Ultra Hype for The Ultra 64

Nobody builds up excitement the way Nintendo does. It hypes its products so effectively that its games often set sales records on the very first day they're available. Remember the videotapes Nintendo mailed out to promote Donkey Kong Country in 1994? The result was an opening-day sales record. In 1995, months of hype brought chart-topping sales figures for Killer Instinct, which was matched a few months later by DKC 2. Nintendo doesn't just know how to make video games and systems, it knows how to sell them.

For two years now the hype about the Ultra 64 has been gathering momentum. So smitten are gamers by the promise of what this still-mysterious system will do, they are already swearing their allegiance to the Ultra 64, even though they've never played a single game on it. We get lots of letters confirming what Daniel Pauley's letter at right tells us. Is it because they have undying faith in Nintendo? Or are they so disappointed in the other new systems that they'll grasp at whatever Nintendo offers? Either way, gamers definitely want their Ultra 64.

Based on the mail we get, the big dilemma facing gamers this past holiday season was deciding whether they should spend 32-bit bucks now or spend 64-bit bucks later. We posed the question to our editorial staff: If you could buy only one system, which would you get — any new system available before Christmas for up to $300, or would you wait until April for a $250 system you haven't even played yet? Our editors split down the middle: Half wanted a PlayStation now, and half would hold out for Nintendo. Sorry, Sega.

Perhaps the best way to solve the dilemma is to take the advice of "RabidWmbr3," who suggests in the letter after Daniel's that we all have patience when buying anything. He's right: Considering how prices inevitably get slashed in this business, sometimes the best game to play is the waiting game.

Meeting Attractions?

When I polled some people to see if they liked Nintendo's Ultra 64 or Sega's Saturn, the results were stunning! Every one of the 21 people favored the Ultra 64! I can't believe that people would prefer a system that isn't even out over a system that is. I sure hope the Ultra 64 lives up to its popularity!

Daniel Pauley
Carmel, IN

Bro' Buzz replies:
A lot of people hope that the Ultra 64 is all it's cracked up to be! Read our adjacent editorial to see the results of an informal poll we took about Nintendo's intriguing new system.

Whenever the holidays come around we get a rush of new "cutting-edge" systems. Unfortunately, most companies have forgotten that the most important thing in a system is not the circuitry but the games. Are they entertaining? Are they addicting? I find many of my old NES classics to be much more fun than most of the new state-of-the-art games. Wait before rushing out to buy the next new thing like I did, and make sure that the system will be entertaining in the long run. A system is just a piece of plastic if the games you plug into it are a real bore, no matter how good the graphics are.

Battling for Your Bucks

I'm writing this letter because I'm concerned over the video game market. I believe there's way too much hardware and software, and gamers just can't support it all. I'm convinced some companies are gonna go belly up in the months to come, unless they can come out with affordable but revolutionary products.

Mark Guinan
Manchester, MA

The Unknown Gamer replies:
It's true, some companies are gonna go belly up. Many already have. So it goes in almost every business: If your company can't come up with inexpensive, innovative products, you're likely to fail. With new systems priced at $300 and new games at $70, gamers are too smart to blindly buy every product that comes out.

I recently paid $59.99 for MK 3, and now I ask myself why. The game is just total cheese, and it's harder than the arcade original. You can't play the "easy" game without losing almost all of your six continues! And the characters are not at all mystical or creepy; they're as flashy and Americanized as the wrestlers in the WWF! Plain cheese! I hope MK 4 isn't as corny as MK 3.

When you reviewed Survival Arts (“Hot at the Arcades,” March 1994), you said it would come out for the SNES and Genesis. Where is it?

Nathan A. Navarro
Internet

Bruised Lee replies:
The game has gone to that great video game graveyard in the sky. American Sammy had plans to bring Survival Arts to other systems, but the company quietly killed those plans last year.

You reviewed The Mask for the SNES in November. Will there ever be a Genesis version?

Jim Brady
Egg Harbor Township, NJ

Doctor Devon replies:
A T·HQ spokesperson told us that the company planned to make a Genesis version, but when the SNES version took longer to finish than expected, T·HQ decided not to split up its creative team. The SNES version came out about a year after the movie was released in theaters, so a Genesis game wouldn’t have come out about two years after the fact. Too little, too late, so there won’t be a Genesis version.

I’m a big fan of the Road Rash series, but I’m tired of the street bikes. Will EA ever make a Road Rash game using dirt bikes?

David Terry
Temple Hills, MD

Captain Squideo replies:
We went to EA’s Road Rash expert, Executive Producer Randy Breen, for an answer. He admits that there have been discussions at EA about such a game, and he has some designs in his head, but nothing formal has been planned yet.

By The Watch Dog

Still snowin' outside? Man, this old dog is really gettin' on in years. Something else that makes my bones go cold is the latest batch of letters concerning Sega and the Jaguar.

Q: I'm interested in buying a Jaguar, but my friend tells me that it's not worth $149 because it doesn't live up to its full potential. My friend also tells me that the Jaguar system itself contains 32 bits (not 64), and that the games come with the other 32 (but not always). Is this true? Also, how difficult is it to understand the controller?

Eliseo Col'on, New York, NY

A: Scary Larry states:
We've printed a picture of the controller so that you can see the layout for yourself. The controller usually doesn't use the keypad, and for games that use the keypad extensively (Alien vs. Predator, Doom), a keypad overlay is used to minimize confusion. But yes, it is a lot of buttons for nuttin'.

As to the value of the Jaguar, well...you have to make that determination on your own after playing the games. As we go to press, rumors are flying that Atari is getting out of the video game business (as it did when the video game market crashed in 1985). Still, a Jag is cheaper than the other next-gen systems, and though it uses a true 64-bit processor, most experts feel that the games don't use the processor to its full potential.

Q: I just bought Mortal Kombat 3, and inside was a warranty card that says "To be eligible for customer support and product upgrades, you must complete this warranty card and return it to Williams Entertainment Inc." Since I happen to know that MK 3 will be getting an upgrade, does this mean that I'll be sent the upgraded version? Will I have to return my copy to Williams, or will someone program it into the game, or will I get a new version?

Jared R. Sigler, Philadelphia, PA

A: A representative from Williams Product Support states:
"The warranty card is strictly a means to help with customer support. The keyword in the legal information concerning the warranty is 'eligible.' And when speaking of upgrades, we mean upgrades to a specific game like MK 3, but not upgrades to a new game like Ultimate Mortal Kombat."

Q: I recently bought a Sega CD and am saddened to see only old games to play. I've looked everywhere, but haven't been able to find any good games for the Sega CD. Have the games been discontinued?

Nick Piontek
Coon Rapids, MN

A: The Watch Dog states:
Two new games scheduled for release in the near future include BrainDead 13 and Myst. These two games are all that's on the horizon for the diminishing Sega CD. It's clear to us that Sega has turned its full attention to the Saturn.

Q: I would like to comment on how you somehow managed to get your facts messed up for your Chrono Trigger Strategy Guide, Part One. First of all, you spelled the cave woman's name as Eila, when in fact her name is Ayla. Then, everyone knows that one of the time periods is 65,000,000 B.C., but once again you screwed it up and said 65,000 B.C. There is no such thing as the Promo Dome; there is, however, the Promo Dome. Heckran isn't called "Hekkran"! The name is Nizbel, not Nizbey!

There are probably many more mistakes, but pointing them all out would take eons! These "minor" mistakes truly upset me and many other Chrono Trigger fanatics. You guys are supposed to be our source of gaming info, but how are we going to know whether or not we're getting correct info?

Brodie Krause, Bismarck, IL

A: Sir Scary Larry states:
The facts were not "messed up," simply lost in the translation, my fine young man! The Chrono Trigger strategy was taken from a Japanese translation, some time before the American code was finalized. Take heart, Brodie! All the other information (and especially the crucial how-to's) is accurate.

Trailing Sony, Sega Restructures

Sony has captured the upper hand over Sega in 32-bit hardware sales.

The latest 32-bit sales figures are in, and Sega ain’t smilin’. In late November, Sony clocked in with 300,000 PlayStation sold, while Sega trailed with a mere 130,000 Saturn sold. Although these figures will change dramatically during the crucial Christmas buying season, Sony’s early lead is particularly impressive because the Saturn has been available for more than three months longer than the PlayStation. Sony also reported strong sales of software and peripherals, registering four games sold for every PlayStation.

Sega’s recent financials reflect the beating it’s taking at stores: Japan’s Sega Enterprises reported that the entire company’s profits had fallen to $110 million in the six months prior to January, a sharp drop from $163 million it earned in the same period last year.

These losses may have been the motivation behind Sega’s recent restructuring. In conjunction with CSK Corporation, a large Japanese software developer, Sega has formed a new company, Sega Soft, that will produce games for the Saturn, PC, and Internet. Sega will continue to develop and publish games for the Genesis, Saturn, and other Sega hardware in the U.S., and will also handle the marketing and distribution of Sega Soft’s products.

“It’s basically a good business model,” said Neil Cohen, Sega’s vice-president of marketing and corporate communications. “The two companies will work together closely; it’s a very hand-in-glove relationship.” Squelching rampant industry rumors, Cohen firmly denied that Sega Soft would develop games for the PlayStation or Ultra 64.

Neo-Geo CD Back on Track

After a three-month delay, SNK planned at press time to release the Neo-Geo CD by early January. The catch, however, is that the hardware will utilize only a single-speed disc drive, which means that games will load much more slowly than they would’ve on the double-speed drive that SNK originally planned.

SNK’s Game Lord Chad Okada explained that the switch from a double- to a single-speed drive will reduce hardware costs “in a fiercely competitive market where others [Sega and Sony] are losing money on hardware with double-speed drives.” No other changes were made to the system, Okada added. The Neo CD will still sell for $399 with one controller and a pack-in game (consumers can choose either Samurai Shodown 2 or King of Fighters ’95). SNK plans to accompany the Neo CD’s launch with the simultaneous release of 50–70 games.

Deal Propels M2 into System Wars

The recent sale of 3DO’s 64-bit M2 technology to Matsushita Electric Industrial Company (MEI), the parent company of Panasonic, Technics, and Quasar, puts 3DO in a much stronger position in the next-generation system battle. The deal calls for MEI to pay 3DO $100 million for M2, which MEI plans to use to develop a 64-bit upgrade to the 3DO, a separate standalone 64-bit system, and other consumer electronics products (see “ProNews,” January). For gamers, the deal signifies that, with the backing of electronics giant MEI, the nascent 64-bit M2 system will probably emerge as a strong challenger to the systems made by Sony, Nintendo, and Sega.

“What it means for the consumer is that MEI stands behind the [M2] technology,” said Bill Gardner, vice-president of Panasonic Interactive Media (formerly Panasonic Software). “The bottom line is that it’s not a dead-end system. In the U.S., we’re on a much more competitive basis with the Sonys and the Segas.”

Although Gardner said that it’s too early to plan release dates for M2 hardware, his company is working on M2 games, including titles beyond Ultra 64!

The Ultra 64, unveiled at the 7th Annual Shoshinkai Show in Japan last November, is certainly a ground-breaking video game system, but Nintendo isn’t about to stop there. Nintendo engineers are also working on a peripheral device that supports proprietary magnetic storage media, which will enable the Ultra 64 to read and record game data. According to Nintendo, such technology would enable gamers to purchase new levels for games or create and swap characters. New versions of Dragonquest and The Legend of Zelda are already in development for 1997.
based on Williams arcade games like Ultimate MK 3. He added that MEI is also beginning talks with other game companies that may be interested in licensing M2 technology.

Despite persistent rumors that Sega was interested in buying M2, a Sega spokesperson was unruffled by the deal. “We decided not to go with M2 because we didn’t think enough of it,” the spokesman said. “We believe in the Saturn architecture, and it will be the basis of our future technology, which we’ll be working on over the next three years. There’s only one 64-bit system to reckon with, and that’s Nintendo’s.”

As for the 3DO Company, it reported a net loss of $8.8 million on revenues of $7.1 million in its recent quarter, though the influx of M2 cash should bolster its fortunes. 3DO will push ahead on several fronts, including work on its M2 games; exploring the development of software and hardware for the PC, arcade, and Internet; and beginning work on the next level of technology beyond M2, according to a spokesperson. “We support MEI and really feel that the M2 technology will take off.”

At the same time, the spokesperson indicated that 3DO could begin work on PlayStation and Saturn titles, depending on how the market turned. “Anything’s possible,” the spokesperson said, concisely summarizing the next-gen situation. “We want to hit the sweet spot, and the leader’s not clear.”

Window Opens on Windows 95 Games

Heavyweight software companies like Sony Interactive, LucasArts, Acclaim, and Electronic Arts gathered in Redmond, Washington, this fall for the Windows 95 Games Launch. More than 75 games and accessories for Windows 95 were displayed, most of them scheduled for Christmas release.

Among the prominent third party games were NBA Jam T.E., Shock Wave Assault, The Dig, Warhawk, DeathKeep, Return Fire, The Hive, Beavis and Butt-Head, and Daedalus Encounter. New Windows 95 peripherals included graphics accelerators, joysticks, and 3D glasses.

Absolutely Grim

1995’s tough market has taken its toll on another software company, Absolute Entertainment, makers of Tum and Burn and Battletank, suspended operations and laid off most of its staff late last fall, according to industry sources. While the company hadn’t returned calls by press time, sources say that Absolute’s last batch of games for 1995, including Penn & Teller’s Smoke and Mirrors (Sega CD, 3DO) and Battletech: Gray Death Legion (Saturn), are indefinitely on hold as the company determines its future course.

Atari Axes New Games

Atari has good news and bad news to report this month. First the bad: While unconfirmed rumors of the company’s imminent demise continue to swirl through the industry, Atari has canceled three unfinished Jaguar and Jag CD games and laid off the creative teams working on them. The cancelled games were Thea Realm Fighters, which featured actors who appeared in MK II; Black ICE/White Noise; and Sudden Impact.

On the flip side, Atari is making progress on the retail front with the opening of the first Jaguar Mall Store. Located in Longmont, Colorado, the store offers nothing but Jag and Lynx systems and games.

Will Battletech ever make it to the Saturn?

Quick Hits

- Sega Channel continues to expand its service. New deals with three more cable companies (Continental, Adelphi, and Cox) will make Sega Channel accessible by almost 8 million more cable subscribers in cities ranging from San Diego to Boston.

- Nintendo’s monthly addition to its recent list of statistical landmarks (see ‘ProNews,” December ’95 and January ’96) shows how long the company has been on top: For the first time ever, a game company has sold more than a billion video games. The impressive total means that in the last 12 years Nintendo has sold games around the world at the rate of three per second for every minute of every day. Nintendo breaks down the sales this way: 50% NES, 23% Game Boy, and 27% SNES.

- Go to a CyberMind Virtual Reality Center (there are 20 around the world), and you’ll find something new for sale: SimulEyes VR stereovision 3D glasses. Made by StereoGraphics, the lightweight glasses sell for $179 and come with a control box and a specially modified stereovision CD-ROM of Descent: Destination Saturn.

- In other tech news, VictorMaxx is bringing out a new cordless and baseless PC controller. The $119 VIR One controller should already be on store shelves. Similar controllers should be out for the Mac, PlayStation, and Saturn later this year.

**Subj: Why no MK 4?**
**From: MKBen2**
John Tobias and Ed Boon, the creators of Mortal Kombat, have supposedly decided not to go beyond MK 3. Why not? MK games at this point are the hottest games in the U.S., and their hit movie means even more dough. Maybe they don't want to imitate the Mega Man games and make so many that they get old, but they could at least make MK 4, and maybe MK 5.

**Subj: Re: Why no MK 4?**
**From: Psx1234**
I hear there will be an MK 4, due out in October 1996. Supposedly it will have the same game engine as Toshihiden and Virtua Fighter but with MK graphics, moves, and fatalities.

**Subj: MK3 for 3DO**
**From: DG 1978**
I read in GamePro's ProNews that MK3 is coming for the 3DO early in '96 ["ProNews," November 1995]. Will it be for the M2? At least the 3DO can handle the game! No three-second wait to morph!

**Subj: No Thank You**
**From: Han Soloe**
Sixteen-bit systems have a good three years of life left before the 32- and 64-bit systems take over. I wouldn't worry about Virtual Boy, though. Why the heck would anyone want to spend $180 on something that doesn't come in color?

Mario is gearing up for battle, which means the last combatant in the new video game system wars is maneuvering into position. It will be called the "Nintendo 64" in Japan and the "Nintendo Ultra 64" here in the U.S. Whatever the name, this 64-bit machine should scream!

**Shoshinkai Showtime**

The Nintendo 64 (N64) made its debut at Nintendo's Shoshinkai Software Exhibition in Japan, and according to Nintendo of America (NOA), beyond a possible color change, the Ultra 64 (U64) will be an exact duplicate. In Japan, the N64 is scheduled for release on April 21. NOA wouldn't commit to an exact day, but U.S. gamers should expect to see the Ultra 64 by the end of April. The Japanese N64 price tag will be ¥25,000, which is in line with NOA's promise to bring the U64 in at $250.

**Made in America**

Silicon Graphics, based in Mountain View, California, designed and developed the Nintendo 64 architecture and chipset, and MIPS Technologies of Milpitas, California, crafted the silicon. The heart of the cartridge-based unit is built around a 64-bit RISC CPU (a custom MIPS R4000-series chip) and an SGI Reality immersion processor for graphics and sound.

The CPU burns along at a blazing 94 megahertz, and teamed with 4 megabytes of memory (charged by proprietary Rambus data-transfer technology), it makes the U64 faster than a speeding personal computer. In fact, the unit is basically a scaled-down version of SGI's powerful Reality Engine graphics computer, and most game developers will use SGI graphics workstations as development systems.

Nintendo already has its eye on future memory enhancements, too. There's a mysterious memory-expansion slot on top of the system.
For Controller Freaks
The tri-grip controller looks strange, but it feels super smooth. Like the SNES controllers, it has front-mounted L and R buttons and a directional pad. Unlike the 16-bit controller, however, there are just two action buttons, but that won’t limit the U64’s capabilities. A thumbstick set in the middle of the controller enables 360-degree movement. There are also four smaller top-mounted buttons, which are used mainly for switching among four perspectives, and a trigger located underneath the controller. The three grips also make at least three button configurations available to gamers.

The controller’s underside reveals another Nintendo innovation: a cartridge slot for a Memory Pack accessory that will enable players to save gameplay data, which they can use in other U64 systems.

To take the controller action another step further, the U64 features four built-in controller ports.

In the Box
At launch, the Japanese Nintendo 64 will be sold with one controller and an AC adapter. Although the Super Famicom (Super NES) AV cable will work with the system, additional stereo/AV cables will be sold separately. There will be no pack-in game with the Japanese system; it’s unlikely, however, that this will hold true for the American U64. NOA has never introduced a new game system without a pack-in.

Ultra Is Coming
At Shoshinkai, the Nintendo 64, backed by Nintendo’s reputation for well-built hardware, clearly looked like a formidable contender among the next-generation game machines, but the games are always the ultimate test. Super Mario 64 (50 percent complete) and Kirby Bowl (20 percent complete) were the only playable carts at the Japanese showing (see sidebar). The video-game game is afoot in 1996, and Nintendo is clearly here to play hardball with its new hardware.

Super Mario 64!
At Shoshinkai, the 50 percent version of Super Mario 64 played ultra smooth. Nintendo wasn’t ready to reveal a story line, but Mario’s classic foes were on hand. The graphics were still rough with noticeably blocky pixels, but you could instantly switch among four gameplay perspectives. The action was a blast, and included sliding down a long, twisting ramp and wrestling a giant Koopa. In jumping from a 2D environment to 3D, Mario seemed like a completely different game.

**Programmable Pads**
The new fighting games for the next-gen systems increase the complexity of the moves. For gamers still struggling with special moves on the PlayStation, the Programmable Pad by Innovation may be the answer.

This pad enables gamers to assign control movements to one of four special buttons. A RAM card, which stores 32 sequences of special moves for one or more characters, slides into the back of the controller. The easy-to-read LCD face makes programming straightforward, and you can combine up to eight movements and button presses per programmed sequence. You can't program the L2 and R2 buttons, however.

Identical in appearance to the Programmable Pad and also for the PlayStation is Innovation's Mortal Kombat 3 Kontrol Pad, which comes with a RAM card of preprogrammed MK 3 special moves. Each preprogrammed card installs moves and fatalities for two MK 3 characters. Extra cards cost $19.99.

While the programming feature earns a nearly flawless victory, the quality of the Kontrol Pad falls into the pit. The pad is flat and thin, and its cheap plastic buttons lack spring and a sense of durability. If you need a programmable pad, though, you might overlook the shoddy design to get all the right moves.

**No-Frill Thrills**
If you don't need turbo, slow mo, or fancy options in your PlayStation controller, check out ASCiiWare's ASCiiPad PS.

While similar to both the ASCii Specialized Pad ("GamePro Labs," November 1995) and Sony's stock controller, the ASCiiPad PS doesn't deliver turbo or slowmo. It does, however, offer a better design.

**Feline Friends**
Take a look at the following jaguar enhancers now available from Atari.

**TeamTap**
Packed in with White Men Can't Jump (or sold separately for $29.95), the Team-Tap expands one joystick port to accommodate four control pads. It also supports NBA Jam TE, Charles Barkley Basketball, and the upcoming soccer game Fever Pitch. The Jaguar supports two TeamTaps, but no eight-player games have been announced.

**Jaglink**
The Jaglink connects two Jaguars for head-to-head competition on separate game screens. This $29.95 peripheral supports Phase Zero, AirCars, and Doom's cooperative and DeathMatch modes.

**MemoryTrack**
The MemoryTrack saves Jaguar CD game data. With 125K RAM, the $29.95 cart saves up to 250 games.

**ProController**
Keeping the keypad interface intact, the eight-button ProController implements familiar top L and R flippers and adds a row of action buttons (X, Y, and Z) that run parallel to the traditional A-B-C button interface. At $29.95, this controller (and Ruiner Pinball, the first game to support it) is available now.

Editors' Choice Awards 1995

GamePro editors honor the best games of the last year.

By The Feature Creature

Last year was, uh, interesting. As usual, fighting games dominated the software scene. Instant classics (Chrono Trigger and Vectorman) joined familiar names (Earthworm Jim 2, DKC 2, and Doom) at the top of the charts. And the 32-bit giants hit big with their own titles (Sega’s Virtua Cop, Sony’s Warhawk). Which of these great games deserve top honors? Here are GamePro’s selections. All games released during 1995 were considered.

**Best PlayStation Game**
1st: Doom
   “The best console version of Doom to date” – Major Mike
2nd: Jumping Flash, Loaded (tie)
3rd: Warhawk

**Best Saturn Game**
1st: Virtua Fighter 2
   “VF 2 is a fighter’s dream.” – Scary Larry
2nd: Panzer Dragoon
3rd: Virtua Cop, Bug! (tie)

**Best Genesis Game**
1st: Vectorman
   “Fast and fun, and it’ll torch your thumbs” – Scary Larry
2nd: Earthworm Jim 2
3rd: Weaponlord

**Best SNES Game**
1st: Donkey Kong Country 2
   “Easily the best SNES game of the year” – Scary Larry
2nd: Earthworm Jim 2
3rd: Killer Instinct

**Best Arcade Game**
1st: Tekken 2
   “Tekken returns to the arcades with more explosive power than ever!” – Bruised Lee
2nd: Virtua Fighter 2
3rd: Open Ice Hockey

**Best 32X Game**
1st: WWF Wrestlemania: The Arcade Game
2nd: Virtua Fighter
3rd: Doom

Virtua Fighter is more popular in Japan than you think. The release of VF media ramps up the anticipation for VF 2 on the Saturn more than ever.

By Nob Ogasawara and Major Mike

With the imminent release of Virtua Fighter 2 on the Saturn, our Tokyo correspondent dropped into Sega Enterprises' Tokyo headquarters for a visit with the renowned AM2 game-development group (see "Sega's Top Guns: An Interview with AM2," November 1995). His mission: Examine the ever-expanding world of Virtua Fighter, which includes a truly bewildering array of merchandise, spinoff comics, and even an animated TV series in Japan. He also found out where the crack AM2 crew is headed in the future.

GamePro: Virtua Fighter 2 is arguably the most popular arcade game in Japan right now, and one of the most highly anticipated games for the home systems. There has also been much spinoff merchandise. How did the merchandise come about?

Fumio Kurokawa: We originally made dolls of the cast of the first Virtua Fighter for our arcade UFO Catchers (coin-op crane machines for snagging prizes such as dolls and T-shirts). These turned out to be so popular the supplies ran out almost immediately. So we made additional batches, including movable action figures with punching motions. After that we produced T-shirts, posters, and other smaller items.

GamePro: So everything was produced within Sega initially?

Fumio Kurokawa: That's right. But after seeing the success of VF merchandise as prizes, we realized VF characters had strong business potential as proper merchandise. As a result, we found business partners, such as Bandai, that were capable of producing and marketing merchandise. Through such licensing deals, we have seen a huge variety of merchandise released, including stationery and toys.

Stuffed VF dolls and other popular items

GamePro: You've also released several CDs in Japan.

Fumio Kurokawa: Yes, we've released five music CDs with original soundtracks of the arcade VF, arcade VF 2, Saturn VF, a remix version of VF 2, and an image CD album of new music for the various characters called "Dancing Shadows."

GamePro: How popular are these?

Fumio Kurokawa: "Dancing Shadows," our most recent CD, entered the Japanese top 30 on release. Although we can't claim enormous numbers, it did extremely well for a game-related music CD.

GamePro: You also released in Japan CG Portrait Collections for Sarah and Jacky Bryant with CG illustrations and music. I understand you'll be releasing collections for the VF 2 characters. How well did these do?

Fumio Kurokawa: Very well. Initially, we were worried about how well they would be accepted because although they are playable on Saturn, they aren't games. Our wholesalers shared our misgivings about these "non-games" and placed limited numbers of orders. So what happens? They sold out instantly on the first day.

GamePro: No kidding. I couldn't buy mine.

Fumio Kurokawa: The second batch should be reaching stores now. Because of the first titles' success, we haven't had any problems persuading wholesalers to place larger orders for the third and fourth CG Collections, those of Akira and Pai.

GamePro: There have also been strategy guide videos from licensees.

Fumio Kurokawa: That's right. Actually, we're working on a series of strategy videos, too. We've...
prepared a separate video for each of the VF 2 characters that shows in-depth techniques and strategies for taking on different opponents.

GP: Is this series about arcade aces in general, or specifically players of VF 2?

FK: We opted for standard anime graphics because we wanted to broaden the appeal of VF to younger audiences. We didn't want to do something that would appeal just to established fans.

GP: Can we count on a VF movie in the horizon?

FK: No, we think movies are too risky.

GP: Not even as a spinoff from the anime series?

FK: Strictly VF 2. The people depicted are real players, such as Ikekuburo Sarah, Shinjuku Jacky, and Bunbunmaru.

GP: How did the weekly animated series come about?

FK: The project was proposed by a movie company with which we are affiliated. The story predates the first VF contest, so the characters are younger than those in the games.

GP: Will the story end with the characters coming up to the first VF tournament?

FK: It's a little early to say. The show has only been on air for several weeks yet!

GP: Why didn't you use polygon characters for the anime?

FK: We haven't really contemplated such a move. After all, we are first and foremost a game company.

GP: Can you tell us what AM2 is up to right now?

FK: We just released Fighting Vipers at the arcades. It's already at our own arcades and should be spreading quickly. It is doing extremely well with record income reported already. After that, we have two Model 2 [the hardware used for Virtua Fighter, VF 2, Daytona, and Desert Tank] arcade games in the pipeline. We should be able to tell you about the new game next month. We're very confident that it will be another success.

GP: Can we expect to see more AM2 games ported to Saturn soon? Such as, say, Virtua Striker [a polygon soccer game]?

FK: I don't know about Striker, but Virtua Cop 2 will be ported. Fans can also count on seeing Fighting Vipers on Saturn.

contents to ensure the characters remain true to their roots as we originally envisioned them. In that sense, yes, the manga titles can be considered parallel-world stories. After all, the grade-school books and Playboy are by different publishers, so obviously they have different stories. Still, they have identical backgrounds. There is also a manga series featuring well-known arcade gamers who are depicted playing VF 2.

Fumio Kurokawa
AM2's publicity section manager

A movie spinoff? Not yet. "We are first and foremost a game company," says AM2's Kurokawa.

The Virtua Fighter animated TV series in Japan

Fighting Vipers - headed for Saturn

The big question is: When can we expect to see VF 3?

FK: That's a tough question. VF 2 is still doing extremely well at arcades, and Fighting Vipers has made a very successful debut. Releasing VF 3 right now could be a tough call, as it could end up taking income away from these games. That said, it doesn't mean we're not working on VF 3 — we certainly are. We've already decided that we'll add two new characters. One is a big guy. We haven't decided on what sort of fighter he'll be...maybe a wrestler or a Sumo wrestler, but we'll give him moves that make sense for his size. The other new character will be a Japanese girl.

GP: Is she a relative of Akira?

FK: Let's just say that I don't really know. But you can sure count on something that won't disappoint fans of Virtua Fighter!

Ridge Racer Revolution

**PlayStation**

Pushing the envelope of racing intensity, Namco returns to the pole position with Ridge Racer Revolution (pictures from Japanese version shown).

This sequel to the ever-popular Ridge Racer boasts up to 15 cars, 3 race modes, and link-cable compatibility for two-player action on separate TVs. Clean, sharp graphics and crisp audio put a shiny bow on this tight racing package, but the meat of the game remains the same - outstanding gameplay.

Unlike its predecessor, Ridge Racer Revolution provides a wealth of sharp climbs and drops, adjustable curve speeds, and a rear-view mirror in the first-person perspective to show opponents. What's more, in the two-player mode, you can race on the new tracks, plus the original tracks of the first Ridge Racer.

Without a doubt, Ridge Racer Revolution's most outstanding feature lies in the ability to link two PlayStations and go head-to-head against a human opponent.

If next-gen shooters all look like G Police, the future looks bright. In this one-player game, you're a G Policeman searching for your missing sister. G Police's linear missions are linked so that their outcomes influence the next mission.

The stunning 3D graphics depict realistic, detailed city backgrounds; innovative vehicles like gyrocopters; and electrifying explosions created by weapons such as rocket launchers, particle beams, and strobe guns.

Mission briefings and outcomes in movielike animation are among the other highlights.

**Alien Trilogy**  
PC CD

The movie trilogy that put face huggers in the dictionary gives gamers another go at the aliens in the 32-bit arena. In Alien Trilogy, you play as Ripley in a first-person trek across 18 Doom-like levels packed with face huggers, chest bursters, guards, and soldiers smuggling aliens off the planet. Alien Trilogy combines action from each movie in the series and arms you with special weapons up the wazoo.

Motion-capture techniques using real stuntmen and texture-mapped, 3D graphics lend lifelike realism to the characters' movements.

Samurai Shodown 3

In the latest installment of this two-player weapons-fighting classic, seven of the Shodown II warriors return to do battle with five new warriors, including Amakusa, the boss of the first Samurai Shodown. Ukyo, Haoa, Nakoru, Kyoshiro, Hanzo, Kenjuro, and Galford all have two sets of moves, which makes the total number of fighters seem more like 24.

Other new features include air blocking and the ability to circle around an opponent. SNK promises to deliver better graphics and sounds with more animations and some different moves for the veteran characters.

This smash PC hit is gunning its engines at the starting line for more white-knuckle Indy racing. Up to 31 drivers can go head-to-head via modems on 15 Indy-sanctioned tracks with cars, drivers, sponsors, and billboards from the 1995 season. To stay in the race, gamers must carefully respond to banked turns, grades, weather conditions, and fluctuating fuel loads. Spending quality time under the hood with the shocks, tires, and so on also makes a difference.

The sharp SVGA graphics sport 3D texture-mapped scenery, and the cars will dent and shed parts during collisions. Digital sounds should round out the race with authentic engine and crash effects. If you don't have a PC, don't despair — this one could peel out on both the PlayStation and Saturn.

Get ready to blow through barrel rolls faster than a bad burrito blows through you. Because you’re strapped into the cockpit of WARHAWK, the only fighter plane that gives you true 360° movement. It’s just you, your Sony PlayStation™ and the wild, blue yonder. You can hover in mid-air, dive in any direction, even devour loop-the-loops at Mach 7. (Warning: air sickness bag not included.) Your mission, should you choose to accept it, is to battle the madman Krel through six different 3-D worlds before he grabs enough red mercury to destroy the universe. With Swarmer missiles, Plasma cannons and Doomsday bombs, you’ve got more firepower than a state militia. And you’ll need it, because while tanks are shelling you from the ground, bogeys are swarming all over you in the air. Just don’t throttle back too fast. Or you’ll wish you’d brought along an extra pair of boxers.

No surprise here — Midway's exclusive sports games continue to heat up, even though its latest and greatest is played on cold ice.

**What a Matchup**

NHL Open Ice features two-on-two action with all 26 NHL teams from both conferences. Each player’s skills reflect his real NHL abilities. A record-keeping option allows players to reveal hidden characters and power-ups — you get more than 80 Easter eggs in all! Other features include a tournament mode.

The detailed graphics display each sharply digitized player with 360 degrees of movement. Fluid skating animation adds to the realism. Shots on goal are just as wildly amusing as were dunks in NBA Jam. Players can spin around, perform backflips, and increase in size. There are even shadow moves.

The sounds are cool as ice with legendary NHL announcer Pat Foley calling the play-by-play. While the commentary is clear and informative, it lacks the smack talk that’s widely heard in WWF and NBA Jam. Plenty of stick slapping and skating sound effects punctuate the moans and groans of harshly checked players.

**Is It the Blades?**

Standard NBA Jam controls set up the gameplay mechanics. Players can shoot, pass, and pour on the turbo speed. Skaters react and move responsively, whether they’re stealing the puck or checking someone off the boards.

**The Little Engine That Could**

NHL Open Ice proves that Midway will continue to dominate the arcade sports market long after the success of NBA Jam. Granted, the Jam game engine is fairly simple, but the adding (and we mean adding!) gameplay is something all age groups can enjoy. You’ll get “no debate” here.

**SLAP SHOT!**
Midway's Open Ice design team offers you their favorite ProTips.

Use fire to knock people out of the way and steal the puck. Let your partner score as much as possible while you’re on fire. – Joshua Tsui, artist

To force a turnover and stop your opponent from getting hot, play tight man-to-man defense and get really physical. Check the hell out of him. – Mary Ann Rohn, artist

When you’re defending your goal, send one human player into the corners to dig out the puck while the other sets up in front of your net to either intercept or check an opponent while waiting for a pass. – Martin Martinez, artist

Skate with the puck behind your own net and let your turbo build up. When your opponents come after you, kick in the turbo and use your teammate as a screen to head down ice for a 2-on-0 breakaway. – Jack Haeger, co-designer/artist

On a breakaway with a computer teammate, take the puck to the top corner and pass back down to your teammate. He’ll one-time it into the net. – Mark Penacho, designer/programmer

Be careful when stealing the puck — you may slide past an opponent without stealing, and he’ll have a breakaway. If you’re not in a position to steal, give your opponent a hard check. – Jonathan Hey, sound designer

CYBERIA

- "...One of the most impressive games of the year."
  Frank O'Conner, Editor-in-Chief, Video Games Magazine.
- Stunning SGI graphics
- Killer music from Thomas Dolby's Headspace™
- 11 intense arcade action sequences
- Mind bending puzzles

Danger never looked so good.

This is the most incredible gaming experience ever. Dolby sound, music and full-screen cinematic motion so realistic that you'll lose yourself in the year 2027. Puzzles and plot lines so intriguing that no two games will ever be the same. Characters so complex that they'll become a part of your life.

It's an epic adventure, more than two years in the making. The real danger is that you might miss it.

Gex was a breath of fresh air for the 3DO, and the little lizard remains lively on the PlayStation. Looking and playing slightly sharper with Sony, Gex delivers the same super side-scrolling, platform-hoppping action.

LET'S TALK ABOUT GEX

Gex, a wise-cracking gekko, has been trapped in a world based on bad television genres. As Gex, you must escape the Horror, Cartoon, Kung Fu, and Jungle worlds to go head-to-head ultimately with Rez, the metallic wasp responsible for trapping you.

The creative design of the levels offers a few twists to the standard side-scrolling gameplay. Gex can use his lizard skills to stick to almost everything, which means you can crawl on the backgrounds and ceilings. Each of the three or four levels that make up the individual worlds is huge. Gexperts agree you can spend hours exploring each level, finding hidden areas, secret bonus games, warps, and power-ups. Each world plays differently than the one before it. In the Cartoon world, for instance, you ride rockets and avoid falling anvils, and in the Jungle you ride a raft and escape a booby-trapped temple.

HIGHER RES-OLUTION

Graphically, Gex is the same game it was on the 3DO. The backgrounds, however, look cleaner and scroll more smoothly, and the sprites are sharper. The colorful worlds and characters really pop. And, while Gex remains the only rendered character in the game, his fireball and iceball projectiles have new, vibrant animations.

While the graphics were adjusted, the nearly perfect sound needed no changes. The music and effects are high quality. Gex's repertoire of one-liners (voiced and written by comedian Dana Gould) provide sharp humor and are barely repetitive no matter how long it takes you to get through a level.

TOO MUCH GEX, STILL AIN'T ENOUGH

The controls have been tweaked so Gex moves at a better pace and with more freedom than he had on the 3DO. Gex entertains with a variety of action that should keep you from platform hopping anywhere else. In a world where side-scrollers are scarce for 32-bit systems, Gex really "sticks" out.

PROTIP: Before leaving the Tomato Soup level, look for this 1-up that's located just below the exit television.

PROTIP: On the Rock It level, ride the first two rockets across, then at the third rocket, head down the side. You'll find this warp which brings you to a bonus game. Get good at this game -- it's easy to find so you can always return to this level and earn extra lives.

PROTIP: When facing this boss, keep pace with the rapidly scrolling ground. Jump and tailwhip the boss when the skulls circle her head.

PROTIP: By the first save point in the Powl level, you'll find a series of warps that takes you to this Jungle world remote control.

PROTIP: Once you step on or past this elaborate stone, the whole level scrolls at a fast pace. Only a well-timed run will see you through this temple.

PROTIP: While it's possible to swim, you're safer staying on the raft.

Divide and Conquer
Zero Divide starts off like any fighter: Best two-out-of-three rounds wins the tournament for this mean, motley melange of mechanized mayhem-makers. You have to contend with ring-outs, but in a playful twist, your fighter can save himself by dangling from the edge of the raised ring.

Less than Zero
The graphics are a real winner. Futuristic warehouse backgrounds and smooth polygon fighters fire up the action and keep it moving along. The special moves should have been flashier, though.

The sounds can get annoying. An announcer constantly tells you that your unit is gone, which isn’t what you want to hear 20 times during the heat of battle.

Controlling your fighter is a real bear. Special moves take practice, and the computer A.I. is too tough. What’s more, some players are devastatingly powerful. The robot WILD3, for example, has a cannon and butterfly knives!

Zero Divide is a flattering first-round imitator of Toshinden with the fluid grace of VF 2. Although it lacks the solid fighting foundation that would make it great, Zero Divide has moments of greatness. You certainly won’t be bored.

PROTIP: Get the lamp from the half, then go to the room on the right and grab a neon tube from the top of the workbench.

items and learn more about the aliens that invaded the vessel. All items are kept in an easy-to-understand menu at the bottom of the screen, making your search (and control) a snap.

The Fungus Among Us
The graphics are as static as a lame-duck Congress. You see one screen at a time – with no scrolling – and nothing moves in the backgrounds. Finding useful items is akin to looking for the proverbial needle in the haystack. Some things are so small, you may pass them over.

Slightly better sounds include plenty of voice and some pretty ominous background music.

Puzzle solvers and point-and-clickers will thrill over Alien Virus, but they won’t be coming back for more with its one-time playback. Still, if aliens were after you, this would be the game to prepare you for it.

If demolition derby with a full-metal-jacket twist sounds like your type of game, Twisted Metal may be right up your alley.

**Heavy Metal Mayhem**

A scorched Los Angeles is the scene of Twisted Metal's drive-by scenario, but the story line is incidental to the wanton destruction. You and a bud can engage in the two-player competitive mode, or solo drivers can compete against 11 motor maniacs in destroy-or-die vehicle combat.

To survive the carnage, you need killer wheels. You must choose wisely from 12 uniquely armed-and-dangerous vehicles, which include an ice cream truck packing napalm cones and a missile-laden motorcycle.

**Pretty and Twisted**

Graphically, Twisted Metal is a mixed bag. Nice touches like flickering headlights and detailed street scenes can't overcome graphic foibles like the static arena crowd and hard-to-read radar. The greatest offender is the eye-jarring break-up that occurs when you burn rubber past buildings.

Likewise, the sound effects range from anemic crowd noise to the satisfying crunch of metal against metal. The music is weak overall.

The controls take you for a wild ride. Mastery over the simultaneous steering, targeting, firing, and driving will take patience.

Despite its flaws, this twisted game is fun. If you can overlook the graphics break-up, take Twisted Metal out for a test drive.

**Cyber Speed**

By Air Hendrix

Hovercraft racing games are popping up for every 32-bit system, and Cyber Speed is the newest addition. Despite some fresh twists and thrilling combat, it eats Wipeout's dust.

**Cyber Ski Lift**

On Cyber Speed's ten tracks, you streak after opponents in one of eight ships that dangle from a power line like a gondola at a ski resort. The crafts swing out on turns like a pendulum, but, defying the laws of physics, sticking to the inside of the turn vastly increases your speed. You'll have to overcome your instincts to master this quirk, but the racing's fast and furious once you do.

Mindscapes sweetened the action with intense combat. As you concentrate on steering precisely, you must use plasma bolts, missiles, and mines strategically to pummel the pack into submission. After a few practice laps, you'll find that the decent controls won't abandon you in either task.

---

**White Flag**

Graphically, Cyber Speed lacks Wipeout's sleek futuristic edge, favoring a brightly colored, less detailed style that feels more like comic-book sci-fi. The tracks sport strong variety, plunging through harrowing drops and turns, and the outlandish ships range from a hawklike powerhouse to a speedy ball-shaped craft.

Ordinary sounds pace the race without pizzazz. A goofy announcer helps more than he annoys by pointing out incoming threats, and the flat sound effects and wannabe techno won't interrupt your concentration.

If you've conquered Wipeout, Cyber Speed's diverse, novel gameplay will pose an enjoyable challenge. It finishes soundly in second, though.

EA resurrected a venerable Neo-Geo shooter for the PlayStation, injecting magnificent graphics and toe-tappin' tunes. Unfortunately, gummy controls and daunting challenge turn Viewpoint's traditionally tight gameplay into an exercise in overly precise shooting.

**Great View**
This Viewpoint stays true to the Neo-Geo version by duplicating its level layouts and enemy patterns. With two laser blasts, three devastating smart bombs, and power-ups that triple your firepower, your armaments haven't changed either.

But the captivating new graphics imbue this game with an impressive, fresh, futuristic look. A metallic sheen highlights everything from the backgrounds to the enemy robots, and remarkable details, like the hot, glowing embers of an explosion, enrich the effect.

The sounds keep pace with scorching combat effects and solid background noises like the splash of surfacing fish. Sharp new tunes range from house to jazz.

**Sharp Point**
Once combat begins, this version's flaws rear their ugly heads. The absence of two-player action severely limits the fun, and even on the Easy setting, Viewpoint's challenge will bring intermediate gamers to their knees. Even worse, sluggish controls make your ship feel like it's mired in molasses.

These problems demand a patient, methodical approach that won't entertain action junkies. Viewpoint's snazzy scenery still demands some serious play time, but take a run through Jupiter Strike if you need a dose of responsive, riveting space combat.

---

**PROTIP:** Be careful when using Exene's triple combo (R2, Forward, Triangle). She jumps way back, and sometimes lands outside the ring.

**VF Too?**
Criticom is a slow but enjoyable fighter. It's a standard two-out-of-three fighting bout with interesting characters (six of the eight fighters are female) and flamboyant moves. As in VF, you win if the opponent falls outside the fighting ring, and most characters have simple combos and a pounce move to use when an opponent falls.

To make things tougher, the special moves don't come easily. You receive more of these lethal moves when you advance in rank. But you can move up only twice, and each time you must beat the game and take on a mirror image of yourself! You'll need those specials, too, because the fighters become harder with every battle.

**Criticom Condition**
Criticom's graphics are similar to Toshinden's, with polygon fighters and gorgeous backgrounds. The fighters look vicious, but graphical glitches and sluggish moves (especially throws) lessen the impact.

The good sounds deliver solid smacks and punches, but the voices make Minnie Mouse sound like a bull. The game's sparse music is a plus, since you need to concentrate on the action.

Criticom is a great game for players who have mastered VF 2 or Toshinden. Until sequels of those games come out, this is a nice snack. But it definitely leaves you wanting more.

This stellar, near-perfect port of the arcade hit is a joy to watch and play...but you may find that your trigger finger is not as overworked as you'd like it to be.

**Harmin' the Miranda**

In an amazingly real polygonal world, you fight pseudo-Secret Servicemen, pseudo-SWAT teams, and assorted other pseudo-thugs. You have to be careful, though — you must reload ever six shots, and hostages pop up everywhere at the most inopportune times.

Shotguns, automatic pistols, rifles, and machine guns are hidden in crates, barrels, and sometimes on the gunners themselves. Also assisting you is a very obvious targeting system, which plants a large yellow cross hair on your opponent, so the game's gut-busting action isn't too hairy.

That is, of course, if you own the Stunner, a gun-style controller that was made for this game. Playing with the regular controller is like getting into a shootout with a frying pan. It's slow and unresponsive in tight shooting situations.

**Scene It, Done It**

Stylish polygon graphics complement the action nicely. A different animation plays for each area where the opponent takes a hit, such as the hands, knees, groin, and chest. The backgrounds are imaginative, and when thugs get in your face, you really jump.

The sounds are equally impressive. Each gun has a distinct sound, and you'll hear great sonic detail, like clear explosions and hostages pleading for mercy.

Where the game is sadly lacking is in the gameplay. After one pass through VC, there's nothing more to make you play again. We've heard, though, that there is a way to play with the patterns reversed, which makes for a whopping two playthroughs!

**Nonstop Cops**

Regardless of the replay value, you have to own this game. It's a great addition to Sega's Saturn library, and it's lots of fun. Play it without the gun and the challenge will increase dramatically. Virtua Cop is a thrilling virtual shootout...and so real, you expect to stop at a virtual donut shop.

This is the best weapon. This gun holds 15 standard shots at a time, and you can reload.

**Rifle**

Good for multiple enemies, the rifle is fast and has a wide range. You can reload it.

**Shotgun**

The shotgun is slow and clumsy, but deadly. It can be reloaded.

**Machine Gun**

The fast-shooting machine gun can't be reloaded. It's good against multiple enemies.

**Magnum**

The magnum is strong but slow, so it's weak against groups of enemies. You can reload it.

**Saturn**

By Scary Larry

Fans of the popular PC game already know the tricks to this fast-paced game, but newcomers will thrill at Cyberia's flashy graphics and exciting gameplay.

**Polygon Puzzer**

You play as Zak, a hacker who faces two choices: death or a suicide mission. The mission involves finding a secret military outpost known as Cyberia, and destroying its apocalyptic weapon.

You start by walking, talking to, or shooting numerous characters, and solving puzzles. Cyberia plays a lot like Burn: Cycle and looks a lot like Virtua Fighter on steroids. Besides walking and firing your Plasma pistol, you pilot a jet and blast aircraft with a mini-cannon.

Control can be difficult. Your character moves in four directions, and you're dead meat if you pick the wrong way. Then again, Zak moves so quickly that his demise isn't always your fault.

**Scene and Heard**

The smooth, fluid graphics feature great polygon rendering and detailed backgrounds. The flight levels are as fast and sharp as any sim out there. But the hokey anti-aircraft levels look like something from a 16-bit game.

As for sounds, Cyberia is buffered by an array of voices. Crisp explosions and eerie mood music echo through the deserted hallways.

Cyberia is a great port-over, and a finely tuned puzzler with an action twist. But you may find yourself wishing for more fighting and less finding in this brainy spy game.

Sega Rally Championship kicks your Saturn into overdrive, leaving Daytona USA in the dust.

**Radical Rally**

In Sega Rally you can burn rubber in the Toyota Celica GT-Four or the Lancia Delta Integrale '92. Gameplay alternates between first-person and behind-the-car views. Added to the Saturn version are Time Attack and Two-Player Battle modes. What's more, the Car Set-

**PROTIP:** At the starting line, keep your RPMs around 7000 for the best jump off the line.

**PROTIP:** With its superb handling, the Lancia Delta Integrale is the ideal car to use on new tracks.

**PROTIP:** In Two-Player Battle, you race against a friend in fast split-screen action.

**Checkpont**

Power-slide controls make up Sega Rally's entire gameplay. At first, the power-slide technique may seem frustrating, but given the chance the move can be effective and fun.

With graphical improvements and options exceeding Daytona's standards, you may want to call your local Sega dealership for a trade-in.

Ghen War updates the old “mech” concept with sharp graphics, sensational sounds, and cool controls. Fast, futuristic, and fun, Ghen War is a proud addition to the roster of Saturn games.

**Mech Memories**

Ghen War doesn’t break new ground: it’s basically an old-fashioned mech shooter. You stomp through 18 missions of first-person blasting, from Australia to the moons of Saturn. Been there, blasted that, right? Wrong. While the concept is old, the execution is new. Not only does Ghen War have the speed that past mech games lacked, it has some of the best control in the mech business. You bring varied armaments to these wars—including multiple missiles and bombs. And your mech is a marvel of movement: You can high jump over objects, slip sideways, and spin to fully explore your 3D universe.

**Screen Dream**

The graphics are prime. Just when the wide lunar backgrounds are getting too similar, you’re thrust into Doom-style corridors for deadly hide and seek. Enemies are intriguing, and everything shatters when you destroy it.

The sounds rock. Propulsive music, clear voices in the full-motion-video intro, and exciting explosions all ring true.

It’s not deeply strategic, but when it comes to annihilating aliens, Ghen War’s a blast.

---

**PROTIP:** Use fast-firing guns against fast-moving enemies. Save rockets for slow or stationary targets.

**PROTIP:** Use your “slide” to move sideways through the corridors of NORAD while still facing forward.

---

**Solar Eclipse**

**By Captain Squideo**

The Eclipse series flies onto the Saturn with good results. It’s no breakthrough, but Solar still eclipses most other shooters.

**Totally Total**

If you played Total Eclipse on either the 3DO or PlayStation, you know what to expect from Solar Eclipse: behind-the-ship planet skimming and tight tunnels cluttered with shifting obstacles. The tried-and-true formula is a little stale, unfortunately. There’s not enough variety in the gameplay to inspire repeated visits to Solar’s universe.

Your controls are only above average. This isn’t the fastest fighter jet in the world, nor is it the most maneuverable. You can make sharp, banked turns, but you still fly as if in a box, unable to do loops. Plus, you possess only one kind of weapon at a time, which further limits your control options. At least you can switch from an inside- to an outside-the-cockpit view.

**O Solar Mio**

The graphics and sounds are instantly familiar, but that’s not great news. While the look is sharp, the landscapes and enemies get repetitious after a while. Even so, the intro film is good. The sounds are as generic as the graphics—they’re high quality, but not memorable.

Despite its limitations, Solar Eclipse is hard to put down once you’re airborne. Expect a fun trip, just don’t expect the thrill to last.

**Primal Rage**

By Scary Larry

32X owners have been feeling left out of the video game loop, but this killer version of Primal Rage is the best of the series so far.

The superb graphics are comparable to the 3DO versions. Little breakup or slowdown mars the action, while bright, vivid colors enhance the primeval backgrounds and lavishly colored dinosaurs.

The music and sound effects also live up to the game's reputation. Good grunts, clear hits, and muffled roars all exist in the lost world of Rage.

The game demands a six-button controller, and the moves are easy to accomplish. You could start playing even without a manual.

Rage fanatics will want this one on their shelf, even though the next-gen versions are coming out soon. Until then, this Rage rules.

**Protip:** Attack whenever an opponent tries a projectile move against you.

**Protip:** Blizzard and Sauron use air throws a lot, so stay out of the air against them.

**Protip:** Forget head-to-head chomping against Talon. Go for the bite, then back away.

---

**T-MEK**

By Air Hendrix

In the arcades, T-MEK earned a solid rep for rowdy group combat. On the 32X, you still choose from six futuristic tanks and face off against three opponents in intergalactic arenas, but the thrill of group competition is lost.

While the engaging one-player action moves quickly, the split-screen two-player games are ruined by slow-down and crowded screen space. The decent controls realistically reflect each tank's attributes, though.

With awful pixelization and weak detail, the graphics don't even pretend to be 32-bit. The sounds chime with an ominous announcer, but tinny tunes and effects spoil the fun.

This cart won't satisfy 32X owners desperate for quality gaming. Some action junkies might find short-term thrills, but this cart lacks long-term intensity and depth.

**Protip:** Enemies usually can't see you when you approach from the side, so get in several special-weapon shots.

**Protip:** Refill special weapons under the spotlights.

**Protip:** Before you tackle bosses like Baked and Shocka, take out the other enemies.

---

**Star Trek: Star Fleet Academy**

By Bro' Buzz

Space...where many have gone before. Star Fleet Academy duplicates the year-old SNES version (see ProReview, December 1994). For space cadets, it's strictly C-average.

As a cadet in the Picard-era Star Fleet Academy, you command eight ships through 30 missions. The gameplay is sporadic, however. Sometimes it's interesting, sometimes it isn't. Smooth controls let you easily access five ships' stations, but extended downtime while warping drains your adrenaline.

The graphics and sound fluctuate. The pix are sharp overall, but the first-person view-screen visuals lack pizzazz. The soundtrack's repetitive Star Trek movie theme will drive you crazy.

Trekkers will enjoy this Academy, but only for a semester or two.

**Protip:** Get key info in the classroom.

**Protip:** You can fight best when flying at one-quarter impulse speed or in reverse.

**Protip:** Enter suspicious situations with ships' stations at Yellow Alert and Tactical On.

[Assault Rigs]
By Scary Larry

How good is Gargoyles? It's one of the best games for the Genesis, right next to Earthworm Jim 2. This action game will leave your heart pounding, your blood racing, and your thumbs burning!

Sympathy for The Devils

It starts in medieval Scotland, where an ancient race of Gargoyles is fighting a rogue band of Vikings, who unjustly possess the mystical Eye of Odin. Goliath, the Gargoyle leader, is transported to modern-day Manhattan, where he continues to search for the talisman as he fights an evil race of robots.

Goliath can swing, fly (for a very short time), and fight. During combat, he punches, bites, throws, and rips the face of his opponents. Not bad for a guy made of stone. Goliath uses his powers against Vikings, archers, Raptor-bots, and more as he flies through the game's 18 extensive levels.

With all these moves to master, controlling Goliath can be rough. You must accurately swing and jump from precarious ledges while fending off enemies tougher than New York gangsters.

Love Me Like a Rock

The graphics are some of the best ever for the Genesis. Dark and dreary, the stages all fit the shadowy Gargoyles, who turn to stone should they ever see daylight. Enemies sport great detail, right down to mini-arrows, and Goliath is an impressive sight with flapping wings and beastly claws.

Ominous sounds complement the dark game, from the leatherly flapping of Goliath's wings to the death moan of the female Vikings. The music definitely needs a tune-up, though. Medieval musicians ain't got no rhythm.

Statue of Limitations

The game gets harder with each level, so gamers expecting an easy go of it because of the Disney tie-in should think again. It's easier to sneak into Disneyland than it is to finish this game. But all in all, Gargoyles gives you the kind of rewarding gameplay and gorgeous scenery associated with award-winning games like Vectorman and EJ 2. Gargoyles rocks!

HAVE A NICE MISSION.
**REVOLUTION X**

By Air Hendrix

In possibly the dumbest plot ever, Rev X's bad guys are bent on eradicating fun, and you must plod through L.A. clubs and Middle Eastern deserts to stop them and rescue Aerostrike. Rev X's slow shooting lacks strategy and challenge, but at least you can choose from multiple routes through the ho-hum mayhem.

You aim through a crosshair that quickly sweeps the screen, but the finicky targeting will make you long for the lightgun that this game desperately needs. Grainy, choppy graphics and droning, static-ridden sounds add insult to injury.

Genesis games have matured to the point where developers can deliver eye-popping games likeVectorman— which means Acclaim has no excuse for slapping together this miserable arcade conversion.

**Protip:** Jack up your firepower by continuing to fire bullets while you launch CDs.

**Mutant Chronicles: Doom Troopers**

By Playmates Interactive Entertainment

**Protip:** Waste everything in the background to find power-ups.

**Protip:** In Stage 2, run as fast as you can and shoot to decapitate, not kill.

**Protip:** To pass this level in Stage 1, shoot the enemies, then stand on their corpses.

**VR Troopers**

**By Stol**

The VR Troopers are an obvious Power Rangers clone, but they do inject their own personality into this familiar-but-fun fighting game for kids. You can tune the Troopers' battle against Grimlord to your tastes. There are eight playable combatants, three gameplay modes, and five skill levels. The crisp controls provide quick access to a basic 17-move punch, kick, jump, and block ensemble. Each fighter also has three special moves.

VR's sharp graphics and enthusiastic tunes have energy. The detailed character sprites and imaginative backgrounds will jazz fans of the toon show. The music rocks 'em as you sock 'em but that's the best the sparse sounds can muster.

**Protip:** Ryan Steel is the toughest Trooper.

**Scooby Doo Adventures**

By Tommy Glide

Zoinks! The Mystery Machine posse needs you to help solve the riddles of Blake's Hotel and Ha Ha Carnival.

As Shaggy (with Scooby in tow), you investigate mysteries based on actual episodes. The easy interface has a menu of commands to help you collect items and clues. The puzzles aren't all easy, however.

**Protip:** In the hotel, use the dumbwaiter to descend to the kitchen. Push down the flour and look through the peephole.

**Protip:** In the Carnival Arcade, look through Windows 2 to see Velma, Daphne, and Fred stuck in the boat. Go help them!

Both mysteries are broken up by cinematic ghost chases. These and the graphics capture the show's flavor. The average sounds are rescued by music that kicks with a solid translation of the TV tunes.

If you're a fan of the series, this is a nice rental down memory lane. If not, this is a "Scooby Don't!"
CRANE will meet or beat any competitor's prices!

By Scary Larry

Based on the Jimmy Lee comic, Wild C.A.T.S. is a fun Final Fight-type brawler with huge sprites but standard enemies. In the overall SNES lineup, though, C.A.T.S. doesn’t soar.

**Wild Things**
The interesting game mechanics have you begin as one character—Spartan, Warblade, or Maul—and then change characters at a certain point in the action. You’ll never play through as just one comic-book hero, which makes the gameplay more varied than other superhero titles.

Each hero has a series of devastating moves and an assortment of punches, kicks, and smart bombs. The easy enemies and pattern-dependent end bosses make the awkward controls bearable.

**Stand Up Comics**
The graphics are well drawn and have a more flavorful feel than other comic-book games, like Death and Return of Superman. But they never get too creative, and you’ll see the same enemies again and again.

The sounds are funky but flat. The repetitive theme music never graduates to exciting, but then again, neither do the graphics. Other sound effects include standard punches and whacks.

Overall, Wild C.A.T.S. is not a bad game, but it just barely rises above the mediocrity of other side-scrollers. If you’re looking for a good, easy weekend rental, you could do worse than this title.

---

**Pro Tip:** Sometimes Warblade has trouble finding a way out. Double jump to see possible exits above him.

---

**Get Ready to Grumble**

We wouldn’t be so unfair as to compare this version to the PlayStation game, but we will say that next to the Genesis and 32X versions (see Pro-Reviews, December ’95) this one doesn’t have a chance.

The problems start right from the beginning. Yokozuna and Bam Bam Bigelow are gone from the roster! Next up, the game plays so slowly that you could grab a bite to eat between special moves.

**Pro Tip:** Use Maul’s Charge Run (tap Forward twice) to knock out enemies.

---

**Pro Tip:** Donk can be pretty sneaky. Grab an opponent, then motion Down, Down-Toward, Toward and hit any Punch button to electrocute a foe.

---

The poor graphics feature smaller sprites and fewer colors than the cart’s 16-bit cousin. Again, the slowdown also takes away from the game’s fast-paced fun, and the static backgrounds are washed out.

The sound gets no help from the dismal, tinny sam-

about the same as in the other games, and the moves are identical, but the slowdown makes things difficult. You never know if a combo is complete until the last slow movement takes place.

---

**What a Ripoff!**

WWF Arcade has more going for it than this poor game. Buy the Genesis or 32X (or even the PlayStation) versions, but sweep this one under the mat.

Scooby Doo Mystery

By Quick-Draw McGraw

PROTIP: To get clue points, take new objects to Velma whenever you find them.

Hop inside the Mystery Machine with Shaggy and Scooby. You guide the pair through a series of side-scrolling mysteries, getting clues from Freddy, Scooby snacks from Daphne, and the Mystery Status from Velma. Bonus games like the "Wac-A-Monster" or "Make a Scooby Sandwich" help you.

The characters are successfully re-created, and the monsters will scare the pants off you. Although there isn't much action, the backgrounds are detailed. The sound lacks voice effects and the famous theme song, but you'll enjoy the limited soundtrack.

Reading maps and piecing together puzzles may not fulfill the action quota, but Scooby Doo does provide an intriguing adventure for kids.

PROTIP: Use Scooby's sniffing abilities to find hidden items.

Revolution X

By The Axe Grinder

Looking for a great arcade shooter? Revolution X ain't even close.

Rev X is a first-person shooter with slowdown. You meet wave after wave of silly attackers and blow them away.

The bland graphics are average at best, featuring cheesy explosions and blocky sprites. Although Rev X stars the rock band Aerosmith, the wannabe hard-rock riff is dull away, effectively burying the few muted sound effects.

The controls are also nothing to sing about. Moving your target sight is a breeze, but accurately pinpointing small targets is difficult.

Revolution X fails to bring the arcade home. What this version does bring home is a very disappointing game.

PROTIP: To stop the bus, shoot it everywhere — including the small panel above the door.

Dragon: The Bruce Lee Story

By Tommy Glide

The film Dragon showcased Bruce Lee's power. On the SNES, however, Bruce looks weaker than Lester the Unlikely.

Ten stages trace the film's plot, from Bruce's brawl with the sailors through the demonic finale modeled after Enter the Dragon. Although you can earn special weapons and techniques, like nunchakus, this shallow game is more of a beat-em-up than a true fighter.

Mediocre sprites, animations, and backgrounds provide the visuals, but don't expect to see blood. Decent martial arts music carries the audio, but the fight sounds are lame. Fans of the film may want to rent Dragon. All others should stick to the fighting legends of the gaming world.

PROTIP: When the fight moves to the alley, focus on beating the first chef you fought inside.

WORD CLUE: What one does while asleep.
By The Axe Grinder

Making the rounds to almost all the known console systems, Primal Rage holds up well on the 3DO. This version has the best looks and sounds of any home-system Primal to date.

Leapin' Lizards!

Once again the arcade's seven dinosaurs battle for the new Urth, but this time extended options enrich the gameplay. In the endurance match, for instance, you can choose up to four dinosaurs for tag-team action. In the one-player mode, lack of a last boss puts a damper on the excitement — you simply face all the dinosaurs you previously vanquished.

This Primal excels with graphics and sound. The game looks great, with fine details on the dino fighters. With combatants hissing and chomping on humans, the sound effects are excellent. The music is appealing, with rock riffs that perfectly fit the intense fighting.

A six-button controller works better here than the standard three-button, and the game uses a unique special-move system (mostly holding down two or more buttons and performing a motion on the joy pad). The moves are easy to execute, but timing is important on the finishing moves.

The Dino That Fell To Urth

Those looking for a close arcade translation can't do better than Primal 3DO. But it still won't convert those who never took to the arcade original.

Killer fans have nothing to worry about. Their favorite fighting game has shrunk, but still packs a powerful punch. The best portable fighter? Yep! Right after Street Fighter II for the Game Boy.

The Hit Parade
Although Ripper and Cinder were trimmed for memory's sake, the classic elements of KI were kept in – multiple-hit combos, fatalities, and fast gameplay are all here.

The story line is the same: best two-out-of-three rounds wins the Killer Instinct tournament. You get special moves, standard punches and kicks, and long-lasting ultra combos for each player.

How is this achieved with two buttons when the original KI was a six-button game? Hold a button down for a fierce punch or kick, or tap it for a weak punch or kick. This makes the control a little awkward but still masterable.

Killer Filler

Super Game Boy Game Profile
Killer Instinct
(By Nintendo)

Killer Instinct makes its debut... in the palm of your hand! This portable puncher is great, and probably the only reason to dust off your Game Boy this year.

Game Boy, however, the graphics are clean and fast, with lots of detail for such a small screen. And surprisingly, this is a game that looks and plays better on the Game Boy than on the Super Game Boy.

Although you won't hear an announcer state how many hits you've registered (as in the 16-bit version), you will hear some funky rhythms and some pretty tinny punches and kicks. ProTip: Crank some tunes on your Walkman, instead.

Basic Instinct
Killer fans will want to take this show on the road, because their favorite game is just as much fun on the green screen. Any GB enthusiast facing a long backseat ride home will enjoy this game. Street Fighter II Game Boy has a little more in the gameplay area, but Killer Instinct is more fun.

PROTip: Try using fast punches against this powerhouse hitter. Throw projectiles when he's across the screen.

PROTip: End any multiple-hit (four or more) combo with the Phoenix (Down, Down-Toward, toward, then tap Kick) and you have the Killer Combo.

PROTip: For more hits at the end of a combo, throw on the Shockwave (Down, Down-Toward, toward, and tap Punch) or the Liquidize (Down, Down-Toward, Toward, and tap Punch).

PROTip: Add hits to the end of a combo with Spinal's Morph (tap Down, Down, Kick during any combo).

Sonic Drift 2
By Sir Gamabus
Hairpin turns, bombs in the road, and competitors who never give up make Sonic Drift 2 Game Gear racing at its best.
Seven of your favorite Sonic characters take it to the streets in 18 strangely familiar settings. Look for power-ups, such as rings, mines, and invincibility, but watch out for obstacles — your opponents will stop at nothing to slow you down.
Good detail and great backgrounds make it easy to spot items in this graphic masterpiece. A different musical score for each track keeps the audio at an enjoyable level. And the control is great once you get the hang of it.
Sonic Drift 2 coasts easily into the lead as a great racer.

Tails' Adventures
By Sir Gamabus
Two beautiful girls, a famous raccoonôn, and a group of bandits will keep you busy for hours. Hassle more bandits for more treasure. The game is easy to follow, so it's a breeze to beat.

Cutthroat Island
By Sir Gamabus
There's nothing Cutthroat about this island. A sword fight through monotonous levels with no finale and no fireworks? No thanks!

The stiff controls make no amends in this island tragedy. In addition to your ever-present sword, you're armed with daggers, bombs, guns, and bottles, as you fight a barrage of repetitive bad guys. Although you have ten moves, you'll be lucky to pull off two when it counts.

The graphics are sketchy and indistinct, offering little detail. The repetitive sound effects are glitchy, but the variety of tunes will keep your mind off the mindless gameplay.

In the end, you'll want to desert this island.

PROTIP: To perform a diving punch, hold both buttons while your Ranger's in the air. Pretty nifty against the Putty Patrol.

Power Rangers: The Movie
By Scary Larry
Oh no! Power Rangers! But fans of the series will love this cart, so don't knock it... yet.

This time Ivan Ooze wants to rule the Earth. All six Rangers (pick your color) are there to stop him, and they come equipped with special moves.
The graphics aren't bad for a small game. Well-defined sprites and faded backgrounds make up the gist of it.
The sounds are tame and repetitive, but not as annoying as other Game Gear carts. Plenty of snacks and whacks fill the small speakers.

Pick up the Power if you have an hour to waste. But don't spend your hard-earned money. Borrow it from your little brother.

FIFA '96 Soccer Scores Big on the PlayStation

FIFA '96

By Tommy Glide

PlayStation
It was exactly a year ago when FIFA first wowed 3DO owners. Now EA brings the same 3D stadium to the PlayStation with even sharper gameplay and sound.

Maximum FIFA
Now more than ever before, EA Sports maximizes its FIFA license to provide more than 3000 world class players from 12 international leagues, including England, Italy, and Brazil, along with 59 international teams. Traditional FIFA options give you a Season, Playoff, Tournament, and Exhibition modes of play.

The gameplay simulates real soccer better than ever, and the computer brings a fairly tough A.I. to the field. Complementing the realistic strategy element is the great passing and shooting control, which adds to the depth of the game. If you're looking to showboat, powerful speed bursts can create great breakaways, and moves like the rainbow kick and 180-degree spin, while not easily mastered, leave your opponents searching for their jocks.

Striking Distance
While not a radical departure from the 3D graphics seen on the 3DO, the sprites on the PlayStation have been cleaned up a bit, and the animation's smoother. Several views are offered, though none is really outstanding.

While the Ball cam puts you confusingly in the middle of the action with large sprites, the smaller sprites seen from higher views give you better playing perspective. The most helpful views are the overhead views for corner kicks and the optional bird's-eye view when your goalie has possession.

The sound has been enhanced with real-time commentary by England's play-by-play man, John Motson. Motson uses real player names in his commentary, and his voice is woven seamlessly into the action. However, the onfield sounds seem too soft. The great crowd noise remains intact, but there isn't the huff and puff you'd expect from running 22 men up and down the field.

Goal-A-Rama
FIFA '96 rolls onto the PlayStation with all the glory of a World Cup final match. While there may be more 32-bit soccer games on the horizon, you'll be hard-pressed to find any sim that bring home a more realistic soccer experience.

More full-motion video and sharper clips highlight this FIFA.

FIFA '96 Tips

- PROTIP: To score on corner kicks, lob the ball to the near post and try to head it in.
- PROTIP: As the Italian world team, feed the ball to Baggio (#10) for guaranteed goals.
- PROTIP: When first playing against the computer, give yourself the advantage of Brazil or Italy and take on weaker teams like Algeria and Luxembourg.
- PROTIP: If you're having trouble moving the ball uphill, switch your strategy and formation to compensate.
**Sports Pages**

**Center Ring Boxing**

By Tommy Gildy

Saturn

Following in the footsteps of Virtua Fighter, Center Ring Boxing could almost be called “Virtua Boxer.” Unfortunately, these polygonal pugilists lack the speed, grace, and fluidity of their martial arts predecessors.

**Taste the Canvas**

Center Ring offers features reminiscent of many 16-bit boxing games. You can build your own boxer and choose your face, height, weight, color of your shorts, left or right hand, and gender. Climb in one of six divisions from Bantam to Heavyweight (though you’ll hardly feel a difference in gameplay between weights) and square off with 30 top-ranked boxers.

Once you enter the ring, you’ll wonder where the 32-bit control went. The boxers circle each other well, but they move and punch sluggishly. You can throw decent combo punches, but the game sorely underuses the buttons. You only use Buttons A, B, C, and X (for taunt moves).

**PROTIP:** Use your feet. Often you can maneuver to the side of your opponent and hammer them with a hook.

**Rent-a-Center**

Graphically, these sharp boxers lack character. However, 12 camera angles enable you to watch the punches from different aspects and keep a clean view of the fight.

Decent sounds, like the round bell, are crystal clear, and the spotty music mixes in smoothly. But the punches sound tinny, and the announcer constantly repeats himself.

Boxing buffs may find that this game grows on them. While it’s certainly reminiscent of the old 4D Boxing for the PC, Center Ring lacks the discipline to be a true 32-bit contender.

**Quarterback Attack**

By Coach Kyle

300

Impressive visuals don’t make a great game. Quarterback Attack has the looks of a Super Bowl champ, but simplistic gameplay keeps it out of the playoffs.

**Attack of the Killer QB**

Digital Pictures carved a niche for itself with innovative sports games like Prize Fighter and Slam City with Scottie Pippen. Like those earlier efforts, QB Attack uses actual video clips shot from a first-person view, which in this case put you inside the helmet of a pro QB. You’re not merely an observer of the action, you’re the actual target of ferocious onrushing linemen.

Unfortunately, so much effort went into the visual concept that sacrifices were made in the gameplay. The negatives stack up like defenders at the goal line: It’s a one-player game, there’s no NFL license or players, you control only the offense, and you control only one player, the QB.

That’s right – you have nothing to do with kickoff returns, calling for blitzes, or field goals, to name just three important elements. These missing features are standard in virtually every other football game.

**Behind the Face Mask**

The visuals score a touchdown. The footage is much bigger than the postage-stamp size used for Prize Fighter’s video. While it’s sharp and quick, the footage isn’t flawless. Occasionally when you’re snapping the ball at the goal line, the view puts you closer to midfield.

The sounds rack up big yardage. Voices are sharp, taunts are humorous, and Mike Ditka effectively razzes you from the sideline.

Good looks and little strategic challenge add up to fun the first time around but not the second. QB Attack scores – just not enough to win.
NFL Quarterback Club '96
By Slo Mo

Super NES
As Acclaim’s football franchise, NFL Quarterback Club ’96 does a nice job of establishing field position on the SNES. This version essentially mirrors the Genesis game with a similarly offensive-minded A.I. but slightly slower player speed.

Total Offense
The Club has plenty of flash. It kicks off with all 30 NFL teams and a playbook packed with 400 plays, which you can flip. General managers can even create an entire 11-man team using specialized practice categories to build up specific position skills.

PROTIP: You can pressure passers into making mistakes. Try overshifting defensive ends wide of the tackles.

PROTIP: A pass-catching running back can be an invaluable custom player.

PROTIP: Long Pro-Set passes work in every QB Club cart. Select Long, Pro-Set, PA Delay. At the snap, quickly double-tap Buttons B, A, Y to pass to wide receiver Y.

The all-the-way-in-one-play CPU, however, is a defensive coordinator’s nightmare. The teams were programmed according to ‘95 stats, but you can easily lead the Patriots in an embarrassing rout of the Cowboys. For balanced competition, play a friend in the more evenly tuned head-to-head mode.

On the field, well-crafted controls open up an impressive variety of moves. Players can spin, straight-arm, dive for catches, and jump for interceptions. There’s even a power mode that increases the ability to either break or make tackles.

You can also set three standard audibles or use the 50 preprogrammed Hyper Audibles. You can call Hypers on the fly, and if you get really good, you can play most of a game without opening a playbook!

Championship Seasons
You literally can’t lose with this game. If you think winning is the only thing, the Club can make all your football fantasies come true.

Frank Thomas "Big Hurt" Baseball
By Air Hendrix

Super NES
With Frank Thomas “Big Hurt” Baseball, Acclaim tried (and failed) to mimic World Series’ fast-paced, gripping gameplay. Watching Little League players would be more exciting than struggling with Big Hurt’s shoddy controls, scant features, and no-brainer action.

Basic Ball
Big Hurt starts off in either Exhibition, Playoffs, Season, Clutch Situations, and Home Run Derby mode. Before hitting the field, you choose from all the Major League teams, but the MLBPA license means that only real-life players step up to the plate – the teams are named after the cities. While you can adjust fielding strategy, you can’t draft, create, or trade players, and you’re equipped with merely three pitches and two swings.

The awful controls prevent the game from coming to life. To pitch, you have to wade through menus to set the ball’s various attributes, but the unwieldy process interferes with tight, strategic pitching. The simple batting works smoothly, but during fielding, the view tracks the ball so tightly that it’s often impossible to make the play.

Frankly Bad
The graphics are this cart’s lone bright spot. Like World Series, large, realistic sprites race through well-detailed representations of big-league stadiums. The animations frequently stutter, though, marring the game’s eye-catching look.

In the sound department, deaf silence accompanies most games. Crowd noise shows up as a muted hiss, the ball and bat effects sound tinny, and a nervous kid on a first date speaks more often than the game’s announcer.

With the strong batting order of other baseball carts, bench Big Hurt in a hurry. Better 16-bit fields have been built for years.

PROTIP: Concentrate most of your pitches to the inside or outside. Center pitches usually get hit.

PROTIP: When fielding, use the radar screen to immediately send a fielder after the ball.
UNBELIEVABLE!
THUMB BREAKS FOUR WORLD RECORDS

Celebration spills over into streets after Thumb topples fourth world record in two days.

By COURT CRANDALL
STAFF WRITER

The living room—At exactly 8:37 p.m. ET, the blue guy crossed the finish line nearly two minutes ahead of the red guy in Val d’Isere Skiing and Snowboarding to topple the fourth world record in two days. It started Friday night with a record-breaking 140 points in NBA Jam Tournament Edition, followed only hours later by a new speed record in Super Burnout.

There is no ‘I’ in “HAND,” Thumb said. “Every finger played a role.” By 1:34 p.m. Saturday, Thumb added a 14-stadium reign in Supercross 3D. The rest, as they say, is history.

The deal—Moments after the fourth record was shattered, sports attorney Bob Prichard said his client and the sports world were still far apart in terms of contract negotiations. Prichard cited the discrepancy between his client’s salary and those of other much less valuable body parts like the big toe, guaranteed $5.6 million per year, and the right eyebrow, which earns a cool $6.2 million plus incentives.

The injury—“If we were talking about a pinky, it would be just another hangnail,” Dr. Arnold Markowitz said. “But when you’re talking Thumb, you’re talking potential career-ending injury.”

The system—After the tickertape welcome home parade, Thumb dedicated his record-breaking performance to the Atari Jaguar system, and encouraged thumbs everywhere to hitchhike to their local video game stores and pick one up for the holidays.

I’m proud to have left a thumbprint on this system,” Thumb says. “I’ll be ready to take on more hockey, racing, basketball and soccer games soon.”

How The Records Fell

In a mere 48 hours, Thumb propels himself from body part obscurity into sports mythology.

NBA Jam Tournament Edition

Thumb shoots 76% from field as fingers look on in awe. Says, “It takes big calves to beat these guys.”

Super Burnout

Riding one of six custom bikes, Thumb sets world speed record. At 143 mph, he’s the fastest digit on the planet.

Val d’Isere Skiing and Snowboarding

Thumb narrowly avoids freak accident with snowmobile to break Giant Slalom record.

Supercross 30

Overcoming serious cramp, Thumb catches air as he sweeps all 14 Supercross titles.
This is the first installment of a guide to Capcom’s eagerly awaited Breath of Fire II. The details of the story are left for you to discover, but we take you halfway through your journey.

The Game Starts

First, get the TreePole from the chest. You must talk to everyone in the village before you can go to the mountain in back.

Ten Years Later

You and Bow are looking for work at the Ranger Guild in Home Town. You're given the task of retrieving Nina's pet, Suzy. Leave the village and travel southeast to Mt. Fubi. Your first big fight is at the top against three harpies. Inside the cave, get the Fire Rock.

Go To Coursair

In Coursair, enter the Pub at night, and talk to Rand at the end of the bar. Leave the town, go to Tag Woods in the north, and fight Baba. Make the fight quick by using the Fire Rock. Get Baba's axe, return to Coursair, and talk to Rand. Now you fight Katt in the arena.

Rand and Bow continue to repair the house.

Home Town

Go back to Home Town, and you can now enter the Magic School. Go to the top floor and find Nina. Her sister has been kidnapped by the Joker Gang, the ransom being Nina. Their hideout is a cave south of Coursair (over the bridge) and to the west.

Joker is in the main cave with Nina, Mina, and his henchmen. You fight several Hoods first, then Joker. Joker is really a demon in disguise, however. After the battle, Nina joins your party.

When you return to the village, go into the church. There you meet Bow, who joins you. Leave the village and go northwest to the cave. In the cave, you fight Barubary.

Return to the Ranger Guild at Home Town and get a reward for rescuing Suzy. Later that night, Bow gets a job from a villager, Kilgore, but ends up framed instead. Leave the house, talk to Kilgore, and return to the house. Talk to Bow. Take Bow back to the Ruins and leave him with Niro.

After the fight, Rand joins the group. Go back into the arena and fight Augus. After defeating Augus, return to the inn, where Katt joins your party. Return to the Ruins where
so Sana and the magician can set up a lab for experiments. Return to Capitan and select a carpenter. The look of the Ruins depends on the carpenter you select.

Meet Jean in the woods, then go west to Witch Tower. Have Nina lead when exploring the Tower. Defeat Nimufu, and she tells you how to change Jean into normal form. Before leaving, find Sesu the Water Shaman, who is a prisoner in the Tower.

Kuwadora, get the thief (Patty) out of the cage in the kitchen and return to Home Town. Take Patty to Trout's house, then go back to the Ruins and get Bow. Take Bow to Kilgore's house in Home Town.

Although he is a weak fighter, Jean's ability to turn into a frog not only lets him swim in lakes, but makes him travel faster. He can also jump small hills and gaps.

Go to the basement at Trout's house, defeat the demon, and release Patty. Then return to the Ranger Guild. There you hear about a strange occurrence at a town called Gate involving the demon you fought at the beginning of the game. Time to find the Grass Man....

From Ruins, go back to Capitan and find Sana, the Fire Shaman. You are then transported to a magician's house north of Capitan, where a magician unlocks your Dragon powers. Go back to the Ruins.

From Capitan, you can now take the boat across the water to the woods in the west.

World Rulers HAVE IT and in this contest YOU HAVE IT.
Adam must rally the remaining dinosaurs to help the humans before all of them become extinct.

The road to success winds through many lips. There's more talking in this game than at the Democratic National Convention, and like that caucus, much of the talking is useless rhetoric that does nothing to enhance the game. Besides talking, you also gather clues to solve puzzles. No experience building or endless battling, so experienced RPGers may want to sidestep this one.

**Paradise Lost**
The graphics are crisp, clean, and imaginative with fantastic images of bejeweled dinosaurs and winged advisors to the kings. But unfortunately, for the most part, these images are static with just the lips moving. Little goes on in the background, making it a joy when something actually moves – like the rendered brontosaurs.

The music is a great earthy composition, reminiscent of the weird, funky rhythms of Deep Forest. It's complemented by a full-voice soundtrack with every piece of dialogue spoken.

The simple controls offer a pleasing cube interface. Basically, a cube (your cursor) revolves around the screen. When you pass the cursor over an object, an icon is displayed.

**Riddle Me This**
Myst fans who love the puzzle elements of point-and-click text adventures will really dig these dinosaurs, but be prepared for some lengthy discourses to keep you occupied. Although Lost Eden takes a bite from the RPG apple, it probably shouldn't talk with its mouth full.

This ProStrategy Guide will get you through four levels of the meanest space scam ever to stain the galaxy.

Grab your weapon and load up because, with 15 levels of splatterfest shooting action, Loaded is sure to challenge. Use these strategies, maps, and hot spots to survive Loaded's treacherous beginning. By the time you reach Level 5, you'll be ready for the nasty surprises that lie ahead.

**The Loaded Team**

**Mama**
- Mama lacks speed but has awesome, concentrated firepower.

**Butch**
- Butch, "the most dangerous cross-dresser in the galaxy," turns his victims into neat piles of ashes. Although Butch is fast on his heels, his flamethrower is only effective at close range.

**Fwank**
- With effective, concentrated firepower, Fwank is very good at shooting around corners. He's a bit slower than the others, though.

**Bounca**
- Bounca has good speed and terrific range with his missile launcher. His maneuverability is poor, however, and his weapon has little spread.

### Stats
- **Mama**: Speed: Slow, Armor: Good, Weapon: Plasma Gun
- **Butch**: Speed: Fast, Armor: Medium, Weapon: Flamethrower
- **Fwank**: Speed: Slow, Armor: Good, Weapon: Neutron Spheres
- **Bounca**: Speed: Moderate, Armor: Medium, Weapon: Missiles

### Smart Bombs
- **Mama**: Smart Bomb: Ripple Grenade
  - Makes the floor erupt, killing everything within a limited range.
- **Butch**: Smart Bomb: Explosive Ring
  - Blasts out a very powerful circle of flame and has good range.
- **Fwank**: Smart Bomb: Homing Teddies
  - Swarm the screen and home in on targets, making them the most effective smart bomb.
- **Bounca**: Smart Bomb: Frag Missile
  - Causes little damage and has very short range, making it the weakest smart bomb.
**Vox**
Vox, a sonic beauty, uses sound to her advantage. She's the fastest character, but her weapon has little range, and she takes damage easily.

**Stats**
- **Speed:** Fast
- **Armor:** Light
- **Weapon:** Hail Flail

**Cap 'N Hands**
Armed with two guns, the Cap 'N has it all—massive firepower, excellent range, and good spread. He's on the slow side, but his big guns amply compensate.

**Stats**
- **Speed:** Moderate
- **Armor:** Average
- **Weapon:** Flintlocks

**The Basics of Brutality**

**Light Up the Rooms**
In dark rooms, some characters, including Cap 'N Hands, can use gunfire to throw some light around and reveal shadowed enemies and icons.

**The Need for Greed**
Pick up any coins the guards drop when you shoot them. Everything adds up at the end so be greedy!

---

**Level 1: Prison - Holding Cells**

**Objective:** Find Exit to Next Level

**Level 1 Highlights**

At the start of Level 1, go down and to the right. Grab the yellow keycard (1). Walk into the room above (2) and grab the gun power icon for the upcoming battle.

In Level 1, collect the keys in this order: yellow, green, blue, red.
Enter the room (3) up to the left, where you find a laser tower firing intermittently. It fires right after the rotating guns stop. The turrets move slowly, so you have enough time to dodge the shots. If things get hectic, get more ammo from the small room on the right (4).

Head back up to the center to the door on the left (7). Open it and start shooting, but don’t go into the room. Keep shooting until you destroy the laser tower just inside.

If you’re feeling greedy, head to this secret area (11). It’s filled with coins. It’s also filled with guards, though. Watch out for them hiding in the shadows.

The easiest way to get through this room is to aim diagonally up and to the left. Move slowly and fire constantly. Kill the tough guard at the far end of the room and pick up the green keycard (5) that he drops.

These straitjacketed enemies look harmless, but they move fast and have a deadly head butt. They love to surround victims and bash away. You’ll find them in padded rooms (8), so be careful when entering one.

If you enter this room (12) slowly, you can kill the guards without attracting their attention. Grab the health and ammo power-ups.

Head back the way you came and then down further to find a room that’s almost identical to the room you just left. A tough guard at the far end of this room carries a blue keycard (6).

Three massive, slowly rotating laser cannons (9) guard this stage, inflicting extensive damage if their twin-gun laser blasts hit you. Circle these behemoths and keep firing. It doesn’t take many shots to destroy them.

Enter this room (13) and blast your way to the left. Use the post for cover from the laser turrets. Aim diagonally down and to the right and slowly move down, firing as you go. When you reach the bottom, turn right and slowly walk forward while firing. Shoot the tough guard and get the red keycard.

In Level 1, decrepit or cracked walls often hide secret rooms filled with power-ups and other items (10). Some secret rooms, however, are also filled with guards and enemies. Whenever you see a suspicious wall, shoot it.

The only things standing between you and the exit (14) are a couple of guards.

Shoot the wall here (1) and head for the teleporter (2). The teleporter takes you to an isolated room filled with icons and guards. Be ready for the guards clustered around the teleport pad that leads out of the room (3). Before stepping on the teleporter, face left and take out the guard that’s waiting for you by the platform (4) in the other room. Step on this platform (2a) and return to the main room.

Shoot this wall (5) and reveal a hidden area filled with coins, ammo, and a gun power-up.

There are no doors by these rooms (6). Move toward the door and head for the teleporter (2). The teleporter takes you to an isolated room filled with icons and guards. Be ready for the guards clustered around the teleport pad that leads out of the room (3). Before stepping on the teleporter, face left and take out the guard that’s waiting for you by the platform (4) in the other room. Step on this platform (2a) and return to the main room.
and guards rush out to give chase. When blasting through this room, move slowly – the guards blend in with the black-and-white checkerboard floor and are difficult to see. Forget about shooting the beds. They almost never hide power-ups, and shooting them only adds to the confusion and wastes ammo.

Enter this room (12) slowly. Blow away the tough guard who has his back to you and pick up the red keycard he leaves behind.

These two rooms (13) are filled with guards. Don't rush in, or you'll be surrounded and smashed to a pulp. Instead, first open the door and take out as many as you can from the hallway. Tackle the other two rooms (14) in a similar fashion, but only after you get the blue keycard.

After getting the green keycard (15), go for the blue keycard (16). Be careful when heading toward the blue card – laser turrets are tucked into the recesses of the long hallway that leads to the card. The lasers turn and fire simultaneously in the same sequence.

Shoot this wall to find a hidden room (17). The three rooms at the end of this stretch (18) contain gun power-ups, ammo, and first-aid kits. There are two tough guards in the room right before the exit (19). Have plenty of health and ammo before taking them on.

There is a gun turret (7) at the junction at the end of this hall. Go down the hall to find armed guards waiting behind a barricade of crates. The crates also hide a cache of ammo and gun power-ups. Another gun turret (8) is concealed in the shadows at the end of this stretch. The yellow keycard is at the far end of the room carried by the tough guard. If you shoot the wall here (9), you will find a passageway to three coin-filled rooms.

After destroying this barricade (10), beware of the two guards hiding on each side of the doorway. Reveal the first aid, but save it until after you’ve cleaned up the room – you’re going to take some damage here, especially with the presence of yet another gun turret. A secret room (11) is hidden at the far end of the room.

In Level 2, collect the keys in this order:
- yellow
- red
- green
- blue
Level 3 Highlights

At the start of the level, grab the ammo and gun power-ups (1) and proceed down the hallway. Slow but powerful zombies line the hallway—they take several shots to kill and can inflict massive damage. Use the room with the number "1" as a reference point each time you retrieve a keycard.

Meet a new enemy when you hit this junction (2)—rats! These rodents will shred characters with weak armor in moments. Unfortunately, the only way to obliterate them is to let them get close to you—trying to hit them at a distance is difficult. From this juncture, go right and make a dash for the red keycard (3). These corridors are dimly lit and filled with rats.

The passage hidden behind this wall (4) is filled with snipers, but leads to a room with a first-aid kit and gun power-up.

En route to the blue keycard, there are three hidden passages (5). The card is in the room at the very end of the section (6). Keep an eye on the slow zombies in this section. They regenerate when you kill them, so don’t waste your ammo. Just avoid them.

The green keycard (8) is surrounded by snipers and is tough to get. The temporary-invincibility icon in the hidden dead-end alley (7) will help. Get the icon, grab the keycard, and leave quickly.

After getting the yellow keycard (9), shoot the wall below and go down the secret passage (10). This stretch is filled with rats, but there's a payoff: You'll find an extra life behind the cracked wall at the end of the passage.

The only things standing between you and the exit (12) are several hundred rats and an army of snipers. The room before the exit (11) is the worst part. This is a good time to use a smart bomb.

In Level 3, collect the keys in this order:
red · blue · green · yellow
More zombies and rats. The exit to the level (2) is directly above the starting point (3). There are four keys between you and the exit, however, and the first one, the red keycard, is to the upper left (1). If you start the level and immediately go to the right (4), all you find are a few power-ups and a whole lot of pain.

Directly below the reference point (3) is a narrow alley filled with rats. Unless you really need it, the gun power-up down the alley to the left (5) isn’t worth the trouble. The same goes for the section if you keep going down (6). Unless you have the blue keycard, don’t bother. Use this room (7) as a safe haven from the rats.

The green keycard is in the lower right side of the level (8). Instead of backtracking your way out, go to the passage to the left and shoot the wall at the dead end (9). Return to the reference point (3).

The yellow keycard is next. Be wary of the big room (10) at the end of the narrow stretch. When you leave the room, take the passage in the middle (11). There is less ground to cover and more coins to collect from fallen guards.

The yellow keycard is in the big room to the right (12). Instead of rushing into the room, go down the corridor below you instead. There are some rats and zombies, but there is also a temporary-invisibility icon (13). If you’re fast enough, you can run out of this room and grab the keycard before the invisibility wears off.

On your way to the blue keycard, there is a hidden room with a temporary-invisibility icon (14). With all the rats and guards in this area, you need to grab this icon. Make your way to the far room (15) and in the darkness is the blue keycard. Blast your way out of this section and head for the exit (2).
Digging the Dirt with Earthworm Jim 2

Jim is back and dirtier than before! In this ProStrategy Guide, we show you the most challenging levels and their big secrets!

By The Axe Grinder

Some Harmful Items

These look like fun, but Jim should avoid them.

- Electric Chair: A shocking experience
- Iron Maiden: Radical acupuncture treatment

Fun with Cows

Press any of the buttons when the cow says "Well done," and he makes funny sounds.

Standard Jim Abilities

- Whip: Tap the Whip button.
- Snort Swing: While jumping, tap Jump again.
- Parachute: While falling, hold the Fire button.
- Block: Hold Up and tap the Weapon Select button.

Password Pieces

Collect these items to assemble the password. When you get all three in a level, you can then skip that level when you play again.

- Earth Flag
- Worm Flag
- Jim Flag

Weapons of Destruction

- Standard Issue: Standard shots
- Bubble Gun: Worthless bubble-blower
- 3 Finger Gun: Fires in three directions.
- Homing Missile: Chases a target and explodes.
- Barn Blaster: Cleans everything off the screen.
- Mega Plasma: A powerful shot that uses two rounds of plasma energy.
Standard Jim fare – a gigantic level loaded with familiar enemies and even a hidden level.

**Extra Life**

Forget about trying to get the extra life above you when the level starts. The only way to get it is to run to the right, climb the ledge before the door (A), and use the Snott Swing.

**Hidden Areas**

J
To reach the first hidden area, jump straight up from here.

H
At the top of the stairs, hang from the bar, drop down, activate the parachute, and press to the left. Enter the hidden area.

K
Tag the invisible checkpoint, then go back to the right. Walk through the wall and get the super suit power icon.

L
Run through this wall for the Jim Flag and other goodies.

M
Tag this invisible switch and go back down to the left for several plasma power-ups.

N
Jump to the left and use Snott to enter this secret area.

**Happy Oinkers**

You need to use these pigs in two areas (to pick up a pig, stand over one and press Down). The first area is on the “pig chute” (B); the second is on the big plug (C). On the big plug, use the homing missile to get rid of the rolling fishbowl.

**Bob & #4**

Shoot the lock over these two bully cats (D), and a pile of junk falls on them. Beware of their bowling fishbowls.
Earthworm Jim 2

Falling Grannies

Use the following speeds for each of the flights of stairs to avoid the falling ladies. Change speed after each falling lady:
- First flight (E): Fast
- Second flight (F): Slow, then fast
- Third flight (G): Fast, then slow

Granny Bonus
If you're desperate for an extra life, try this bonus game. Here are the speeds you should use for the following floors (change speed after each falling lady):
- First floor (A): Any speed
- Second floor (B): Slow
- Third floor (C): Fast, then slow
- Fourth floor (D): Fast, then slow
- Fifth floor (E): Slow

The Boss: Hi, Bob!

This is a boss so tough that you have to figure out how to defeat it on your own! Hint: Wait for Bob to make the first move.

Secrets 'N' Stuff
A
To get the Chip Butty, stand here and jump to the right. Activate the parachute and press toward the right. You should grab the ledge and get 200 percent health.

B
To get to the area with all the goodies above, shoot all the dirt off the pipe above. When it piles up, run and jump to the right. Using the Snott Swing, swing once, then immediately use the parachute to get on the ledge to the right. If you timed it correctly, you should land on the ledge next to the stopwatch. Walk off the ledge, activate the parachute, and press toward the right. Grab the platform below. Now jump up to the right, grab the platform, and collect all the goodies.

C
Tag the invisible switch here, and you find an extra life waiting for you where you started the level (that's right - all the way at the bottom!).

Lorenzo's Soil LEVEL 2

Jim has a new enemy - time. However, the level is loaded with stopwatches to give Jim precious seconds to find a way out.

Pain in the Ant

Sure, you can shoot the ants, but that takes time and effort. Instead, shoot the dirt over the ant holes to seal them off. This tactic also works on the open flames.

Pedro Pupa

A giant maggot on a unicycle. The fastest way to defeat it is to catch it on an incline and mercilessly whip it. Run away if it gets too close - it has an appetite for worms, especially Jim's flavor.
**Puppy Love**

**Levels 3**

Jim must bounce Peter Puppy's pals from the left to right side of the screen. If he drops too many, Peter will get very angry (and Jim gets severely punished).

**New Controls**

These stages require Jim to do only two things:
- **Button A** = Dives for puppies.
- **Button B** = Turns Jim around.

---

**Puppy ProTips**

The key to this stage is to focus on delivering the puppies - even at the cost of a juicy icon. Most important is the bomb. Whatever happens, the bomb must be delivered. If Jim drops the bomb, it causes massive damage (even more than Peter's punishment). When on Peter's side of the screen, listen for the whimper of puppies, which indicates that Psy-Crow has started dropping them.

Drop too many puppies, and it's punishment central for Jim!

---

**Villi People (a.k.a. Blind Sally)**

**Level 4**

Jim's now a blind cave salamander trapped in an intestinal planet. Loaded with pinball bumpers, floating "things," and deadly villi walls, you must move slowly (and carefully) through this maze-like level. Different bumpers bounce different distances: Jim's bounce a little, 12 bounces a little more, and Psy-Crow's bounce a lot.

**New Controls**

This stage has some new controls for Jim:
- **Button A** or **Y** = Fire
- **Button B** = Float

**Secrets and Other Stuff**

A

The one (and only?) hidden item are the four suit power icons (A) that are revealed when you hit the invisible switch at this point.

Aside from the deadly villi walls that are just waiting to take a bite out of Jim, floating blobs also present a problem. Always blast these things at a distance - they explode in a shower of deadly debris. They can also go through walls, but you can shoot them through walls, too.

---

**Quiz Show**

The more meal worms you collect, the more questions you can answer. Prizes are a plethora of icons.

**Memory Game**

Repeat the sequence of dings made by the pinball bumpers. Always tap the Float button after landing on one so you don't accidentally land on any bumper more than once and lose the game.
The Flyin' King

LEVEL 5

Jim takes to his rocket for a 3/4-overhead-view shooter level. Safely take the bomb to Major Mucus and detonate it. Of course it won't be easy. At the start of the level, leave the bomb and scout ahead. This way you can remove some hazards.

New Controls
New pilot controls for Jim:
Button B = Turn around
Button Y = Fire

Catapult Nightmares

The flying sumo/Roman centurions can be a real pain. If they grab onto your craft, they drain your life meter. Rapidly turn the ship around when they grab on. You can also take out the catapult bases by shooting the large boulders nearby.

Express Lanes

The extreme right and left corners of the screen are express lanes. Use these to quickly speed down the screen, but keep the balloon away from these slots. Nothing is worse than pushing the bomb a long way in the wrong direction.
Balloon Go Boom!

Aliens are stealing cows, and Jim must stop them. Pick up the cows (the same way you picked up the pigs in Level 1) and carry them to safety. Some of the ledges can only support so much weight, so move quickly when standing on a ledge that starts to creak and groan.

The objective of each section is to take the cows to the milking barn.

Secret Areas

A
A hidden patch of slime is up here - use Snott to grab it. Swing back and forth (attaching and re-attaching) and slowly make your way up. At the maximum ceiling height, swing toward the right and collect the extra life and shield power icons.

B
The door in this wall hides plenty of ammunition and a teleporter. Careful of the gap after the ammo - if Jim falls in, it costs a life.

C
When you reach the items on this ledge, grab the homing-missile gun first, then the ammunition. Jump over the teleporter to the left and get part of the password. If you go into the teleporter, you'll miss some hidden items.

D
A patch of slime's hidden here. Use Snott to swing to the ledge on the right side.

E
Use Snott to grab the patch of slime here. Swing to the left and collect the ammunition and other items hidden in this narrow cavern.

F
Swing to the right to get into this area filled with weapons and password pieces.

Cow Theft

Put a cow down, and a UFO may try to steal it. When a cow gets caught in the UFO's tractor beam, whip the cow. You can also keep the UFO away by shooting or whipping it (homing missiles are effective).

Exploding Cow

If you find a cow with a fuse on its head, take it to the giant bathtub immediately and dunk it. If it explodes, Jim loses a life. However, if a UFO steals an exploding cow, it will defuse the situation - if it takes the cow away in time.
Evil the cat squares off against Jim! Using Jim's inflatable head, float to the top without getting popped. Remember to collect as many meal worms as you can - you'll need them for the bonus stage at the end.

**New Controls**

Jim has two new abilities on this level (they only work while he is floating, though):
- Button A or Y = Deflate
- Button B = Inflate

**Secrets and Other Stuff**

**A**

Float over this hole and deflate. Several hidden items are here, including a Chip Butty and a password piece.

**B**

From this point, Evil flies down and tries to pop Jim's balloon. Watch his approach in the background. When he shows up, move to one of the sides to avoid him.

**C**

Slow down at this section! There are two areas above where Evil is waiting with his peashooter (wonder why he stopped descending on you?). Never short on nastiness, Evil also shoots diagonally out of these two holes, so get away from them as fast as you can.

**Big Idea**

Whenever Jim's balloon pops and he falls, press to the right or left. This way, Jim can get some valuable items he may have missed on the way up. Remember, though, when Jim's balloon is popped, his parachute won't work.

**Lonely at the Top**

Jump on the platform when the icon is above the flag in the background. This is where collecting all those meal worms pays off; each time you jump on the platform, your stock goes down. Save your jumps for the real juicy icons - like the super suit power.

The best 2D fighting game in the arcades is making its way to the PlayStation! This translation is nothing short of perfect: The moves and combos are all here along with all the frames of animation! In this installment of "The Fighter's Edge," we take you through the game's basics and jump into some heavy-hitting combos. Be sure to look for future updates on the rest of the characters and hidden fighters.

**Combo Skills**

The following combo skills are used throughout this strategy guide and are essential to properly playing Street Fighter Alpha. Learning these combo skills correctly and using them in a fight will separate the men from the boys.

**Starting Two-in-One Combos**

Real combos are what made Street Fighter the huge success it is today. Street Fighter was also the first fighting game to use two-in-one combos. To perform a two-in-one combo, start a move with your character, then immediately begin the second move. If timed correctly, you can execute both moves and, if your opponent doesn't block the first move, the second move will also connect. Not all the fighters' regular and special moves can be two-in-one or chained together.

**Example of a Basic Two-in-One Combo**

Hold ↓, tap FK. As soon as your character starts to perform the move, two-in-one immediately with the second move.

Motion ↓ → FP. Normally, to perform a fireball, you have to motion ↓ → → FP. But since you were holding ↓ from the pervious move, you only have to motion ↓ → FP to get off the two-in-one.
Start with an Air Attack

Most of the combos on the following pages start by jumping in deep with a move. This isn't essential, it's just a good way to get in close to your opponent and land an extra hit.

Cross-Up Attack

To perform a cross-up attack, jump with a move toward the opposite side of your opponent. Cross-up attacks are an excellent way to start a combo because they often confuse a blocking opponent. From there, the damage is up to you.

*Note: Not all characters have cross-up attacks. (See the following character profiles for cross-up attacks.)*

Linking Moves

The following is a list of moves each character can link together to form a combo. These chain moves can be interrupted (two-in-one) with some special and even super moves.

Basic Skills

Air Blocking

New to the Street Fighter series is air blocking. To perform an air block, hold (as you normally would on the ground) while in the air. Some major rules apply, and not all moves can be blocked in the air. Here's a list of what can and can't be air blocked.

Can't Be Air Blocked

No ground-based normal moves and super combos can be air blocked, except for Charlie's.

Roll on the Ground

Another new feature in Alpha is the ability to roll toward or past your opponent as you're knocked down from a move, combo, or throw. Ground rolls are performed by motioning a half circle toward your opponent. Push a button at the end of the motion to determine the distance you want to roll.

Super Moves

As in X-Men, each fighter has a Super bar made up of three levels that can be carried over between rounds. You can increase your Super bar by hitting your opponent, getting hit, and performing special moves. When the Super bar reaches a level, you can then perform a Super move (see the following character profiles for instructions). The Super bar maxes at Level Three, and when it does, you can either perform a super move individually (using part of the bar) or all at once (using the entire bar), depending on how many buttons you press.

Counter Throws

To perform a Level One super, first do the joystick motion, then tap one of the punch or kick buttons. To perform a Level Two super, press any two of the punch or kick buttons. For a Level Three super, press all of the punch or kick buttons. The higher the level, the more hits and damage you inflict.

Counter Throws

To counter a throw, move the controller toward or away from your opponent and press FP right as you're being thrown. Timing is very important here.

Alpha Counters

Alpha Counters are one way to counter incoming moves. When an enemy comes in for attack and your character starts their blocking animation, perform an Alpha Counter (see the following character profiles for instructions). Alpha Counters are best used to defeat opponents who like to jump in and to get out of the nasty corner traps. Using an Alpha Counter takes off one level of your Super bar.

Let You Stay
in The Game—
Forever.

Kill faster! Jump higher! Never die! This time Interact has
gone too far! With the Game Shark™ for the PlayStation™ and
Sega Saturn™ systems, the rules no longer apply! YOU decide
what weapons you want, how much ammunition you have, how
strong you are, how fast you can go, and what you can drive!!
It’s the ultimate game enhancer!
The Game Shark is menu-driven, so there’s no manual to
figure out—just tons of built-in codes you can use to customize

Narrow down the competition in Daytona
USA™! The Game Shark lets you race against
five opponents instead of 40!
Have you ever raced with this car in Ridge Racer™? You can only get it by using the Game Shark!!

Mind-numbing velocity! Game Shark lets you increase your maximum speed in Sega Rally™ to 152 M.P.H.!
