■ SUPER MONACO GP (Sega, £34.99)

The official BUZZ Mega Drive review...

Move over WEC LE MANS and GRAND PRIX CIRCUIT you've been overtaken by this, the ULTIMATE driving game!

Piloting a grand prix racing car must be one of life's greatest kicks and Sega has managed the near impossible task of putting this in a game. Sega gives us mere mortals a taste of what the real thing must be like...

The initial option is to race around one of the most daunting of tracks - Monaco - in a carbon copy of the best arcade racing game in years. cont >

Get the hang of the circuit in practice mode, do a qualifying lap to earn a grid position and then race three laps against 15 other cars. Get in the first three and...race on a wet track! Fun.

For fun with a capital F though, get rid of the automatic gearbox and pick either the fastest four or SEVEN-Speed box and embark on the real thing - a grand prix season with five laps of 15 different circuits, pit stops, tyre changes...the lot.

The screen is packed with information - what gear you're in, tachometer reading, position on circuit map, speed, lap, lap times, etc, etc. Almost too much.

You've a cockpit view of the road ahead and must keep an eye on the rear-view mirror at the top of the screen to see what's coming up behind. Easy it ain't!

Graphics are first-rate, sound FX (particularly engine roars on starting grid) top notch, movement brilliant. Drive like Ayrton Senna.. and win!

TIP SHOP...TIP SHOP...TIP SHOP.

■ Three health blocks not enough on the Master System version of **ALTERED BEAST**. **Soul Eagles** of ?????? reckons you can get five blocks by pressing the diagonal upper left button on the pad during the title screen, then by pressing either button.

■ **Danny Gasser** of **Edmonton** has this ace cheat up his sleeve to help with the Mega drive version of **REVENGE OF SHINOBI**. On the options screen select 00 shurikens and wait for about 10 seconds. The 00 will join together and you'll now find you can start the game with endless shurikens. **Win a Sega >**
