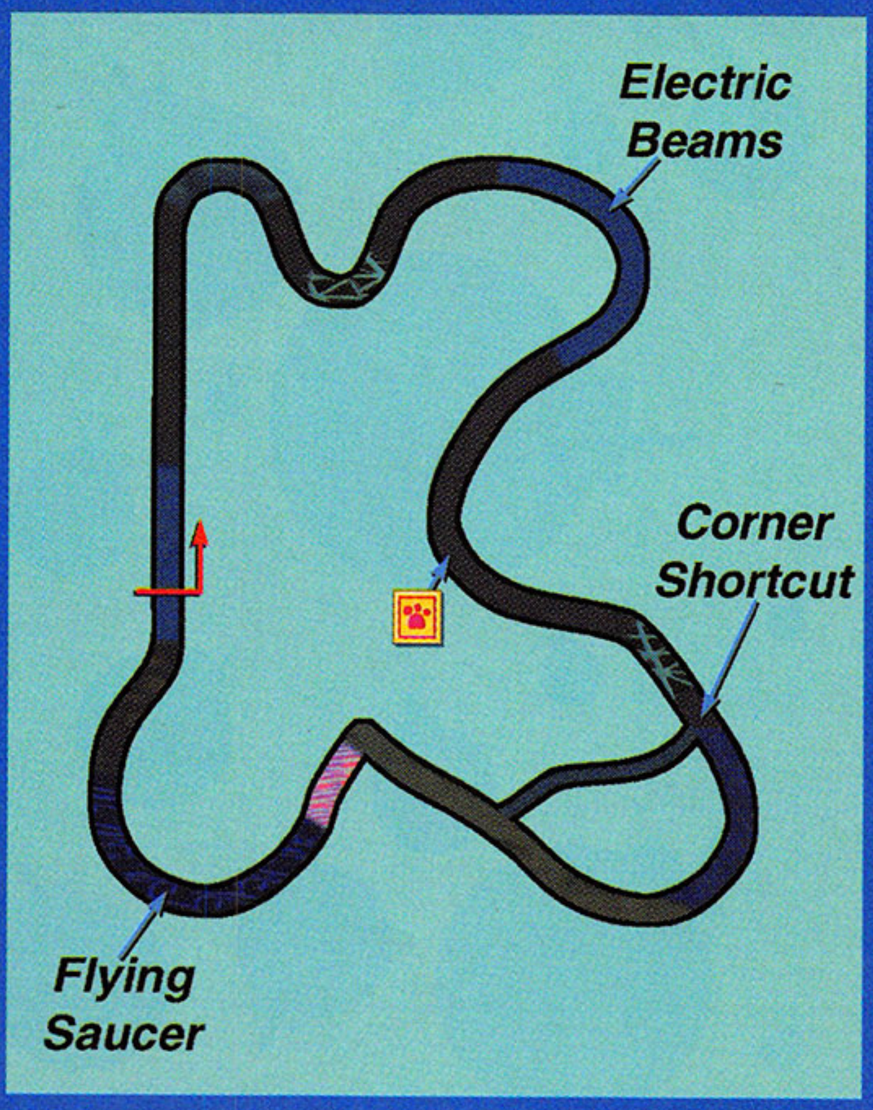
The beams here seem much easier to avoid than they really are. If you're having difficulty jumping over them, try running along the outside edge of the turn. There's a small embankment there that will make jumping easier.

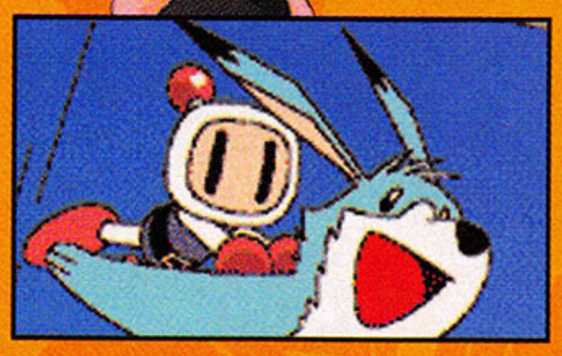
Corner Shortcut

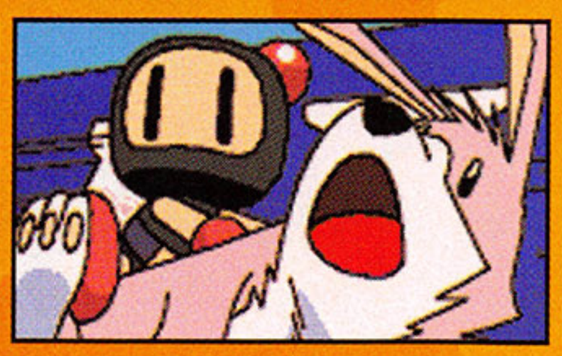
There's a really inconspicuous shortcut here that begins on the inside of this corner.

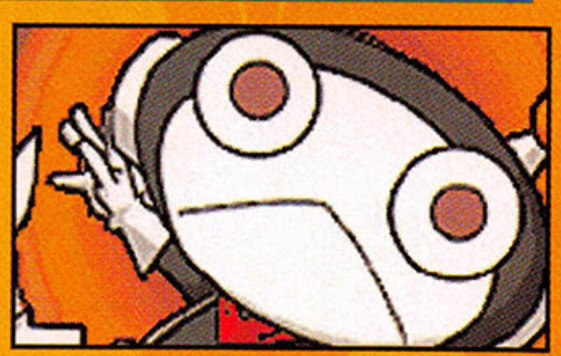
Flying Saucer

The yellow beams that this guy shoots out are really easy to avoid if you stay to either side of the track.









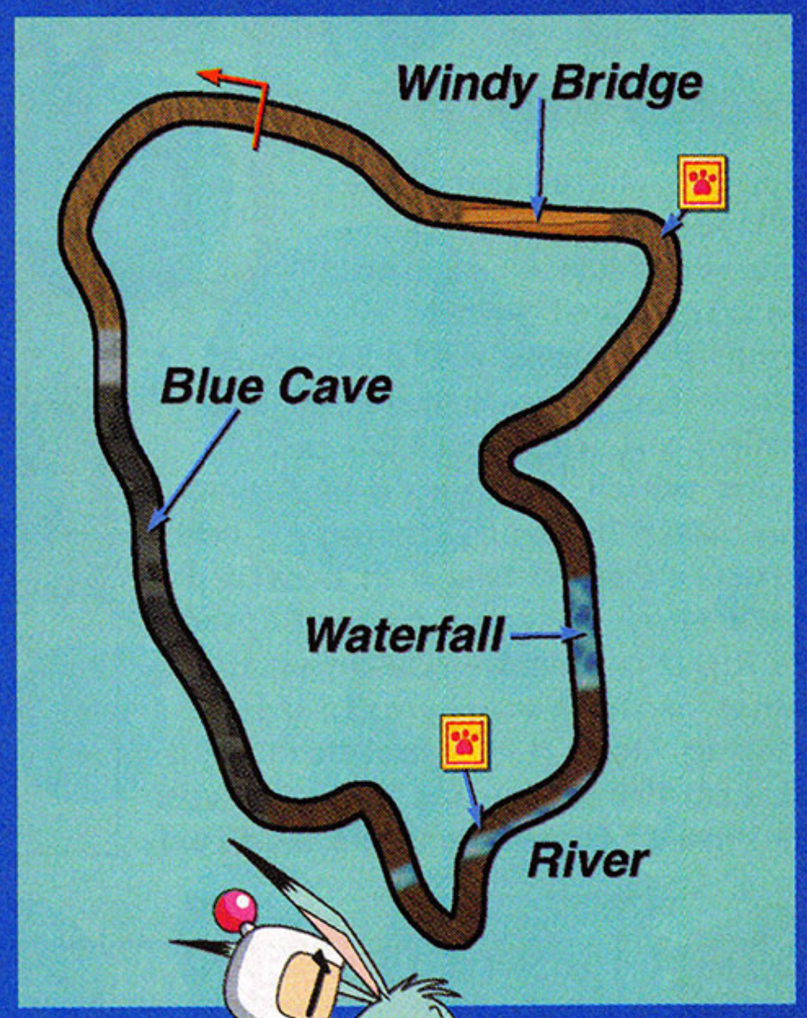
Dyna Mountain

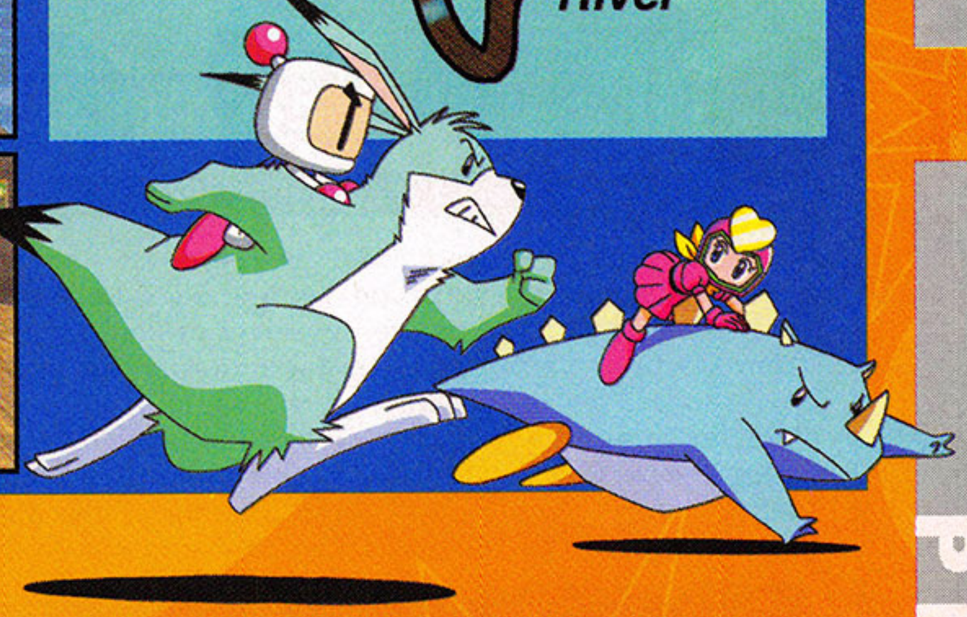
Blue Cave Shortcut
You can save a great deal of time if you follow the narrow platform here. Just run straight and jump over the gap at the bend in the platform instead of following it all the way to the other side.

River Jump Plate
If you decide to hit this plate, it will shoot you right into the wall at the corner ahead. It's very difficult to slow down in time, so be prepared to brake or do a wall jump if you're going too fast.

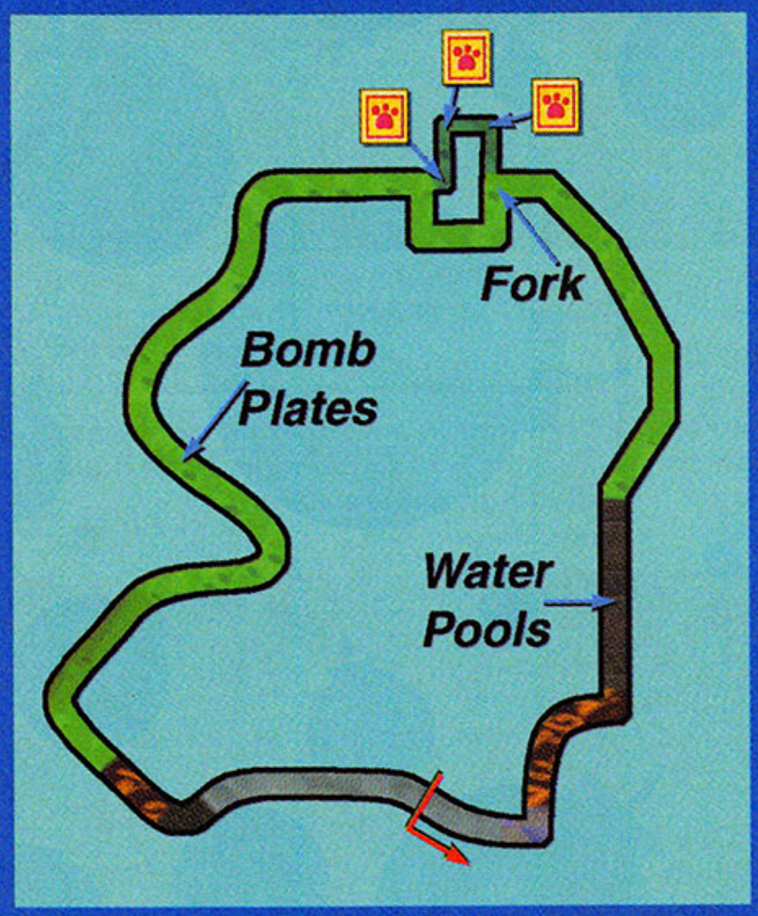
Waterfall
If you have a very fast animal like the Hyper Louie, you can just dash over this section. Slower animals will get swept away by the current, so if you're using one of those, you'll have to hop on the small islands.

Windy Bridge Jump Plate
This one is very important to hit accurately. If you hit it off center, sometimes it will shoot you right into the wall at the end of the bridge.





Bomber Castle



Water Pools
These fenced pools of water can be a pain in the neck if you're not running perfectly straight. If you get stuck here, it will take you forever to get back into the race. The wall corners in the following sections of the course are almost as bad.

Fork
The left road here is slower but easier; the right road is extremely fast but insanely difficult. In order to take the right road properly you'll have to wall jump off of the arrow sign. Next come three jump plates. You'll have to hit the second and third ones before you even touch the ground. The platforms are very narrow; if your orientation is even a little off, you'll fall. If you can get through this section without making mistakes, it will give you a big-time advantage, although it's not necessary for a 1st place finish, even in mirror mode.

Bomb Plates
If you touch the plates on the ground, they will set the huge bombs on the sides of the track to explode! It's a good way to stop opponents if any are around, but it's also an easy way to hurt yourself.

After the success of *Resident Evil 2*, series producer Shinji Mikami is ready to rekindle the virus with *Resident Evil 3: Nemesis*. *Nemesis* takes places 24 hours before the events of *Resident Evil 2*. Jill Valentine finds herself stuck in Raccoon City just as all heck breaks loose. We've learned that the game includes another playable character, a former Umbrella employee by the name of Carlos; this will undoubtedly add some interesting plot twists. Taking place in Raccoon City, large portions of the game are spent outdoors and in a hospital. Capcom has improved the integration of pre-rendered backgrounds with real-time polygonal characters; this should add up to more believable enviroments. Other improvements include higher graphic resolution, a new dodge manuever, ten different zombies and a baddie named The Pursuer. *Dino Crisis* will have to tide us over until we can get this!

1 ***"Yo Quiero Taco Bell?"***

2, 3 ***Jill doesn't take any lip from these zombies; she's seen here putting an end to their reign of terror with the help of some explosive ammunition.***

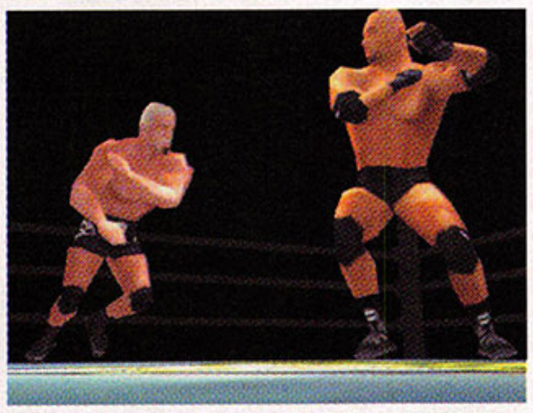
Check out the sheer, graphic beauty! (The background is not too shabby, either.)

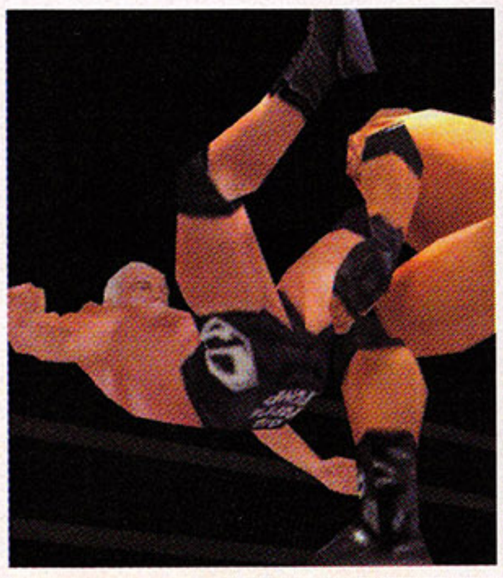
Cornered in a narrow passageway, Jill caps a nasty zombie. Let's hope she knows there's another one behind her...

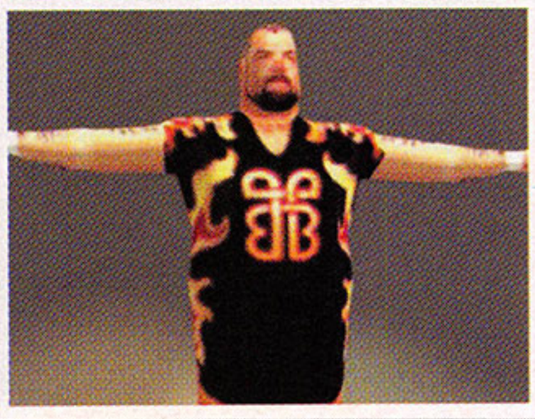
WCW MAYHEM

EA • 3rd Quarter 99 • 1-4 Players

The folks at EA are gearing up for their first wrestling title after acquiring the WCW license. Will it be able to match the quality of their existing sports titles? They hope so. In fact, they believe this will be the "Goldberg" of wrestling games. *WCW Mayhem* is still in its very early stages, but already they are addressing things that hard-core wrestling fans would enjoy. EA wants to capture that same nuttiness that occurs in real wrestling matches by incorporating what they call the "out of control, out of the ring" feature. Wrestling can occur far outside the ring, including backstage, in locker rooms and even garage areas. Also being addressed is the rivalry factor. Much of wrestling is about rivalries and history. The game will have a "story line" which will bring all those heated rivalries into focus. Sound amazing? We hope it turns out a winner!



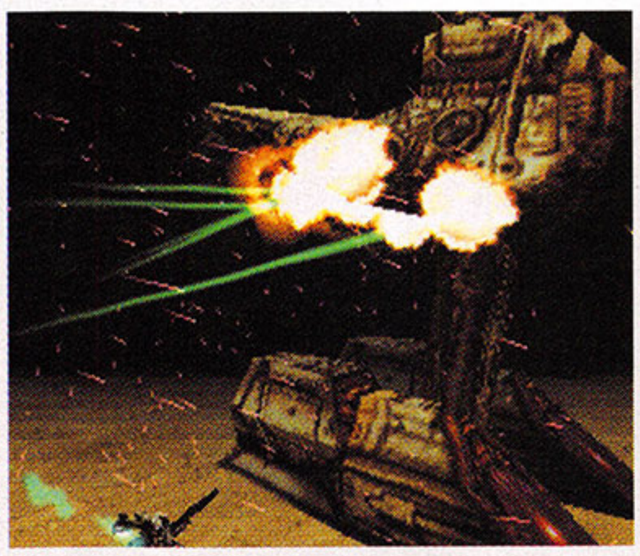


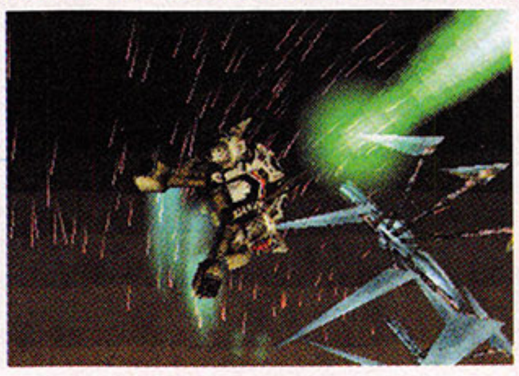


OMEGA BOOST

SCEA • 3rd Quarter • 1 Player

Polyphony, the developer who brought you Gran Turismo, is currently working on a high-intensity space mech shoot-'em-up. Known for incredible graphical achievements on the PlayStation, Polyphony will demonstrate what it can do in a space battle environment. So far, it looks like another mind-boggling experience. Players will control a Macross-style mech which can transform from flying to battle mode. The fighting system is much like *Panzer Dragoon*, in which the gun can lock on to multiple targets and release a spray of ammunition. Each mech also has a tracking device which can monitor the enemies in the area. If all else fails, you can slam your mech into the enemy Kamikaze-style! The game will be available in Japan during the summer and should be hitting U.S. shores in the fall.





APE ESCAPE

TIPS & PICK! TRICKS

SCEA • 3rd Quarter • 1 Player

One of SCEA's most anticipated titles of 1999 is *Ape Escape*. This will be the first game which will be exclusively for use with the Analog Controller. So if you don't have one yet, get with the program! The objective of the game is to catch a bunch of loose monkeys using various tools that the professor gives you. You control your character with the left thumb stick while the tools are controlled with the right. Some of the tools you'll use include a remote-controlled car, a casting net, a sling-shot and a sword. You will go through a practice round each time you're introduced to a new device. The game is packed with various styles of gameplay, including tons of mini-games. Sony is hoping that *Ape Escape* becomes another mega-hit title with plenty of sequels, like *Crash Bandicoot*.

WU TANG

Activision • 4th Quarter 99 • 1-4 Players

Believe it or not, Activision is going to release a fighting game featuring members of the rap group Wu Tang Clan! *Wu Tang* will have a storyline akin to many kung-fu movies of the '70s, with plenty of killer martial arts action. Players will be able to play as any of their favorite nine Wu Tang Clan members, including RZA, Method Man and Ol' Dirty Bastard. Fighting arenas include ancient China and the backstreets of New York City. There will be three modes of play: practice, multi-player and story mode. In the story mode, players will be challenged to defeat 36 chambers of enemies. If you have their albums, then get their game!

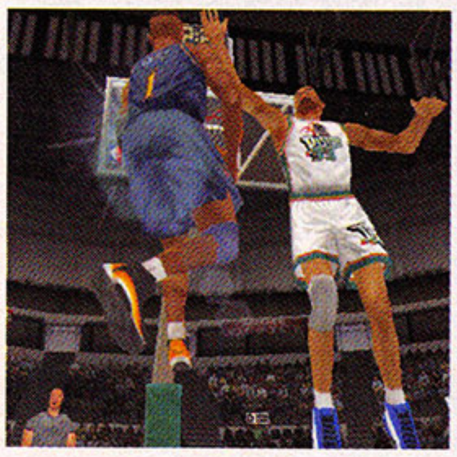
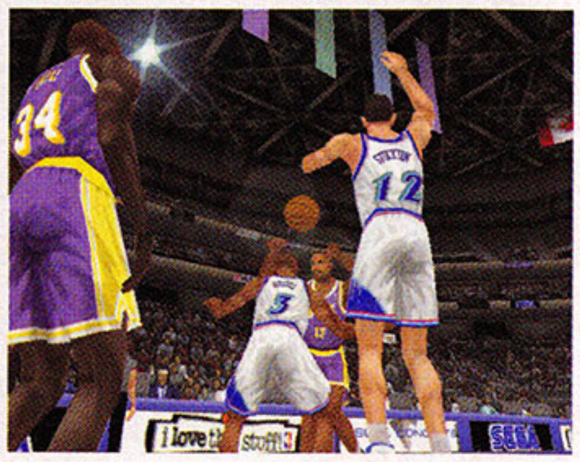
NBA 2000 *

Sega • September • 1-4 Players

Here's a first look at Sega's upcoming NBA game for the Dreamcast. The game is being developed by Visual Concepts, the same folks who brought you the *NBA Action* series for the Saturn. The details on the players are incredible and the arenas even have the appropriate championship banners and retired jerseys! Most intriguing is the possiblity of multiplayer games using the Dreamcast's modem. Will this game make people forget the fact that EASports is absent in the Dreamcast line-up? Sega hopes so.





NFL 2000 *

UPDATE!

SCEA • 3rd Quarter • 1 Player

Sega's new football game is slated to be a launch title for the U.S. release of the Dreamcast. Also developed by Visual Concepts, this NFL game boasts incredible graphic detail. Everything from refs, side-line coaches and cameramen are all present on the field. We all know that a football game is essential when releasing a new system into the U.S. The question still remains on how well this title will play. So far, it looks like a touchdown.

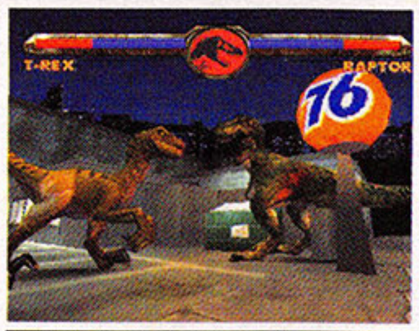
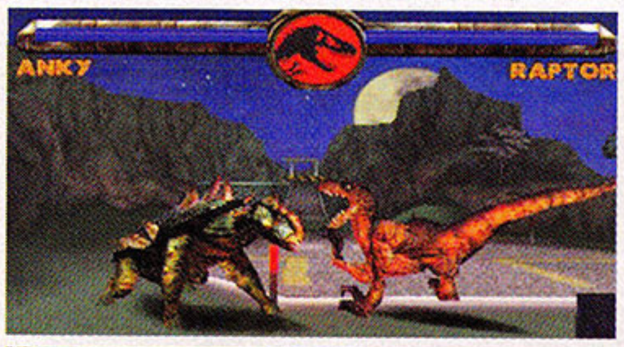
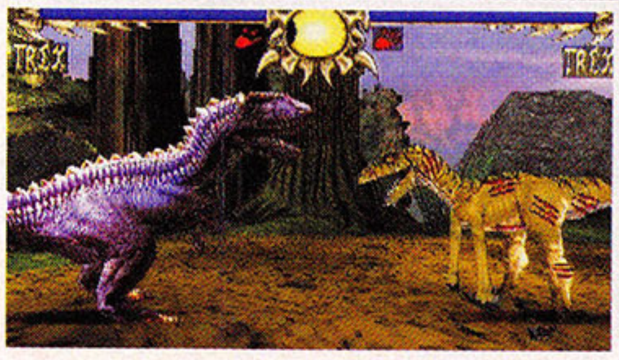
WARPATH: JURASSIC PARK

EA • 4th Quarter • 1-2 Players

EA recently acquired the rights to publish Black Ops' much anticipated dinosaur fighting game, *Warpath: Jurassic Park*. Forget *Primal Rage*, this game features historically accurate dinosaurs in full 3-D. Each dinosaur will have their own special moves but all of them will be able to do a "thunder attack". By taunting an opponent, the dinosaur can charge up its "thunder meter" to boost its strength, then release the attack once it's fully charged. Also included in the game will be a cool interactive extra called the Dinosaur Museum where you can browse through and learn more about them. The stomping and chomping will begin later this year.



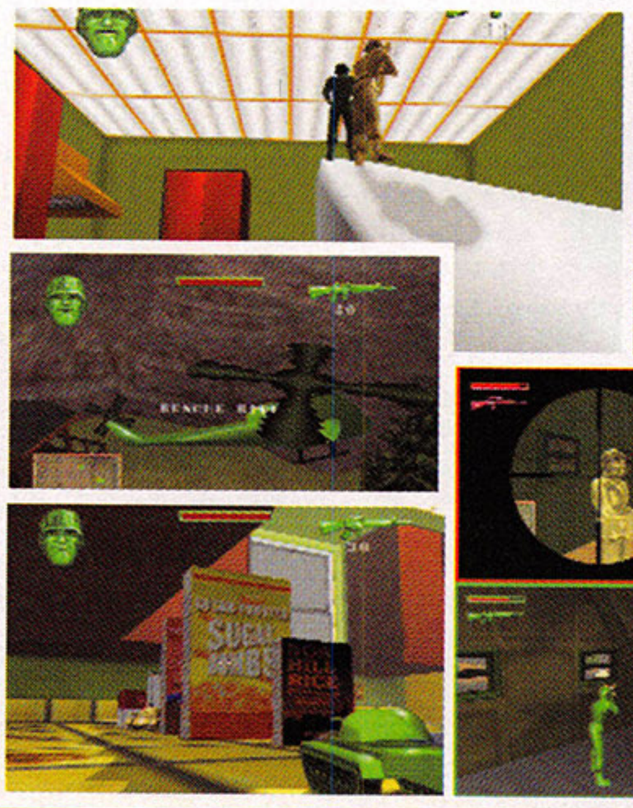


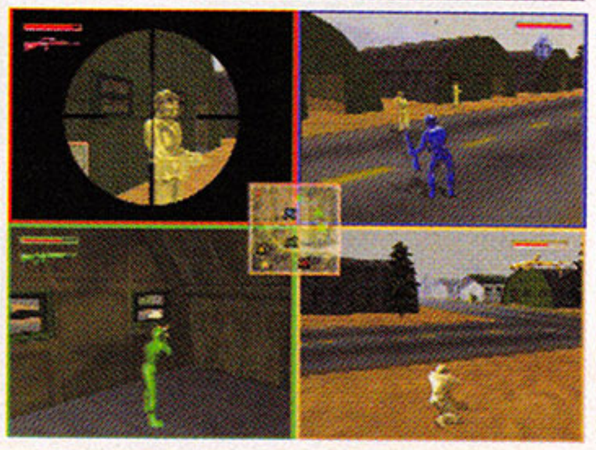


ARMY MEN: SARGE'S HEROES

3DO • November • 1-4 Players

Remember taping firecrackers to your little army men and blowing them up? Well, now there's a game featuring your favorite plastic men: *Army Men: Sarge's Heroes*. 3DO had some good success with their *Army Men* series for the PC. This time, rather than doing a top-down stratgey-type game, *Army Men* for the N64 will be third-person action game. Players can control up to nine different characters and take on 14 missions. Tons of weapons and hilarious death animations are some of the highlights. The game will support the 4 MB expansion pack and there are plans to include a multiplayer mode.





ZOMBIE REVENGE

TIPS & PICK! TRICKS

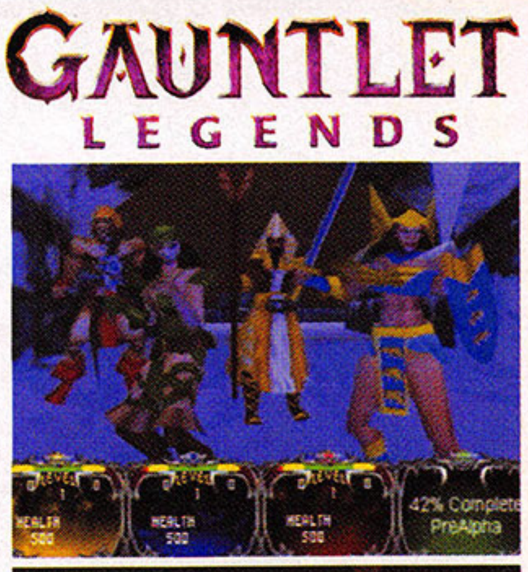
Sega • Available Now • 1-2 Players

Originally, *Zombie Revenge* was slated to be titled *Blood Bullet: The House Of the Dead 1 1/2*, but this kick-butt game deserved its own name. Think *Resident Evil* meets *Streets Of Rage*, instead of the regular light-gun game. Two players can choose from three different characters: Stack, Linda or Rikiya. Together you patrol the streets and go on a zombie-killing spree. Various weapons will be available for your disposal such as guns, lead pipes and even gasoline! This game brings back the almost forgotten fun of teaming up with a friend and going on a lynching parade like *Final Fight*. Words do not do this game justice; go play it now!

GAUNTLET LEGENDS

SCEA • 3rd Quarter • 1 Player

The incredibly popular arcade game comes to the home. Gauntlet Legends for the N64 will have all the stuff in the arcade game, Skorne and all. The four-player input of the N64 makes this game a natural for the system. The game will support the expansion pack for high-resolution graphics. Midway is currently working on a death-match mode, but details on how this will work is still unclear. A PlayStation version is also underway but unfortunately, it seems that it will only support two players due to graphical limitations. It seems that N64 owners will always win out when it comes to Midway games!

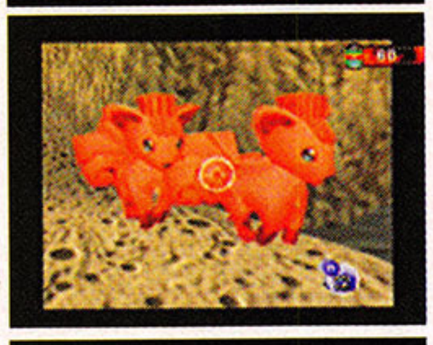


POKEMON SNAP

TIPS & PICK! TRICKS

Nintendo • June 1 • 1 Player

Pokemon Snap has been announced for the U.S. to the delight of many *Pokemon* fans. Players will take on the role of Toru, an avid *Pokemon* photographer. Toru has a multi-terrain vehicle called the Zero One, which allows him to travel on the ground, in the air and on the water. The game has an incredibly large map to explore as you take pictures of various *Pokemon* wildlife. Toru will also have several tools to coax out shy *Pokemon*. Players will be judged on how well they take pictures; the bigger and more centralized the character is in the photo, the better your score will be. Pictures can be stored in an album where you can store them in a controller pack and trade them with friends. A great addition to the *Pokemon* franchise!

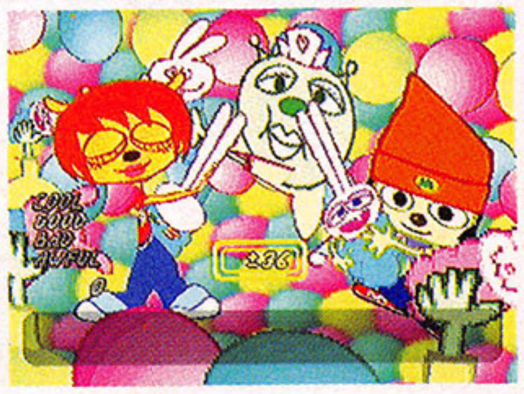


UM JAMMER LAMMY

TIPS & PICK! TRICKS

SCEA • 4th Quarter 99 • 1-2 Players

Um Jammer Lammy steps away from the rap songs of Parappa the Rapper and introduces blistering hard rock. Since Um Jammer is a guitar player, you'll be playing guitar notes instead of words. Katy Kat comes back as the bass player for Um Jammer's band, Milk Can, and Chop Chop Master Onion also returns to give you pointers on the first stage. Don't let him lie down on you again! The game is significantly longer; probably after all the complaints that Parappa the Rapper was too short. Also, the game features a two-player mode for double the fun! Where's Parappa, you ask? Well, he's in there and you can play as him if you... We'll tell you how in our upcoming strategy!



SPACE INVADERS

Activision • Fall • 1 Player

In the wake of its success with an *Asteroids* makeover last year, Activision is pulling yet another classic out of the closet: *Space Invaders*. The video game that truly started it all in the U.S., *Space Invaders* acted as a veritable quarter magnet, possessing kids and adults alike with its simple yet addictive "mow down the army" method of gameplay. This new upgrade of *Space Invaders* features immersive 3-D battlefields, cinematic cut-scenes and stunning in-game special effects. There are ten worlds to conquer and twenty types of alien enemies to wipe out. Developed by Z-Axis, the team responsible for *Fox Sports College Hoops* on the Nintendo 64, *Space Invaders* is expected to come super-charged with devastating power-ups and—hopefully—the original game from 1979 as a hidden Easter egg. (Please?)

HYDRO THUNDER

Midway • September • 1-2 Players

Also in development simultaneously for Sega's Dreamcast, Midway's *Hydro Thunder* packs a serious punch. The coin-op, currently running in arcades all across America, is easily one of the smoothest, sweetest-looking racing games ever crafted, thanks to Midway's top-of-the-line Diego hardware. The Diego set up is impressive, running on an Intel Celeron at 333 MHz. While the N64 version will understandably suffer a noticeable degradation in graphic quality (just try to match Diego at this point), the gameplay will largely remain intact. According to inside sources, even Dreamcast isn't powerful enough to pull it all off at 60 frames per second. Okay, so there won't be a 10" sub-woofer under your butt cheeks, either—however, players wishing to approximate the experience will be able to slap a Rumble Pak into their controllers. Yes, very soon, *Hydro Thunder* will be playable at home. The Dreamcast version promises to contain several extra bonuses, including exclusive tracks.

GEIST

UPDATE!

Sega • September 9th • 1 Player

It is the year 3067 and we are all going to die. Well, we'll all be dead by that time anyway, but you know what I'm sayin'. Sega's *Geist* looks a bit like *Panzer Dragoon*, with its soar-target-and-shoot style of gameplay. Developed by Netter Digital Entertainment, a Hollywood special effects house, the game contains outrageous doses of over-the-top graphic details like 3-D particle effects and explosions. According to Sega, *Geist* features 5 levels, some of which are on rails. Since it's going to take an awful lot to even come close to the goodness of the *Panzer* series, and since Hollywood is involved here, we're not holding our breaths on this one. That's not to say that *Geist* couldn't theoretically end up a dynamite title; to the contrary. From the videos we've seen of the game running so far, we could be in for a very pleasant surprise, although the choppy frame rate could use some help. Still, there are questions. Why this game? And where the heck is *Panzer*?

SHEN MUE

UPDATE!

Sega • December • 1 Player

This series of screens depicts Ryo Hazuki, hero of the piece, in a rather unenviable position.

Yu Suzuki and his AM2 team created this fully-playable "virtual convention center" segment specifically for an event held at Tokyo Big Site in Japan.

As time goes on, we're learning more and more about Yu Suzuki's 100% original Dreamcast project. The latest info we have indicates that this massive action/RPG will ship in multiple installments, with "cliffhanger" scenarios at the tail-end of each disc. Amazingly, Sega has stated that even with an estimated 30-50 hours gametime (depending on whether the player blazes through or fully investigates), *Shen Mue*'s debut disc (Episode One) will retail for only around twenty bucks! We suspect there are two main reasons for the decision to split the game's content into multiple discs: 1. With *Shen Mue* only 50% complete, Suzuki does not wish to "rush" development of what he feels is his strongest title to date—a real gamble on quality if Sega forced a premature release this Fall. 2. Sega knows it must slam shelves with every single "AAA" title it has before the end of '99 in order to maximize Dreamcast's attractiveness in the marketplace (and before the arrival of the new PlayStation hardware). There is even word that *Shen Mue* may consist of a total of some 40 individually-released discs over a five year period! Wait—there's more! Apparently, musician Yuzo Koshiro (of *Streets of Rage* and *Actraiser*) is composing the epic score. SoJ states that Disc One is on target for an August release in Japan, which means that even with massive localization duties, *Shen Mue* could show itself here come Christmastime.

Yup; this is real time, boyee-eee!

CRAZY TAXI

ARCADE

TIPS & PICK! TRICKS

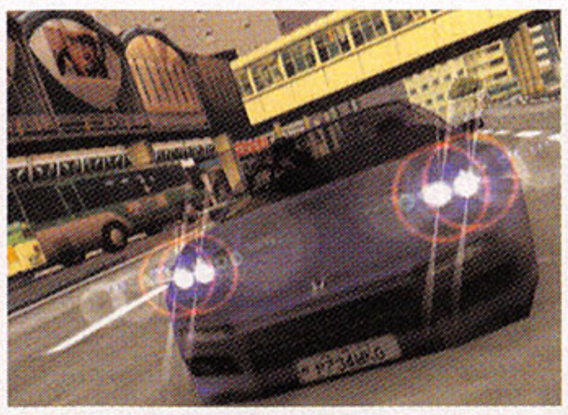
Sega • Available Now • 1 Player

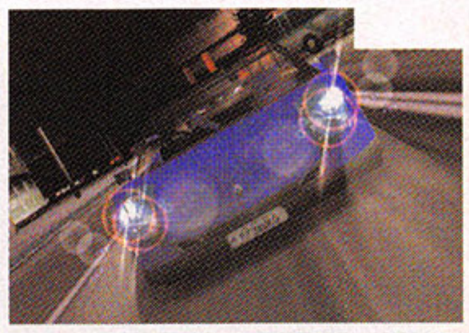
Wow. This has to be one of the coolest driving games of all time. In *Crazy Taxi*, you play the role of a cabbie trying to pull in as many fares as possible during a set amount of time. Select one of three characters, each with his own unique look and vehicle. As you make your way around town, you can choose exactly who you wish to pick up. Potential fares are highlighted by a brightly-colored circle pattern on the ground. The color of the circle indicates short, medium and long-range trip requests. The cool thing about *Crazy Taxi*, though, is that—in true Sega form—the game is laced with a ton of licensed icons; Pizza Hut, FILA, KFC, Levi's and even Tower Records are all represented. As you zoom along the big city, you can pretty much drive wherever you want, although the goal is to get your passengers to their destinations before time runs out. Just like our other current favorite coin-op, *Zombie Revenge*, *Crazy Taxi* is Naomi-powered, so expect a Dreamcast release before the end of the year. Dang, this game is fun.

METROPOLIS

Sega • Fall • 1-2 Players

Bizarre Creations, the U.K.-based development force behind the *Formula 1* games on the PlayStation and PC, is at it again; this time they're cookin' up a tasty treat on Sega's Dreamcast. Metropolis is an incredibly-detailed, city-based racing game. There are 3 cities in which players can compete, including San Francisco, London and Tokyo, and each city is comprised of nearly two square miles of territory. Bizarre assembled these cities after compiling 30,000+ individual photographs and nearly 40 hours of videotaped footage. There are street lamps, phone booths and traffic lights. *Metropolis* comes with some twenty licensed cars from a dozen auto manufacturers; Mercedes, TVR, Toyota, Mazda, Alpha Romeo, Honda, Ford, Peugeot, Mitsubishi, Rover and even Jensen! Each of the vehicles are topless, so you can actually see the driver and his or her reactions on the road. *Metropolis* will contain two modes of gameplay: "Arcade" and a story option which Bizarre refers to as "Gang Battle." We've been told that to win in this mode, the player must race against various gang members of each city in an effort to join up. This all sounds very interesting and if the mesmerizing screens on this page are any sign, *Metropolis* could come out smokin' like nobody's business.





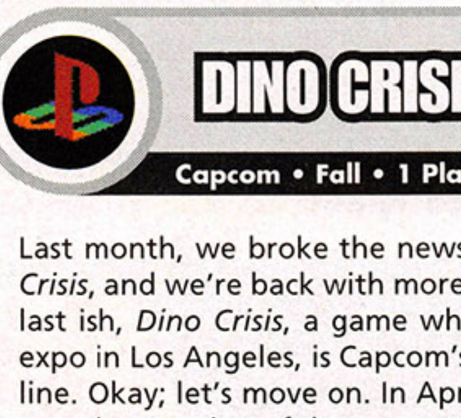
DINO CRISIS

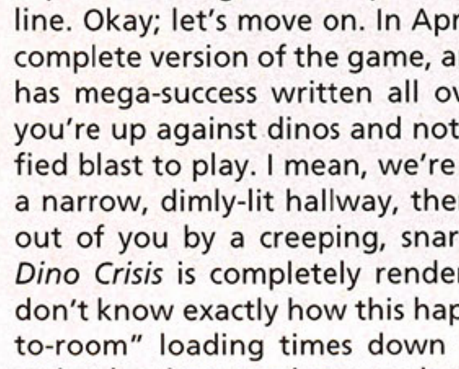
UPDATE!

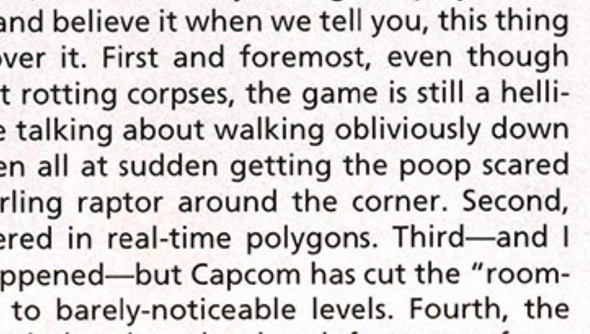
TIPS & PICK! TRICKS

Capcom • Fall • 1 Player

Last month, we broke the news on Capcom's upcoming PS game, *Dino Crisis*, and we're back with more. In case you missed out on our coverage last ish, *Dino Crisis*, a game which is making its debut at this year's E3 expo in Los Angeles, is Capcom's next attempt with its "Survival Horror" line. Okay; let's move on. In April, we were lucky enough to play a 70% complete version of the game, and believe it when we tell you, this thing has mega-success written all over it. First and foremost, even though you're up against dinos and not rotting corpses, the game is still a hellified blast to play. I mean, we're talking about walking obliviously down a narrow, dimly-lit hallway, then all at sudden getting the poop scared out of you by a creeping, snarling raptor around the corner. Second, *Dino Crisis* is completely rendered in real-time polygons. Third—and I don't know exactly how this happened—but Capcom has cut the "room-to-room" loading times down to barely-noticeable levels. Fourth, the acting has improved tremendously (on the other hand, for some of you cheesy hard-cores, this actually may not be a plus). Other improvements include Dual Shock and vibration compatibility, 180°, about-face capability (just hit the **R1** button), the ability to walk/run with a weapon drawn, an "infinite items" storage display and a much-improved save feature (say goodbye to typewriter ribbons!) I guess the only bad thing to say about this game is that players will have to wait until Fall to play it.







RESIDENT EVIL 2

TIPS & PICK! TRICKS

Capcom • Fall • 1 Player

Well, it's about time! One of the biggest complaints leveled against the N64 during the past three years has been regarding the blatant omission of "horror" type games—the most obvious absentee being Capcom's *Resident Evil* series. Fast-forward to a new, improved "right now"; *RE2* on the "Fun Machine" is just as gruesome and bloody as its PlayStation and PC counterparts, albeit a tad bit fuzzy in spots (oh, that's a shocker). Actually, the on-screen characters themselves appear much more crisp than they do on the PlayStation; it's the surrounding pre-rendered scenery that seems a little washed out. Not too worry, though; the N64 version still way, way-yyy cool. Gameplay is identical, loading times are gone and the overall resolution is much higher thanks to Expansion Pak compatibility. In addition, this version contains new secret costumes and an option to adjust the level of graphic content (default is standard red-colored blood and gore.) Just when you thought it couldn't get any better, Capcom has decided to seed dozens of extra "files" throughout the game. The additional files contain background information perfect for getting N64 owners up to speed on the world of *Resident Evil*. Finally, an inside source told us there's a good chance that this game will be somehow link to a future RE game. Hmmm...could it be...GAME BOY COLOR?!! N64 owners: Go out and buy this game right now, please, or we're going to have to come to your house tonight and kill you ourselves.

ACCLAIM: **1** Also in development for PlayStation, *Re-Volt* lets players control miniature R/C cars. There are 28 cars, interactive environments, 14 different tracks, a track editor and even four-player battle arenas. Coming this Fall. **2** On sale this Summer, *Shadow Man* will be available for both the N64 and PlayStation. Acting as former hit-man Mike Le Roi a.k.a. Shadow Man, the player "walks between worlds" to wage a personal war against a host of serial killers and other assorted wackos.In addition to loads of killing activities, the game features puzzle solving elements and multiple ending scenarios. The N64 version employs an off-shoot of last year's scorching hot *Turok 2* graphics engine, so the game should end up looking mighty sweet. **ACCOLADE:** **3** *Slave Zero* is a city-based mech-style combat game for Dreamcast. The graphics in this game appear second to none, with huge, screen-filling killing machines and fantastic explosions. The game will release late Spring for the PC, then a DC release by the end of the year. **4** Also heading to Sega's Dreamcast, *Test Drive 6* ushers in improved car handling and upgraded graphics. As expected, there are brand new interactive environments with which to race through. **5** Accolade promises that *Demolition Racer* will feature 2-Player split-screen deathmatches with up to 16 cars on-screen simultaneously. A tall order, but we look forward to it. **ACTIVISION:** **6** Activision continues its business of porting PlayStation games to the N64 with Disney Interactive's *A Bug's Life*. It's basically the same game but with more graphic power! To infinity and beyond! **7** *Tony Hawk Pro Skater* could turn out to be the best skateboarding game on the PlayStation. **8** *Spider-Man* is being developed by NeverSoft, and the word so far is that this will be the absolute best Spidey video game ever made (yup; even better than Sega's Genesis version.) This 3-D polygon action/adventure game is based on the classic comic book series of the '70s, so prepare to do battle with the likes of the Doc Ock, Scorpion, Mysterio and more. Unfortunately, we'll have to wait till Summer of 2000 (at the earliest) for a release. **9** *V8: Second Offense* is also coming to the N64 and Dreamcast. Expect more of the same vehicular manslaughter, only better. **10** Activision's *Wu Tang* is...um, an interesting title, to say the least. Seemingly inspired by last year's *Thrill Kill* (make that *Thrill Killed*), the game is set up for four-player simultaneous combat. Check out our full preview on page 59 of this issue. **11** We got a sneak peek at *X-Men* several months back and were pretty impressed with the big, bulky character designs. Could this fighting game challenge Capcom's *"Versus"* series? Hmmm...we'll see when it becomes available for both PlayStation and N64 later this Fall. **AGETEC:** **12** One of our favorite games last year at the Tokyo Game Show was UEP's *Rising Zan: The Samurai Gunman.* AGETEC, formally known as ASCII, will be bringing this unique gun and sword action game to the U.S. this Fall. **13** From Software's *Shadow Tower* is similar to *King's Field* in that it's a first-person action/adventure. Not your traditional RPG, when you encounter an enemy in you can log them in a journal, then use them in combat at a later time. **14** From Software's *Ecco Night* is a first-person adventure/puzzle game. You transport to a mysterious ship and meet up with souls which are floating around. The idea is to provide closure to the souls' tormented existences. Sounds innovative. **15** *Bass Landing* is a hard-core fishing simulator. **CAPCOM:** **16** After a long hiatus from the Game Boy, Capcom returns with *Street Fighter Alpha*. It may be tiny, but all the moves are there! **17** No, that's not an illusion! *Resident Evil* is coming to the little hand-held and looks like it's gonna rock. Actually, we played an early rev, and it *does* rock! The game is set up with all of the rooms from the mansion in the original PlayStation version. **18** Also coming out this Fall is

none other than *Ghouls 'N Ghosts* for the Game Boy. **19** *Power Stone* will be one of the first third-party games for the U.S. release of the Dreamcast this September. This game redefines 3-D fighting in every way. You can get a taste for it at your local arcade! **20** About a month after the Dreamcast's launch over here, Capcom will release *Marvel vs. Capcom.* One thing that absolutely shocked us about the Japanese version is that there's virtually no loading time! Finally, a system that can handle Capcom's great arcade titles. **21** *1942* will also join the list of excellent Game Boy games coming out of Capcom this Fall. By all accounts, 1999 is a huge year for Capcom. Keep it up guys! **CRAVE: 22** Crave is proud to bring Genki's *Jade Cocoon: Story of the Tamamayu* to the U.S., and they should be! The in-game graphics are excellent and the Pokemon-style gameplay should get many people hooked into collecting various monsters. **ELECTRONIC ARTS: 23** After several delays and a transfer of publishing dibs from MGM Interactive to EA, Black Ops is almost finished with *Tomorrow Never Dies.* The game ustilizes plot elements from the feature film. Control James Bond in a whole host of games-within-a-game. **24** The perfetc amount of style and aggression combined with the ever-growing popularity of snowboarding, *Sled Storm* is taking precedence over all other competitors with this soon-to-be-released adventure racing game. **25** To be perfectly honest, not much is known as of presstime regarding *Hot Wheels.* It's safe to assume, however, that the game involves racing. Ahem. Sorry; that was lame. **26** It's the ultimate revenge, and we don't need to wait for *Maken X* to release for Dremamcast, either! In Medal of Honor, players get to travel back to 1944 and blast the ever lovin' stuffing outta the Nazis! This title features first-person, 3-D killing action and loads of WWII-era weapons. "Danna, na-nanna, na-nanna, na-nah!" **EIDOS: 27** After numerous delays, Eidos has everyone wondering when *Legacy of Kain: Soul Reaver* will hit the store shelves. Currently it's listed as a June release. Will it live up to all the pre-release hype? Or will all the delays be evident in the game? We'll see. **GT INTERACTIVE: 28** *Driver* is lookin' oh-so-sweet! You're the "wheel man", an undercover cop and it's up to you to infiltrate the mob. Cruise the streets in old cars, then stop by the pad to check messages on your answering machine. The graphics are absolutely intense. **29** *40 Winks* is a cutesy PlayStation action/RPG filled with stubby little characters. Not much else is known at this point; we'll keep you informed. **INTERPLAY: 30** Along with Midway, Interplay wasted no time in aligning themselves as a U.S. Dreamcast developer. The much anticipated *MDK 2* will be released for the new system sometime next year. **KONAMI: 31** Only the quickest fingers in the West can win at this game! *International Track & Field* is on its way to the Game Boy. **32** "Easy Left, Easy Right!" *Rally Racing* will also be coming to the Game Boy **33** Soul of the Samurai also experienced many delays but Konami hopes to have it in stores by August. Players will get to choose a male or female character and go on a slashing spree in this feudal-era Japanese sword fighting adventure. **34** Before *Final Fantasy VII*, *Suikoden* was the most popular RPG for the PlayStation. *Suikoden II* probably won't regain the RPG crown for Konami, but people have been waiting for a sequel for quite some time. Also scheduled for an August release. **MIDWAY: 35** *Hydro Thunder* is on its way to Dreamcast and Nintendo 64! For the real story on this killer coin-op conversion, flip back to page 62. **36** *Paperboy* is coming to the Game Boy Color and it's as fun as ever. **37** With its high polygon count and *Super Punch-Out!!*-style boxing action, *R2R* is gonna smoke on the DC. **38** *WDC* is Midway's offering in the world of *Gran Turismo*-type racing games. We hope it rocks.

MIDWAY: **39** *MK: Special Forces* is the second attempt at branching the MK franchise into new avenues. After dismal results with *Mythologies*, Ed Boon and company are working hard to get this one right. *Special Forces* will be a combination of many things, not the least of which is *Tomb Raider*-esque 3-D action. Players can elect to take care of business as either Jax or Sonya. Sounds good, but…snowboarding?! Come on-nnn!! **40** Think of *Mortal Kombat Gold* as "*MK 4.5*" or "*MK 4 Extreme*". This DC exclusive game features 15 characters (minimum), some of whom are returning from *MK 2* and *MK 3*. This ultimate *MK 4* offering contains the best-looking *MK* graphics to date—they even slam Midway's very own Zeus board. Each character consists of 3,000+ polygons and the whole thing runs at 60 frames per second. No one can ever accuse Midway of not rushing to Sega's aid, that's for sure. **NAMCO:** **41** A bit of a "bone" thrown to Sega, *Soul Calibur* is a DC exclusive by Namco. This home version actually looks much, much cleaner and sharper than the coin-op original. The game will also run at a full 60 fps; a nice touch. **NINTENDO:** **42** The huge PC hit *Command & Conquer* will make its way over to the N64. Nintendo is adding a few turn-based strategy games to their line-up including *StarCraft* and *Ogre Battle III* to pull in a whole new PC crowd. **43** *Jet Force Gemini*'s release date has slipped several times over the past two years but Nintendo is hoping it will be ready in August. **44** The follow up to last year's awesome baseball game is out now. Check out *Ken Griffey Jr.'s Super Slugfest!* **45** *F-1 World Grand Prix II* will deliver more simulated historical race challenges like last year. Coming in July. **SEGA:** **46** Climax Graphics' *Blue Stinger* is a bit of a mixed bag. The *RE*-inspired action/suspense is intriguing and the graphics certainly look sweet, however, control issues and a strange sense of "Just what the heck is going on here?" tend to bog down the fun factor. Sega does not plan to release this one in the U.S., so expect a 3rd party to pick it up at some point. **47** *Sonic Adventure* is hands-down the most well-rounded, action-packed DC title so far. The American version will feature reworked camera angles and better collision detection, making it nearly perfect. If you pick up a Dreamcast on September 9th, be sure to lay your mitts on this one. **48** *HOTD 2* is an exact replica of the Naomi-powered coin-op. Even though the DC light gun seems a tad strange, this game definitely rules. **49** *DD 2* may be an odd choice as a DC port, but we're looking forward to it regardless. **50** From Climax Entertainment—the makers of *Landstalker* and *Dark Savior*—comes *Landers*, a massive Dreamcast RPG. **51** Sega has not made it official, but *Get Bass* should make it as a U.S. release by the end of the year. **52** Reactions have been mixed regarding *CART: Super Speed Racing*, however, the game is still on track for a release at launch time. **SQUARESOFT:** **53** Squaresoft's biggest title yet, *Final Fantasy VIII*, has finally been given a U.S. release date of August 31st. Look no further than *Tips & Tricks* for an awesome strategy! **54** Even though *Saga Frontier* wasn't nearly as popular as *FF VII*, Square hopes that by releasing *SF 2*, people will come to appreciate the series. **THQ:** **55** *Knights of Carnage* is a side-scrolling beat-'em-up in the vein of that ancient EA game for the Genesis, *Sword of Sodan*. **56** *Shao Lin*, a 4-Player fighting fest, is being buttoned up as I write these words. Characters have multiple fighting styles, including Bruce Lee's very own Jeet Kune Do. **UEP SYSTEMS:** **57** The DC exclusive version of *Cool Boarders* should blow some minds. Slopes are littered with all sorts of obstacles, including animals and breakable objects. **VIDEO SYSTEM:** **58** *Harrier 2001* has been pushed back to Fall of '99, due to the fact that the game has been virtually re-programmed from the ground up.

LAST MINUTE GAMING INFORMATION...

• Since the announcement of PlayStation 2 in March, several key developers have announced that they are currently developing for the new system. Konami, Game Arts, Human, Capcom, Namco, Gasto, Koei, 3DO, GT, Core, Acclaim and Naughty Dog have all confirmed. The list will probably grow as the year goes on. Namco has hinted that its first game on PlayStation 2 will be on CD rather than DVD in case the system is delayed and they have to convert the game for the PlayStation. Core has announced that *Fighting Force 2* is in development. In other Sony news, rumors are circulating in Japan that the price of the PlayStation will drop to ¥9,800 sometime in the Spring. Could this mean another price drop announcement for the U.S. could be made at the E3 expo?

• Namco will release an updated version of its popular fighting game called *Tekken Tag Tournament*. As the name suggests, players will be able to choose two or three characters for a single match and switch them around in mid-battle (much like *King of Fighters*). There will be a fifth button which will allow the "switch." The game will play on the System 12 arcade hardware (just like *Tekken 3*), so a PlayStation conversion is not out of the question.

• Sega has announced a new fighting game on the Naomi board called *Waffupu*. The game has a unique fighting system, much like Ocean's *Fighter's Destiny*, where the player wins by scoring points by throws and knock-downs. No word yet as to a Dreamcast port of the game.

• Sega of America has officially announced the U.S. release of the Dreamcast. At a recent retailer's conference (Toys 'R' Us, Best Buy, Kaybee, EB, Babbages, etc.), Sega confirmed that the release date of its new system will indeed be September 9th, 1999 (9/9/99). The Dreamcast will be sold for $199.99. A Sega spokesman went on to say that 30,000 pre-orders have been taken through various retail chains, a number which is expected to grow to 200,000 pre-orders immediately prior to the launch. Sega predicts that by April 1st of next year, 1 million Dreamcast units will be sold in the U.S. The elusive $100 million marketing campaign will finally start kicking in toward late summer. Sega also promised that in the month of September, the public will be indundated with Dreamcast advertisements; that "Sega will be all you see." Further details regarding the Internet service for the Dreamcast were scheduled to be revealed at the Electronic Entertainment Expo in May. Although Sega of America was debating whether to include a DVD drive for the U.S. launch, those plans seem to have fallen through. 10 to 12 titles will be available at launch and by next year there should be more than 100 titles. Named as launch titles from Sega: *Sonic Adventure*, *Virtua Fighter 3tb*, *Super Speed Racing*, *House of the Dead 2*, *Sega Rally 2*, *NFL Football* (tentative title), *NBA Basketball* (tentative title) and *Geist Force*. Sega also said to look out for the following titles from third party developers around launch time: Power Stone, Ready 2 Rumble, Castlevania (although unlikely) and Soul Caliber.

• More Dreamcast News: Sega's *Shen Mue* will be released as four separate chapters starting with *Chapter 1: Yokusuka*. The first chapter will be released in Japan in August for a mere ¥2,800, almost half the cost of a regular Dreamcast game. Sega claims that even though the game is divided into four parts, the first chapter alone holds approximately 50 hours of gameplay. ASCII and Yuke's (the creators of *Evil Zone*) will release an RPG for the Dreamcast based on a popular Japanese comic called *Berserk Fighter*. Bizarre Creations has announced *Metropolis Street Racer*, a super-detailed racing game featuring cities from around the world such as Tokyo, San Francisco and London. Interplay is working on *MDK 2* for the Dreamcast. Players will be able to play all three characters this time: Kurt, the Doctor and Max, the dog! SNK's *The King of Fighters: Dream Match 1999* will be released on June 3rd in Japan. The game will have a few 3-D features and will be able to link to the Neo•Geo Pocket. *Cool Boarders* by UEP Systems is also slated for June and is also rumored to link to the Neo•Geo Pocket. The U.S. version of *Sonic Adventure* will feature new music by Chris Vrenna, percussionist for Nine Inch Nails.

• Konami just announced that an enhanced version of its popular game will be released in Japan in July called *Metal Gear Solid Integral*. The game is basically the same as *Metal Gear Solid* but includes a third disc with 300 VR training modes. The game will also feature a 1st-person mode! A special edit mode will allow users to place enemies wherever they want. The Japanese version will also feature full English dialogue, so import buyers shouldn't be intimidated. Konami's ever popular "Bemani" series is taking a step further with the *Bemani Club Kit*. The *Bemani Club Kit* can connect any two Bemani machines together to create a super-mix. Games that can connect to each another are: *Beatmania* (*Hiphopmania* in the U.S.), *Dance Dance Revolution* and *Guitar Freaks*. Owners of the PlayStation version of *Beatmania* and *Dance Dance Revolution* can insert their memory cards into the arcade machines to access custom and hidden stages. A PlayStation version of *Guitar Freaks* is also in the works. Lastly, *Metal Gear* creator *Hideo Kojima* has been saying that he is currently working on a Dreamcast title. Could it be a *Metal Gear* sequel?

• Square/EA's much anticipated title, *Final Fantasy VIII*, is being readied for an August 31st U.S. release date. Need we say more? Other Square/EA U.S. release dates are: *Chocobo Racing*, *Final Fantasy Anthology* (FFV and FFVI) and *Chocobo's Mysterious Dungeon* for January 2000.

• Capcom keeps them coming with *Street Fighter III 3rd Strike: Fight for the Future* scheduled for arcades this summer. *Street Fighter* veterans will be pleased to know that the car-smashing bonus stage will be back. New characters will be introduced like Q, Remy, Twelve and others. Old characters will all have new animations and moves. In other Capcom news that should excite all PlayStation fans, the third installment in the *Resident Evil* series—called *Resident Evil: Nemesis*—is scheduled for release in Japan this Fall. The game takes place 24 hours before and after the events in *Resident Evil 2*. Speaking of *Resident Evil 2*...*Resident Evil 2* is confirmed for the N64. It will utilize the 4 MB expansion pack and will have N64-exclusive features. *Rival Schools Evolution 2* will soon be released in Japan. The game has more mini-games but less fighting, making it a questionable product for the U.S. However, the game does have a *Bust-A-Groove*-like dancing game! After a long hiatus from the Game Boy, Capcom is working on *Resident Evil*, *Ghouls and Ghosts*, *1942* and *Street Fighter Alpha 2* for the Game Boy Color! And last but definitely not least is Capcom's announcement of a new *Spawn* game for the Naomi arcade machine and for Dreamcast. More details on the Spawn game will be coming!

• In N64 news, Rare has finally announced some U.S. release dates: *Jet Force Gemini* on August 30th, *Perfect Dark* in late September and *Banjo-Tooie* sometime in 2000. Titus sadly canned its two N64 projects, *Jungle Bots* and *Quest for Camelot*,citing that they would not appeal to the U.S. market. Crave has reportedly acquired the rights to publish the N64 version of *Gex 3: Deep Cover Gecko*. Nintendo has confirmed *Mario Golf* for release on September 13th. Midway is planning to release *Hydro Thunder* for the N64 later this year. It will support the expansion pack. Taito will release *Densha De Go! 2* for the N64 in Japan in the Fall, giving more credibility to the N64 in Japan.

• 989 Studio's mysterious title Diabolical Adventures of Tobu has been cancelled due to internal strife within the development team after numerous delays. Out of sight, out of mind?

• Game Arts' *Grandia* will come to the PlayStation in the U.S. on August 13th thanks to SCEA.

• THQ is reportedly planning to publish Riverhill Soft's *Overblood 2* in the U.S. Expect a July release.

• Our friends at Retro Studios are hiring! Retro is a new video game company that is proud to be involved in developing for Nintendo's next game console, the successor to the N64. If you are a programmer, 3-D artist, character animator, game designer or project manager and you're interested in working at one of the most promising new development houses in the industry, send your resume and demo reel to Retro Studios, Dept. GD, 3410 Far West Blvd., Suite 300, Austin, TX 78731 (or e-mail jobs.gd@retrostudios.com) and tell them you read about them in *Tips & Tricks*.

• On the weekend of August 14 and 15, 1999, fans of classic video games will converge on the Plaza Hotel in Las Vegas, Nevada for Classic Gaming Expo '99. Organized by Keita Iida and John Hardie—two of the video game fanatics who were responsible for last year's World of Atari '98 expo—the CGE is expected to attract a large number of classic game creators, many of whom will be making keynote speeches and answering questions from fans of their games. Among the luminaries scheduled to attend are Ralph Baer (the "father of video games"), Nolan Bushnell (founder of Atari Corp.), former Activision designers David Crane (*Pitfall!*), Steve Cartwright (*Megamania*) and Garry Kitchen (*Keystone Kapers*) and many more. Other highlights will include a museum of classic game systems and arcade machines, dozens of vendors and exhibitors selling classic games and systems and video game tournaments co-sponsored by the Twin Galaxies Intergalactic Arcade Scoreboard, the results of which will be pubished in the next edition of the *Twin Galaxies Official Video Game & Pinball Book of World Records*. For more information, check www.cgexpo.com on the web. We'll see you there!

• Three parents have sued 25 entertainment companies including Sega, Nintendo and Sony, after their children were killed in the infamous school shooting in Paduch, Kentucky on Dec. 1st, 1997. The suit claims that the murderer, Michael Carmeal, was heavily influenced by violent games such as *Quake*, *Doom* and *Mortal Kombat*. Carmeal even testified that those games "honed his shooting skills". The suit will most likely be thrown out before going to trial due to Free Speech rights.

• The Associated Press reported that a 10-year-old boy in Singapore was killed by an arcade game. Ang Rui Cheng was eloctrocuted by the gun controller while playing *Space Gun* at a local arcade. He was rushed to a hospital and was pronounced dead soon after. As Ara says, the moral of the story is...don't play *Space Gun*.

• At the annual CESA (Computer Entertainment Software Association) Awards held in Tokyo in April, Nintendo's *Zelda: the Ocarina of Time* was presented with the Best Game of '98 award. *Biohazard 2* (*Resident Evil 2* in the U.S.) was awarded Second Place. Other winners were: *Ridge Racer 4* for Best Graphics, *Beatmania* for Best Sound and *Pikachu Genki De Chu* for Best Character. 342 titles were submitted and 54 were nominated. The games were then voted on by the public through mail and e-mail. this year there were 130,000 participants, making this the biggest video game award event. CESA hopes to make this annual award ceremony as important as the recording industry's Grammy awards in the near future.

AERO GAUGE

Extra Tracks & Vehicles

Note: You need two controllers to input this code, and it can be difficult to get the timing right, so if it doesn't work the first time, try again. First, turn the game on and hold **L + R + Z** on Controller 2. When the title screen appears with the words "Push Start" flashing in red, quickly tap **Up** on the D-pad and the **C▼** button at exactly the same time (also on Controller 2); you must also be sure to release those two buttons at exactly the same time. Finally, press **START** or **A** on Controller 1 before the title screen disappears. If you've entered the code correctly, you should see two new courses at the track-select screen and five new vehicles to choose from, including one that's shaped like a Nintendo 64 controller. Press the **R** button repeatedly at the vehicle select screen to change the color of the N64 controller to red, green, blue, black or yellow.

Turbo Start

At the starting line, hold the **A** and **B** buttons. When the announcer says, "Set, Ready, GO!" release the **B** button just before he says "GO!" This gives you a speed boost at the start of the race.

Turbo Boost

During a race, hold the **A** button to accelerate, hold **Z** and point the joystick hard **Left** or **Right**, then release both buttons and quickly press **A** again. This is a difficult trick to perform, but if you do it successfully, you'll hear a sound and you'll get a burst of speed.

AEROFIGHTERS ASSAULT

Stage Select

When you turn the game on, wait for the Video System and Paradigm Entertainment logos to disappear, then enter the following code as soon as you see the planes flying in the introduction sequence: **Up, C▼, Left, C▶, Down, C▲, Right, C◀, L, R, Z.** You'll hear a sound to confirm that the code has been entered correctly. Next, choose "Main Game" from the Game Mode menu; a stage select menu will appear, allowing you to practice any stage. The save options are deactivated when this code is in place, so your regular game scores won't be affected.

Secret Character: Mao Mao

Wait for the words "Press Start Button" to appear on the title screen, then press **C◀, C▼, C▶, C▲, C◀, C▶, C▼**. At the "Pilot Select" screen, you'll find a new character called Mao Mao who pilots an F-15. Note: You may have already gained access to Mao Mao if you continued more than three times in the Tokyo stage.

Secret Character: Spanky

To access another secret character, you must complete the following requirements:

1) Earn more than 170,000 points by the end of the Pacific Ocean stage; this will allow you to play the first bonus stage, "Air Landing".

2) Clear the Tokyo, Pacific Ocean and Air Battle stages in less than 1,400 seconds; this will allow you to play the Desert stage during daytime.

3) If you clear the daytime Desert stage, you'll access the second bonus stage, "Shuttle Defense."

4) If you clear the "Air Landing" and "Shuttle Defense" bonus stages, you'll enter the third bonus stage, "Goliath Defense," after the Fortress level.

5) If you clear the "Goliath Defense" bonus stage, you'll enter the fourth bonus stage, "Space," after the Antarctic Ocean and Ice Cave levels.

6) If you clear the "Space" bonus stage, you'll be able to access Spanky, an X-29 pilot.

ALL-STAR BASEBALL 99

When the "story" screens appear during the game's demo mode, quickly press **C▶**, **C▲**, **A**, **B**, **C▼**, **C▲**, **C▶**. If you're fast enough, you'll hear Shao Kahn say, "Khameleon." Now Khameleon is a selectable character at the character-select screen.

Play as Motaro
Choose any character, hold High Kick + Low Kick and point the D-pad or joystick away from your opponent before the battle begins. When the fighters appear on the screen, you might change into Motaro. Note: This trick only works in certain stages, including the Wasteland and Jade's Desert.

Play as Shao Kahn
Choose a character, hold High Punch + Low Punch and point the D-pad or joystick **Down** before the fight begins. When the fighters appear on the screen, you might change into Shao Kahn. Note: This trick only works in certain stages, including the Rooftop and The Pit 3 stage.

Hidden Game #1
After playing 50 consecutive games in two-player mode, you'll get to play a hidden game that's similar to *Pong*.

Hidden Game #2
After playing 100 consecutive games in two-player mode, you'll get to play a hidden game that's similar to *Galaxian*.

Hidden Game #3
When fighting on The Pit stage, keep an eye on the moon in the background. If you see a shadow of any kind flying in front of the moon, press the **Z** button; if you do this, the winner of that match will get to play a hidden game that's similar to *Space Invaders*. This game also appears if you play 150 consecutive games in two-player mode.

Stage Select
At the character-select screen, highlight Sonya, hold **Up** and press **START**, then choose your character normally. A "Select Kombat Zone" option will appear before the fight, allowing you to choose the stage you'd like to fight in.

Super Hard Mode
At the character-select screen, highlight Kano, hold **Down** and press **START**, then choose your character normally. When the "Choose Your Destiny" screen appears, you'll find that all of the battle plans have been changed to make them much more challenging. The "Novice" plan now includes three endurance matches instead of one, and the "Champion" plan starts with battles against Khameleon and Motaro—followed by a whopping *eight* endurance matches.

Free Play
When the "story" screens appear during the game's demo mode, quickly press **Down**, **Down**, **Up**, **Up**, **Right**, **Right**, **Left**, **Left** on the D-pad. You'll hear a crunch sound to confirm the code. Now when you die in a one-player game, you'll find that the credit counter has been replaced by the words "Free Play", which indicates that you can continue as many times as you wish.

Secret "More Kombat" Menu
When the "story" screens appear during the game's demo mode, quickly press Run, High Punch, Low Punch (that's **C▼**, **B**, **A** in the default control configuration.) You'll hear Shao Kahn say "Outstanding!" Now press **START** to access the Kombat menu, then hold **Up** and press **START**. When the main menu appears, you'll find a new option with a blue question mark; this cheat menu allows you to activate the stage-select feature, disable throwing, activate unlimited "run" meters, turn on "Bloody Kombat" and activate the two secret characters, Human Smoke and Khameleon.

Secret "Kombat Cheats" Menu
When the "story" screens appear during the game's demo mode, quickly press High Kick, Low Kick, Run, Low Punch, High Punch, High Punch, High Punch, Low Punch, Low Punch (that's **C▲**, **C▶**, **C▼**, **A**, **B**, **B**, **B**, **A**, **A** in the default control configuration.) You'll hear a voice say "Ow-uh!" Now press **START** to access the Kombat menu, then hold **Up** and press **START**. When the main menu appears, you'll find a new option with a red question mark; this cheat menu allows you to activate Free Play mode, disable the Fatality timer (giving you infinite time to do a finishing move), set one-round matches or turn the game's collision boxes on. The collision boxes are tools that the programmers use to check the characters' hit detection, but you can use them to study the attack ranges and defense parameters of your favorite fighter. When you attack, a blue box appears that shows the area of the screen that's within range of your attack and a red box appears that shows your opponent's vulnerable area. If the blue box touches the red box, your attack will connect. Note that the above code also activates the blue question mark menu as described above.

MULTI RACING CHAMPIONSHIP

Unlock Bonus Cars
To access the two locked garages, you must beat each track in Championship mode to gain access to Match Mode, then race in Match Mode and defeat both the Hannya and the Dues cars. If you don't want to take the time to do this, you can access both cars with the following trick: Plug in two controllers and access "Vs. Race" mode. Choose "Machine", then—when the car select screen appears—highlight one of the locked garages and press **B**; the word "Selected" will appear to confirm your choice. Both players can choose the Hannya or Dues in this mode; even better, if you use this trick to choose one of the "locked" garages for Player 1, then exit "Vs. Race" mode after leaving the car select screen, you can choose "Championship", "Time Trial" or "Free Run" mode from the main menu and the Hannya or Dues you chose in "Vs. Race" mode will still be selected.

STAR WARS: SHADOWS OF THE EMPIRE

Cheat Mode

Enter your name as "_Wampa_ _Stompa" or use the "Rename" option to change your name to this. Note that there's a space before "Wampa" and two spaces before "Stompa," and that the "W" and "S" are the only letters that are capitalized. Now start the game and enter any stage. During the game, press **START** to pause; when the pause menu appears, hold **L** + **R** + **Z** + **C◀** + **C▲** + **C▶** + **C▼** + **Left** on the D-pad. While continuing to hold those buttons down, point the analog joystick slightly to the left—not all the way to the left—and hold it there until you hear a sound. After you hear the sound, point the analog joystick slightly to the right—not all the way to the right—and hold it there until you hear another sound. Repeat the process with the analog stick to the left again, then again to the right, and once more to the left; you should hear a sound to confirm at each step, and at the end of the procedure, a cheat menu will appear at the top of the screen in pink letters. (Now you can release all of the buttons!) Use **L** and **R** to scroll through the different cheat codes and press **A**, **B** or **START** to activate the one you wish to use as follows:
• Get all stuff (weapons, items)
• Invincibility
• 50 lives
• Sleepy villains (press **Up** on the analog joystick to change the message to "Villains are sleepy," now all of your enemies are frozen in place and won't attack you. Press **Down** to deactivate.)
• Kill Dash
• Teleport (to another location in the current stage)
• (Skip to) Next level
• (Restart) This Level
• (Return to) Previous Level
• Wall Ghost (Press **Up** on the analog joystick to turn this option "on;" now you can walk into walls and go right through locked doors. Press **Down** to deactivate.)

You'll notice the new item at the pause menu called "Game Secrets;" check this out to find some additional cheats that you can use in certain stages; one of them gives you a fully three-dimensional mapping system. Finally, with this cheat code in place, if you choose "Quit" from the pause menu and return to the stage-select menu, you'll find that all of the game's stages have been unlocked.

Play as X-Wing or TIE Fighter

Play through the Skyhook Battle stage until you reach the Skyhook station. Once you're given control of the Outrider, change the camera angle until you have a view of the Outrider from behind. Next, press **START** to pause, then hold **Left** + **L** + **R** + **Z** + **C◀** + **C▶** + **C▼**; with all of those buttons held down, press **Up** and **Down** on the joystick to change your ship to an X-Wing or Imperial TIE Fighter.

Control Enemy Characters & Vehicles

Enter your name as "_Wampa_ _Stompa" or use the "Rename" option to change your name to this, with the exact specifications as described above under "Cheat Mode." Now start the game and press **START** to pause; when the pause menu appears, choose "Options" and set the controls to "Traditional." Now you can take control of other characters in the game as follows:
• In the "Battle of Hoth" stage, play until the AT-STs appear, then hold **C▶** and press **Up**, then press **C▶** repeatedly until you see an over-the-shoulder view of an AT-ST. Press **Left** or **Right** on the D-pad to steer it or hold **Up** to fire its primary weapon. You can still control your snowspeeder with the analog joystick while you're in AT-ST mode (if you can see it!) Once the code is in place, press **C▶** to toggle between the snowspeeder and the AT-ST.
• In the "Escape from Echo Base" stage, hold **C▶** and press **Left** on the D-pad; you'll be controlling one of the Wampa creatures that are being held in cages on this level. (Note: This code won't work at the "Easy" difficulty level because the first Wampa cage will be empty.) You can still control Dash with the analog stick while playing as the Wampa. Use the D-pad to control the Wampa; hold **Down** to attack. Once the code is in place, press **C▶** to switch between Dash and the Wampa.
• Also in the "Escape from Echo Base" stage, hold **C▶** and press **Right** on the D-pad; you'll be controlling an Imperial Snowtrooper. You can still control Dash with the analog stick while playing as the Snowtrooper. Use the D-pad to control the Snowtrooper; hold **Down** to fire. Once the code is in place, press **C▶** to switch between Dash and the Snowtrooper.
• In the "Gall Spaceport" stage, hold **C▶** and press **Left** on the D-pad to control a Wampa or **Right** on the D-pad to control an Imperial Stormtrooper; these both work as described under "Escape From Echo Base" above.
• In the "Imperial Freighter Suprosa" stage, hold **C▶** and press **Right** on the D-pad to control a Stormtrooper as described above.
• In the "Sewers of Imperial City" and "Xizor's Palace" stages, hold **C▶** and press **Right** on the D-pad to control one of Prince Xizor's armored guards.

See the Ending

Enter your name as "_Credits" (the first character is a space) or use the "Rename" option to change your name to this. When you choose a level and start the game, you'll go directly to the game's ending and credit sequence. Note: When entering the name, be sure that the "C" is the only letter that's capitalized. After the credits begin to repeat, press **START** to return to the title screen; when it appears, point the analog joystick in the **Up/Right** position to see a photo of the game's creators.

Wampa Noises

Enter your name as "R_Testers_ROCK" or use the "Rename" option to change your name to this. Now you can hear Wampa sounds whenever you access any menu option.

SUPER MARIO 64

Cinema Camera Change

Make sure you have a second controller plugged into the Player 2 port when you defeat Bowser and finish the game. When Mario flies off to the castle and Peach appears with her Toad guards, you can use the analog joystick on Controller 2 to change the camera angle. This also works in the game scenes that appear while the credits are rolling.

TETRISPHERE

Secret Scene

Choose "Single" from the main menu, then choose the "New Name" option and enter the name "VORTEX". Choose "OK" to confirm the name, then press and continue to hold the **RESET** button on the Nintendo 64. After about five seconds, you'll see an animated sequence with characters from the game being pulled into a vortex; the scene will repeat itself as long as you hold the **RESET** button down.

Secret Game Mode

Choose "Single" from the main menu, then choose the "New Name" option and enter the name "LINES". A new game mode called "Lines" will appear at the bottom of the menu on the right side of the screen.

Stage Select

Choose "Single" from the main menu, then choose the "New Name" option. At the name entry screen, hold **C▶** + **C▼** and press the **L** button; you'll see the numbers on the menu change to different characters. Use these new characters to enter the following "name": Saturn, Flying Saucer, Rocketship, Heart, Skull. Now choose "Start" and enter the "Rescue," "Hide + Seek" or Puzzle" game modes; you'll find that you can now choose any stage to start on.

Bonus Music

Choose "Single" from the main menu, then choose the "New Name" option. At the name entry screen, hold **C▶** + **C▼** and press the **L** button as above to change the numbers on the menu to different characters. Enter the name "GaMEBOY" but use the alien head character in place of the letter "A". Now access the Audio options from any point in the game and you'll find ten secret music tracks that sound suspiciously like Game Boy tunes.

See the Credits

Choose "Single" from the main menu, then choose the "New Name" option and enter the name "CREDITS". You'll be taken immediately to the game's credits sequence.

TOP GEAR RALLY

Cheat Codes

Each of the following codes can be entered at any time during the game, but it's best to do them slowly and deliberately while you're at the menu screens before the race:
• Access all cars (except bonus cars)—**A**, **Left**, **Left**, **C▼**, **A**, **Right**, **Z**
• Access All Tracks (except Mirror Tracks)—**A**, **Left**, **Left**, **Right**, **Down**, **Z**
• Access Mirror Tracks—**Right**, **Up**, **Left**, **C▼**, **Right**, **Down**, **Z**
• Access Milk Truck—**Down**, **A**, **Right**, **Z**, **Right**, **Up**, **C▼**
• Access Helmet Car—**Up**, **Up**, **Z**, **B**, **A**, **Left**, **Left**
• Access Ice Cube Car—**C▼**, **Up**, **B**, **Right**, **A**, **C▼**, **A**, **Right**
• Access Beach Ball Car—**B**, **B**, **A**, **Left**, **Left**, **C▼**, **A**, **Right**
• Access Mirror Cars—**Right**, **Up**, **Left**, **C▼**, **C▼**, **A**, **Right**, **Z**. With this code in place, press **C▼** at the Car Select screen to change any car into a mirror-textured vehicle.
• Non-Blur Mode—**B**, **Left**, **Right**, **Up**, **Left**, **Z**, **Right**. This code turns off the N64's "bilinear filtering" effects, making the graphics appear to be more "pixelated."
• ZBuffer Mode—**C▼**, **Z**, **B**, **Up**, **Up**, **Right**. The ZBuffer is used by the N64 to determine if a pixel that is about to be drawn is in front or behind the pixel already on the screen. This buffer is exactly the same size as the buffer that contains the color information for each pixel. When you enter this cheat, the N64 continuously copies the current ZBuffer data into the color data, and the result is a freaky mess of colors on the screen. Enter the code again to turn ZBuffer Mode off.

See the Credits

Choose "Options" from the main menu, then highlight "Load Configuration" and press **C▼**, **Right**, **Down**, **Z**. You'll see the full credit sequence—not the abbreviated version that can be called up from the Options menu.

VIRTUAL CHESS 64

Debug Mode

At any time during the game, press **C▲**, **C▼**, **C◀**, **C▶**, then **Up**, **Down**, **Left** and **Right** on the D-pad. With this code in place, symbols will appear on the screen whenever the computer is "thinking" about its next move. Unfortunately, these symbols won't mean anything to you unless you're the guy who programmed the game.

At the character-select screen, quickly press **Down**, **Right**, **Left**, **Left**, **Up**, **Down**, **Right**, **Up**, **Left**, **Left**. You'll hear the announcer say, "All too easy!" to confirm the code. Now press any button to choose the highlighted character; Grox will not appear until the fight begins.

Play as Exor

You'll hear the announcer say, "All too easy!" to confirm the code. Now press any button to choose the highlighted character; Exor will not appear until the fight begins.

Infinite Continues

At the first *War Gods* title screen—not the one with the "Start/Options" menu on it—quickly press **C◀**, **C◀**, **Right**, **A**, **B**, **C▲**, **C▶**. You'll see the screen flash and the announcer will say, "All too easy!" if you've entered the code correctly. Now access the Options menu and highlight the "Continues" option; you'll find a new setting called "Free Play."

Cheat Menu

At the first *War Gods* title screen—not the one with the "Start/Options" menu on it—quickly press **Right**, **Right**, **Right**, **B**, **B**, **A**, **A**. You'll see the screen flash and the announcer will say, "All too easy!" if you've entered the code correctly. Now access the Options menu; you'll find a new option called "Cheat Menu" which allows you to handicap either player, choose which stage you'd like to fight in, disable the game timer or activate an "Easy Fatality" option. With this option turned on—and the "Fatalities" option activated at the main menu—you can perform any character's fatality with ease by simply standing at the correct distance (as described above) and pressing all four Punch and Kick buttons when the "Prove Yourself!" message appears.

WAVE RACE 64

Ride the Dolphin

Enter Stunt Mode and choose the Dolphin Park course. Now perform all of the possible stunts (handstand, ride backwards, stand up, somersault, vertical flip off a ramp, barrel roll off a ramp clockwise and counter-clockwise and submarine dive off a ramp), go through all of the rings and finish the course before the timer expires. The easiest way to accomplish this difficult task is to do all of the non-ramp stunts at the beginning of the course, before you reach the ramps; you can even do one stunt—like the stand and somersault—before you cross the starting line and you should still have enough time to reach the first checkpoint. There are only four ramps in the course, so you must do a different ramp stunt on each of them. If you do all of the above correctly, you should hear the dolphin chattering when you cross the finish line. With this trick accomplished, return to the main menu, choose Championship mode and select the "Warm Up" option. When the Watercraft Select menu appears, highlight the character you want, hold the joystick **Down** and press a button to confirm your choice. (If you want the alternate-color character, hold **Up** on the D-pad while holding **Down** on the joystick.) When the race starts, you'll be riding the dolphin instead of a jet ski. With the dolphin trick accomplished, you'll also find that the game's demo mode alternates between the normal demo and a new demo of people riding dolphins.

WAYNE GRETZKY'S 3D HOCKEY

Invisible Players

Pause the game and select "Replay". Press **L** or **R** to highlight a player; that player will flash for a brief instant. If you press **Z** quickly before the player stops flashing, he will turn invisible. Press **START** twice to return to the game; that player will stay invisible. Note that pressing **Z** causes the highlight to return to the player closest to the puck, and that highlighting an invisible player will cause him to become visible again. Note the order in which you advance through the players as you press the **L** or **R** button. To turn your entire team invisible, advance through the lineup with **L** or **R** until you reach the last player on your team, press **Z** to turn him invisible, then use the same button to advance to the next-to-last player, press **Z**, etc. You can't turn the goalie invisible with this trick, but if you pause the game while no player is controlling the puck, you can turn the players on both teams invisible.

Multiplayer Practice

To play in Practice mode with more than one player, each player aside from Player 1 should hold the **A** button at the title screen, then have Player 1 highlight "Practice" and press **A**. If you do this, all of the other players who were holding **A** will get to play in practice mode with you.

Instant Start

To start a game quickly, hold any button except **A** at the main menu and press **START**; you'll immediately jump to the face-off with you playing as Gretzky on the Rangers.

Select Opposing Team

When playing against the computer, go to the "Select Your Team" menu, highlight the team you wish to play against and press the **C▶** button three times; you'll hear a click to confirm that the highlighted team has been chosen as your opponent.

Player Size Tricks

At the Options menu, hold the **C▲**, **C◀** or **C▼** button and press **R**; you'll see a line of numbers called "Specials" at the bottom of the screen. The first six digits control the way your character appears in the game as follows:

Big Heads—Hold the **C▼** button and press **R** until the first two digits of the "Specials" option are "10".

Huge Heads—Hold the **C▼** button and press **R** until the first two digits of the "Specials" option are "01".

Tiny Heads—Hold the **C▼** button and press **R** until the first two digits of the "Specials" option are "11".

Tiny Players—Hold the **C◀** button and press **R** until the third digit of the "Specials" option is "1".

Giant Players—Hold the **C◀** button and press **R** until the fourth digit of the "Specials" option is "1".

Short, Fat Players—Hold the **C▲** button and press **R** until the fifth digit of the "Specials" option is "1".

Tall, Thin Players—Hold the **C▲** button and press **R** until the sixth digit of the "Specials" option is "1".

Some of these effects can be combined; for example, if you want giant players with tiny heads, use the above codes to change the first four digits of the "Specials" option to "1101". Some of the codes also change the announcer's voice in a humorous way.

Forfeit Game

During a game, press **START** to pause, then access the Options screen. Hold the **L** button and press **C◀** nine times; the seventh digit of the "Specials" option will be changed to "1". When you return to the game, you'll find that the game clock is at 0:00 and the score is 1-0 against you.

Trade Players

At the Options screen, hold the **L** button and press **C▼**, **C▼**, **C▲**, **C▲**, **C▼**, **C▼**, **C▶**, **C▶**, **C▼**; the eighth digit of the "Specials" option will be changed to "1". Now return to the main menu, choose "Records" and access the "Team Stats" option. When the team stats appear, press the **C▲** button ten times. A secret "Modify Teams" menu will appear. Use the D-pad or joystick to choose two teams to modify, then press **A**. The roster of the first team appears on the left; press **B** to change the team on the right. Use **Up** or **Down** to highlight the name of the player you want to replace, use **Left** or **Right** to highlight the name of the player you want to replace him with. Press **A** to make the substitution. Press **START** to advance to the other team to modify; when you're finished (or if you just wanted to mess with one team) press **START** to return to the "Team Stats" screen.

Frequent Fight Mode

At the Options screen, hold the **L** button and press **C▲**, **C▲**, **C▼**, **C◀**, **C▶**, **C▶**, **C◀**, **C▶**, **C◀**. The "Specials" option will appear with the ninth digit changed to "1". Now you'll have a fights breaking out every time a player is checked—but only if you're playing in "Arcade" mode with fighting turned "on". Also note that this code is automatically deactivated at the end of each period.

Access Super Teams

At the Options screen, hold the **L** button and press **C▶**, **C◀**, **C◀**, **C▶**, **C◀**, **C◀**, **C▶**, **C◀**, **C◀**. The "Specials" option will appear with the tenth digit changed to "1". Now you have access to four super teams at the "Select Your Team" menu: USA, Canada, Williams Entertainment and the "99ers".

See Company Logos

Press **Z** at the Options menu to view the different company logos that appear on the sides of the rink during the game. This only works if you choose Options from the main menu, not while a game is in progress. You can also do this at some of the other menu screens, like the "Records" menu.

THE NEED FOR SPEED

Hidden Tracks
Choose "One Player" from the main menu and select "Tournament" mode. Choose "Password" at the tournament menu and enter the password "TSYBNS", then press **START**. With this code in place, you can now return to the main menu and choose any game mode. When you reach the "Race Location" menu, you'll find a new, secret track called "Lost Vegas".
"Rally" Tracks
With the cheat password in place, highlight any track and hold the **L1** and **R1** buttons. You'll see the name of the track change to "Rally"; this changes the pavement to a slippery dirt road like those in *Sega Rally*. If you hold **L1+R1** while the "Rusty Springs" track is highlighted, you'll gain access to yet another secret hidden track; this one's a desert course called "Oasis Springs".
Secret Car
With the "TSYBNS" password in place as described, choose any game mode and access the car select screen. Highlight any car and hold **L1+R1**; now you can choose the top-secret "Warrior" car, a lightweight, futuristic vehicle that can zoom from zero to 60 in 3.5 seconds flat.
Arcade Mode
Again, with the "TSYBNS" password in place, get to the "Race Location" menu and highlight the "Segment View" (or lap-select) box. Hold **L1+R1** and you'll see the words "Arcade Mode" appear. Start the game in Arcade Mode and you'll find that the game plays much more like a *Ridge Racer*-style arcade game instead of a full-on simulation.
Machine Gun Horn
Choose the Head-to-Head mode on the Race Type Screen. Select your vehicle, then pick your computer opponent's car. After selecting your opponent's vehicle, press and hold **L1**, O, □ and diagonally **Up/Left** on the D-pad until the race starts. You should see the words "LOCK OFF" in green letters, right in the middle of the screen; this allows you to access all of the tracks in Arcade or Championship mode. As soon as you see the words "LOCK OFF," if you release the △ and ○ buttons immediately you can enter any or all of the additional codes shown below; these buttons must be held down before the Infogrames logo is colored in and you must continue to hold them until the memory card message appears:
• Hold **L1** and the words "TIME OFF" will appear; now the race won't end if the timer runs out in Arcade mode.
• Hold **L2** and the words "NARROW ON" will appear; now the tracks will be more narrow in Arcade mode.
• Press **Left**, then press and continue to hold **R2**; the words "RESTART ON" will appear. This adds a "Restart" option to the "Pause" menu in both Arcade and Championship modes, allowing you to restart a race if something goes wrong.
• Press **Left**, then **Right**; the words "FULL DEBUG" will appear. Now you can see the programmers' debugging data on the screen and in a new "Pause" menu option called "Memory." Note: You can't use the "Restart" option if you enter this code.

RESIDENT EVIL

Rocket Launcher

If you finish the game in less that three hours, your saved game will allow you to start a new game with an all-powerful rocket launcher; it has infinite ammunition and can destroy just about everything with one shot.

Special Key

In the room with the large mirror, there's a locked closet that seems impossible to get into. To get the special key that unlocks this door, you must finish the game with two characters rescued (e.g. if you're playing as Chris, you must have Jill and Rebecca with you when you leave the mansion; Jill must rescue Chris and Barry.) If you do this, your saved game will allow you to start a new game with the special key. Inside the closet, you can change your character's clothes.

RESIDENT EVIL: DIRECTOR'S CUT

Easier "Advanced" Mode

Choose "New Game" from the main menu, then highlight "Advanced" and hold **Right** on the D-pad for about four seconds; you'll see the word "Advanced" turn green. Now start the game in "Advanced" mode and you'll find that it's slightly easier than usual.

RESIDENT EVIL 2

Secret Photo

In the S.T.A.R.S. office, check Wesker's desk—it's the one right in front of the S.T.A.R.S. logo. You'll get a message that says, "It's trashed. Someone must have searched the desk..." Continue to check this desk over and over again; on the 50th try, you will obtain a film. Take the film to the darkroom to develop it and you will get to see a secret photo of Rebecca from the original *Resident Evil*.

Alternate Clothes

Start a game in Normal Mode and go through the city area (including the gun store and the bus) without picking up any items. If you go to the alley by the stairs in the R.P.D. lot, you will meet a very special zombie: It's Brad Vickers, the helicopter pilot from the original *Resident Evil*. Enter the police department and get the rifle/grenade launcher from the S.T.A.R.S. room, then go back out and kill Brad (you can't take him down with your normal gun). Next, check his body; you'll find a special key. This key opens the locker in the darkroom; if you open it, you will be able to change into a different set of clothing at any time.

Shoot the Camera

Go to the outside area in the basement where the two dogs jump down from the fence, stand with your back facing the manhole and walk forward until the camera angle changes. Now draw your rifle and shoot; "bullet holes" will appear on your TV screen!

Bonus Weapons

If you beat Scenario One with an "A" or "B" ranking and your total playing time is under two-and-a-half hours, you will get a rocket launcher with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under three hours, you'll get a sub-machine gun with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under two-and-a-half hours, you get both of these "infinite ammo" weapons plus a Gatling Gun, also with infinite ammo. You'll find the bonus weapons in the chest.

Secret Character: Hunk

To play as the bio-suit guy from the opening movie, you have to achieve an "A" Ranking in either Leon or Claire's Scenario Two; to do so, you must beat the scenario in under three hours without using any of the "infinite ammo" bonus weapons (see above). When you finish doing this, you will be asked to save a second time after the normal Scenario One/Scenario Two save. The saved game will say "Hunk," choose this to play as him.

Secret Character: Tofu

To play as a giant tofu, you must follow the instructions for playing as Hunk (see above). Once you've done this, you must continue playing until you have chained three sets of Scenario Ones and Scenario Twos (a total of six games). When you finish doing this, you will be asked to save an additional time. The saved game will say "Tofu," choose this to play as him. (Note: After you qualify for the "Hunk" save, you don't have to continue to get high rankings in order to access Tofu; just keep playing and always remember to save.)

RESIDENT EVIL 2 (DUAL SHOCK VERSION)

Extreme Battle Mode

Play through the game with either character and complete Scenario 2. After the credits roll, you will be rated as usual and a message will tell you that there is another mode. You will be asked to save the regular game and then it will ask you to save a second time for the Extreme Battle data. Extreme Battle mode can then be accessed by calling up the Load screen and selecting the EX Battle data from the Arrange Mode menu. If you're lucky enough to have kept a Scenario 2 save on your memory card from the original Resident Evil 2, you can use that with the Dual Shock version and simply complete the game to get Extreme Battle. When you beat the first level of Extreme Battle mode, you will earn the ability to play as Ada Wong; you can also play as Chris Redfield from the original *Resident Evil* if you beat the second level.

RIDGE RACER REVOLUTION

Title Screen Trick

If you hold two **L** or **R** buttons at the title screen, you can move the spotlight around with the D-pad and change its focus with □ and ×.

Extra Cars

If you earn a "perfect" in the *Galaga '88* loading game by destroying all of the enemy ships before they fly away, you'll get eight extra cars to choose from.

Buggy Mode

If you earn a "perfect" in the *Galaga '88* loading game by destroying all of the enemy ships with exactly 40 shots, you'll get the eight extra cars as described above, but all of the cars on the track will be changed into funny-looking buggies when you start the race. This is very difficult to do, but here's a cheat that makes it easier: During the *Galaga '88* game, press and hold **Down + L1 + SELECT + △ + R1**; all of the enemy ships will be automatically destroyed with exactly one shot each.

Secret Cars

Once you place 1st in all three courses in normal race mode, three super cars will appear to race against you in the Time Trial mode as follows:

Novice—13th Racing Car
Intermediate—13th Racing Kid
Expert—White Angel

If you can beat these cars in the Time Trial mode, they will become available for you to race with in all game modes.

Spinning Mode

Choose "Time Trial", then at the main menu, highlight the "Start" box, hold the Brake button and press the Accelerator button; continue to hold both buttons down until the race starts. (You'll have to press the Accelerator twice because the Brake button will take you back to the title screen.) Now you're playing in Spinning Mode. When you reach a turn where it's possible to spin your car 360°, the words "Spinning Point" will appear on the screen. Try to spin your car around; it helps if you choose a vehicle with a low "grip" rating. When you finish the turn, a toy car will drive across the screen and show you your total points for that spin. After the race, watch the replay to see a chart that shows your score on each Spinning Point along with your total for the entire race.

You'll see her costume change to the way she looked in *Street Fighter II Champion Edition*; now her fireball is a "charged" move.
Play as "Shin" (True) Akuma
At the character-select screen with the "shortcut" turned off, highlight Akuma, hold the **SELECT** button for one second, release it, then move the cursor to the following characters in order, stopping for about a second on each one: Adon, Chun-Li, Guy, Rolento, Sakura, Rose, Birdie, Akuma, Bison, Dan, Akuma. Fight Against "Shin" (True) Akuma
Start a game in Arcade mode by choosing your character with a Punch button (or a Kick button if you're on the Player 2 side.) Play through seven matches without losing a round or using a continue, and get more than three "Perfect" victories. If you do this, "Shin" Akuma will appear before the eighth match as the final boss. If you lose to him, he will consider you to be inferior and he will not reappear.
Mid-Level Bosses
Play through five battles in Arcade Mode without losing a round and win more than five rounds with Super Combo or Custom Combo finishes. After your fifth win, a new mid-level boss character will appear and there will be a short dialogue on the screen between the two fighters.
Choose a Victory Pose
After you defeat your opponent—but before the "K.O." symbol appears—hold the **SELECT** button and one of the Punch or Kick buttons to choose from up to six different winning poses. Not all characters have six poses, however.

STREET FIGHTER COLLECTION

If your timing is right, you'll see a mysterious silhouette on the match-up screen. You're playing as Akuma.
Super Street Fighter II Turbo: Play Against Akuma
Play a one-player game in Arcade Mode at any difficulty level without losing a single match; you must also try to defeat each opponent as quickly as possible. If your total playing time is low enough by the time you reach the final battle against M. Bison, you'll see Akuma jump into the screen and defeat Bison for you; now you must fight Akuma instead.
Super Street Fighter II Turbo: Remove Super Meter

Street Fighter Alpha 2 Gold: Play as Cammy
To access Cammy in Street Fighter Alpha 2 Gold, you must play as M. Bison in Arcade mode and beat the game with a score that's high enough to take the #1 position on the High Score list. Once you've done this, enter your initials as "C A M"; now you can play as Cammy—in "Versus" mode only—by highlighting M. Bison at the character-select screen and pressing the **START** button twice.

X-MEN VS. STREET FIGHTER

Secret Options Menu

At the main menu—the one that says "Battle Mode/Vs. Mode/Training Mode" etc.—press **△, △, Right, ○, L1**; you must enter this code very quickly. If you've done it fast enough, you will be taken immediately to a secret "EX Option" menu with two special options:

• "Game Mode" lets you use a limited version of the "tag team" option from the *X-Men vs. Street Fighter* arcade game. To do this, set "Game Mode" to "Original", then start a game in Vs. Mode. At the character-select screen, Player 2 must choose the same characters that Player 1 has chosen, but in the opposite order. (For example: If Player 1 chooses Cyclops, then Ryu, Player 2 must choose Ryu, then Cyclops.) If you've done all this correctly, when the fight starts you'll see that each of the four characters has his or her own energy meter. During the match, if you press Fierce Punch + Roundhouse Kick simultaneously (that's **L1 + R1** if you haven't changed the game's default control configuration) you will "tag out" and switch places with your partner, who enters with an immediate attack on your opponent.
• If you set the "Hyper Combo Gauge" option to "Full," your Hyper Combo Gauge will fill up to Level 3 automatically when playing in Vs. Mode.

Play as Apocalypse

First, beat the game in Battle Mode at any difficulty setting without losing a single round. Once you've accomplished this, start a game in Vs. Mode. At the character select screen, highlight Akuma, hold the **SELECT** button and press any action button. Apocalypse will appear as your chosen character. Here are some of his moves:

→ ↓ ↘ + Punch—Ground Pound
↓ ↘ → + Medium Punch—Shoulder Rockets
↓ ↘ → ↗ + Fierce Punch—Drill
↓ ↘ → ↓ ↘ → + any button—Mace

Alternate Chun-Li Costume

Highlight Chun-Li at the character-select screen, hold the **SELECT** button and press any action button to choose her. Chun-Li will appear in her *Street Fighter Alpha* costume.

FACEBALL 2000
Secret Rooms/Level Warps
When you find the exit in the first level of the Cyberscape game, shoot the exit five times; you'll be sent to a special room with a speedup pod, a nine-lives pod and warp doors to levels 10, 15, 20 and 25.
If you shoot at the nine lives pod three times, it will change into a key; grab it and the west wall of the secret room will open to reveal another room with a speedup pod, an automag pod, a level 3 armor pod and warp doors to levels 30, 35 and 40. (Watch for the Ninja in this room, though.)
Note that the armor pod did not disappear when you took armor from it. Travel to the west wing of the secret room and find the wall that faces south. (When you see the south wall, there will be a flashing warp door to your right; that's the exit to level 40.) Shoot the south wall once, then touch it. Then go back around the corner to the armor pod. Touch the pod and shoot it to get a key

that opens the south wall and a third secret area with two ninjas. Defeat them to find an automag pod, an armor pod and warps to levels 45, 50 and 55.
Next, go to the southeast corner of this room, shoot the east wall, then touch it. Now go back to the automag pod and touch it three times; it will turn into a key that will open the east wall in the corner, which leads to yet another secret room. Inside are automag, speedup and armor pods as well as three more ninjas and warps to levels 60 and 65.
Finally, check out the east wall of this newest room. Stand near the center of the wall and move slightly to the left; now touch this part of the wall five times and shoot it once to open a secret door that leads to the final part of the first level. Just inside the door is a warp to level 70, but there are also four ninjas waiting for you.

Secret DJ Options
Each of the following tricks works in DJ mode when your character is on the screen:
• If you highlight "SE" and tap **Right** on the D-pad, the song will restart from the beginning. Try tapping **Right** repeatedly to "stutter" the first note.
• If you highlight "SE" and hold the D-pad diagonally in the **Up/Right** position, the music will be temporarily transposed into a higher register. Likewise, if you hold **Down/Right**, the music will change to a lower key.
• If you highlight "Tempo" and hold **Left** on the D-pad, the music will play in reverse.
Print DJ Music
First, connect your Game Boy to the Game Boy Printer and turn the Printer on. Next, enter DJ mode, press **SELECT** to access the "Trippy-H" synthesiser screen, make sure the "Sound I" tab is highlighted in the upper left corner of the screen, hold the **START** button and press **A**. The Printer will spit out a long table of information that tells you everything you need to program the current tune on any Game Boy Camera. (Note: The Game Boy will stop playing music during this process. Please be patient, as the printer must pause to load data several times before the printout is complete.) You can use these printouts to exchange music data with your friends.
Flip the Stamps
When using the "Stamp" function, position any stamp on the photo and continue to hold the **A** button down. After a few seconds, the stamp will begin to "flip" horizontally; if you release the **A** button at the right time, the stamp will remain flipped over on the screen.

A special options menu will appear; this one allows you to modify 12 different gameplay parameters, including your car's downforce, the speed of your opponents' cars and much more.

Secret Cars

Choose the "Begin Career" option at the main menu and enter your name as "GO BEARS!". When the Season Setup menu appears, you'll have access to seven different stock cars instead of just one. If you enter your name as "GO BRUINS!" instead, you'll access six secret Formula 1 cars, including the cool black Team Andretti vehicle.

When you want to skip to the next stage, just hold the **L** button at any time and press **Up** on the D-pad. To warp to the previous stage, just hold **L** and press **Down**.

At any time during game play, hold **L + Y** and press **X** to rotate the screen 90° from its standard horizontal position, or hold **L + Y** and press **Z** to go clockwise. Now you can play the game if you turn your TV set on its side—which is something that many TV and monitor manufacturers do not recommend, unfortunately. To return to the normal horizontal screen, hold **L + Y** and press **B**.

Z—Walk forward
B—Walk backward
Y—Strafe left
C—Strafe right
A—Action
L—Fire weapon
R—Jump

Note: If you don't own an analog controller, this code is useless because it will assign two different functions to the D-pad; the result is that you'll be accidentally changing weapons whenever you want to turn left or right. To return to the standard control scheme, just enter the code again.

Stage Select

At the main menu—the one that says "New Game/Load Game" etc.— press **X, Y, Z, Z, Y, Z, Y, X, Y**; this code must be entered quickly. You'll see the words "Choose Stage Cheat On" appear at the bottom of the screen. Choose "New Game"; the stage-select menu will appear after you choose a difficulty level.

No Monsters

At the "select Skill" menu, press **Z, Z, X, X, Y, X, Y, X, Z**; this code must be entered quickly. A new difficulty level called "No Monsters" will appear; can you guess what happens when you choose it?

FIGHTERS MEGAMIX

Access Hyper Mode

Fight your way through Survival Mode, winning at least two fights in the three-minute trial, at least six fights in the seven-minute trial and at least 11 fights in the 15-minute trial. Now go to the Options Plus menu and you'll find the Hyper Mode option.

Infinite Health & Stage Select

After playing 500 games, go into the Options Plus menu and you'll see three more options; you can choose a caged or non-caged arena and you'll be able to give either player infinite health.

Play as the AM² Palm Tree

Play as a Slab of Meat

Simply turn the Saturn on with *Fighters Megamix* inside 29 times (or reset the game and reload it 29 times). Then start a game, highlight Kuma at the character-select screen and press **X**. The meat's moves are almost identical to Sanman's.

GUARDIAN HEROES

Cheat Mode
To access a Debug feature, choose "Option Mode" from the title screen. When the Options menu appears, highlight "EXIT" and hold the **X, B** and **Z** buttons. Here's the tricky part: While holding those buttons down, press and continue to hold **Down** on the D-pad, then quickly tap the **A** button while the "DIP Switch" option is highlighted. Note that you must tap the **A** button before the cursor starts to move down again—remember that you're still holding **X+B+Z+Down**—and you must release **A** immediately after you press it, before the DIP Switch menu appears.
If you've done this correctly, you'll find three new options at the dip switch menu. Turn the "Enemy Level Disp." option on to see the experience levels of all enemies in the Story Mode. With the "Next Exp. Disp." option on, you'll get a red-and-black "Next" indicator on the screen in Story Mode that saves you from having to pause the game just to find out how many experience points you need to go up a level. Best of all is the "Debug" option; turn this on to gain access to the following features:
• A "Test Mode" option will appear at the Options menu; this allows you to see any of the game's seven different endings.
• In Story Mode, when the character set-up menu appears, your character will have a level of 200; you'll also have 200 bonus points to max out your strength, vitality, intelligence, mental powers, agility and luck ratings.
• In Story Mode, a stage-select menu will appear after you choose your character.
• In Story Mode, you can refill your life points at any time by holding **X+Y+Z** and pressing **Up**. (If you hold **X+Y+Z** and press **Down**, you'll die instantly.)
• In Story Mode, you can skip to different scenes using the following commands:
Hold **R** and press **START** to skip ahead one event
Hold **R+C** and press **START** to skip ahead four events
Hold **L+R** and press **START** to skip back one event
• In Vs. Mode, you can choose from any of 45 different characters, including all of the heroes and enemies from the whole game.
• In Story Mode and Vs. Mode, if you pause the game and tap the **L** button, you will see boxes drawn around the characters that show how the game's collision detection works; if an enemy touches the box, it registers a hit. If you pause and tap **L** a second time, the boxes will be three-dimensional. Pause and tap **L** a third time to remove the boxes.
• If you have both the "Debug" and the "Next Exp. Disp." options turned on, the red-and-black meter in Story Mode will display your karma points instead of experience points.

HANG-ON GP

Access All Courses
Access the Option menu and highlight any icon. Next, press **B** to return to the main menu, then press **R, R, L, R, R** on top of the controller; you'll hear a xylophone sound to confirm the code. Now you can race on the previously-unavailable courses without having mastered the first three.

HEXEN

Cheat Menu
During the game, press **START** to pause, then put the cursor on "options..." and press **Up, Down, Left, Right, Y, Y, Z, Z, A, X, Up, Down, C, B**. Now access the "Miscellaneous Options" menu from the "Game Options" screen; you'll find a new option called "Cheat...". From here, you can turn on invincibility ("God Mode"), walk through walls (turn "Clipping" off), warp to any stage or access over a dozen other cheat options.

THE HOUSE OF THE DEAD

Infinite Ammo
During the game, hold **L + R** and press **Y, Y, Y**; you'll hear a sound to confirm the code. Now you'll never need to reload your weapon.
Score Display
During the game, hold **L + R** and press **X, X, X**; your score will appear on the screen. To remove it, just enter the same code again.
Secret Characters
Choose "Saturn" mode from the main menu; when the character select menu appears, hold **L + R** and press **Up, Down, X, Y, Z**; you'll hear a signal to confirm the code. Now cycle through the characters and you'll find two new ones, you can choose to play as Sophie or one of the researchers.
Cheat Menu
At the main menu—the one that says "Arcade/Saturn/Boss Mode" etc.—press **L, R, R, L, L, R**; you'll hear a signal to confirm the code. Now highlight "Arcade" or "Saturn" mode; hold **L + R** and press **START, A** or **C**. If you chose "Arcade" mode, the cheat menu will appear; if you chose "Saturn" mode, you must continue to hold **L + R** when choosing your character until the cheat menu appears. The cheat menu allows you to start at any stage, become invincible (set "Lives" to "Infinite") or even change the color of the enemy characters' blood.

INDEPENDENCE DAY

Cheat Mode
Choose "Options" from the main menu, then select "Player Name" and enter your name as "RADARMY". Now return to the main menu (the one that says "Single Player/Multiplayer/Options") and press **Left, Right, Up, Down, X, Z, Y**. A "Cheater" menu will appear with 12 different cheat options.

LAST BRONX

Portraits
To access all of the character portraits, you must play through the Arcade Mode without losing a single round or continuing; do this at the "Normal," "Hard" and "Arcade" difficulty settings to get all three portraits for each character.
Alternate Weapons
To access alternate weapons, you must first earn the third set of "Portraits" by beating the game in Arcade mode at the "Arcade" difficulty setting without continuing or losing a single round (as described above). Once you have access to the third set of portraits, enter one of the following simple codes at the character-select screen:
• For Yusaku, Nagi, Zaimoku, Lisa or Red Eye, highlight the character, hold **Left** on the D-pad and press **A** or **C**.
• For Joe, Tommy, Yoko, Kurosawa or Red Eye, highlight the character, hold **Right** on the D-pad and press **A** or **C**.
When the match starts, your character will be holding a funny weapon. (Zaimoku has a fish, Yusaku has a toy train, etc.)
Extra Difficulty Settings
Last Bronx uses the Saturn's internal memory to keep track of how many times you've turned the Saturn on with the *Last Bronx* disc inside. Once you've loaded the game 15 times, you'll find three new difficulty settings at the Options menu: Defense (in which the computer blocks a lot), Berserk (the computer goes crazy) and Judo (the computer throws a lot).

LAST GLADIATORS DIGITAL PINBALL

Hidden "Victors" Table
At the title screen, after the words "PRESS START BUTTON" appear, press **X, Y, Z, X, Y, Z, C, B, A, Up, Up, START**. You'll warp immediately to the "Victors" table, a small pinball machine which actually leads to the game credit sequence that plays when you beat the game. You'll only have a short time to play it before the credits roll, but hey, it's something. If you're some kind of nut who wants to watch the ending credits without playing the "Victors" table, use this code at the title screen instead: **C, B, A, A, B, C, Y, Z, X, Down, Down, START**.
Debug Menu
If you can read Japanese, you might get a bit more out of this cheat than the average American gamer. At the title screen—when the words "PRESS START BUTTON" appear—press **Up, Up, Down, Down, Left, Right, Left, Right, X, B, Z, R, START**. You'll be sent to a strange debugging menu with different windows of information. The only thing you can play with is the small window that says "CPK" (actually, it says "CPK • Player" in Japanese.) Move the arrow/cursor to the "Mount" button and press **A**; you'll get a list of items in the window above it. To see or hear an item, highlight it with the cursor and **A** button, then point to the "Play" button and press **A**. The items that start with the letters "CDDA" are the digital audio tracks from the CD, and the items that end with "CPK" are full-motion video scenes; most of the others will lock up the Saturn, as will the "CDDA" and "CPK" items as soon as they're done playing.
Cheat Mode
At the title screen, after the words "PRESS START BUTTON" appear, press **Up, Up, Up, Up, A, B, C, Down, Down, X, Y, Z, START**. You'll hear a sound to confirm the code. Now start the game; at any time during play (on any table), hold the **X** button and press **Up**; you'll see two sets of numbers appear in the bottom right corner of the screen. Change the number on the right by pressing **Up** or **Down** on the D-pad, then press **Z** to trigger one of the current table's special modes; for example, on the "Gladiators" table, each the following modes can be activated by pressing **Z** when the corner number is set as follows:
00—Multiball
01—Roman Triumph
02—Retiarius
03—Bloody Arena (Two-Ball)
04—Chariot Races (Three-Ball)
05—Extra Ball Lit
06—Senator Mystery Lit
07—SPQR
08—Thracians
09—Empire
10—Gladiator Show
Experiment with the other tables to find out what each of the 11 numbers can trigger. The only limitation is that you can't trigger one mode if the results of another mode are still in effect. Also, the Saturn will crash after you run out of balls on any table with the cheat mode in place. Heh heh...sorry.
To remove the numbers from the screen, hold **X** and press **Down**; while the numbers are gone, hold **Y** and press **Up** to pause or unpause the game without obstructing the screen, or hold **Z** and press **Up** repeatedly to step through the animation one "frame" at a time.
Secret Scene
Last Gladiators uses the internal clock of the Saturn to play funny tricks on you. Assuming you have entered the date and time correctly at the Saturn's "System Settings" menu, you can see a behind-the-scenes video of the making of the game before the title screen appears if you load the game between 8:00 and 11:00 A.M. At any other time of day, you'll get the standard FMV introduction. If you want to watch this hidden scene at any other time, just change the Saturn's internal time clock at the "System Settings" menu and boot the game.

THE LEGEND OF OASIS

Two-Player Mode
At any time during the game, move Leon to a place where there are no enemies on the screen. Press **Z** to open the Weapon Select window, then hold the **L** button and press **X**. A duplicate of Leon will appear; he's controlled by Player 2. To get rid of him, just enter the code again.

MANX TT SUPERBIKE

Secret Bike
Choose Arcade Mode from the main menu. When the Transmission Select screen appears, highlight Automatic or Manual, then press the **Y** button and wait for the timer to run out. When the race starts, your racer will be wearing different clothes and riding a gray bike.
Access Superbike Mode
At the main menu—the one that says "Arcade/Saturn/Time Trial" etc.—press **X + Y + Z + L + R** simultaneously; you'll hear a shout to confirm the code. Now choose "Saturn" mode and you'll be able to access the "Superbike" mode even if you haven't previously qualified for it. You'll also have three extra "Superbikes" to choose from in the Saturn and Time Trial modes.
Sheep Mode
Choose any game mode. When you are asked to select your transmission type, press **Up, Up, Down, Down, Left, Right, Z, Y**; you'll hear a sheep say, "Baaa!" (Note: When playing in Arcade mode, you must enter the code quickly because there's a five-second timer on the transmission select screen.) Now start the race and you'll find that your bike—and all of your opponents—have turned into sheep, and the background music will play a deranged version of "Mary Had a Little Lamb."

MARVEL SUPER HEROES

Alternate Colors
To choose the alternate Player 2 color for your character instead of the normal color, make sure the "shortcut" option is turned "off" at the option menu, then enter one of the following codes at the character-select screen:

• For Iron Man, Psylocke, Captain America, Shuma-Gorath or Blackheart, highlight the character, hold **Down** on the D-pad for three seconds and press an action button before releasing **Down**.
Boss Codes
To play as Dr. Doom or Thanos, you must first beat the game in one-player mode at any difficulty setting. Once you've done this, use the following codes at the character select screen with the "shortcut" option turned "off":
• Dr. Doom—Press **Down, Down**, then press and continue to hold **A**, then **B**, then **C** (you should still be holding **A** and **B** when you press **C**)

Once you've entered the codes to play as each boss at least once, both boss characters will then appear at the "shortcut" menu.
No Gem Mode
To play without the use of the Infinity Gems in two-player mode, both players should press **L + R** after choosing their characters and continue to hold them down until the fight begins; the message "No Gems" will appear at the bottom of the screen.

MAXIMUM FORCE

Arcade Mode
Choose "Options" from the title screen; when the Options menu appears, press **X, Y, X, X, Y, X, X, X, Y, X, X, X, X, Y**; you'll hear a sound to confirm the code. MEGA MAN X4

Alternate MegaMan X
At the character-select screen, enter the following code carefully: Highlight MegaMan X, press the **B** button twice, press **Left** six times, then hold **L + R** and press **START**. When the game begins, Mega Man's costume will be slightly different—his arms and legs will be purple instead of light blue. More importantly, as you play the game with this code in place, you'll find different power-up items in the capsules that Dr. Light has scattered throughout the levels.
Play as Black Zero
At the character-select screen, enter the following code carefully: Highlight Zero, hold the **R** button, press **Right** six times, release **R**, hold **B** and press **START**. Extra Turbo Speed

• "Max Round" lets you change the round counter from three to one or five.
• "BGM" gives you the opportunity to change the game's background music into the music from the original *Darkstalkers* game! Choose the "Random" setting to have the game randomly choose between the music from "Classic" *Darkstalkers* or the default *Night Warriors* music (called "Hunter" after the game's Japanese title, *Vampire Hunter*).
• "Scenery" lets you alter the colors of the game's backgrounds to match those of the original *Darkstalkers* game. Also, if you set this option to "Classic" and watch the game's introductory demo, you'll see the intro from the original *Darkstalkers* game.
• Like the previous two choices, "CPU Color" gives you the ability to choose characters with the "Classic" *Darkstalkers* colors.
• "Full Animation" will restore several insignificant frames of animation to certain characters' movements which were deleted from the default "Cut" setting.
• "BGM Test" lets you hear the game's music.
"Pause" Code
At the "Option Mode" menu, highlight "Screen Size" and quickly press **A, C, Y, Y, Up**. You'll hear the clashing steel sound to confirm the code. Now start the game, and you'll find that when you press **START** to pause, the screen will not darken and the word "Pause" will no longer appear.

PANZER DRAGOON SAGA

Fun with Zwei

If you own a copy of *Panzer Dragoon II Zwei* and *Panzer Dragoon Saga*, there are some cool things you can do with your saved game files as follows:

• If there is a saved game of *Zwei* in your Saturn's backup memory, you will start off *Saga* with one hundred Dyne for every hour you clocked in playing *Zwei*; e.g. if you've played *Zwei* for five hours, you'll start *Saga* with 500 Dyne.

• If there is a saved game of *Zwei* in your Saturn's backup memory, you will be able to obtain a music box from the girl outside Vaiman's place in the Holy District; just keep talking to her. You'll see the music box near your backpack when you're in the camp. Access it to hear the theme from *Zwei*.

• Load up any of the four *Saga* discs. Next, open the Saturn without turning it off and replace the *Saga* disc with your *Zwei* disc. When you load up *Zwei*, you will see the opening movie of the first *Panzer Dragoon* game instead of the usual *Zwei* intro.

• If you have a saved game of *Saga* in your Saturn's backup memory, you will have access to the special "Pandra's Box" cheats in the Options menu of *Zwei*.

Press **Up** or **Down** to cycle through the different countries and press **Left** or **Right** to change cities; you can even access all of the secret stages.

When you beat the game, a new option called "Battle Mode" will appear at the main menu; it's a timed challenge mode in which you must make your way through the house and kill all of the monsters as quickly as possible. To access this option without having finished the game, hold **X + Y + Z** and press **START** on Controller 2 while the words "PRESS START BUTTON" are flashing on the title screen; the "Battle Mode" will be added to the main menu options. Note: You must have a saved game to play in Battle Mode.

Part 2 of 2

GUARDIAN'S CRUSADE

by Geoff Arnold

Last issue's strategy guide finished up the first half of *Guardian's Crusade* with the defeat of Yugonga and the acquisition of the Chester Flute. You should be on the island where Kerple Village is located; go to the beach on the northwest side of the island and use the flute to summon Chester the Water Bug, who can transport you across the ocean. Although there are many lands you have yet to visit, you should first go straight north past Den Heldar. Keep going north until you hit a beach. Exit Chester and walk south back to the town.

Apparently the Artema cult has moved into Den Heldar, luring adventurers, mercenaries and the like with the promise of a great "treasure" in the North Tower. No one has ever returned from the Tower—not even Darkbeat and Ibkee, who went there on some type of rescue mission.

Tasks

1. As with any new area, the monsters outside of the town are stronger, so take the time to buy new weapons and armor.
2. Talk to the townspeople and gather information about the North Tower and the missing people from the town. Someone has even taken the time to hire a private detective, but he also has had lit tle luck finding anyone.
3. When you talk to the Mayor's daughter, she begs you to help find him. She informs you that he also has traveled to the North Tower in search of the missing townsfolk.
4. Go to the house right next to the weapon store and knock on the door. The resident will become angry and throw a Living Toy "Insectorfly" at you.
5. Pick up as many Peach Potions and Hamburgers as you can and travel to the North Tower.
6. From the entrance, walk south into the next room.
7. This large room contains four smaller rooms, each with a treasure chest. The northwest and southeast rooms contain Living Toys "Douwner" and "Toughwall," while the northeast and southwest rooms contain a Devil's Shield and a Crystal Sword, respectively. After picking up all the chests, walk to the south part of the room and through the door into a passageway.
8. Walk through three hallways with stairs that go up.

9. Take the north exit to get to the roof.

10. When you get to the roof, the tower appears to be deserted. Nehani suggests that you guys head back, but be sure to check the roof first. There is a Living Toy "Vegas" sitting on the south west ledge of the Tower, and there is a chest with Splint Mail just to the east of the entrance.

11. As you get to the bottom floor, you see a monster walking through a secret passageway on the southwest wall. Follow it through the wall and down into the basement.

12. Walk down two flights of stairs and grab the Living Toy ("Mossman") from the treasure chest on the west wall. Then take the north entrance into another room, where you run into Darkbeat and Ibkee. Darkbeat explains that he too is also here to rescue the townspeople and tells you not to get in the way.

13. As you follow him into the room, you see him get into a fight with two monsters. Since you are also here to rescue the towns folk, Darkbeat enlists your help and tells you to fight the Blue Monster while he takes on the Red one.

14. After defeating both monsters, Darkbeat informs you that he is heading back to Den Heldar to collect the reward. There are townsfolk left behind, however (including the Mayor of Den Heldar), and each one thanks you before leaving the Tower. The last one tells you that there is a man from Trisken still in the room and that he needs help. Take the north entrance in the room, travel down the hallway and step into the corridor of light.

15. Before walking down the hallway, be sure to heal your party and restore your PP if necessary. Walk down the hallway until you encounter the man from Trisken. He asks you to help him to stand, but you notice a strange being at the top of the corridor. As you approach the Guardian, it asks you one question...then it suddenly attacks you.

16. After receiving a ridiculous amount of experience and money for defeating the Guardian, a treasure chest appears and out pops Solomon's Ring. Nehani starts to mention something about the Ring, then changes her mind for some strange reason.

17. After beating the Guardian, the man from Trisken is able to walk again and explains that he was on orders from Kalkanor to find a jewel that was hidden here, but found only monsters. He runs back to tell Kalkanor what happened. Before leaving, he tells you his name is Jadik. He is a watchmaker from Trisken and invites you to stop by whenever you have the chance. He would like to give you something in return for saving his life.

boss: BLUE MONSTER

HP	800
Special Attacks	Jet Punch, Gas Missile
Items	none

As with the other Boss Monsters, now is the time to put your Living Toys into action. Deploy any two attack Toys of your choice (preferably Contributor and Pyro) and attack with Knight. If you get low on HP, you can use angel to heal both you and Baby at the same time. If Baby seems to be taking too much damage, make use of your new Toy, Toughwall. Toughwall takes all the damage dished out to the character that it protects. If you have the chance, be sure to use your other new Toy, Douwner, which lowers both the offensive and defensive power of your enemy. Watch out for the Blue Monster's pesky Gas Missile attack, which causes damage as well as poisoning your characters. If you are around level 27, you should be able to defeat the Blue Monster within five rounds.

boss: GUARDIAN

HP	1,050
Special Attacks	Prism Drill, Burst Shot
Items	Solomon's Ring

Another Boss Monster? Although the Guardian isn't too tough, he can deal out the damage rather quickly—especially to Baby, so be sure to pay attention to your HP throughout the battle. The Pyro and Contributor Living Toys seem to do decent damage against the Guardian, as does Samurai. With some luck, the Guardian should be defeated within five rounds as well.

18. Walk back through the corridor of light, head back upstairs into the main lobby of the Tower, leave the Tower and travel back to Den Heldar.

19. Once back in Den Heldar, go to the Mayor's house and talk to him. He is so overcome by your heroism and the rest of the missing townsfolk that he gives you his family heirloom, a Living Toy called "Windmeister." Stock up on any supplies you may need and take the east exit out of town.

20. Follow the path outside of town to the south and east to a beach, then use the Chester flute to call Chester. Travel south, then east past Kerple until you hit an island. From the island, travel south around a peninsula, then look for a beach just to the east. Pass up the first beach and keep heading south until you reach another beach where you can exit onto land. From the beach, head straight east until you reach a deserted house. Look on the east side of the house for a Living Toy, "Stare." Beware of the irritating Mimic that guards the chest!

21. From the abandoned house, follow the path north across the bridge, then east, then north again around the mountain to reach the town of Trisken.

Trisken

Items/Toys

1,000 Rb
1,500 Rb
Bug
Living Toy "Dr. Snooze"
Living Toy "Tarantula"
Living Toy "Sacribat"

The busy town of Trisken has a lot to see and much more to do. It's the biggest city in the game by far, so take the time to get to know it a little; you will be spending a bit of time here. Although the town seems to be overrun by tourists, there are many people here with good information. This is where Kalkanor resides when he isn't off trying to save the world. Apparently, a big celebration has just occurred, with Kalkanor and his friends as the main attraction.

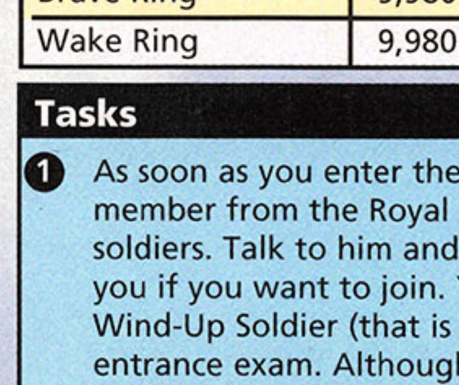
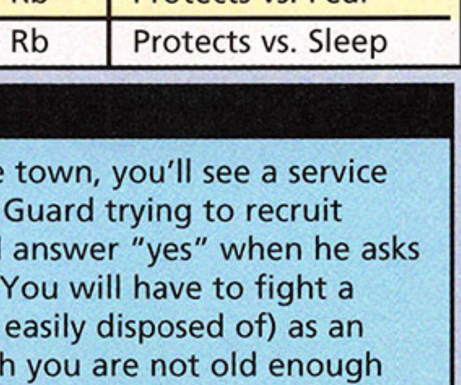
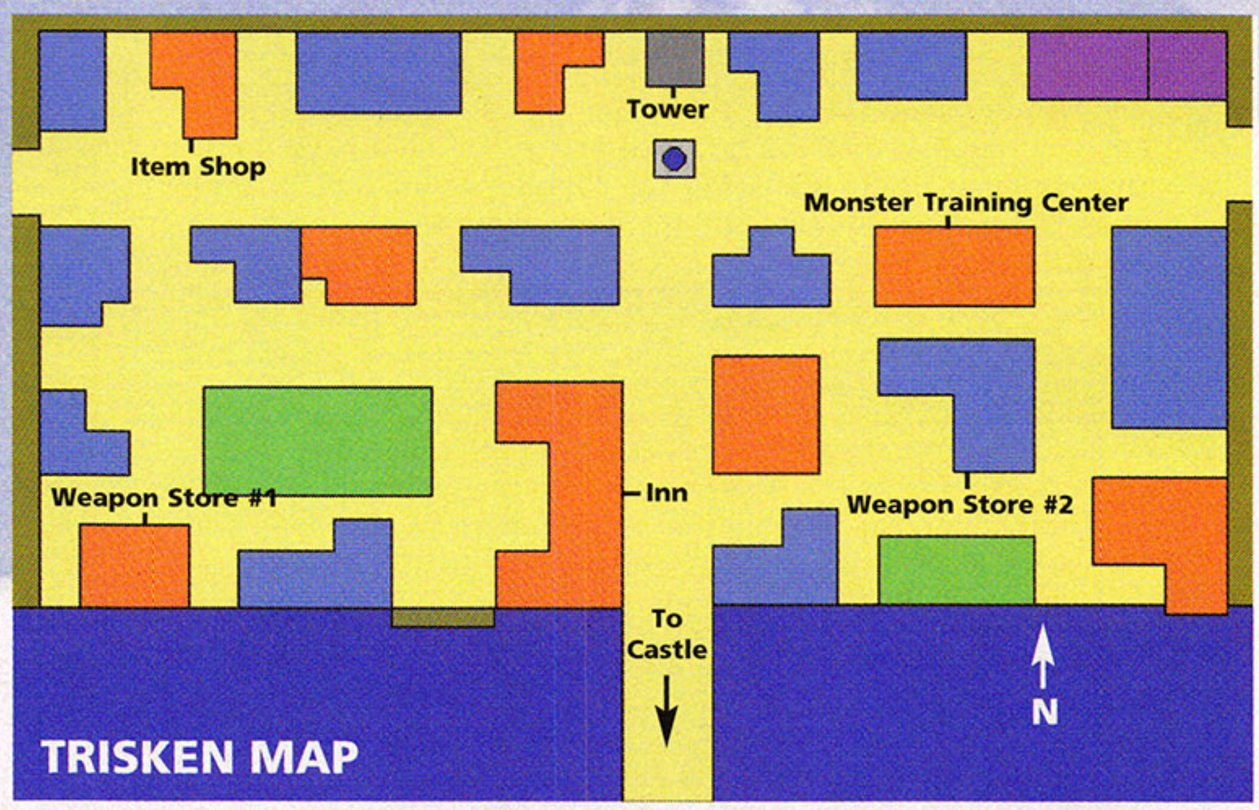
Tasks

1. As soon as you enter the town, you'll see a service member from the Royal Guard trying to recruit soldiers. Talk to him and answer "yes" when he asks you if you want to join. You will have to fight a Wind-Up Soldier (that is easily disposed of) as an entrance exam. Although you are not old enough yet to join the Guard, the recruiter gives you a Living Toy ("Dr. Snooze") for your trouble.
2. Make your way to the center of town and talk to the man walking around the fountain to pick up a wallet. You will get a small reward for this later.
3. Be sure to buy new weapons and armor. Even though they are expensive, the monsters in this area are pretty tough, so you've gotta be prepared.
4. Walk to the southwestern part of town by the dock and return the man's missing wallet for 1,000 Rb.
5. Go to the watchmaker's house (just west of the tower) and talk to him to get a Living Toy, "Tarantula."
6. Walk up to the top of the tower to get another Living Toy, "Sacribat."







7. Walk to the eastern side of town and go into the Monster Training Center. This is a useful place; it makes Baby stronger in both offense and defense against certain types of elemental monsters. In order to get stronger, two things must be accomplished: You must pay 100 RB for each of Baby's levels for each monster, then Baby must defeat the monster in single combat. There are six types of monsters in all, representing the Fire, Water, Earth, Wind, Light, and Dark elements. When Baby defeats each monster, he will get stronger against that specific type of elemental creature. If Baby is around level 30, he should have no problems defeating each monster. Just be sure to restore his HP after each battle.
8. When you are done training Baby, head to the southeastern part of town to the corner house and pick up a Bug. Next, walk west and south across the bridge to reach the castle.
9. Talk to the couple on the west side of the courtyard two times to receive 1,500 Rb. Talking to them a third time will result in a loss of the money you were given.
10. As you enter the castle, you see the King in his audience chamber with Kalkanor and his party. Kalkanor tells you to enjoy the party, while Ramal hints that Karmine must be stopped before unleashing something terrible. Gwinladin becomes angry for some reason when he finds out that you res cued Jadik. (Hmmm...) Even when you talk to the noblewoman, she agrees that something is wrong with Gwinladin. After conversing with her, she finds out that her purse has been stolen. Furious, the King seals off the room and declares that the thief is one of the people in his chamber. While inspecting a nobleman in the bottom corner of the room, Baby indicates that there is something wrong with this particular man. Afraid of being caught, the thief flees upstairs, only to find that there is no way out. Chase him back to the chamber to duke it out and return the missing purse. *92, 93*

11. After fighting the thief, Baby suddenly decides to take it upon himself to leave the area in a big hurry.
12. Be sure to talk to the noblewoman after returning her purse to get a use ful item, a Water Ring, which powers you up against Fire Elementals.
13. Unsure of where Baby went off to, take the east exit out of town and fol low the path to northeast towards Garam. You will find Baby sitting at the checkpoint on the road that leads to Garam. After a brief interlude with Baby, the King shows up and orders the guards to open the gates that lead to Garam.
14. Follow the path north, then east through the mountains; keep heading east to reach Garam.
15. Note: Be careful in this area. The monsters here are relatively strong and can dish out high damage quickly. Don't hesitate to call in a Living Toy to help in the battle, especially to help with your offense.

boss: THIEF

HP	375
Special Attacks	Punchfest, Steal, Mud Attack
Items	Stolen Purse

The thief is relatively weak and shouldn't pose any problem. Don't worry about his "Steal" attack; everything he steals will be returned when you defeat him.

Garam

Items/Toys
Hamburger
Sickweed
Strange Bug
Living Toy "Sumode"

A small town secluded in a valley, Garam lies just southwest of the icy mountain passageway that leads to God's Tower. It seems that Garam has a big problem: There is a Giant on the loose that has kidnapped a little girl. The Mayor ordered the Giant's cave to be sealed off to avoid further attacks on the village, and the only way to get to Denvrado and God's Tower is to the north, through a blocked passage that can only be opened after the Giant's defeat.

Hamburger	100 Rb
Cheeseburger	500 Rb
Peach Potion	10 Rb
Bubble Gum	20 Rb
Terror Seed	20 Rb
Go Go Bean	25 Rb

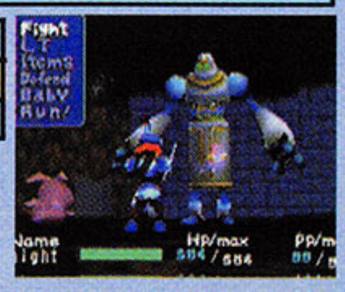
Tasks

1. Talk to all the townspeople to learn about the Giant and how it affects life in Garam.
2. Go to the house stable next to the Mayor's house and search under the Knoygn for a Hamburger.
3. Go just to the southwest of the stable and search the Teddy Bear upstairs for a Rotten Weed.
4. Go to the house just east of the last one and search the jar upstairs for a Strange Bug.
5. Buy (expensive) new weapons and armor.
6. Go to the eastern end of town toward the Giant's cave. On the way, a man stops you to ask you to save his daughter, Anna, from the Giant. He explains that Anna was playing in the cave when the Giant came out. He has unsealed the cave in an effort to get somebody to rescue her. Go into the cave.
7. Look along the west wall for a treasure chest with a Living Toy, "Sumode."
8. Walk up to the Giant and inspect it. Although the Giant seems to be a statue, as you start to look for Ann it comes to life and attacks!

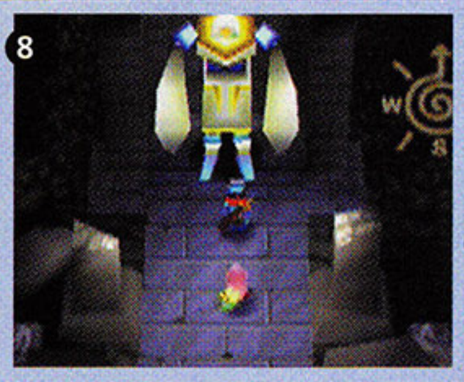
boss: RUVAL

HP	1,200
Special Attacks	Blaster, Earthbomb
Items	none



Ruval can be pretty tough, but if you use your Living Toys wisely, he can be defeated within six rounds. I suggest using Contributor and either Samurai or Windmeister. Keep concentrating on attacking until your HP are low, then use Angel to heal yourself. Baby might take extra damage due to his low defense rating, so watch his HP carefully. If you are around level 32 you shouldn't have a problem defeating Ruval.

9. After the battle, Ruval falls to his knees, then Ann comes out and tells you to lay off the gentle Giant. It just so happens that Ruval is a good guy, and he was only trying to help Ann escape when the Mayor ordered the cave to be sealed off. As you start to exit, Kalkanor shows up again with his merry bunch and decides to take it upon himself to have Gwinladin destroy Ruval. Unfortunately, Ramal casts a spell on you and you just sit idly by as Ruval is destroyed. When the battle is over, Gwinladin takes a gem from Ruval, and informs the others that it's time to make haste to the Tower. Angry at what Kalkanor has done, you shake off the spell and rush Kalkanor with sword in hand. Although you put up a valiant fight, Kalkanor is just too strong and defeats you easily. He explains that he is trying to stop Karmine from turning the world into an evil place full of monsters.
10. Go to the Inn, restore your HP and save your game.
11. Leave the town through the north exit and follow the long path north, then east, then north again through the snowy mountains to reach Denvrado.



Denvrado

Items/Toys
Living Toy "Hornet,"
Living Toy "Gabriel"

A frozen little town on the way to God's Tower; there isn't much to offer here at Denvrado, not even a weapon store. You hear the townspeople talk of a Holy Sanctuary with a Saint named Aruvin, and there is an eerie feeling about the quiet town. Where else can you find a woman married to a zombie?

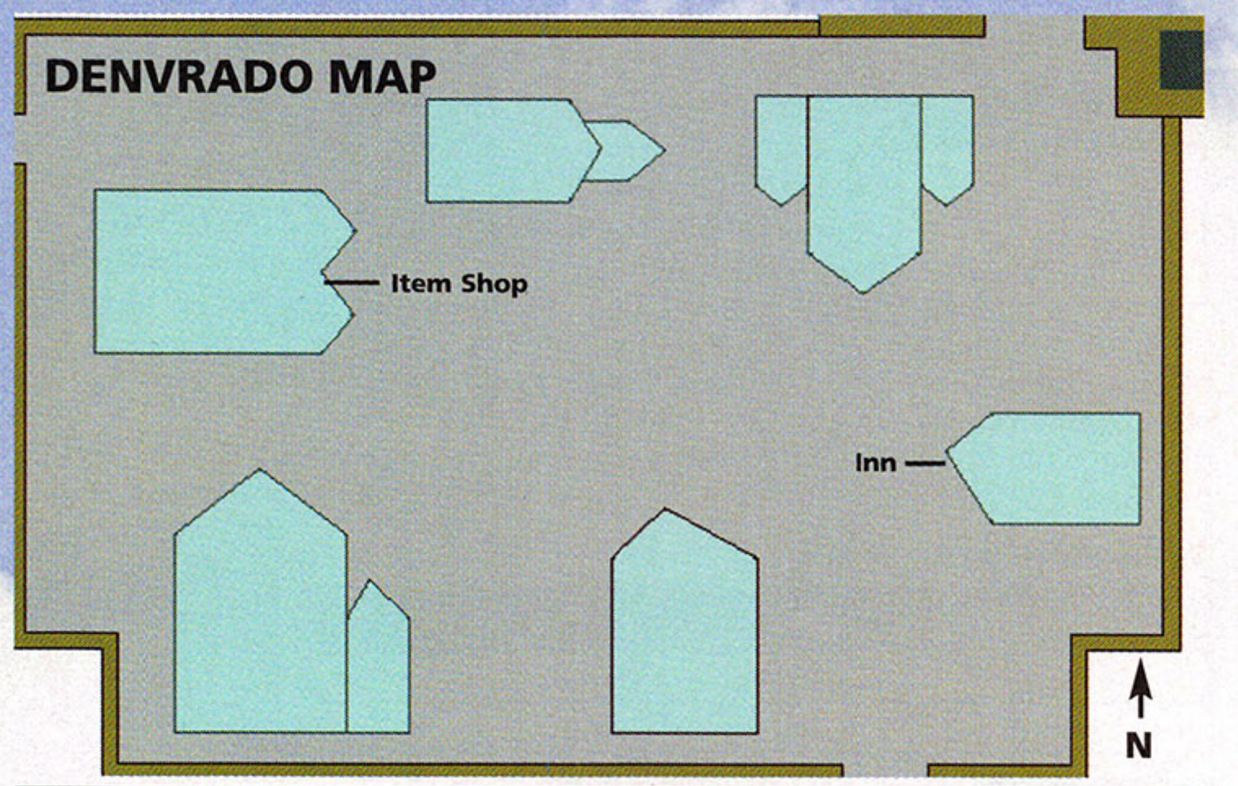
Guardian's Crusade

Item List

Item	Cost
Hamburger	100 Rb
Cheeseburger	500 Rb
Spinach Snack	800 Rb
Peach Potion	10 Rb
Sick Weed	10 Rb
Rotten Weed	15 Rb
Toadstool	20 Rb
Wooden Cross	1,000 Rb

Tasks

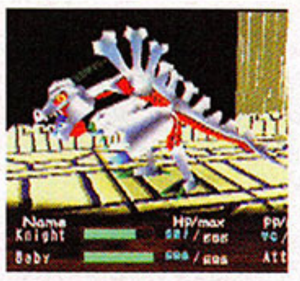
1. Walk to the center of town to where a man is playing a guitar for a woman. Talk to him and he will offer to sell you his record. Buy it for 1,000 Rb to receive a Living Toy, "Hornet."
2. If you talk to Shawn (on the cliff near the Mayor's House), he will show you a lovely view of the mountains and God's Tower. It seems that God's Tower is just on the other side of the mountains.
3. Be sure to buy any items you need at the item shop before leaving town; this will be your last chance to buy anything before attempting God's Tower. When you are finished, leave town through the west exit.
4. Follow the path through the mountains to the south west, then north, then west again until you reach the end of the mountain pass.
5. Keep walking along the path to the north, then around the lake to Aruvin's Church.
6. Talk to the disciple on the left to heal your wounds and to save. He tells you that Kalkanor's party has already set off for God's Tower to find Karmine, but something is amiss.
7. Apparently, Aruvin is too busy sleeping...er, I mean "meditating" to help you right now. Looks like you're on your own on the way to God's Tower.
8. You want to be at level 35 or better before attempting to enter God's Tower; now would be the time to catch up on experience if you haven't done so already. The Liobirds in this area will reward you handsomely with about 3,300 experience for each battle, so building levels should be a piece of cake.



9. From Aruvin's church, walk straight east around the mountain and into the dark forest surrounding God's Tower. Keep heading east through the forest, travelling south around a mountain, then head north and west around the top of the mountain to reach God's Tower.
10. Finally! God's Tower is in sight. As you approach the Tower, you see Kalkanor and his party confronting Karmine. There's a plot twist here that we don't want to give away; let's just say that you end up fighting a monster named Glor.

boss: GLOR

HP	1,500
Special Attacks	Nail Blade, Death Breath
Items	none

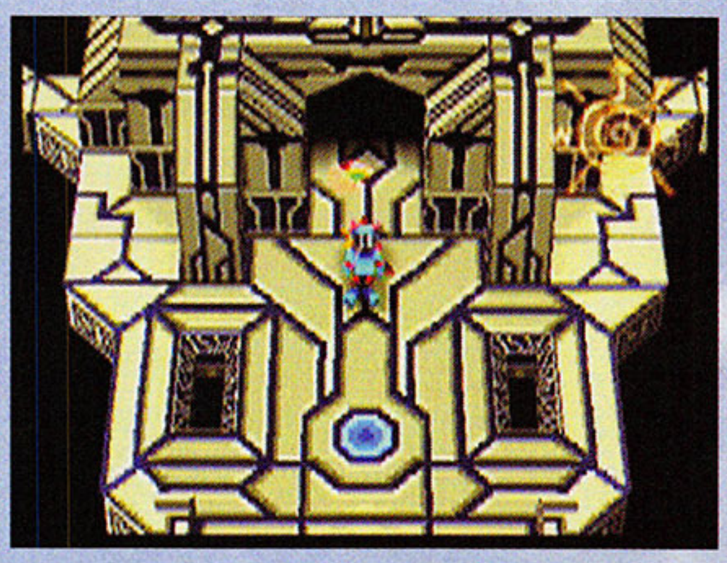


Glor can be a nasty little monster. His Nail Blade attack dishes out around 100 HP of damage per hit, and almost twice as much on Baby. Use Contributor and Windmeister to attack, keep an eye on your HP and Glor should fall within five turns.

11. When the battle is over, Kalkanor and Ramal lie wounded on the bridge. Travel back to Aruvin's to see if he can help heal their wounds.
12. When you get back to Aruvin's, you are surprised to find out that he has already sent help for Kalkanor and Ramal. He tells you that a great darkness is approaching and that another one of the holy creatures is in danger. Just then Baby gets a little impatient and decides to leave on his own. Baby says that something terrible is about to happen in God's Tower and he must leave right away. Before leaving, Aruvin gives you a little something to help you in battle: a Living Toy called "Gabriel."
13. Head back to God's Tower.

God's Tower

Although the layout is pretty straightforward, some items may be overlooked, so be thorough in your quest. The truth is yet to be discovered. What strange ties does Baby have to this tower, and what waits at the top for our heroes? Stay tuned...



Tasks

1. In the main room, there are 3 doors: north, east and west. Go through all 3 doors and into the rooms to get the Miracle Shield, Miracle Armor, and Miracle Sword, respectively. When finished take the west stairs up first to get a Spinach Snack, then go back and take the east stairs to climb the Tower.
2. Follow the stairs up to the next room.
3. Again, follow the stairs up into the next room, but stop to pick up the Snoozeweed that sits in the treasure chest. Be wary of attacking Hangries; they give outrageous XP and RB, but they are a tough fight for you and Baby.
4. Walk up another flight of stairs to the treasure chest that contains a Fire Ring, then walk through the door.
5. A Guardian lies here, blocking the path. It tells you that it has been waiting for Baby to come back, but then it begins to malfunction. It resets and tells you that you shall not pass—that Karmine is its master. The only way to get by is to defeat it.
6. After defeating Anzo and picking up the Living Toy, walk into the small pillar of light and teleport to the next part of the Tower.
7. Follow some more stairs going up and stop to pick up the Peach Potion in the treasure chest before proceeding to the next level.
8. Even more stairs going up.
9. Hey, guess what: More stairs going up! One difference: a Spinach Snack in the treasure chest.

Items/Toys

- Miracle Shield
- Miracle Armor
- Miracle Sword, Spinach
- Snack x2
- Snoozeweed
- Peach Potion
- Fire Ring
- Living Toy "Dark Cross"
- Living Toy "Holy Cross"

boss: ANZO (Guardian)

HP	1,050
Special Attacks	Mind Rings, Stomp Stomp
Items	Living Toy "Dark Cross"

Anzo isn't too tough, but its Mind Rings spell can be damaging, especially since it can confuse both you and Baby. As always, employ two Living Toys to attack and don't let your HP fall too low. You should be around level 36 when fighting Anzo.

10. Gee...doesn't this look familiar? Another Guardian awaits here in the room. At least this one has a different name: Lanzo. Lanzo welcomes you back and begins to speak about Celestia. Suddenly, its programming also goes haywire and it turns on you.
11. Take the Living Toy and walk through the teleporter to the next part of the Tower.
12. Take the north exit in this next room.
13. An encounter with Karmine leads to another batch of interesting plot twists—resulting in a battle with Karmine himself.
14. After Karmine's defeat, he calls upon Xizan to take his soul and bring eternal darkness to the world. Go check on Baby! As you begin to leave, a huge earthquake starts to shake the Tower. Looks like Xizan is about ready to be resurrected, so you and your posse will beat feet out of the Tower. A lonely voice echoes through the Tower as you leave, comforting Celestia with words of encouragement.
15. As you race out of the Tower, you will learn that Baby has inherited a valuable new skill. The blast from God's Tower sends everyone flying...but as it rescinds, Xizan finally shows himself. He then sprouts wings and decides to go take a little nap to regenerate himself.
16. After a brief interlude, you awake in a strange futuristic place called Picard.

boss: LANZO (Guardian)

If you use the same method to fight Lanzo as you did with Anzo, you will be fine.

HP	1,475
Special Attacks	Laser Cannon, Stomp Stomp, Mind Rings
Items	Living Toy "Holy Cross"

boss: KARMINE

HP	2,000
Special Attacks	RoboBlade, Phoenix Attack, Checkmate
Items	none

Baby is incapacitated for this battle, so you will have to fight on your own. First, throw out two Living Toys (Contributor and Windmeister work well), then sit back and watch them go to work. If you haven't used it yet, now would be a good time to use your Walkbomb toy to inflict some major damage! Be wary of Karmine's Checkmate attack, which will paralyze you. If you are around level 38 or so, Karmine should be destroyed within six turns.

15

Picard

Not really a town, Picard is more like a whole bunch of rooms stuck together with the Warp Gate Station being the focal point.

Items/Toys

- Full Plate
- Steel Shield
- Great Sword
- Warp Gate Key
- Living Toy "Verseus"

Tasks

1. When you awaken, walk to the northwest corner of the room of the stairs (rotate the camera angle to see more clearly) and open the treasure chest. Inside is a Living Toy, "Verseus."
2. Leave the room you are in and go the room with the purple door, just to the west. Darkbeat is here. He explains to you that all hope is not lost, and the first thing you must do is to locate the four pieces of Holy Armor. Exit and go into the room in the southwest corner to get Full Plate. Go into the room with the green light to find Baby and Nehani. Bring them back to talk to Darkbeat.
3. Once back in the room with Darkbeat, he tells you to find the four pieces of Darwin's Holy Armor. He tells you to bring them to him and the he will do the rest. As you walk out, he gives you a Warp Gate Key, which allows you to travel the lands with a Warp Gate. A very useful item indeed!
4. Go to the library (red door, next to Darkbeat's room) and search the bookshelves for information about the Holy Armor.
5. Leave the library and go up the stairs in the middle of the room.
6. As you exit, follow the path around the first outside ring to the north room where you can pick up a Steel Shield. Take the outside path around to the east and go into the eastern room to get a Great Sword.
7. Get back on the inside path and take it back down to the first room.
8. Go to the orange door at the south end of the room and go through to find the Warp Junction.
9. At the Warp Junction, each door leads to a Warp Gate by a specific area. The locations are as follows:
   A. Northwest gate—Kell
   B. West gate—Trisken
   C. Southwest gate—Den Heldar
   D. South gate—Jungo
   E. Southeast gate—God's Tower
   F. East gate—Denvrado area
   G. Northeast gate—Galik's basement
10. Even though you should concentrate on finding the Holy Armor, many towns have changed since the birth of Xizan and should be revisited. Now that the Warp Gates are open and Baby can fly, let's go back to some of the towns to pick up some things first.
11. Take the southwest Warp Gate and go to Den Heldar. Talk to the detective in the park to get a Living Toy, "Sermone."
12. Leave Den Heldar and fly to the northeast to Carmarthen. Go into the coal mine and talk to the miner digging at the end of the tunnel to get a Living Toy called "Voodoodoll." Leave the mine and go to the southwest part of town into Galik's house, then use the Warp Gate Key to get back to the junction.
13. Go into the west Warp Gate and fly east to Trisken. When you get to Trisken, all of the Artema followers have transformed into Gargoyles and are attacking the city! There are eight Gargoyles scattered throughout Trisken. After finding and defeating them all, be sure to heal yourself, then talk to the wizard next to the inn. His name is Org and he is one of Karmine's lackeys. To save the city, you must fight him. But beware: He doesn't fight fair. He calls in a monster for extra help!

boss: ORG and VELMINE

HP	975 (Org), 1,475 (Velmine)
Special Attacks	Dark Force (Org), Firebreath, Heavy Stomp (Velmine)
Items	none

Although Velmine is huge on the screen, he actually isn't that tough. Concentrate all of your attacks on Org first. Since he has less HP, he is easier to take out. Be sure to watch out for Velmine's Firebreath attack; it can take your HP down very quickly. Be sure to start the fight by bringing your Living Toys into battle. Windmeister, Pyro, Samurai and Contributor do very well in this battle. If your Living Toys get returned to you by taking too much damage, don't be afraid to use others such as Mapster or Foreman to do extra damage. If you are around level 39 or 40, Velmine and Org should be defeated within seven turns.

14. After defeating Velmine and Org, go to the castle to talk to the King. For saving the town, you are awarded a Living Toy, "Generosity."
15. Go back through the Warp Gate, then take the northwest Warp Gate at the junction to the city of Kell. As you exit the Warp Gate, take the cave entrance on the west wall and make your way through the cave to where the Galestork was. Go past the Galestork's nest and into the next room. Pick up the Bronze Mail in the treasure chest and exit the cave. Stand on the edge of the cliff and have Baby fly you north to the Coastal Inn.
16. The Blue Cat that was guarding the treasure chest here is now gone. Open the chest for a Living Toy, "Whyme." Leave the Inn and fly southeast to Zed Harbor.

Guardian's Crusade

17 When you enter Zed Harbor, you notice something is happening on the docks. On the dock awaits Bosmie, another one of Karmine's lackeys. He orders his Gargoyle entourage to kill all the humans in the town. The Gargoyles disperse in the town, but there are only four and they aren't hard to find. Destroy them, then go to the dock again to talk to Bosmie. You will be forced into a fight with him.

18 After beating Bosmie, talk to the Mayor to receive a Living Toy, "Cheergirl."

19 Leave Zed Harbor and fly west back north to Isten. Go to Marco's house and talk to Carmen; she explains that Marco went to the Artema Church and never returned. Talk to everyone in town to get clues about the Church, then talk to the worshipper out front. Go inside the Church and fight the Gargoyle that is guarding Marco. After saving Marco, Carmen reminds him that their wedding is in the morning. You rush on over just in time to see the ceremony finish. After the party, go talk to Carmen at Marco's house. She will give you a Living Toy, "Marilyn."

20 From Isten, fly back to the Warp Gate in Kell. Go to the junction and take the southeast Warp Gate by God's Tower. From the Warp Gate, fly straight west and a little north to a cave on the coastline.

boss: BOSMIE

HP	1,500
Special Attacks	Combo Hack, Horizon Beam, Nose Blow
Items	none

Bosmie is a lot tougher than he looks. Call out two Living Toys of your choice to aid in the battle and watch for Bosmie's Nose Blow, which can take over 150 HP off both Knight and Baby. If you are around level 40 or so, Bosmie should expire within five turns.

Forest Cave

Difficult to see on the map, this cave is home to a few treasures. Some items may be hard to spot, so be sure to rotate the camera angle if necessary.

Items/Toys

Cheeseburger
Attack Sword
Spinach Snack
Living Toy "Ninja"
Living Toy "D'Artagnan"

Tasks

1 When you enter, walk north and look for a chest with a Cheeseburger in it on the west wall. Grab the Cheeseburger and head to the west exit.

2 Look on the north side of the big rock in here to get an Attack Sword. Go west and take the exit.

3 When the path splits, go north and take the exit.

4 In this room go north to pock up a Spinach Snack, then head west and take the exit.

5 Again take the west exit in this room.

6 Go west down the stairs, then make a U-turn and grab the chest sitting at the base of the ledge for a Living Toy, "Ninja".

7 Follow the cave to west once again and take the exit.

8 In this next room, you will see a Dragon behind a wall of light. When you talk to the Dragon, she thinks you are the ones who have stolen her stone. Unable to convince her that you aren't Kalkanor, she attacks.

boss: HOLY DRAGON

HP	1,100
Special Attacks	Super Sound, Blue Swoosh
Items	Living Toy, "D'Artagnan"

This Dragon is basically a pushover. Use Cheergirl on yourself to boost your offensive power, and deploy Contributor and Ninja to help in the battle. Don't even worry about the Holy Dragon's magic, it doesn't do that much damage. You should be around level 40 now and the Dragon should be destroyed within four turns.

8

14

9 Leave the cave and fly southeast to Garam.

10 Go to the Artema Church and talk to the disciple by the altar. The disciple turns into a Gargoyle. Kill it then open the treasure chest in the other room to get a Living Toy, "Championo."

11 Fly northwest back to the Warp Gate near Denvrado, and take the southwest Warp Gate that transports you near Den Heldar. The quest for the four pieces of Holy Armor begins here. If you pay close attention to your map, you will see that there are four places on the map that are marked with red dots. These are where the pieces of Armor are hidden. One lies in Kerple, one in Castle Ryan, which is just east of Den Heldar, one is in the Denime Plains by Isten, and the final piece is far to the north east in the town on Penguii. Look for the Helmet first.

12 From the Den Heldar Gate, fly straight south to the island where Kerple is.

13 Go to the north end of the town and proceed into the cave. Follow the path that you took to get to Yugonga. When you get to Yugonga's room, walk up the stairs, take the north exit, and walk into the circle of light.

14 At the end of the walkway, a Guardian awaits. It tells you that in order to possess the helmet, you must prove your worth. Obviously an invitation to battle.

15 Grab the Helmet and equip it, exit Kerple and fly straight north and slightly east pass the Warp Gate to Castle Ryan.

boss: GUARDIAN

HP	1,500
Special Attacks	Delta Shock
Items	Holy Helmet

The bosses that guard the four pieces of Armor are all identical. They can be a little mean, so be sure to use your Living Toys for extra fire-power, and watch out for the Guardian's particularly nasty spell: Delta Shock, which can do up to 200 HPs worth of damage every time it uses it. If you are level 40 or higher, the Guardians should be killed in five rounds or less.

Castle Ryan

Sitting snugly against a cliff just southeast of Olgo lies Caste Ryan. The Holy Sword is hidden here, but it's also home to a few other good treasures, so look closely!

Items/Toys

Spinach Snack x2	Dark Plate	Living Toy "Dr. Gas"
Toadstool x2	Dark Sword	Living Toy "Freakz"
Sickweed	Dark Shield	Living Toy "Assassin"
Cheeseburger	Living Toy "Classique"	
Earth Ring	Living Toy "Confuso"	

Guardian's Crusade

Tasks

1. From the entrance, go straight south into the next room. Pick up the Dark Plate in the center of the room, then take the east exit.
2. Pick up the Dark Shield, then head back into the last room and go through the west door.
3. Grab the Dark Sword and head south down the passageway.
4. Follow the path through the door to the east.
5. Grab the Spinach Snack here and proceed through the door to the north.
6. Go down the stairs and grab the treasure chest in each room. Go to the west end of the room and down the stairs.
7. Head west down the hall, then head south and east to reach the next room.
8. Grab the treasure chest in the corner, which contains a Living Toy ("Assassin"), then talk to Know Owl.
9. Know Owl tells you to turn the four red switches on in the main room to get to the heart of the castle. Retrace your steps to the large room where you got the Dark Plate.
10. In the four corners of this room are sets of stairs that lead up. Go up each path and hit the red switches in each room. Be sure to collect the four Living Toys: "Confuso," "Classique," "Dr. Gas" and "Freakz" before moving on.
11. When you press all four switches, a new passageway will open up in the large room. Follow it to the south and walk into the circle of light.
12. Another Guardian waits for you here, asking if you are worthy to don the Holy Armor. It has the same stats as the previous Guardian.
13. After defeating the Guardian, exit Castle Ryan (using Foreman if you wish) and head north to the Denime Plains.

Denime Plains/Forest Cave

The 3rd piece of the Holy Armor lies far beneath the earth in a cave on the Denime Plains. The entrance to the cave looks just like a giant tree stump, so look for the opening on the south side.

Items/Toys

Quilted Armor
Spinach Snack
Twisted Sword
Twisted Shield
Living Toy "Resetter"

Tasks

1. From the entrance, take the west path into a room. Look around the back of the tree stump for Quilted Armor, then head back into the last room.
2. Take the south entrance and pick up the Living Toy in this room, then head back to the previous room and take the east exit.
3. Follow the cave to the south and take the next exit.
4. When the path separates here, go north first to get a Spinach Snack, then go south and take the exit.
5. Go north and take the stairs down to the next room.
6. Head south and into the next room.
7. Before entering the passageway into the tree, check the backside of the trunk for a Twisted Shield.
8. Walk around the circle of light and grab the Twisted Sword before stepping into the circle.
9. Another Guardian waits for you at the end of the path, guarding the Holy Armor.
10. Exit the cave, then head to Isten to save your game and heal if necessary.
11. From Isten, fly straight east to the frozen northern continent. Stop off and stay for awhile in the town of Penguii.

Penguii

Items/Toys

Living Toy "Mermaid,"
Living Toy "Frooze"

Sitting on the frozen tundra of the northern continent, Penguii is a small town that's home to a race of Penguins. Mainly just a place to stop and visit on the way to the Nord Temple.

1. Talk to the fishing penguin (Tongie) to get a Living Toy,"Mermaid."
2. Search the Snowman for a Living Toy, "Frooze."
3. Buy any necessary items.
4. Fly to the northeast to enter the Nord Temple.

Nord Temple

The resting place of the final piece of the Holy Armor. The monsters in here are pretty tough, so be prepared for long battles on the way to get the Holy Shield.

Items/Toys

Aztec Sword
Wind Ring
Obro Armor
Obro Shield
Living Toy "Draken,"
Living Toy "Frostall"

Tasks

1. When you enter, the path will split off in four directions: north, east, northeast and west. Take the west path first.

Guardian's Crusade

2. Take the stairs up to the next room. Grab the treasure chest that contains a Living Toy, "Draken."

3. Go back to the main entrance and take the north path. When the path splits, go west and pick up a Wind Ring. Continue north—avoiding the southwest path—and go through the entrance at the top. Inside this room you will find an Obro Shield. Head back to the main entrance again, but this time take the northeast path. Go through the door and follow the path into the next cavern. Go through the door in this next short cavern.

4. You should now be on top of the main entrance, with a path going east that crosses over the main floor, Follow the path around to the west until you hit a door. Go through it.

5. This room is filled with ice slides. Depending on which slides you take, you may end up in different places when you finish. Luckily, there are only two items to get in addition to the Holy Shield, so here are instructions on how to get to all three:
Living Toy "Frostall"—middle slide, middle slide, left slide, left slide
Aztec Sword—left slide, left slide, walk through the door
Holy Shield—right slide, left slide, right slide, left slide, walk through the door

6. Taking any of the slides all the way to the bottom just loops you around to the top again. On the way back up, there is a Penguin named Jengie that will let you rest and save your game for free.

7. You'll fight another Guardian Boss next; after defeating it, use your Foreman Toy to exit the Temple in a hurry.

8. Fly to the nearest Warp Gate and go to Picard. Once there, talk to Darkbeat. He tries to put on the Holy Armor, only to find that he can't wear it. He suggests that you try to put it on—and it fits perfectly! It seems that you are the legendary Warrior, the true Chosen One. Suddenly you find yourself whisked away to the Throne of the Holy Warrior, only to undergo one final test and battle Darwin himself!

boss: DARWIN

HP	2,500
Special Attacks	Roboblade, Bloody Cross, Tech Sword
Items	none

Darwin isn't too tough now that you have the aid of some of the most powerful Living Toys. Immediately deploy Toughwall on Baby so he doesn't sustain any damage throughout the fight. Use either Contributor or D'Artagnan next, then just keep attacking until Darwin falls. If you are around level 47, Darwin should be defeated within six turns.

9. After defeating Darwin, he proclaims that you have proven your worthiness to don the Holy Armor, then discusses the hid ing place of Xizan with you. He admits that he only has enough power left to send you to where Xizan resides and asks you if you are prepared. Answer "NO!" There are still three more Living Toys to gather as well as the most powerful weapons and armor in the game. Leave the island and head northwest to Jungo.

10. Bonik's weapon store is now open! Although all of the items for sale here are outrageously priced, they provide the best protection in the entire game. If you have the funds, buy all of the Platinum items, as well as any rings you may have missed along the way.

11. After spending your entire life's savings at Bonik's Store, feed any old weapons or armor (but not the Holy Armor) to Baby for a boost of offense and defense. Next, head to the Rogo's Tunnel located just northwest in the desert by Zed Harbor. Talk to him and he will give you a Living Toy, "Avalanche." By now you should have 68 Living Toys. Fly west past Orgo to Zeppetto Island.

12. After a brief dialogue, you show all of your Living Toys to Zeppetto and he gives you one final Living Toy, "Legend." He claims it is the most powerful Living Toy ever produced, and that he developed it to make the world a safer place for children. Before leaving Zeppeto's house, search Zeppetto's cabinet upstairs for a Zeppetto Helmet, the second strongest Helmet in the game.

13. Leave Zeppetto's island and travel back to Orgo to rest. Go to your home and take a brief nap to recover your HP and save your game. When you awaken, there is a present waiting for you on your dresser. It seems that Zeppetto had created a Living Toy prototype called "PeaceMaker." Finally, the most powerful of the 70 Living Toys is at your disposal!

14. Although the Final Battle lies ahead, be sure you've reached at least level 47 before attempting to fight Xizan. If you aren't high enough in levels yet, there is an easy and relatively pain less way to gain levels rather quickly. Throughout the world there are places that you may have found where the monsters are always more powerful than you are, no matter what your level is. Some of the locations are shown on the map.
One of these places lies just east of Orgo, on the small stretch of land between the mountain that separates Rogo's tunnel from the river next to Orgo. Fly to this small patch of land and fight the monsters there. Even though they are weak monsters from the past, they will be much stronger now and will yield high experience and Rb for each fight. Use the Generosity Toy each time; about 50% of the time you will get extra experience points for each battle. When your levels are high enough, fly back to the Throne of the Holy Warrior and prepare for the Final Battle.

The Final Battle

boss: XIZAN

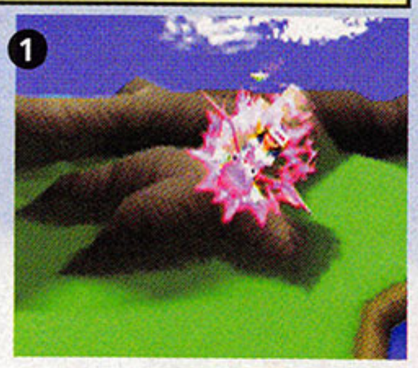
HP	4,000
Special Attacks	Dark Whip, Haven's Wall
Items	none

Since Baby will take more damage in this battle than you will, immediately use your Toughwall Toy on him; it will be easier to heal yourself. Next, deploy D'Artagnan and Contributor to pile up the damage quickly on Xizan. After a brief time, Nehani will tell you that you aren't inflicting any damage; at that point, Baby will begin to try to speak. If you look at Baby's commands, a new command will appear; use this command to transform Baby into his true state. Just as Xizan was sealed in the past by Darwin and his Dragon, Baby attempts to imprison Xizan in a pyramid of light. As Xizan is shrunk down by the pyramid, he proves to be too strong and breaks out, transforming into a more powerful state.

1. When you answer "Yes" to Darwin's question, you are whisked off in on your way to fight Xizan. As you and Baby are flying through the sky, you encounter a lone figure with the torso of a man and the body of a horse standing in your way. Who is this mysterious nemesis? Fortunately, some old friends will show up to save the day, allowing you to continue on and deal with Xizan.

2. As you fly off to meet Xizan, Nehani asks you an interesting question. No time to answer now; Xizan lies right in front of you! The battle between good and evil begins here.

1



boss: XIZAN (Form 2)

HP	3,000
Special Attacks	Black Hole, Hypnos Claw, Blood Suck
Items	none

It's a good thing that you have all of your Living Toys back for this next battle. Again, use Toughwall on Baby and bring D'Artagnan and Contributor into the fight early. Keep attacking consistently, paying close attention to your HP as the battle rages on. When Xizan's second form is weakened, he will cast a "Forbidden Spell," Armageddon, obliterating your Living Toys as well as causing 9,999 HP of damage to both you and Baby. Seemingly defeated, one of your comrades comes to your aid by using a seemingly worthless item acquired earlier in the game. After this touching moment, Xizan will once again transform and reveal his true form.

boss: XIZAN (Form 3)

HP	7,000
Special Attacks	Hell's Wind
Items	none

After being revived by Nehani, you will have full HP and PP as well as all of your Living Toys at your disposal. Use Toughwall once again on Baby and prepare for the final battle. If you haven't used Legend or PeaceMaker by now, this is the time to use them. Use Legend first; it will inflict 700 points of damage per turn on Xizan. Xizan's attack, Hell's Wind, does high damage, however, and will KO Legend in about six rounds. When this happens, use PeaceMaker. PeaceMaker will deliver a 256-hit combo that will do insane damage and destroy Xizan! The final battle is over! Good has triumphed.

PEPSI MAN

for PlayStation

Regular *Tips & Tricks* readers know that we're crazy about Pepsiman, the computer-animated superhero who appears in Pepsi's TV commercials in Japan. His first video-game appearance—as a secret character in the Japanese version of *Fighting Vipers* for the Saturn—made us jump for joy, and now he's even got his own PlayStation game. Developed and published by KID (we never heard of them, either), *Pepsiman* was expected to be a minor diversion at best, especially when we learned that its suggested retail price was only ¥2,800 (less than $25). Surprise! It's a killer racing-type game in which Pepsiman runs through eight different stages (and four bonus rounds) to deliver Pepsi to the thirsty. It's a real challenge to pick up the 100 Pepsi cans that are scattered throughout each level; you're also invited to try to beat the pre-set "best times" in Time Trial mode. Achieving these goals can unlock hidden features (like alternate Pepsiman body styles), so the game also has a surprising amount of replay value. Unfortunately, it's very unlikely that *Pepsiman* will ever be released outside of Japan.

Just like the TV commercials, Pepsiman is as cool as he is clumsy; he even bumps his aluminum-alloy head on the title screen logo!

In the first stage, Pepsiman plows through a residential area in San Francisco, running through people's backyards just like Margot Kidder.

Use the speed burst (with its cool *Metal Gear*-style "blurring" effect) to play chicken with an oncoming New York subway train.

Unlocking Pepsiman's old red-and-silver body style also changes the game's Pepsi cans to the old look; you can even play as "Wire Frame" or "Stealth" Pepsiman!

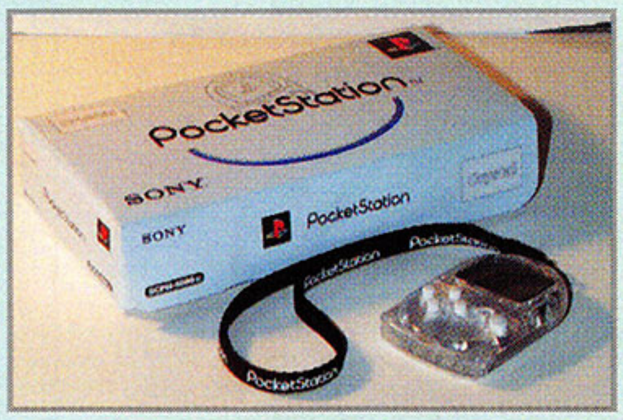
Strap It On!

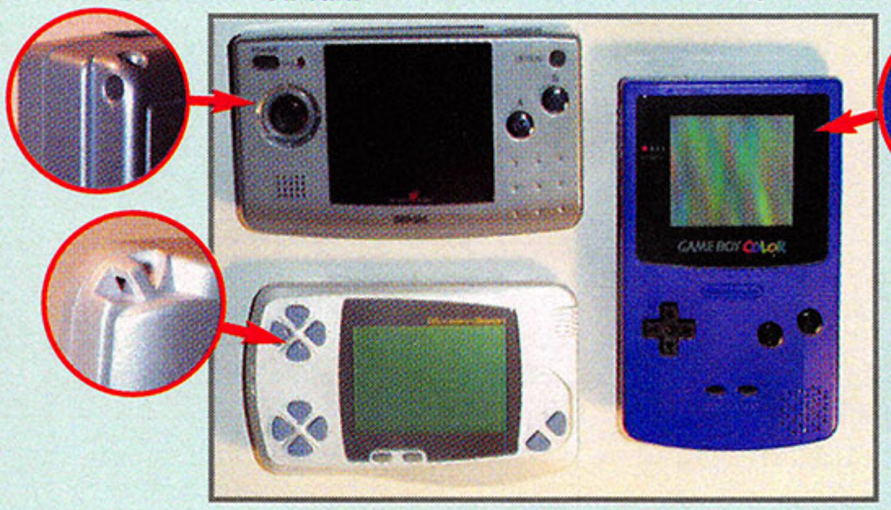
The popularity of cell phones, portable game systems, Tamagotchi and Personal Digital Assistants (PDAs) in Japan have all contributed to big sales of a particular fashion accessory: the wrist strap. Available in lots of different colors with the names of popular licensed characters printed on them, many wrist straps are sold with tiny charms that you can hang on the straps to further accessorize them. Sony's new PocketStation PDA/Memory Card even comes with its own wrist strap emblazoned with the PocketStation logo. Check out some of these cool straps and the funny character charms that come with them!



If you'd rather wear your PocketStation around your neck, Sony sells a longer version of this PocketStation strap.

The PlayStation puzzle game *Devil Dice* was a huge hit in Japan, where it was called *XI[sái]*; this strap tells the world you're a *XI* fan.

This Parappa the Rapper wrist strap has little Parappa and P.J. Berri charms; it also comes with tiny Parappa stickers.



All of the new portable game systems—the Neo•Geo Pocket, the WonderSwan and the Game Boy Color—have a place for you to attach a wrist strap.

Pokemon Origami

Origami isn't everybody's thing, but if you see this book you may become a convert. Ione picked up this awesome Pokemon Origami book at Yaohan's, a popular Japanese food market here in L.A. The book comes with pre-printed origami paper with easy-to-see fold and cut lines. We wasted a whole afternoon putting these things together! There's also a Doraemon origami book we're going try to get our hands on. Gotta fold 'em all!

Cool Zone

Whooo! Did you feel that? The room just got about 10 degrees cooler when you turned the page. But it ain't no faulty air conditioner; you're chillin' 'cause you just stepped into the...

COOL ZONE

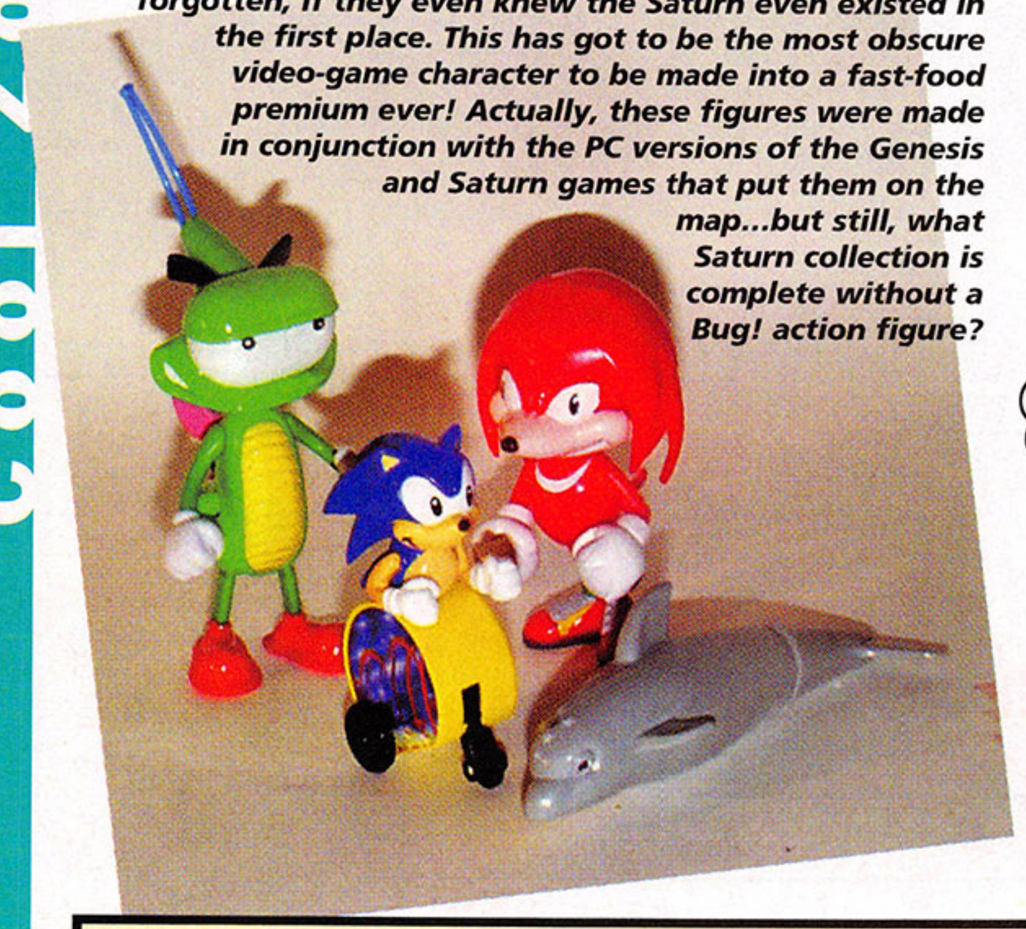
Aww...lookit these Parappa and Sunny Funny dolls based on the PlayStation game Parappa the Rapper. *Don't they make the cutest couple? Actually, they don't. Sunny (at left) is an eight-inch "Collectable Doll" made of soft plastic; it's the companion to the Parappa Collectable Doll featured in the March 1999* Cool Zone. *The Parappa figure (right), however, is an all-cloth Beanie-baby-sized doll that just doesn't capture the character's identity as well as the plastic ones do. Plus it's shrimp-sized next to the towering Sunny Funny; you'll wonder if she's still "the girl of his dreams." (Available in Japan only.)*

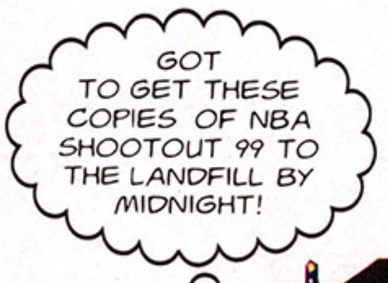
Here's another manufacturer's version of "Ramune," the sweet Japanese beverage we described last issue. We still can't believe that this drink hasn't been responsible for more choking deaths, since there's a glass marble inside every bottle which in some cases is small enough to escape through the opening. It sure tastes good, though.

We can't get through an issue of Tips & Tricks *without some kind of happy, funny Japanese candy to brighten our day and rattle our dental work. "Hi Chew" is yummy and is seen here in three flavors: Green Apple, Strawberry and Grape. (Import only.)*

You will never—EVER—see anything cuter than the Pokémon music box we picked up at our local Japanese import shop; it's a porcelain statue of Pikachu and a tiny Caterpie sharing a quiet moment on a hilltop, with a curious Diglett peeking out of the side. Wind it up and it rotates slowly on its base as it plays a beautiful, gentle melody which—according to the inscription on the bottom—is entitled "Goodnight, My Pikachu."

A shocking find from the drive-thru window at our local Jack in the Box fast-food emporium: Sega character toys! We almost pooped in our pants when we saw Sonic, Knuckles and Ecco the Dolphin...but when we spotted the fourth toy, Bug!...well, let's just say it was time for a change of underwear. Think about it. Bug! The star of two Saturn titles that most people have already forgotten, if they even knew the Saturn even existed in the first place. This has got to be the most obscure video-game character to be made into a fast-food premium ever! Actually, these figures were made in conjunction with the PC versions of the Genesis and Saturn games that put them on the map...but still, what Saturn collection is complete without a Bug! action figure?





HOOOONK! Tyrone picked up this authentic Buddy L semi truck at Toys 'R' Us for about $20; check out the cool PlayStation graphics! It doesn't light up or make any sounds, but it rolls good and sure looks cool on his shelf.

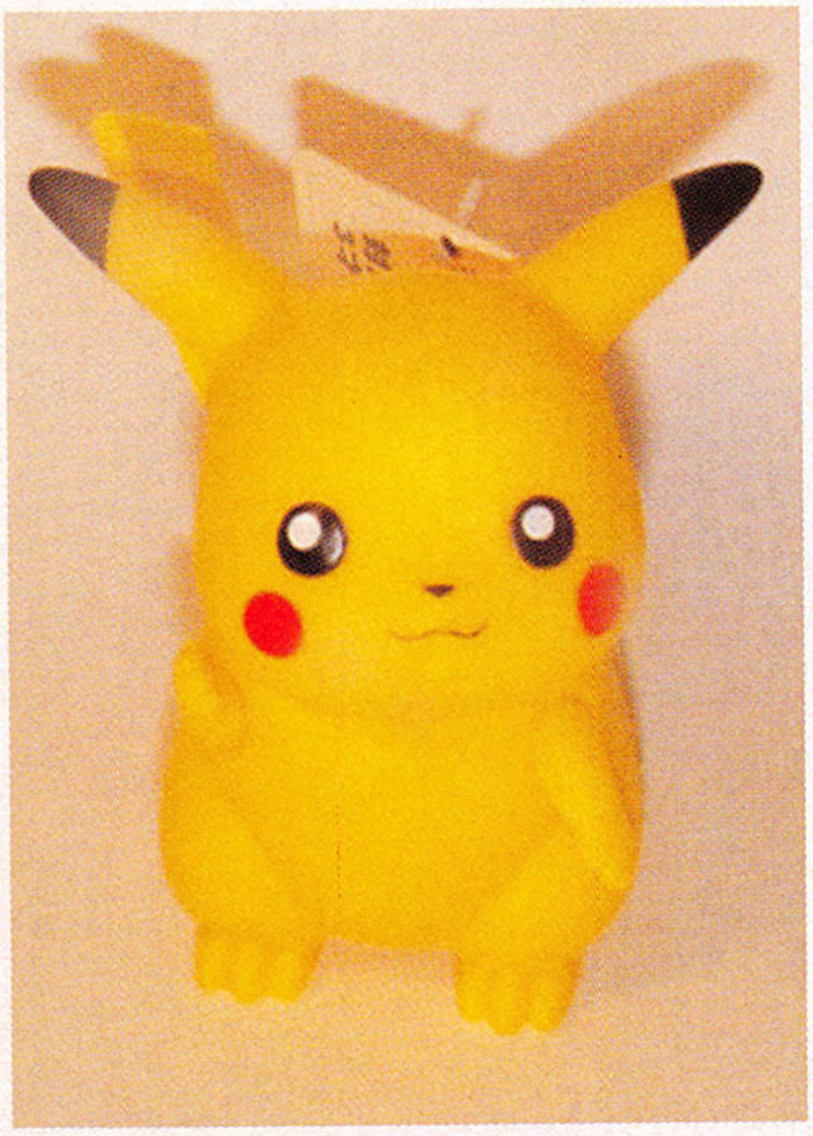
Like the stuffed Nekobus we featured in the February issue, this Mini-Totoro comes from the popular animated feature **My Neighbor Totoro.** *You can squeeze it and squeeze it and it just keeps coming back for more!*

Tech Decks from XConcepts are "finger skateboards" with real grip tape, real metal trucks and real wheels; they also come with extra wheels and the tiny tools you'll need to switch 'em. You can do stunts with your fingers if you have a miniature skateboard park in your basement, or your superhero action figures can shred on 'em. There are lots of different styles with authentic graphics from over a dozen pro skateboard companies, but the best looking ones are these Hook-Ups models that our pals Nikos and Jeremy sent over.



And if you just can't get enough of Pokémon, we'll wrap up this issue's* Cool Zone *with the little Pikachu toy pictured above, This one is hard plastic with poseable head, arms and tail; he's almost five inches tall with ears extended. Manufactured by Tomy, sold in Japan; we found this one at a local Japanese import shop for about $10. Pi-ka-CHU! (Zap!)

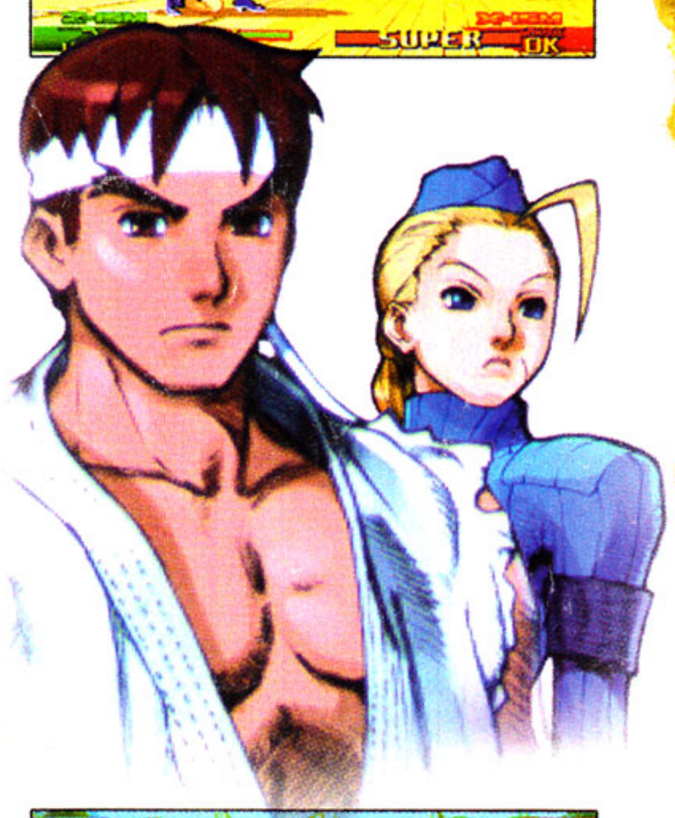
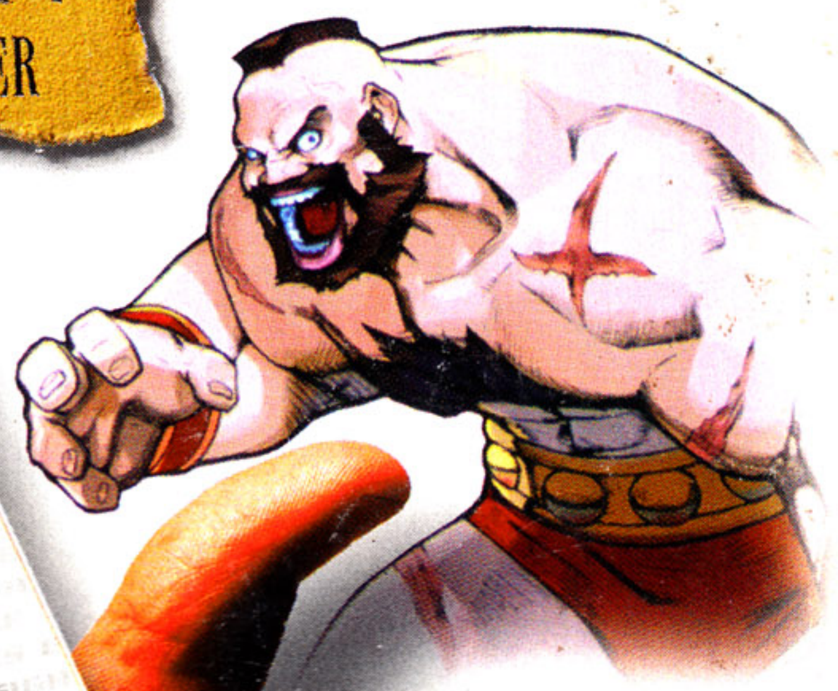
STREET FIGHTER PERFECTION

– GAME INFORMER





Street Fighter Alpha 3 scores a triple K.O.! It's the most accurate translation of an arcade game to grace the circuits of the PlayStation game console... featuring all new enhanced modes of play, including 3 fighting styles for every character – plus the skill building, World Tour Mode. Maybe nobody's perfect. But as of today, at least one fighting game is.
