WELCOME TO GAME PLAYERS

We're back again — it seems like there's hardly been time to read the last issue, and another's already in your hands. And what a thrashing issue this is!

We've got a barrel-load of games, including Mortal Kombat for Sega CD, Jammit, Mansion of Hidden Souls, and, of course, Super Metroid. As ever, you know you can trust the reviews you read in Game Players because we're on your side — if a game's not worth the money, we'll tell you. So see what we thought before you buy a cart.

When you've finished reading this issue, write and let us know what you think. We've made things easy for you with a special survey on page 88. Take the time to fill it out and let us know what systems you own, what games you're playing, and what you like (and hate) about Game Players. Oh, yeah — you can win stuff, too, which more than covers the paltry cost of a stamp and an envelope. Besides, how can we make the magazine better if you don't tell us what you want from it?

NEXT MONTH

See you next month with even more top reviews, previews, and strategy.
The war between Sega and Nintendo is heating up. Take a gander at some of the incredible machines you'll be using soon. Plus rumors, news, and details that affect the games you play.

SEGA HITS HYPERDRIVE — Saturn, Jupiter, Titan, and the Super 32X

Yo, ho, ho! If you thought last month was a busy one for Sega of America, get a load of this stuff! The planets must be in alignment for the company — it’s on a virtual spree of game-system designing. Here’s what we’ve learned in 30 short days.

We hear that the first few Saturn games will include Virtua Fighter, Virtua Racing, Virtua Soccer, an untitled 3-D shooter (rumored to be in the works from Game Arts; a souped up Slipspeed, perhaps?), and an untitled action game. Sega of Japan has some 40 games in development, which surely includes the Sonic and Daytona arcade games — one of the advantages of Saturn is that it reportedly takes just two weeks to transfer code from coin-op to Saturn.

Japanese audiences will get their first real look at the Saturn during the Tokyo Toy Fair in June. A U.S. release? The timetable rumors range from this fall through 1995.

The biggest rumor surrounding Saturn is that it will be released in two versions. The 32-bit Saturn we’re all drooling about will incorporate both a cartridge port and a CD-ROM drive. Then there’s the Jupiter, which is a Saturn without the CD-ROM drive, although one would be available for future upgrading.

Despite Sega won’t confirm or deny the existence of Jupiter — or anything to do with Saturn, for that matter — the modular approach of releasing what is essentially a Saturn but without the CD-ROM drive does make a lot of sense. We wondered in print last month how Sega could compete with Nintendo’s planned $250 price tag for Project Reality; the Japanese Saturn is reportedly going to sell for about 50,000 yen (about $470). The stripped-down Jupiter machine could sell for about 30,000 yen (about $280), which is much more competitive.

The plan could cause a few problems, though. The primary one is consumer confusion. Have potential buyers yet figured out the difference among the old Genesis, the new Genesis, the old Sega CD, the new Sega CD, the CDX, the portable Genesis, and the input! Sega CD? Now they’ve got Saturn, Jupiter, and Jupiter’s modules with which to contend. But ultimately Sega wants to continue building its consumer base, and Jupiter seems a good way to keep everyone happy.

Sega’s Saturn machine is the next step toward in video gaming... but with a suggested price tag of $470 how many of us will be able to afford it? By releasing cut-down versions of the same hardware at reduced costs, Sega can make the machine more accessible to all of us.

Sony’s PS-X Heats Up

News continues to filter through about Sony’s PS-X — and everyone we talk to who has seen this system just raves about it. The latest we hear is that Sony already has 110 game companies lined up to develop games for the system, including Bandai, Capcom, Konami, Jaleco, Namco, and Taitei. Sony also says that its number of licensees is increasing faster than those for 300 in the same time frame. We’re also hearing that Street Fighter may be one of the first games released for the system.

Sony Magazine, a subsidiary of Sony Music Entertainment — which, of course, is also the parent company for the PS-X — will begin publishing a magazine devoted to the PS-X this October. Reportedly, a CD-ROM will be included with every issue.

Nintendo has revealed that it will release a cartridge containing a Game Boy adapter, enabling more than 350 Game Boy titles to be played on the SNES. The device will be released in June for $59.99. You can customize colors and borders used in the games — don’t expect true color!
Titan

Titan’s yet another galactic name (it’s one of Saturn’s moons), but it’s not one that you really need to remember. This new 32-bit (we also hear 64-bit) machine is compatible with the Saturn and is already being sold to Japanese arcades at around $950 — less than half of the cost of most current coin-op prices — and is likely to come to arcades in America some time this year.

Titan lets Sega do market research on its new games before it introduces them to the home systems later on. It’s a method that’s working for Virtua Fighter and Virtua Racing, and it certainly worked for Mortal Kombat and NBA Jam — play ‘em in the arcades and get pumped up about buying ‘em for your own.

Sega has already begun replacing existing game boards with Titan throughout its 1200 amusement centers in Japan. The system should ensure that only the best games are released for Saturn.

Genesis Super 32X

Just when we got ready for Sega to announce something like the Pluto or the Hyperion, instead comes the less cosmonically named Genesis Super 32X, a Genesis hardware upgrade available this November that Sega claims will give “arcade-quality game experiences from existing Genesis hardware.” Huh? Well, what Sega’s announcing is a sort of stop-gap measure before Saturn is released. The Super 32X is an add-on module that incorporates two Hitachi SH2 RISC microprocessing chips — the same chips the Saturn will use. When attached to a Genesis or Sega CD, you can play all your old games, as well as CD and Genesis games designed to incorporate the new technology. Sega reportedly has some 30 in development itself, with other licensees to add a similar number.

So why is Sega doing this? When you think the company would want gamers to save up for Saturn instead of dishing out $149 for a new addition? There are probably two reasons: One is obviously to prolong the life of the Genesis and to give gamers a chance to play 32-bit titles now, before the Saturn or Project Reality go on sale.

We also think it’s because cartridge prices are beginning to creep up — remember, Virtua Racing has a staggering $100 price tag. The new enhancer enables Sega and its licensees to keep cartridge prices the same, but still add faster processing speed, texture-mapping, scaling and rotation, and improved graphics to the games.

A Sega spokesperson promised Game Players that the 32X would not postpone the release of the Saturn — although it’s a pretty sure bet that this means Saturn won’t be going on sale during 1994. Our contact wasn’t able to give us any game titles, but he did say Sega’s planning on the one or two games that will only be available for the 32X to drive sales of the system to 2.5 million units within the first year. We’ll see!

Licensees Ponder Project Reality

Things are pretty quiet in the Nintendo of America camp, but we’re hearing mixed reactions to Nintendo’s announcement to make Project Reality cartridge-based instead of a CD-ROM unit. While the idea of the minimum 100-meg cart sounds good on paper (especially if Nintendo keeps its promise to deliver it at a price comparable to current SNES games), the format has some third-party licensees more than a little concerned.

One license told Game Players that the problem from their perspective is that the cartridge format helps Nintendo maintain what many call a stranglehold on its publishers. While Nintendo reportedly charges between $20-25 for each cartridge that it manufactures for a licensee, a CD game costs less than half that for producers of Sega CD titles. Assuming that figure stays the same for Project Reality software (it could even go higher), that’s a lot of start-up cash for a system that’s not even on the shelves yet.

The problem may not be confined just to Nintendo. If what we’ve heard about Sega’s Jupiter is true, then that system would jump ahead of the pricier Saturn as PR’s direct competitor. So what? Well, that could mean that while CD games are possible for the Sega 32-biter, cartridge titles would be in higher demand. And although Sega isn’t rumored to be charging quite as much as Nintendo when it comes to its manufacturing fees, they aren’t cheap, either. The unavoidable price war between Saturn and PR that will erupt shortly after their release, could spell even more trouble for the licensees, forcing them to sell carts at close to cost while Nintendo and Sega take their usual chunk.

One more thing: Developers managed to sneak a peek at some proposed specs for Project Reality during a recent Silicon Graphics conference in the UK. These are sure to change, but we thought you’d like to know what they were anyway.

- CPU: R4200 MIPS
- 100MHz RISC processor
- 100 MIPS (Millions Instructions Per Second)
- 3-D Graphics: 100 MFLOPS (Floating Point Operations Per Second)
- 100,000 polygons generated per second
- Real-time anti-aliased 3-D texture-mapping
- High-resolution HDTV compatibility
- 16.7 million colors
- CD-quality sound

What’s it got?

One Giant Leap for Gamers

By 1997 you may get to steer a little buggy on the moon. LunarCorp, a maker of space-oriented CD-ROMs, wants to raise $110 million to put a remote-controlled rover on the moon, then charge the public to drive the rover across Tranquility Base. A quarter of the rover’s work will also be devoted to science, says David Gun, president of LunarCorp.

There’s no word on how much each trip in the command seat would cost a player, but the theme parks, television networks, and corporate sponsors who would control the rover would have to ante up between $5 and $18 million each.

One Batman, Two Robins

Warner Brothers has been holding open auditions for actors interested in playing Robin in the new Batman movie. "We’re looking for a Robin for the ’90s — someone who’s tough, sexy, rebellious," says Mal Finn, casting director for the movie. With that in mind, Finn has auditioned youngsters recommended by youth clubs, parole officers, and gang liaison officers. Applicants should be under 39 and between 14-20. Wacky!

Another Robin — Robin Williams, to be exact — will be the primary villain in Batman II, which will be directed by Joel Schumacher (The Lost Boys, Flatliners). Producers are also hoping for another high-profile bad guy. Evidently, Warner Brothers is trying to convince Tommy Lee Jones to play Harvey Two-Face. If you remember, Billy Dee Williams played him in the original Batman movie.
VR THEME PARKS EXPAND

Players from San Diego to Houston already know the secrets of the Virtual Geographic League, but now more of the rest of the country can join this society dedicated to interdimensional travel.

Virtual World theme parks — begun by Virtual World Entertainment, which in turn was begun by the folks behind FASA publishing and the BattleTech Centers — are expanding beyond the original four U.S. sites in Chicago, Walnut Creek, CA; San Diego; and Houston. Locations set to open this year include Los Angeles, San Francisco, Las Vegas, and Dallas. Worldwide locations will include Toronto, London, and Hong Kong.

Virtual World is two games in one. For $7-9, you get a 30-minute game session with either BattleTech, which lets you take the controls of a 30-foot walking tank in a ritual combat; or Red Planet, in which you race a hovercraft through mining canals on Mars.

The condemnations of senators mean nothing when you're selling games hand over fist. Acclaim has received an MA-17 rating for its Mortal Kombat for Sega CD. The company can't be surprised — the designers set out to make the game as close a direct conversion of the arcade game as possible. What's that mean? That's right — no blood! There's no need for one. It's bloody right from the beginning.

Phyene Riggs of Acclaim told Game Players that the company has pulled back the game to make some last-minute changes (hopefully to straighten out some problems we had in our 90-percent-complete version; see pages 34-35 for the full review). She's not sure what's going to be changed, but she emphasized that the final product will be as close a direct conversion of the arcade game as possible.

Programmers Respond to Park Place Story

Game Players has gotten some flack from some programmers upset with our March story "Sony Loses Park Place," about the defection of 27 programmers from developer Park Place to Sony Imagesoft. We got the story literally on the day we shipped the InfoTrak column and couldn't find any programmers with whom to talk. But we're more than happy to bring you their views now.

If you didn't see our earlier story, it was an interview with Mike Knox, CEO of Park Place, in which he told us that the collapse of the company was based on the mass desertion of its programmers.

He also mentioned an off-site meeting after which he received 27 resignations. But that's not what we hear from the former employees.

"We were called to that off-site meeting," says Phil Weeks, a former designer who now works for Sony, "to get our final paychecks, and while we were there the locks on the building were being changed. We had to call and make appointments to pick up personal effects."

While Weeks had been aware that "things were shaky" — he hadn't gotten a royalty check, for example, in the six months prior to the closing — that wasn't always the case. Another programmer, who wishes to remain anonymous, was hired only a month and a half before the shutdown.

"I had been there only two weeks when people's paychecks started bouncing," says Knox, "but they allowed me to move from Atlanta. And I wasn't the last person they hired! Sony didn't take everyone, so there are still a number of programmers who used to work at Park Place — one from Sony, as a matter of fact — but he refused to relinquish controlling share.

"Nobody made the move to stab him in the back," says our anonymous source. "We did it just to survive. In talking to you, he claimed that the moral of his story was for independent businessmen to be afraid of what can happen to them. I think the moral of the story is to be afraid if you work for a company like Park Place that just doesn't care."

Suspect and intrigue in the video-game industry. Maybe HBO should look into a picture deal.

Have you ever wondered why balloons came before supersonic jets? It's simple. Hot air is easier to make. When it comes to 16-bit video games, the hot air coming out of Sega's marketing department could inflate a giant Macy's Thanksgiving Day hedgehog—well, almost. Before you make a choice between 16-bit systems, you should get the cold, hard facts.

A BLAST OF HOT AIR

This “Blast Processing” you've heard about is said to speed up Genesis games, but what is Blast Processing? When we called Sega, they said it was just a marketing buzzword. And according to programmers we talked to who design games for the Genesis, Blast Processing doesn't exist except in the minds of Sega's marketing department. There's no Blast Processing hardware. There's no Blast Processing technology. There's no super “Blast” boost of any kind. So what about Sonic's speed? The truth is that you could put Sonic or any character on the Super NES and have it race across the screen just as fast. You could also easily scale him so large that you'd see each individual hedgehog hair (not a pretty sight) and you could rotate his background until he really turned blue. So why don't Genesis games have special effects like that? Because they don't have the custom graphics processors that are used in the Super NES, and because Blast Processing isn't worth a hedgehog's hair when it comes to real gaming advantages.

The truth is that you could put Sonic on the Super NES and have him race across the screen just as fast!

Comparing speed on the two systems is like comparing apples to oranges. Processing speed can be measured in several ways including CPU clock speed and memory cycle time. For instance, the Super NES has a slower clock speed but a faster memory cycle time. Even so, according to game programmers, processing power is not just a matter of CPU speed. In fact, CPU speed is only one of many factors. The only real way to judge speed is by playing the games. It is important in games like F-Zero and Street Fighter II Turbo, because the element of speed adds to the challenge. On the highest speed settings of SF II Turbo (at ten stars), only a real master can react quickly enough to throw a winning combination. On either the Super NES or Genesis you could have characters move so fast that you literally couldn't see them, but what's the fun in that? So what is this myth about Blast Processing? That's simple. Clever ads from Sega's marketing department. If you've been taken in by this myth, don't feel bad. You're not alone.

TRUE POWER PROCESSING

When the Super NES debuted, critics said that Nintendo had waited too long before entering the 16-bit market. What Nintendo had been doing, however, was creating a new technical standard for video games. The Genesis had been put together with mainly off-the-shelf parts that had been designed for generalized computing functions, not video games. But the Super NES incorporated six customized chips and a CPU with specialized, Direct Memory Access high-speed functions and two advanced PPU or video processing units. The video processors are uniquely designed to provide graphic effects like the eight independent background mode functions including the rotation and scaling effects of Mode 7. Mode 7 is a built-in function of the Super NES PPU that has revolutionized home video games. Sports games in particular have risen to a new level with in-your-face perspectives like that of NCAA Basketball and NHL Stanley Cup. This is true Power Processing. It's wired in. And the Super NES does more than manipulate graphics—it also gives you better graphics from the start with more than 32,000 colors to choose from while Genesis has 256. The Super NES can display 256 colors at one time while the Genesis can only show 64. While 128 sprites can appear on the screen on Super NES games, only 80 appear on the Genesis. Put a Super NES game like Street Fighter II, Alien³, The Lost Vikings, or Nigel Mansell's World Championship Racing next to its Genesis equivalent and you'll see the difference: the Genesis presents a flat, pale reflection of the Super NES. It's like comparing fresh oranges to Tang. The Genesis just ain't got the juice.
Superior NES

- Two video processor PPU units with eight mode effects including Mode 7 for special graphics effects like rotation and scaling
- 6 custom designed chips for video games as opposed to only 2 custom chips on the Genesis circuit board give more graphics effects, more colors and better sound
- Almost twice the internal memory for speeding up programs
- Data retrieval is 280 nanoseconds for the Super NES—88% faster than Genesis
- Sound Signal to noise ratio is 2.5 times better in the Super NES for sharper more realistic sound effects, voices and music
- The Super NES Controller has 12 buttons to eight for Genesis for greater game play versatility and better control

Super NES vs. Genesis

If speed is all that a game has, then it won't be fun for long. Involving game play is a matter of variety, challenge and depth. It might feel good to rocket through Sonic 2 the first time you plug it in, but what then? The built-in power of the Super NES gives game designers and programmers more meat to sink their teeth into. These guys are masters—they want to take their game ideas to the limits, and the Super NES is the 16-bit platform that gives them the custom graphics and sound processors to do it. Here are some of the best: Super Metroid, Street Fighter II Turbo. The Legend of Zelda: A Link To The Past, Super Empire Strikes Back, Star Fox, Mega Man X, Super Mario Kart, NCAA Basketball, Secret of Mana, Final Fantasy II, NHL Stanley Cup, Tommy Moe's Winter Extreme Skiing & Snowboarding, Actrailer, Turn & Burn: No Fly Zone, Ken Griffey Jr. Presents Major League Baseball, Tiny Toon Adventures Buster Busts Loose, F-Zero, Pilotwings, Contra III, Bugs Bunny Rabbit Rampage, Road Runner's Death Valley Rally, Mario Paint, Stunt Race FX, Super Mario All-Stars, Soul Blazer, Castlevania IV, Star Trek: The Next Generation, SimCity, Top Gear, Super Bomberman, Tony Meola Soccer, Wicked 18, Wings 2, Yoshi's Cookie and many more classic games in every category including action, sports, adventure, RPG, puzzles and simulations. You could never duplicate these games on the Genesis except in name, and many of these games will never appear on the Genesis in any form. In other words, if you only own Genesis, you can't play these games.

Get Real, Get Nintendo

So you spent your hard-earned bucks on the Genesis and now you can't play the best games. It may not seem fair, but it's not the end of the world. For less than the cost of a couple of Genesis games, you can have the system that gives you the best fighters with lightning fast control like Street Fighter II Turbo, the deepest fantasy adventures from Square Soft, Enix, Koei and Nintendo, the most challenging and creative action games like Super Empire Strikes Back and Star Fox and the most realistic and revolutionary sports games like NCAA Basketball and NHL Stanley Cup. The Super NES is the system with real power. If you don't have it, you're missing the real action. Get real. Get Nintendo.

SATURN
Project Reality.

The war’s just getting started.

On which side of the fence do you fall?

PROVE IT!

Project Reality? I won’t comment on that until it’s a reality. Sega’s Saturn system is a smart move, considering that Mario-type games just don’t cut it any more. Interactive formats are the latest rage.

Hiram Rodriguez
San Francisco, CA

THE CAT’S MEOW
Why wait for Sega’s 32-bit (only 32-bit) Saturn or Nintendo’s Project Reality when you can buy Atari’s Jaguar right now? It has most of the best third-party developers — Accolade, Virgin, Interplay, and so on — and great games are coming soon. It’s the best home-game system.

Haralds Jass
Vancouver, BC

Does Atari have you on retainer?

THE CLEAR CHOICE
I think Saturn will be better than Project Reality. I have a Genesis and my friend has an SNES, and in my opinion, Sega is already better than SNES.

Sean Soto
Owasso, OK

Nintendo’s Move

I switched to Genesis because of its popularity. But I think Nintendo will make its comeback with Project Reality. I hate to say it, but I think PR’s graphics are one step ahead of Saturn’s. This is Nintendo’s chance to get back into the game.

J.P. Emery
Phoenix, AZ

Head Games

I think after Sega brings the Saturn to America, Nintendo will think this is Sega’s finishing move, and it will give us Project Reality thinking it has topped Sega. Then Sega makes the real finishing move by giving us Virtual Reality headgear and leaving Nintendo headless.

Drew McCarthy
11 Nova Scotia, Canada

Enough Already!

Sega and Nintendo’s hardware wars are really getting old. Sure, the consumer’s benefitting from the war where technology, hardware, and software is concerned, but I’d much rather upgrade the hardware I’ve got than spend money on new systems which will be obsolete in five years.

Troy Williams
15 Valley Center, CA

Fade to Black

Sega has a knack for making great games, unlike Nintendo, who, it seems, is running out of ideas. Another thing that makes me think Saturn will be better is Sega’s creativity. I haven’t heard of any Nintendo Channel. In general, Sega’s going to dominate over a fast-fading Nintendo in the future, and Saturn might only be the beginning.

Paul Quiroz Jr.
Bronx, NY

Jam Session

It’s what you’re playing. It’s what you’re talking about.

Although NBA Jam is probably one of the best sports games ever, I feel that the game’s designs did many video gamers a disservice by making the game playable with only one multiplayer adapter. Namely, Sega’s Team Player. I already have EA’s 4 Way Play, and I don’t want to shell out another $39.99 for another adapter.

Joe Hoeken
Austin, TX

Can you tell me why Shaq and Majere aren’t in NBA Jam?

Adam Indiana

Shaq isn’t in the game because he’s inked his own deal with Electronic Arts (and we hear that Barryke’s deal with Accolade means he might be disappearing in late copies, too). As far as Majere, you’ve got us stumped. Do any of you readers know?

In your personal opinion, who are the five best shooters and the five best dunkers in Jam?

Kyle Paxton
Marshalltown, IA

Chris: Well, Kyle, while many players tie for top spots, there isn’t a real leader in any area. Here’s a list, however, of the players who have a maxed-out meter in each of the four categories — any of them will do you right.

**FIRST COME, FIRST SERVED**

It all comes down to the games. We've come to a point where the system technology has surpassed our gaming ideas. All these new systems can play very realistic, awesome-looking games, but which company will have that next huge seller? My opinion goes with the Saturn.

Mark Lohr
East China, MI

**THE 64-BIT QUESTION**

Why isn't Saturn a 64-bit system? When Nintendo finally does come out with PR, Sega will have to come out with a 64-bit system to match it. Sega should modify the Saturn to be 64-bit. But Sega rules — and so does Game Players.

Michael Vieve
Utica, MI

**CLINTON? GORE!**

From what I've seen, the Saturn's graphics are blurry, while the graphics in Project Reality look bright, colorful, and very, very realistic. However, Saturn will probably incorporate blood and guts in its fighting games, and that alone is enough for some people. I'm not a belligerent gore fan, and I like clear graphics, so I'll go for PR.

Jay Kloss
Westlake, OH

**CD FANS UNITE!**

PR looks much better than the Saturn. I don't think that right now would be a great time to put the Saturn on the market because a lot of faithful Sega owners have just blown $250 on the Sega CD. If Sega is smart, it won't release the Saturn until early 1995, which is really not all that much earlier than PR. I'm most likely going to wait for the PR system to be released — Nintendo's 64-bit is worth it!

Justin Reock
Marietta, GA

**SHORT ATTENTION SPAN GAMING**

I've been waiting for this question. I think that, as usual, Nintendo will have the better hardware, but it will lack software because of its later arrival. I'm Nintendo-faithful, but it's the software, not the hardware, that makes or breaks the system. Lynx, anyone?

Michael Monk
Union, MS

**DENTURES?!**

I think Project Reality kicks Saturn hard in the gut! My grandpa's dentures could make a better system than that sucky Saturn. The world's greatest geniuses must be working on PR. In addition to everything else, Sega's Saturn system's hidden cartridge input proves that Sega is more concerned about looks and style than quality and performance.

Ryan Ninneman
Grosse Pointe Woods, MI

**A PICTURE'S WORTH 1000 UNITS**

Project Reality, with its hot graphics, will kick Saturn's butt. If anybody looks at the pictures in your March and April issues, they'll see that PR has better graphics than Saturn. And PR has the potential to be a 64-bitter — that certainly makes it better than Saturn.

Pat Oglesby
Brookville, IN

**RUNNING RINGS AROUND PR**

Saturn may not be Sega's finishing move, but I know I'm saving up for a Saturn. I own both Genesis and SNES, and I enjoy Genesis games much more. Couple that with Nintendo's censoring attitude and the fact that I don't believe they can put out PR for under $250, and they shouldn't make us wait another year and a half. Saturn is for me, and I can't wait.

Damon Vergilio
Lake Elsinore, CA

**WHY? WHY? WHY?**

Project Reality wins! Why would I want to buy a 32-bit system when I could buy a 64-bit system? So what if PR isn't coming out for a while? It just gives us players time to get psyched up. I got a Sega CD almost entirely to play Sonic CD, but if Saturn games were compatible with the Sega CD, then there'd be no reason to buy a new system. Basically, I'm saying that I don't mind waiting for a dream machine that costs, like, a quarter more than the SNES did when it first came out — especially since it's from Nintendo.

Rebecca Cataldi
Coraopolis, PA

**DON'T BE STUPID**

The Saturn is going to be a hit in my opinion. I mean, a 32-bit system built to handle 64-bit software? And because of your totally awesome magazine, I have an equal opinion about Project Reality. So if Nintendo plays its cards right and isn't as stupid as with SNES and doesn't make its games super-wimpy, the company just might make a comeback. And if Sega is smart enough not to make another stupid move (like its rating system), it could take out Nintendo for good.

Alex Hein
Brighton, MI

**THE BURNING QUESTION – MAY**

Companies spend major bucks every year in advertising — in magazines, on television, and even in movie theatres. So how influenced are you by the ads and commercials you see? Have you ever bought a game because of its ad campaign? Were you pleasantly surprised, or did you get burned?

I own Genesis and SNES and quite a few games for both. Consequently, I've read all gaming mags available. You name them, I’ve bought them and read them.

But just recently, I’ve become a subscriber and after reading just two issues of Game Players, my quest is over. When I read your articles, I feel like a friend wrote them. And your reviews are the most interesting I’ve read. Keep up the good work.

BREAKING THE CODE

Are all the Konami games the same? Do they all have the code Up, Up, Down, Down, Left, Right, Left, Right, B, A in them?

Derrick Douglas Harcourt
Ft. Stockton, TX

CHRIS: The code doesn’t work in all Konami games, but it does work in quite a few — and it has different effects as well. Try it on these and other titles: Gradus (NES), Life Force (NES), Contra (NES), Super C (SNES), Gradus II (SNES), and Castlevania: Bloodlines (Genesis).

THE PEN PAL CONNECTION

Playing video games needn't be a solitary pursuit. You wanna start meeting other guys and this is just the place to start...

I'd like to write to someone who is 16-17 years old and has Street Fighter and other fighting games: Jesse Hoffman

PEN PAL UPDATE

We asked you to let us know how it was going. Evidently better and stranger than we thought.

To date, I've had over 75 different responses from all over Canada, England, and all over the U.S., from people from 11-1/2 to 50! The most popular age group is 30-40! Adults have written 95% of my mall. Adults are playing the games as well as buying your magazine and reading it. Do you realize when you start something with "hey kids?" Wouldn't they "hey gamers" better fit the bill?

DON'T LEAVE HOME WITHOUT IT
They should make a Lorena Bobbit game. You could progress through the levels giving male chauvinist pigs just what they desire. There would be various power-ups for your Ginsu and maybe some special weapons like hacksaws. A can of Sicoe would restore your energy, and don't forget to grab those cocktail weenies for a one-up! There could be bosses like The Flasher or "That Guy Who Hides in the Bushes at Central Park after 10 p.m." In the bonus stage, you could teach Mike Tyson a lesson. Watch out for the police, but if you get nabbed you can plead insanity to avoid a game-over.

GELL'S LAST JAM
In Death Bringers, you choose from 12 different characters: Gell, Dragon Wizard, Spike, Blade, In-Line, Dysfruct, Anti-Man, Samarina, The Butcher, Warp, AC/Dc, and Seuzz. It's a tournament game in which you must kill an opponent with a fatal "death bringer" (DB) move to win a match. Some DBs include Gelled Blood Pool, in which Gell melts into a blood pool, reaches out with his bionic hand, and pulls in his opponent. With the Dragon Fire-Bite, Dragon Wizard transformed into the fabloid Fire Dragon, hastesoius, rips off the upper half of the opponent's body, and eats it. And get this — the computer uses DBs on you, unlike M.K.

Now At Theatres?
I call it Movie Slasher. Three college film students — Synna Moxie, a cross between Meryl Streep and Cynthia Rothrock; Brook Boster, who's writing a book called The Films of Dolph Lundgren; and Martin Spike Maranet, who's studying directing and screenwriting — are working on "The Evolution of the Modern Slasher in Cinema" when their professor, F. Shimp Lenz, is sucked into the movies. Only they can save him.

The trio must combat some of movie-dom's most famous murderers, beginning with Jack the Ripper from Hitchcock's The Lodger. Next would be Peter Lorre as the child murderer in M, then Norman Bates from Psycho, followed by Leatherface from The Texas Chainsaw Massacre, Michael Myers, Jason Voorhees, and Freddy Krueger. Sounds like fun, doesn't it?

Willie Holmes

Now At Theatres?
In SNL, you can choose from either Chris Farley or Adam Sandler. It could be a two-player simultaneous game, and it would be set up like Streets of Rage. You try to rescue the real "Saturday Night Live" writers from the aliens that captured them and wrote the stupid, humiliating scripts that we've been watching for the past year or so.

If you choose Chris Farley, he's in his "Da Bears" outfit. His weapon would be throwing beer or ballpark franks. Adam Sandler would be in his red-hooded sweatshirt, and he would be wielding his guitar. For intermission screens, you'd have "Deep Thoughts" or SNES commercials such as "Carls Cinnamon" or "Schmids Gay"

Complaints Counter

Parents speak out on video-game violence issues.

I'm a 26-year-old parent who is sick and tired of the buzz about video-game violence. I see violence more realistically and more shocking in 30 seconds of TV than anything I've ever seen in a video game. Is it time to legislate video games? After all, I'm fed up with the games that have a problem distorting what's right and wrong in the world. They don't let them play it! Daniel Kristoff
Ponte Vedra Beach, FL

What's next? Now's the — they have sex and violence. TV shows — more sex and violence. Neighborhoods — even more sex and violence. Automobiles — they go too fast and you can have sex in them. Football games — violence. Since we'll have to lock up all the children in rooms by themselves until they're 18...

I'm 28 with two children, six and three. They know video games aren't real, and what's seen in the evening news is worse. Senators Lieberman and Kohl don't know as much about real life as my children.

Game Idea of the Month

I'd like to see a Battle of the Bands — and I emphasize Battle! The band you create would have to start off facing N.K.O. D. B. You'd get teeth and claw with them and finish them off with some horrible death blow, like mashing up their hair or wrinkling their trendy clothes. You'd fight a multitude of rock stars and each would have his or her own special moves. And Rage could pull out a baby. Sinead O'Connor could tear up photographs. Kurt Cobain of Nirvana could mumble something that would keep his opponents bewildered. Xanaphile could play his magic pan flute — the list of pain goes on.

If you use a multi-player adapter, you and your friends could fight together as an entire band — Pearl Jam vs. the Goo Goo's. Finally, in the last battle you go toe to toe with the king himself. Brave is the soul who can withstand all those jelly doughnuts.

So whadda ya think, sirs? Am I admitted "MST 3K" rip-off, but the best is original?

Ken Ogasawara sneaks behind the closed doors of Nintendo of Japan to bring us this exclusive interview with the Super Metroid design leader.

If you’re a true Nintendo fan — someone who’s been with the company since the beginning — then you know the music. You know the helmet. You know, as Jeff Lundrigan says, those child-bearing hips. Metroid was one of the first NES games, but fans have had to wait years for additional installments. Super Metroid proves the wait was worth it. Still, why’d it take so long? To find out, Game Players went straight to the top, to Yoshio Sakamoto, the director of the project.

After 18 months in development and almost a decade since the original Metroid, it’s here. Why the wait?

“We wanted to wait until a true action game was needed,” Sakamoto says. “And also to set the stage for the reappearance of Samus Aran. From the initial idea to final approval took approximately half a year. Then the programming of the game itself took two years to complete. The main staff consisted of 15 people.”

One of the surprising things about Super Metroid is how closely the game follows those that have come before. The music is a great 16-bit version of the old tunes, and you even visit some areas you’ve traveled through before. This is great for fans who get an almost seamless transition from the previous games, and it proved beneficial to the design team as well.

“The same sections were redone,”
Always Wanted to Know about Samus But Were Afraid to Ask

There are tons of new weapons to find. Check out Samus’ missile assortment.

Sakamoto says, “to correct parts we were unhappy about in the original game. We felt it would add a sense of familiarity to the game that would please former players, and the new sections also give a much greater sense of drama to the game. Super Metroid isn’t a harder game, but it’s a deeper, more involved game with a more dramatic overtone.

“The goal was to create a good action game. One of the major considerations was the large map and how to organize the amount of graphic data involved. One of the new ideas was to put in many mini-adventures. Thus, the major goal was how to create an effective mix of all the separate elements. We believe that we have almost completely succeeded in our objective.”

Players are sure to agree. We’re not gushing when we say how really great this game is. Nintendo’s obviously betting hard on it as well. The initial reaction when the game went on sale in Japan was extremely positive, and expectations here are just as high. The fact that Nintendo players have been waiting close to forever for a new Zelda or

Shigeru Miyamoto Bares All

OK, so he didn’t develop Metroid or invent the Mother Brain. But the man behind Mario gives our man in Japan, Frank O’Connor, his insight into what it takes to develop great games.

Those of you familiar with Japanese gaming should recognize the name Shigeru Miyamoto. He’s the guy who created Mario and all the games in which the haphazard plumber has subsequently starred. Miyamoto’s career reads like a top ten of video games: Donkey Kong, Super Mario Bros., Pilotwings, F-Zero, Mario Kart. If anyone knows how to write a great video game, he does.

GP: The most important question... where do the ideas come from?
MIYAMOTO: Mario himself was brought about by a combination of accident and design. We had very poor graphics on those first arcade machines, and we had to compromise in order to make him look good. He wears dungarees because that way you can see his arms move. He has a hat because his hair would look silly if it remained static. His mustache is there because there weren’t enough pixels to separate his mouth from his nose. The game itself was just an idea. Running, climbing, and jumping.

GP: Super Mario Bros. Is your most famous game. Can you tell us a little about the process that went into its game design?

MIYAMOTO: The game is split into two halves. One half is the game itself, with the platforms and characters and all the things you can actually see. The other half is secrets. First we mapped out each level. We first drew the levels on graph paper, then implemented them on the development hardware. Then we simply played the game and tweaked the levels until we were happy with them.

A lot of playing has to be done before a game’s perfect. Then we go through each level and add the secret, hidden things. The secret of the Super Mario games is that we play and play and play!

GP: The Legend of Zelda, your other success, also features lots of secret rooms and hidden objects. What inspired these ideas?

MIYAMOTO: When I was a small boy, my friends and I would go hiking in the mountains which surrounded my home town. In Japan, the mountains are small, so we could always find our way home. Exploring is fun when you can’t get lost. Also, I used to explore New York like I would walk alone at night, simply exploring the back streets and hidden places. I think my colleagues think I am crazy.
The Team

Japanese designers are as secretive as spies when it comes to publicity. Here's what we unearthed about the Super Metroid design team:

Y. Sakamoto, 32, team director. Has also worked on Famicom versions of Metroid, Balloon Fight, Wrecking Ball, and the adventure series Tantei Club.

H. Matsuoka, 34, designer. Has also worked on the Famicom version of Metroid and Famicom Wars, as well as the Game Boy Super Marioland and Tetris and Super Famicom Mario Paint!

T. Ohsawa, 31, designer. Has also worked on the Famicom version of Kid Icarus and Tantei Club.

H. Kinura, 28, designer. Has also worked on the Famicom version of Night Moves and the Game Boy versions of Metroid II and Golf.

M. Machino, 28, designer. Has also worked on the Game Boy version of F-1 Race.

T. Yamane, 26, designer. Has also worked on the Super Famicom version of Super Scope 6 and as design leader for the Game Boy Metroid II.

K. Yamamoto, 29, sound programmer and composer. Has also worked on the Super Famicom version of Tantei Club II.

M. Harada, 24, composer. Has also worked on the Game Boy version of The Legend of Zelda: Link’s Awakening.

Mario game isn’t going to hurt sales, either, although Sakamoto points out that the lack of new games in those series had nothing to do with the timing of Super Metroid. He’s also not concerned that the controversy over game violence will cause any negative backlash on the game — it’s Nintendo, after all.

“We don’t think there’s too much violence in the game,” he says. “Take, for example, Samus Aran. Her purpose is to maintain peace and to get the Metroid back where it belongs. It’s not violence for the sake of violence.”

And, finally, the question every developer is getting asked: Will there be a Metroid for Project Reality?

Here’s Samus’ ship. Once you land on a planet, go back to the ship to save your game and get all your energy back.

“We’re not at liberty to respond to that question at this point in time,” Sakamoto says with the typical reticence Nintendo has toward its new system. “However, as long as Samus Aran exists as a character, there’s the possibility of a sequel. But for now, Super Metroid isn’t just another action game; it’s an action game players have been waiting for.”

When I do this, I explore on foot for a while then sometimes I buy a bicycle and cycle round town. Only when I know my way around a little will I buy a map. Zelda games are like this. You explore first, then you gain a useful tool — like my bicycle — then you get a map. The map isn’t essential; it just makes things easier.

GP: Do you have a favorite game that some rival designed?

MIYAMOTO: Hmm. I like the very old Namco games. I especially like Pac Man. It was original and fun. I very much respect Namco’s game ideas. I was disappointed when it released Pac Land because that game relied on jumping and was too much like other jumping games. I think Pac Man’s greatness lies in its originality, but I like many other games, too.

GP: Many people have copied your games, or tried to imitate them in their own style — notably Sega with Sonic.

MIYAMOTO: I think Sega made Sonic the Hedgehog so it would have a character people would identify with Sega, like Nintendo’s Mario. I think a platform game is the best way to incorporate a new character, so I don’t think it copied Super Mario too much. I think Sonic has more to do with corporate identity than anything else. I also think Sonic the Hedgehog is a very good game... very beautiful. It is similar to Mario in some ways, but also very different.

GP: Will we ever see Pilotwings 2? Maybe on Project Reality?

MIYAMOTO: Ha, sorry, no comment. Let me just say that I would very much like to do Pilotwings 2 myself. I can’t say more than that.

GP: On what are you presently working?

MIYAMOTO: I’m currently finishing Stunt Race FX and also a new Donkey Kong for Game Boy. It will have lots of levels, but game play will be very much like the original Donkey Kong. I’m very pleased with this game — it’s nearly finished.

GP: Do you have plans to do another SNES Mario game?

MIYAMOTO: Yes, we do. Definitely. Well, sort of. It will be like Super Mario World in many ways. I can’t say more than that, but it isn’t too far away. It might be announced before Christmas.

GP: Are you currently developing anything for Project Reality?

MIYAMOTO: Another difficult question. Yes. I’m working only on the home-system games. The arcade games will be done by a separate team. I like the fact that there’s a lot of power — more than enough power to do anything I can think of. I don’t care too much about the graphics. I don’t think that graphics are nearly as important as game play, and great graphics won’t change the way I design games. Graphics just make great games look better.
Your wish is our command. Did you wish for Aladdin on Game Gear™? ‘Cause that’s what you’re getting. You’ve got the lamp, the magic carpet and Princess Jasmine. Things are good. In fact, the only thing that might worry you—just a little—is that the most powerful and twisted guy in Agrabah wishes you were dead. But you’re Aladdin. Don’t let it get to you. Have a good time. Visit the Sultan’s Palace. Check out the Cave of Wonders. And most importantly, teach Jafar something about the business end of a scimitar.

Disney’s Aladdin

Also available on Genesis™

Dodge flame bursts, burning lava and rocks on your magic carpet. In short—escape the Cave of Wonders before you become a shish kebab.

It’s come to this. Good vs. Evil. You vs. Jafar. Seem like a fair fight? Well, he’s got the lamp. Then again, you’re Aladdin. You’ll figure something out.

He’s a cobra. A big cobra. And he’s a little upset. Use that scimitar to let him know what’s up. (It’s the only thing he’ll understand, trust us.)
He's back! Accolade's boy-wonder returns for seconds.

You've played his first game! You've seen his TV show! You've stared in awe at the Pante-Less Wonder! Now get ready for... gasp!... Bubsy 2! That's right, Accolade's poster boy is back for more loads more rollicking, frolicking fun on both Genesis and SNES. "What could possibly go wrong?"

Planty! When super-genius mole Virgil Reality teams up with greedy Oinker P. Spam, they create the Amazatorium — a place that simulates any time period in history. But as the center nears its grand opening, mysterious things start to happen.

Records of entire time periods suddenly begin to vanish, as if the subjects and cultures never even existed. It seems that the Amazatorium doesn't just simulate history — it goes ahead and steals it!

Who can save us from the Amazatorium's evil power? Why, Bubsy Bobeat, of course. He and his sidekick Arnold Dillo were taking the wild and troublesome Bubsy Twins to the Amazatorium when they stumbled upon its dark secret. But before Bubsy can alert anyone, the twins sneak inside! Now Bubsy must search for the twins through five worlds and six bonus games, while still trying to save Earth's history. Can he do it? Find out this September when Bubsy 2 is released for both SNES and Genesis.

The original Bubsy boasted great graphics and fun personality, but the game play left something to be desired. Yarnballs — all was yarnballs. But so far the sequel promises to be sort of the opposite: The preliminary screens don't look
quite as good, but the game play has made a
definite leap forward. There are a lot more bonus
items this time around, and some of them (a div-
suit, for example) affect
game play. The game's
also non-linear, so
you can play the
stages in any
order you
like. Design-
er Cyndi
Kirkpatrick
also told us
that players
might be
able to work
through two
versions of the
same game.

“What we
have hopes of
doing,” Kirk-
patrick says,
is offering
some added
replay value.

Because we have the twins in there as a plot
device, we're hoping to allow the player the
choice at the beginning of the game to chase
either Terry or Terri. And if you've chosen Twin A,
then you're going to get slightly different game
screens than if you went after Twin B. The only
thing holding us up is cart size — it's going to be
pretty tricky fitting all that into one cart!”

LET LOOSE THE FROGS OF WAR!

Bubsy 2 intro-
duces bonus

one of those
wacky bonus
rounds.

In this “Frogapult” bonus
stage, you must launch frogs
(don’t worry, they’re happy to

hit. The further you can throw
the frogs, the better you do.
Do well and you’re rewarded
with a bunch of extra lives
and points.

Jump on these

Soul Blazer: The Illusion of Gaia

The adventure continues — now with even more RPG!

Dragon Warrior V may not be on the shelves yet (or even on the way, for that matter), but RPG fans can take comfort in Enix’s sequel to its hit Soul Blazer. While the first game relied on tons of action with sparse RPG elements, the second finds you spending most of your time in town, often chatting with the townspeople for hours between action scenes.

The story starts when Tim, a young boy with a magical staff, hears some news about his long-lost father. Then Karen, a young princess about Tim’s age, shows up and causes trouble. Then Tim goes to jail, but only after eating Grandma Lola’s famous pie. And then... um, I guess I’m getting a little ahead of myself. Let’s just say you travel the globe and stumble through many wacky subplots before you’re finished.

The graphics are very impressive. The deep colors and detailed backgrounds are rivaled only by Secret of Mana. Just look at how detailed this house is — no more tiny huts that get bigger when you enter.

The buildings in town are built like real buildings. When you walk upstairs, the screen follows you without going black and stopping to redraw the room.

This RPG is unique because your lead character, Tim, often narrates the story as you play.

More great graphics! What’s with that fisherman? He keeps tossing his line, but he can’t get it back.

You can go into Dark Space to visit Gaia through any of these portals. She helps you in ways ranging from giving you information to saving your game.

GENRE action/RPG

This is Rob’s house. He lives here with his frail mother.
That’s right, Capcom is only playing the role of developer this time, leaving the marketing chores to the folks at Square Soft, the company behind RPG legends such as Final Fantasy II and Secret of Mana. Breath of Fire, at 12 megs, could easily end up being the best RPG of the year.

As one of the few remaining members of the Light Dragon clan, it’s up to you to restore peace and order by unraveling the mystery behind the Dark Dragons’ evil reign. Your adventure takes you through deserts, forests, castles, bazaars, magical towers, oceans, and much more. Eight different characters eventually join your party, each with his or her own talents and powers. One character, for example, can transform into a bird and fly the party around the world. Another can take you underwater as he changes, at will, into a fish! You can even gain the power to reverse day and night!

What RPG fan can’t get excited about a game like this? It’s sure to follow in the rather impressive footsteps of Square Soft’s earlier hits when it’s released in July. Only one question, though: Just what is the “Breath of Fire”?

**Square Soft and Capcom team up to create one helluva game. Any questions?**

Yo! Get ready for some serious gamin’!

Thanks to one of your characters ability to change into a bird, you can spot the floating tower that holds something vital to your quest. The labyrinths inside are treacherous, but the monster that awaits you inside is even worse...

Your adventure even spans the ocean floor! Good thing one of your party members can become a fish. The townspeople here are talkative, and you need to stock up on life-sustaining items before moving on.

**THERE’S NOTHING LIKE A GOOD BATTLE...**

Combat is at the heart of every good RPG. After all, if you’re going to stop and fight every four or five steps, the system has to be able to keep up your interest.
ASTERIX AND THE GREAT RESCUE

He's from France, dontcha know.

So you've never heard of Asterix, huh? That's understandable. He's made quite a name for himself in France, but you probably don't live there. Other than his Super NES game, this Genesis title is North America's first look at the little Gaul. But, boy, they sure amoure him in France.

Based on Asterix's comic strip, Asterix and the Great Rescue follows our hero through 50 zones of puzzles and comic military situations. You can play as Asterix himself or his barrel-bodied sidekick, Obelix, on a mission to rescue two friends kidnapped from your village. You're armed with quick fists and magic potions which can give you anything from invincibility to the power of flight. Hey, I'd drink some of that!

Asterix, meet America. America, meet Asterix.

Before you dive into a level, check out the map screen. And while you're at it, you can choose between Asterix and his big ol' pal Obelix.

“Umpf!” True to his origins, Asterix has a comic-book style, with splashy sound effects and smooth animation.

ROCKO’S MODERN LIFE: Spunky’s Dangerous Day

Keeping Spunky out of trouble is a full-time job.

Everyone's familiar with those crazy Nicktoons Rocko and Spunky, right? Now the lovable duo is headed to the Super NES courtesy of Vacom New Media, not so coincidentally a division of the company that owns Nickelodeon (and MTV, and Paramount, and a big old chunk of the free world).

Rocko's Modern Life: Spunky's Dangerous Day is a kind of "Learning-esque" game. As Rocko the wallaby, you must clear away the dangers that lie ahead so your pet dog, Spunky, can walk through 16 levels and reach the golden fire hydrant at the end of each. Spunky's not going to make it easy for you, though. He explores dingy basements and treacherous treehouses, pits you against wild washing machines, and more.

The graphics look great and capture the feel of the cartoon, but we'll have to play it more to see if it's got that Ren & Stimpy edge to it that the show cultivates.

The large character sprites and rich colors make Rocko easy on the eyes.

The Death and Life of Superman

Although that whole "Death of Superman" hoopla is over, it still looks like Sunsoft managed to incorporate the smash storyline into a good-looking beat-em-up.
**GP RIDER**

Er... Are you sure that’s not Hang-On?

Fans of Sega’s classic arcade games, Hang-On and Super Hang-On should really get a kick out of GP Rider. The graphics look almost identical to those earlier Sega racers, and lots of new things have been added to make the Game Gear version the most complete yet.

You can choose your game from four different play modes: Arcade, Tournament, Grand Prix, and World Tour. You must qualify before each race to determine your starting position—a much better option than starting dead last. You can also pick from a solid assortment of bikes, and there’s even a two-player mode for you and another Game Gear-wielding friend.

Once you begin the race, the action is pure Hang-On, from the feel of the road to the design of the racers’ uniforms. GP Rider looks promising on its own, but why didn’t Sega just go ahead and call it Hang-On? That’s one classic series I’d like to see keep going.

**ZERO THE KAMIKAZE SQUIRREL**

Aero’s co-star has big-top plans of his own.

You may remember Zero from his video-game debut in last year’s Aero the Acro-Bat. As the jealous circus star who lost his job to Aero, Zero was the bad guy, teaming with the evil ex-clown Edgar Ektor to seek his revenge.

Now, as we told you last fall, he’s back on top in his own 16-meg game for Genesis and SNES, and there’s no Aero to steal the show.

After receiving word that a lumberjack known as Jacques LeSheets is threatening to chop down Zero’s forest home to get money for a counterfeit scheme, Zero splits from the despicable Ektor and tries to foil his plans. He must use kamikaze spins, dives, tail-spins, and more as he zips through rugged terrain from the forest to the mountains, from beaches to volcanoes until he reaches the abhorrent paper factory.

Though Zero is getting his own shot at video-game stardom, it looks as if his competition with Aero isn’t over yet—Zero the Kamikaze Squirrel will be released simultaneously with Aero II. You heard it here first.

We’re jumping the gun a bit, but we just wanted to remind you that MKII should be out around September. Expect the SNES version to look and sound better, and the Genesis cart, to have blood.

Now this is more like it! Super Metroid has Nintendo doing what it does best — mixing smooth, complex gameplay with state-of-the-art graphics and sound. But with Nintendo, game play always comes first, no matter how pretty the pictures look. Instead of settling for standard side-scrolling action carts, it creates new worlds to discover. That theme is clearly illustrated in each of the company's top lines of games: Mario, Zelda, and, of course, Metroid.

Action fans can't afford to miss Super Metroid. Even if you blow your lid and get frustrated with a boss or something, you still won't be able to put down this cart for more than a few minutes. Fans of the NES and Game Boy Metroid carts know what I mean — every time you find a hidden item or a new room, you can't stop playing until you've found just one more thing! Then another, then another, and soon you forget about food and sleep and work and school... Lives have probably been ruined, but, hey, those are the breaks. The auto-mapping feature which charts your progress through.

Here's the little raccoon everyone's chasing. Shcuntle want it for a potential power source, space pirates want it for the power and, and Samus just wants to get it out of dangerous hands.

The Grappling Beam is a new weapon in the Metroid series. Samus can use it to latch a laser-beam onto the ceiling and swing across hazardous pits and other obstacles.

You'll remember the Freeze Beam from the earlier games. Not only does it keep an enemy from attacking you, but you can also jump onto frozen enemies and climb to higher places.

True to the Metroid formula, you use missiles to open locked doors. Some doors require more than others, and some doors can be cracked only with special missiles. In Super Metroid, some doors are also now found on ceilings and floors.
Nab every Energy Tank you can find. Each one adds a reserve to your life meter, naturally making Samus a tougher nut to crack.

There's lots of space to cover, so you can plainly see from this map screen of Crateria.

You begin the adventure at Samus' star ship just after she lands on Zebes. Return here at any time for a complete energy refill.

The game is a new addition and you really need it.

Super Metroid is a sign that Nintendo is finally staking a claim on its share of the 16-bit market. Loyal SNES fans have had to wait too long for a game of this caliber: If Sega can pump out four or five Sonic titles in a year, why does it take Nintendo so long to get its top stuff out? Let's hope Super Metroid is just the start of a bunch of hot new SNES games.

**BOSSES!**

They're not only huge, but they move really well, too.

Some of these guys are two screens big!! Each has his own weakness, and some of them can't be beaten until you find the right weapon. Keep that blaster loaded!

**A SECOND OPINION**

The first two Metroid games are among my favorite games for their systems, and Super Metroid makes it three for three. The game looks great, and the auto-mapping feature is a big plus. In addition, I think the music is exactly right for almost every section. My only criticism is that this wasn't out sooner — why did these guys decide to wait? My reflexes are almost a decade older than the first time I played!

Mortal Kombat

Goro-whuppin’ Karie Ward hoped to test her might, but the latest version of M.K. did little more than test her patience.

You know, I love Mortal Kombat as much as the next guy — no, I love it more than the next guy. If I still had all the quarters I spent that first year the coin-op was released, I could buy my own arcade. So you can’t imagine how excited I was to review the long-awaited Sega CD version. You also can’t imagine how it grieves me to report that my excitement turned to utter despair when I actually played the “upgrade.”

The CD begins with a two-minute trailer which admittedly is pretty cool. Re-edited from the TV commercial, it features game footage, video clips, and an awesome new techno theme song (taken from the M.K. CD single), the intro really gets you hyped for that familiar M.K. rush. Unfortunately, it’s all downhill from there.

With the exception of a few still shots, the only difference between the Genesis version and the CD game is in the CD’s blood-from-the-beginning, which earned the game an MA-17. The graphics are still grainy and drab, but they’re slightly better than before. The real shocker is the audio...
Although the game has the coin-op's "flawless victory" and "fatality" chants, along with a new tune or two, still... CD quality and the music still sounds this way?! Come on!

But, hey, it wasn't graphics and sound that made the Genesis version stand out in the first place — it was game play, right? Well, sorry again, guys. No strides were made in this department, either. It's not bad, it's just not any different. Wait — there is one new element worth mentioning. Now you've got an access-time delay of seven to nine seconds between rounds. It may not sound like long, but really drags down the game play.

M.K. is still a solid action game, but the CD version makes so little attempt to take advantage of its increased memory and technology that it's dissatisfying. Maybe it was the eight-month wait between versions that led me to expect something more impressive. So should you shell out for the expensive system and the CD version? Absolutely not. GP

**A SECOND OPINION**

I'm even more outraged about the backward leap in M.K. CD. Acclaim took the exact same Genesis game you already own, stuck the commercial at the beginning, and expects you to cough up for it. Well, don't! The Genesis game has faster game play and even better music (imagine that). Since CDs are very cheap to produce, companies are taking existing titles and tossing in a little fluff to make a few extra bucks without spending more development money. How could a great company like Acclaim fall into that trap?

— Chris

Johnny Cage successfully pulls off this lethal jump kick against one of the more detailed background scenes.
He didn't expect to stay long in this mansion, but Mike Foster was left breathless by this virtual mind trap.

Although the Sega CD system got off to a slow start, games such as Sonic CD, NHL Hockey '94, The Secret of Monkey Island, and Lunar are finally showing us the unit's capabilities. And now there's Mansion of Hidden Souls. Even if this adventure weren't great gaming — which it is — it would simply be beautiful to look at. Each frame looks carefully painted and planned, and the frames move in conjunction without the screen blackouts that have plagued CD games.

The idea is to rescue your sister after she follows a butterfly inside a mysterious mansion. If you don't rescue her quickly, she'll become a butterfly and join the lost souls who inhabit the manor. Search the rooms for clues, hidden objects — including a diary that lets you save your game — and butterflies. Listen to the butterfly/soul carefully; their hints are invaluable.

Unfolding like a movie, Hidden Souls makes you feel like you're in that mansion — I even got goose bumps. My only complaint is it's way too short. Hidden Souls could have continued for hours without getting old, but Sega evidently wanted to leave us wanting more. And, boy, do we!
KEYS! KEYS!

You need four keys to complete the game. Here's how to snag the first:

1. Look toward the dresser in your bedroom.
2. You're getting warmer!
3. Push back on the chair — there it is!
4. Some guests try to tempt you with goodies. Don't let them delay you.
5. To get out of the candle room, blow out one candle.
6. Watch your step. If you fall in the water, your game's over...
7. ...and you join the mansion's residents as the newest butterfly.

A SECOND OPINION

While Mansion certainly is a gorgeous game, I'm not as enthusiastic about it as Mike. I'd still recommend it — in fact, I enjoyed it — but don't pick up this one expecting something groundbreaking. I like my adventures big, and although the game's riddles will probably have you stumped for a while, overall the game is five miles wide and six inches deep.

Veteran pilot Trent Ward came down to earth when he realized Tomcat Alley looks a lot better than it plays.

Climb behind the controls of the most powerful fighter jet available and take on a madman! Insane fighter pilot Alexi Povich has just set up a base in Mexico, and only you can keep him from covering major U.S. cities with a liberal dose of chemical weapons. It won’t be easy, though — Col. Povich also controls a fleet of MiG fighters, surface-to-air missiles, and some surprises even your special task force doesn’t know about.

Don’t pick up Tomcat Alley if you’re expecting a flight simulator. Basically an airborne shooter, Tomcat Alley is more similar to Mad Dog McCree and Ground Zero, Texas than AH3 Thunderstrike and Turn and Burn. Its graphics and sound are strong, but the gameplay — as is true of a lot of shooters — gets repetitive. Still, Tomcat Alley’s sure to give your accuracy and reflexes a run for their money. And if you’re a big fan of arcade shooters, this one’s better than most. But if you’ve been holding out for a good flight sim, your wait is still on.

If you give your opponent long enough, he slips in behind you. Release some chaff quickly when you see this lock warning, or you’ll be hitting the silk.

Fast reflexes are rewarded with spectacular explosion animations that look like they’re straight out of a movie. See you in hell, you insane Ruskie.

Remember, you’re all that stands between the U.S. and that Russian madman. Go kick some butt!

Get your briefings from the mission commander. He’s not exactly a friendly fellow — screw him up just once and he makes you run the whole mission again.

Here’s where the action takes place. Use your cursor to get a missile lock on enemy targets. Better move quickly, though — the lock’s good for only a few seconds.

If you capture a MiG, you can fly it — don’t even think of trying to shoot it down! If you get too close, you’ll crash.

Get ready, fighting fans — Capcom's got some medieval mayhem for your vicious little appetites. "Knights of the Round" sounds like a fantasy RPG, but it's much more an action game in the "Final Fight" 2 tradition.

You'd think once Arthur pulled Excalibur from its stony prison that all would be peaceful in Camelot. But alas, other knights and kings would have nothing to do with the upstart youngsters. So Arthur conferred with Merlin, and the two decided that the only way to unite England is to find the Holy Grail. "Knights of the Round" sends Arthur, Lancelot, and Percival out on a quest to return peace and prosperity to Camelot.

"Knights of the Round" may not quite live up to the "Final Fight" series, but its lush medieval setting is a welcome change from gritty urban streets. The wide variety of moves at your disposal also makes it exciting to play. If you've always wanted to be a knight in shining armor, here's a good place to start. GP

The Hulk's in this game all right, but Jeff Lundrigan finds that there's nothing incredible about The Incredible Hulk.

There's something mighty appealing about a mindless brute who's simply "the strongest there is." Sadly though, this game doesn't have much to do with its Marvel Comics incarnation.

Stop me if you've heard this before: He walks from left to right, jumps on platforms, and hits enemies. He picks up gamma capsules to increase power and gain special moves. And he fights one of the Hulk's main villains — the Rhino, Tyrraurus, etc. — at the end of stages.

See the problem? You could put any character in here without changing the formula. Sure, it looks OK, but side-scrolling action games have been done to death, and nothing makes this stand out. It's got tiny characters, just a handful of combat moves, and not enough variety among enemies. We've seen it all before — show us something new. GP

Watch a tiny Hulk battle a couple of bosses from the comic book: the Abomination, the Absorbing Man, the Rhino, and others.

The title screen looks great... wish the rest of the game could keep up.

Collect special capsules and they make you a Super-Hulk. You can then do extra moves like the Sonic Clap.

Find transformation capsules or take enough damage to turn into Banner. He gets places the Hulk can't... too bad he dies so easily.

Most of the stages look alike. This is about as distinctive as the designers got.

Doug Brunley learns the hard way that Fievel may not be the best traveling companion on a trip to the Old West.

**An American Tail:**

Fievel Goes West

**SHOOTING GALLERY**

Uncover power-up and bonus icons by shooting the boxes scattered throughout each level.

- **Pick up this Wylie Burp icon and you can continue from the point if you lose a life.**
- **Small hearts refill your life meter by one heart.**
- **White bigger hearts like this one fill the meter entirely and add an extra heart!**
- **A big enough coin collection — 100 to be exact — earns an extra life. Large coins are worth five of the small ones.**
- **Water guns found throughout the level can be used to extinguish these flaming platforms.**

Well, it's not exactly the ultimate cat and mouse game: Evil Cat R. Waul has played upon the dreams of Fievel's family and lured the Mousekewitz family to the Old West, a place he's told them cats and mice live in harmony. In truth, he plans to serve up the Mousekewitz clan as (gulp) mouseburgers!

While Fievel may be small, he's full of fight — and aspirations to follow in the footsteps of his hero, lawdog Wylie Burp. He's discovered Cat R. Waul's crafty scheme and is committed to foiling the plan and saving his family. But the little guy is armed with only his trusty pop-gun, water pistol, and other items as he high-tails it through five levels of desperados and obstacles en route to a clash with Cat R. Waul.

The game's simplicity, brevity (only five levels!), and familiarity should make it a good selection for kids. But the control is a little rough when you're jumping and shooting and leads to frustrating moments even for grown-ups. Since there's nothing new or original, it's little more than another average action game with a sweet cartoon character.

One-Eye is the first of the five bosses you encounter, but you shouldn't find any of the meetings — except for the climactic clash with Cat R. Waul — to be too much trouble.

Whether he's staring down one of Cat R. Waul's desperados or picking up more loot, Fievel always has a smile on his face. Annoying, isn't it?

Quit crying about getting hacked, or how your shoes hurt, or how you can’t shoot outdoors.

Just shut up and jam.
**Pirates of Dark Water**

Mike Foster was pleased to play a game based on one of his favorite cartoons, but this dark water left a bad taste in his mouth.

**MER** — a mysterious world where a substance called dark water consumes any living thing that touches it. Since the only things stronger than the dark water are the Treasures of Rune, the person who controls the treasures controls the planet.

In this one-player adventure, you can select Ren, Ioz, or Tula in your battle to beat the pirate Bloto to the treasures. Each of the three has unique strengths and weaknesses: Ioz is the strongest, Tula the fastest, and Ren falls somewhere in between. You must explore Mer, picking up potions and coins and other good stuff — including melons to feed the helpful monkey-bird Nidder.

The **Pirates of Dark Water** looks great, but its gameplay is disappointing, with slow action and easy-to-defeat bosses. There's not much here for older players, but its nonviolent nature and cartoon theme make it an OK choice for younger games and fans of the cartoon series.

If you're looking for an all-out exhilarating, blow-'em-away Genesis shooter, Jonathan Gagnon says to look no further.

Here it is — chock-full of explosive graphics and equally stunning sound effects. Oh, yeah... there's enough action to glue you to your seat.

As Bren McGuire, leader of the United Planets' Freedom Forces, your sole mission is to keep galactic peace. However, on this day harmony's not part of the picture. Your arch-nemesis, the evil "Machine," has reappeared. That's right, the evil force you thought you destroyed years ago is back with a vengeance. Same picture, different game — you must find the Machine and crush it.

Turrican is a shooter with lasting power. Don't expect to finish it in a sitting — not with 15 horizontally and vertically scrolling levels to explore. You've got a bunch of weapons and gadgets at your disposal, and you'll need every plasma-robe and energy wheel if you hope to survive. Hold on! GP

One of my earliest memories is hunting with my father, sitting bored and miserable in a cold, rainy duck blind, waiting for hours on end for a lone duck to fly overhead. I remember how utterly helpless I felt, how I never thought I would be that bored again. Until now.

Black Bass Lure Fishing is probably the saddest simulation of any kind ever brought to Game Boy. The graphics are sub-standard and the game play downright stinks. You select a spot, cast your line, and wait. Then you get a unique "fish-eye" view below the water's surface. Unfortunately, the perspective is disorientating, and it's confusing and boring to try to figure out where the fish are. Devoted anglers might give this a try — no, wait, I take that back. Use the money and buy yourself a tackle box.

Don't think I hate this game because I hate fishing. I'm the one who gave Super Black Bass an Ultimate Award. In developing that game, Hot-B worked very closely with Zebco, the fishing accessories company, to make the simulation as realistic as possible. It's a shame they didn't take notes on that formula for success.

Psst, buddy, want to go into space? Want to kick some Romulan butt? Jeff Lundri-gan points the way where all will follow.

Hey, man, these are the voyages — for real. You call the shots aboard the Enterprise, warping around the galaxy to deliver medical supplies, rescue scientists, scrap with Romulans, and complete other missions. In the course of your Starfleet duties, you find clues about the "Integrated Field Derandomizer" (IFD), an ultimate weapon left behind by an ancient civilization. Let's just say that you'd better find it before the Romulans do!

It's amazing how much stuff there is to do in Star Trek: The Next Generation, and it takes a fair amount of brain power and skill to survive. However, The Next Generation's biggest strength is that it stays very, very true to the spirit of the show. The designers made sure that the crew's goals and methods are square with Starfleet regulations — mess with that Prime Directive, buddy, and you're outa there quick.

On the down side, it's a little slow. You spend quite a bit of time twiddling your thumbs while you wait to warp to a far corner of space or make repairs. Even the characters walk like somebody turned up the gravity. It makes a few missions — such as rescuing miners in the maze of tunnels below Orientus Alpha IIIB — a real endurance test. But the universe isn't perfect — if it were they'd have found a cure for baldness by the time Picard took over the Enterprise.

Fans of the series won't want to miss The Next Generation, and there's a lot here even for Doug Brumley types who have never seen the show. GP

YOUR VERY OWN STARSHIP
Welcome to the bridge. A bridge too far. Bridge of no return.

You control it all — YES! I'm in charge now! Obey me space pigs! I'm the captain, I'm the captain!

But, seriously, folks, you control the Enterprise and its crew from here. You can even call a briefing if you get stuck, which is very handy.

Adding to the Star Trek flavor is an enormous computer database filled with Starfleet regulations.

MEET THE CREW!
Choose your Away Team carefully or your missions may not last long.

Select the team from familiar crew members or "red shirts," nameless ensigns you can kill off with impunity.

Since special skills are often required on missions, be choosy when you're putting together a team. Counselor Troi, for example, is good for talking to people, and Geordi can see in the dark.
A SECOND OPINION

This one gets a perfect 100% from me. Why? Because I can be bribed, that's why. Look! I'm in the game. Me and Mike and Beth and that Vince Matthews fellas — bunches of magazine folks from all your favorite rags. Cool! And best of all, they made me look like a short-haired Stockard Channing, which means more than makes up for my lowly ensign status. And do you know what? We didn't have to pay them anything! Not a penny. Whatta racket! Seriously, though, TNG is a fun game with a learning curve that's a little high, but it's great for the Trekker in all of us. And you can be me. Or you can kill me. Whatever.

— Leslie

Quit arguing about Shatner vs. Stewart, Mike Foster says, and play this Game Boy version of the top-rated syndicated series.

Star Trek's a Trekkie's dream — you're not quite in the captain's chair, but you do have control of the Enterprise, and its crew awaits your orders. Your missions include saving diplomats, delivering life-support systems, and battling the lowlives of the universe, including Ferengi and Romulans. There's a little too much fighting going on for purists, however; Jean-Luc seems to have lost his grip on the Prime Directive.

But if your Game Boy seems to be losing its luster, Star Trek could be a lifesaver. Set a course at Warp 9 for your nearest game dealer and "engage!"

Shooters? Yeah, I think I remember those. They were all the rage a few years back, when Gradius and Thunder Force really pushed 16-bit sales. Can Grindstormer bring the near-dead genre back from the brink? No.

Grindstormer should come in a plain white box with "shooter" stamped on it. It has no originality, no new twists — nothing you didn't see years ago. You simply fly toward the top of the screen while firing missiles and dropping bombs on everything in sight. The storyline isn't even original: As the last surviving pilot in your fleet, scientists give you the Grindstormer, an experimental new ship to fight an invading alien armada. That story's so old, it's gotta be public domain by now.

On the other hand, Tengen must have realized that Grindstormer isn't the type of game that's really hot these days. It's only $40 or so — pretty cheap compared to most new games. Lonesome shooter fans can get their hands on something for their itchy trigger fingers while still saving up for the next good game. So look at Grindstormer as a nice treat for gamers who still enjoy zapping space ships.

**RATINGS**

**GRAPHICS**
- Grindstormer features large enemies and a very smooth moving ship.
- The overall impact is dull, thanks to drab colors and uncreative enemy ships.

**MUSIC & SOUND FX**
- Explosions and lasers are standard fare, but lack in just a notch higher.
- Most music tracks aren't adrenaline-pumping — I could play golf to this!

**BELLS & WHISTLES**
- Nothing shooter fans haven't seen.
- The info bar takes up way too much space, cramping your game play into a very small window.

**CONTROL**
- Your ship moves very smoothly, and configuring weapons isn't a problem.
- You can lose your ship among the side pods while trying to maneuver.

**REPLAY VALUE**
- It's pretty tough, even on easy level.
- There are only six real stages — after that you go back through them, just with harder difficulty.

Despite the inclusion of pig wrestling, his favorite sport, Mike Foster found that even the gods of Asgard couldn’t make this game challenging.

Gods will be gods, and the Norse gods have been bickering since the beginning of time. But in this skirmish there’s a new twist: Loki, god of mischief, has stolen the most prized possessions of the gods — Odin’s sword, Frey’s spear, and Thor’s hammer — and has hidden them on Earth, where no god can tread. Not to be outdone, the gods send a hero to befriend the Vikings and retrieve their stolen weapons. Thus Heimdall was born and began his quest.

The animated segments opening this RPG are quite impressive — and they should be, since alumni from the Don Bluth studio (The Secret of NIMH, An American Tail) created them. You begin by participating in sub-games to prove your worthiness. Once you’ve thrown a few axes, wrestled a few pigs, and fought a few boatmen, it’s decided how many characters (up to five) can accompany you on your quest.

The rest of the game is not nearly as graphically pleasing, challenging ... or original. Because you simply search through rooms, kill monsters, and acquire treasure, there’s not much that sets Heimdall apart from other RPGs except that it’s very much a beginner game. Pick up Heimdall if you’re daunted by The Secret of Mana or Lunar, but if you’re looking for a challenge, leave Heimdall on the rainbow bridge. GP

Welcome to sub-games, where men are men and women are targets. Do well — even if you must try over and over.

Use your axe to cut the young girl’s braids. But be careful — if you come to close to hitting her, you must begin again.

The one thing no game has ever given you — pig wrestling! If you corner this little piggy, he charges.

Since not all traps are visible, you can set your mind at ease with a Detect Traps spell.

Loki leaves Asgard with Odin’s sword, Frey’s spear, and Thor’s hammer. Can you retrieve them?
Life as a space hero can be pretty miserable sometimes. Like now, for instance. The evil Commander Borf has blasted you with his Infanto Ray and turned you into a little kid, captured your gal, Kimmy, and is threatening to conquer the Earth.

On top of all that, your name is Dexter.

Your mission? Rescue the girl, save the world, run the bad guy out of the galaxy, and regain your manhood (not necessarily in that order)!

Now all the extraterrestrial action of the smash-hit arcade game comes to your Super NES® with 14 wacky and challenging levels of intergalactic mayhem! Over 50 video sequences from the original game put you in the action!!
Nobunaga's Revenge

Publisher & Developer: Koei • now available • $59.95

After whetting his appetite for global domination with Romance of the Three Kingdoms III, Mike Foster found Nobunaga's Revenge a big letdown.

Another Eastern country has been thrown into civil war. As the great shogun known as Ashikaga, it's your job to reunite the people of hundreds of feudal states under one rule. But the daimyo, or leader, of each state wants your job.

You begin Nobunaga's Revenge with a measly amount of money and very little food. You must invest in production and build a strong army. You can protect your fief, or state, with alliances (such as marrying into the family of a neighboring fief), and you can use these alliances to cover your back (even double your troops!) while you invade an enemy fief somewhere else. Be careful, though — sadly no pact is so set in stone that it can't be broken.

Koei games are Koei games — you know when you buy one that you're in for strategy-filled gaming sessions. But Nobunaga's Revenge is incredibly frustrating because you can give only one command per turn, even though you may be invaded two or three times between commands. And before you can train your army, you must recruit men, sell grain to raise money to pay them, invest in farmland to grow the grain... you get the point.

The only cool thing about Nobunaga's Revenge is that you get ninjas — sneaky little guys you can use to start rebellions, destroy dams, or set fire to enemy buildings. Destructive, but still a lot of fun. And this game needs an invasion of fun! GP

Two months after gamers were treated to the much-ballyhooed arrival of Acclaim's NBA Jam, another street-wise basketball game hits the store shelves. Virgin's Jammit (also available for SNES) trades the glamour and glitz of the NBA for the grim and gritty urban streets. If you thought the games were rough in Jam, try the competition on concrete courts such as Slam Haven, Fish Heads, and the Snake Pit.

In Jammit, as in NBA Jam and the older Arch Rivals, you play fast-paced games with fewer players than the standard five-on-five, and there are usually no fouls called. But Jammit sets itself apart from its predecessors because of its eight unique play modes. In addition to the standard one-on-one, you can choose to play games like "2 Hot," in which you score more points if you shoot from the X mark on the court, and "Cutthroat," in which three players (you and two computer-controlled opponents) try to be the first to score 21 points. Without these variations, Jammit would get old fast.

But instead Jammit is a good action-based basketball game that would have been a lot more impressive if Jam hadn't come along. However, the game's many play modes and in-your-face attitude gives it a unique style that makes Jammit worth picking up—even if you already own another basketball game.

You spend a lot of time playing above the rim—driving to the basket is the most common (and effective) maneuver. If you do decide to take a jump shot, be sure to get open first. Otherwise, take it to the hole strong!
**A SECOND OPINION**

*Jammit* is a refreshingly different basketball game. Graphically, the digitized characters are much larger and more detailed than in other hoops sims, and the perspective-switch for dunks gives you a great look at the above-the-rim action. I found control to be its weakest point, but it doesn’t sink the game. The fact that you can play just about every streetball game under the sun certainly helps its replay value. *Jammit*’s not exactly the best basketball cart you’ll play, but it’s certainly worth a look.

You bet on the outcome of the match in the sole game and can keep playing as long as you’re winning. However, if you run out of cash, it’s time to hit the showers.

If it looks like your opponent is going to get off a good shot, shove ’em to the ground! In some play modes, your opponent has the option to call a foul, but he or she can call only a few.

You can double the number of points for a shot in “2 Hit” mode if you hit the basket from the X mark that randomly appears on the court. It’s tough to do — but it’s a great way to make a comeback late in the game.

The Judge owns the city courts, and you’re gonna have to go through him if you wanna go all the way. He’s almost impossible to stop once he drives to the basket, and he can put it up from the outside, too.
STOP That ROACH

Publisher & Developer: Koai • now available • $26.95

Jonathan Gagnon wishes they had stopped this game and left the insects alone! Warning — this should come with its own can of Raid.

Everyone and his brother has done a puzzler for Game Boy, so why should Koai be any different? Well, maybe because STOP That ROACH isn't very good.

Your goal is to stop all the on-screen roaches before they devour your snack. You set up traps in the playing grid, then smash 'em, bash 'em, or spray 'em to get the roaches to run — whether or not they run into the traps, however, remains to be seen. If they make it to your snack, your days as an Orkin Man are over. But if you destroy them all, you advance to the next level. The catch is that you move as if you're on a board game, taking turns and advancing so many squares. But what should add strategy to the game only makes it boring.

The things that save STOP That ROACH from being hopelessly average are options usually missing from many puzzle games. You can skip around to different levels, so a single frustrating stage doesn't halt your progress. If you're a real cheat, you can also take the easy option and see the order in which you should take moves to win.

A good puzzle game should raise your heartbeat a few thumps as well as keeping your brain in overdrive. Since STOP That ROACH does neither, exterminate it from the competition. GP

A SECOND OPINION

Overall, I agree with Karie, but I'd probably have rated Aladdin a little lower. Though the graphics and sound really are the best I've ever seen for Game Gear, the game is far too short and easy! In order to make this title fun for everyone, multiple skill levels should have been added to increase the challenge for gaming veterans while still letting the kids have a good time.

It happens so fast. One minute you're a cute, fuzzy-faced little thing. The next minute you're served up on a platter with a side of mint jelly.

Such is the intensity of new Super Metroid® for the Super NES®. Six new worlds of wilder weapons, weirder weirdos and those ever-lovable life-sucking Metroid hatchlings. All waiting to turn you into so much dead meat.

Luckily you're Samus Aran, so you've got more than good looks and a charming personality going for you. Like ice beams. Power bombs. Super missiles. Screw attacks. And other new implements of destruction.

In fact, with 24 megs of stuff, it's not just the biggest Metroid game ever. It's Nintendo's biggest game ever.

But don't even think about playing it unless you've got a Super NES. Oh, and it wouldn't hurt to have a little of that mint jelly on hand either.
Since I played the first Joe & Mac adventure back in Super Nintendo's early days, I admit I wasn't too excited to hear about this sequel. Not that the first game was bad — it was just a fairly ho-hum side-scroller. But Joe & Mac 2: Lost in the Tropics throws a little spice into the prehistoric mix, improving the original.

The story is simple: The village crown has been stolen by a cave-dwelling creep named Gork, and it's up to our loveable duo to get it back. They must bash their way through six different areas chock-full of enemy cavemen, dinosaurs, and territorial dangers.

The action scenes are almost identical to the first game, except there's a lot more variety in your enemies and surroundings. For instance, one level takes you from an avalanche-threatening mountainside into a snow-covered cave, then into an ice-slicked tunnel. You end up covering a lot of ground in each level.

New to Joe & Mac 2 is a non-linear map screen from which the prehistoric pair travel across the island to reach their next action scene. It doesn't factor much in the game, but it's nice to choose the order in which you play the stages. The two villages are another addition. You can't really call them levels unto themselves since they're mostly for fun, but visit them to view the landscape through a telescope, try new food, or even buy flowers for a marriage proposal. Nothing you do in the villages is vital to the game, but it's a great break between bashing dinos.

Action fans will find Joe & Mac 2 only slightly above average, but it's still good fun. So while you may not want to move it to the top of your "games to buy" list, it's not a bad title for your hack-'n'-bash library.

GP
VISIT THE LOCALS

Talk to the villagers to add some fun variety to the action levels.

- The **password lady** is the lady who gives you passwords. Write one down when you finish a level or do something weird like remodel your house.
- The **store guy** sells you food to restore your health, flowers to go wife-huntin’, and he even remodels your house! Can’t get that down at Kmart!
- The **old dude** isn’t good for much. He tells you a few worthless tips before shuttling you right back down the hill. Repeat “good luck” every time you talk to him.
- Use the **transport fellow** to fly you back to your home village for free. You even get to ride a cool Pterodactyl! On the way, Man, you’re livin’!
- The **peeper** lets you look through his telescope. You can spy on Gork’s cave, the other village, or — gasp! — your own home! This guy’s been peeping into your hut!

With the handy new map, Joe and Mac can aimlessly travel the countryside until they decide on a level. Unfortunately, while traveling you notice there are only six levels — this game is way too short!

A SECOND OPINION

I agree, Chris. This game doesn’t pose much of a challenge, but it has some great touches that make it more interesting than the average side-scrolling action game. But the novelty eventually wears off, leaving you wandering from one side of the screen to the other constantly chasing thugs over the head. When these two cavemen eventually learn to talk, I’d be willing to bet that the first thing they ask for is more variety.

Doug

The graphics are great, with bright colors and deep shading. Animations are done well, too — from crying dinosaurs to enemy cavemen that run after striking you.
Always looking for meaningful sports games, Doug Brumley was intent on seeing exactly how Mega Man was going to save the world simply by winning a soccer match.

You had to wonder why Dr. Wily never showed up for Mega Man X. Had he finally thrown in the towel? Of course not — how could he stay away from the protector of all that’s good and true for long? Still, his new means of attack is... well, original... to say the least.

At a soccer match between the world’s two best teams, fire pelts the field and fans are shrouded in smoke. When the air clears, humans players have been replaced with robots! Dr. Light, Mega Man’s creator, is watching the action on TV. The good scientist brings to life a group of robots and gives Mega Man the job of defeating Wily’s evildoers.

Its cartoonish graphics and lively sound — combined with its arcade-style game play — would seem to make Mega Man’s Soccer an entertaining pick for younger players. But sluggish movement, tough defenders, and a lack of variety could leave those gamers frustrated and bored, and sports fans will immediately be turned off by its slow pace and simplicity. So while Mega Man may like to play a few sports on the side, he certainly should keep his day job.

Each team has a limited number of special attacks that turn the ball into a weapon-like projectile and make scoring even easier. Thanks to these ruthless slide-tackles, you can’t dribble the ball far.

Once you find the sweet spot on the field, scoring is just too easy!

The British are coming! And you must either defend the colonies or lead the assault against them. Change history or lead the colonists to another victory in Liberty or Death, Koei's strategy game set during the American Revolution.

You must plan every step of your campaign: Get the support of your country's political system, then enlist officers and decide their salaries. With your remaining funds, purchase new weapons, recruit troops, then lead them into battle. Do poorly and your troops, officers; even your political backing may walk out on you.

As in other Koei games like Genghis Khan and Nobunaga's Ambition, commanders and generals are based on real people in history. Since most players in these parts know more about U.S. history than that of Japan or China, Liberty or Death appeals more to strategy fans than those titles. But folks not used to the deliberate nature of RPGs and strategy games may revolt when they discover that this requires too much time and work to make too little progress. GP

Mutant League Hockey

Publisher: Electronic Arts • Developer: Abalone • available May • $49.95

Mutants?! Hockey?! One of those words drew Doug Brumley to this game, but we're all too afraid to ask which it was.

Those wacky mutants are back, and this time they're bringing their unique and gruesome brand of cutthroat tactics and bizarre humor to hockey. There's always been roughness in the rink, but Mutant League Hockey makes the National Hockey League look like a slumber party. New faces join the fray in Mutant League Hockey, but there are holdovers from Mutant League Football as well, including Coach Bricka, Bones Jackson, and K.T. Slayer.

Three of the 23 teams are comprised of all-stars, while several standard teams are based on popular NHL teams. For example, the Chilly Liars — led by Skingros and Wrenchin — are the Mutant League counterparts to the NHL's Philadelphia Flyers and team leaders Eric Lindros and Mark Recchi. Each team has its own arena filled with various deadly obstacles and distractions. Rosters contain three types of players — strong, slow trolls; "agile, but fragile" robots; and fast-and-fearless skeletons. EA's 4 Way Play adapter allows up to four people to join in the melee while playing a single exhibition game or even making a run for the Mutant League Monster Cup in the playoffs.

Fans of EA Sports' famous NHL Hockey series will find Mutant League to be quite a different game — not only because it controls differently, but also because scoring goals isn't always the top priority. Weapons, trick plays, and fights often keep the game's focus more on beating your opponent senseless than beating the goalie with a shot. But if you quickly discover that you can combine the two and beat the goalie senseless, then you've jumped right into the spirit of Mutant League Hockey.

Each player is rated in several different categories; his on-ice performance directly reflects his skill levels.

Is the ref taking bribes? Waste him! Special plays such as this take the game beyond the realm of sport.

Score at will by disabling the goalie with a weapon, then shooting the puck past his prone body.

Extracurricular Activities

Special moves — Special violence. That's what sets MLH apart from sports sim.
A COLD DAY IN HELL

Those irresponsible ice fishermen must have been here again. Holes in the ice can deplete your roster in a hurry.

These lively demon nets add new meaning to the term "puck possession."

Bead body parts and skating have never mixed, so keep your skates clean by avoiding the remains of former teammates and foes.

Satan must really have some good connections to get seats this good.

If you don't concentrate on punching during face-offs, you'll lose the puck... and your pride.

Just when you thought it was safe to take the ice....

A damage meter lets you know how close your players are to perishing.

Why play fair when cheating's so easy? Chainsaws, hatchets, and other weapons effectively put a dent in your opponent's ranks.

I'm not convinced that this mutant Zamboni actually cleans the ice, but at least it removes the debris.

A SECOND OPINION

Though the graphics and sound aren't the best I've ever seen, Mutant League Hockey is just pure fun. The nonstop fighting action keeps you on the edge of your seat, and while it's no NHL '94, there's great hockey here, too. Different player types and weapons keep the game from getting repetitious, adding to the already great replay value. If you're looking for a great hockey cart — and don't feel like getting bogged down with silly rules — this is definitely the game for you!

AGASSI GETS MAKEOVER

After a week effort with Andre Agassi Tennis for Genesis a couple of years ago, TechMagik went back to the drawing board for a new SNES version. Superior graphics, control, and game play put this 4-meg cart far ahead of its predecessor. And the unique skins feature — in which a pot of money doubles each time the ball crosses the net, returns to soothe the money-grubbing beast inside everyone.

TRY REALLY HARD AND YOU CAN SMELL THE GRASS AND FEEL THE BREEZE WHEN YOU PLAY PGA European Tour. Well, maybe not, but EA's new links sim offers very realistic golf in the line of the first two PGA Tour games. It's even accurate to the frustration you experience when you play poorly.

Fans of EA's earlier clubhouse cartridges will find this one structured much the same, but, as the name indicates, a change of setting offers a whole new challenge. Even the seasoned veteran will feel the demands of five European courses and their respective tournaments. Ten European pros — the likes of Seve Ballesteros and Bernhard Langer — and 50 new roster players try to keep you off the leaderboard. After all, this is for cold, hard cash (in pounds of course; the Scots did invent the game, after all).

But if you're not ready to take on the heavy hitters, there's still plenty of opportunity to get out on the links. Brush up with a practice round, play a home version of the Skins game, challenge up to seven friends in a match-play elimination tournament, or pit up to four players in a three-hole sudden-death shootout. Compatibility with EA's 4 Way Play insures your foursome's never again denied a tee time, matter how much you annoy the other country-club members.

Solid controls, clean graphics, and dead-on sound effects make your round enjoyable... unless your golf game determines otherwise. Eventually, though, the shots all start to look the same no matter what hole you're on. Less patient gamers may not want to make their way through a full 72-hole tournament. If you have enough patience however to play golf — or watch it — you should thoroughly enjoy this one.
Jimmy Connors’ Tennis

Few athletes excite a crowd like former tennis star Jimmy Connors, whose on-court antics and showmanship made him a fan favorite. Even in his last year of professional competition, “Jimbo” was teaching athletes half his age a thing or two. Now he’s got his own Game Boy sim, which lets you travel the world matching your talent against stiff competition while hoping for fame and fortune.

World tour play takes you to 16 international venues.

Poor artificial intelligence makes the computer easy to defeat once you master a few cross-court shots.

Attempts to lob the ball over your head. You direct the ball by pushing in a certain direction on the directional pad in conjunction with a swing. Player movement is a bit slow and choppy, but the characters effectively get from point A to point B to make a shot.

World Series Baseball

Celebrate the return of the Boys of Summer by stepping up to the plate in World Series Baseball. Although this Game Gear version is entirely different from the Genesis game of the same name, it still provides a lot of hand-held fun.

All the real players and logos are included in World Series Baseball, which — unlike the sport itself — is incredibly fast. The hits, throws, and runners all move very rapidly and bring an excitement to game play that’s often missing from baseball sim. But quick reactions are a must if you hope to grab the pennant for your team.

Although the controls respond better than average, they’re still the game’s weakest point. Computer fielders automatically catch fly balls, but chasing down liners in the outfield takes some work. It can also be a challenge to throw to the correct base, and the buttons often don’t respond quickly enough to allow you to turn a double play.

Game modes include exhibition games, 32-, 84-, 123-, 162-game pennant races (seasons), and two-player competitive games (by linking two Game Gears). You can also create two “dream teams” by picking players from the rosters of all 28 MLB teams. You can substitute batters and pitchers at will during the action, basing your decisions on a thorough list of stats. And don’t worry about entering lengthy passwords — your progress is automatically saved.
Pebble Beach Golf Links

Sega Sports’ latest trip to the golf course, Pebble Beach Golf Classic, looks graphically similar to PGA European Tour, but the likeness ends there. While there’s a wide variety of options such as Skins Match and tournament play from which to choose, you can play on only one course, Pebble Beach in California. The game keeps a record of each round, then shows you extensive stats that let you see how you’re progressing.

But for a game in which accuracy can mean the difference between a short putt and spot in the bottom of a lake, Pebble Beach’s control just doesn’t deliver. With so many different indicators and diagrams to analyze and adjust, you might begin to think you’re piloting a jet airplane rather than hitting a little white ball.

Each club has a maximum distance, and a power meter lets you drive the ball up to 100 percent of that distance. This works fine when you’re going

The average player may be overwhelmed by the wide array of controls. And pros may find it difficult to achieve good results with them.

PGA Tour Golf

So you’re stuck behind the slowest foursome you’ve ever seen, and they refuse to let you play through. What’s there to do while you impatiently wait in your golf cart? If you’re the owner of a Game Gear, you can get in a few extra holes with PGA Tour Golf from Tengen.

This golf sim puts four challenging courses into your hands and pits you against the top names on the PGA Tour in one-round tournament play and practice rounds for up to four people. Yet despite its relatively good graphics, the game suffers from poor gameplay. Thanks to a horizontal power meter, hitting each shot is easy enough. But once the ball leaves your club, you can never be sure exactly how far it’s going to go. For example, you’re 50 yards from the pin so you use a pitching wedge with a maximum distance of 80 yards. You stop the power meter at about 75 percent, which should more than put the ball on the green. Yet it goes about 35 yards and then plows down in a nearby bunker instead. Argh!

And if the game’s distance inaccuracies aren’t enough to make you want to pick up your clubs and go home, try hitting the ball over a tree standing in your way. No matter how much distance there seems to be between the top of the tree and your ball, you hear a thud, and the ball drops from mid-air as if it hit a plexiglass wall.

If you can learn to compensate for the shortcomings in PGA Tour Golf then you might just be able to squeeze in an enjoyable trip to the links any time and anywhere without coughing up the extortionate green fees.

PGA Tour Golf is based on EA’s design, but it unfortunately doesn’t play as well as its Genesis predecessors.
Bill Walsh College Football

When the Genesis Madden games began moving to SNES, you knew Bill Walsh College Football wouldn’t be far behind. Walsh captures the spirit and excitement of college football like no other, so it’s only fair that EA’s letting SNES owners have a piece of the action. Madden’s designers did their homework when creating Bill Walsh, including rules such as the two-point conversion and the 24-second play clock as well as a whole new selection of plays exclusive to the college game. And if it’s teams you want, it’s teams you get — 24 top college teams of recent years and another two dozen from the past 20 years. However, since the cart isn’t affiliated with the NCAA, instead of Notre Dame you get a squad from South Bend, the team’s hometown. Each team is composed of individually rated players indicated by number instead of name, again because of the lack of a license.

The action is fast and furious, and the short college play clock keeps things moving. The players, who move quickly and smoothly, also control very well — a crucial factor given the speed with which you must react to make or break a play. But the players are so small that they’re almost indistinguishable in groups. This leads to some confusion and control problems, especially when a group of receivers and defenders goes for a reception or when you’re running the ball up the middle through an amoeba-like pack of players.

One feature, though, that gives the SNES Bill Walsh the edge over the Genesis version is its use of Mode 7 technology. When an interception is made or a fumble recovered by the defense, the screen rotates 180 degrees so you’re always moving up the screen. The smooth rotation also comes in handy during instant replays, where the L or R button allows you to swing the camera angle around for unlimited views of the action.

So why wait for fall and the kickoff of another college-football season? Bill Walsh College Football makes you feel like you’re on campus... without all those boring classes to attend.

FIFA International Soccer

Soccer fans have been inundated with sims hitting shelves in preparation for the World Cup. EA Sports’ FIFA International Soccer set the standard on Genesis, and now it’s ready to make the jump to SNES.

The new FIFA isn’t an exact transfer of the Genesis version — there are both negative and positive variations from the original. For example, the graphics, sound effects, and music are weaker, but control is aided by a power meter and the L and R buttons, which make putting a touch on the ball a breeze. There are no scouting reports, but the game selects a “Man of the Match” at the end of each contest.

The realistic and action-packed game play, which provided the Genesis version’s solid foundation, has essentially remained unchanged. The only noticeable differences are that the SNES goalies aren’t as good at keeping the ball out of the net, and dribbling through the defense is much tougher and requires more passing skill. A give-and-go button has been added, but it turns out to be impractical most of the time.

FIFA’s three-quarter overhead perspective and the 45-degree angle of the field give you a superb look at the action. You’re automatically given the opportunity to scan the field for open defenders on corner kicks and throw-ins, and can place the cursor on the spot you want to deliver the ball. The chants and graphics aren’t as dynamic as on Genesis, but all in all FIFA easily jumps to the head of the SNES soccer class.
EVERYTHING ELSE IS JUST PRACTICE.

INTRODUCING ESPN BASEBALL TONIGHT.

ESPN Baseball Tonight, the video game, has arrived, and it blows the other games right off the field. We started by filming real baseball players. Then we digitized them. The resulting animation is smoother than a well-oiled mitt. With unprecedented batter control, super responsive "touch," and Chris Berman in the booth, this is the most realistic baseball simulation ever.

So if you’ve been playing those other baseball games, put them away. You’ve had enough practice. (Now available for Sega Genesis. Coming soon for Super Nintendo and Sega CD.)
Hang on. Tight.
You're about to enter the dark and foreboding world of Microcosm. Super-realistic, computer generated graphics inject you into the body of Cybertech's president, Tiron Korsby. Your mission: to find and eliminate a deadly and elusive brain manipulation droid.
Experience a whole new realm of adventure gaming as CD ROM-based interactive cinema effects transport you inside the heart-stopping action.
Over 500 megabytes of brilliant SGI graphics and an original sound track by Rick Wakeman, formerly of YES, crank up the intensity to levels you’ve never before encountered.

Step into the latest high-tech micro-submersibles and pilot your way to the edge of your imagination. But don’t forget to pack an extra pair of shorts.

Vince Matthews takes a look at the wonderful world of polygons, then heads into the lab to test some neat gaming gadgets you just gotta have!

Polygons, Polygons.
All the World Loves Polygons

They wow industry know-it-alls and boggle the mind of the mathematically inept. They're polygons, and in this saturated gaming sea, they look like the only things saving the world from generic side-scrolling action-adventures.

Polygon-based modeling systems allow game companies to create more lifelike experiences, even if the graphics are less realistic. The rapid-redraw and fluid movements that designers are able to get with polygons are what make arcade experiences such as Star...

Lab Results: Yes, FMV is the next step, but at $250, who's willing to buy a VCR that doesn't record or play rentals?

GP Rating: 30%

THE J-CART

The Hypo: From the creative minds behind the Game Genie comes a different approach to multiplayer gaming. The J-Cart is just like a regular Genesis cartridge except it has two joystick ports built in so additional players can compete. Games such as Codemasters' Tennis All-Stars and Micro Machines 2 will use the technology. Prices for the cartridges still depend on meg size, but they should retail for about $50.

Lab Results:
Not a bad idea, but it will be interesting to see if this latest piece of British technology catches fire on this side of the pond. Codemasters' 8-bit Aladdin deck enhancer, if you remember, never took off.

GP Rating: 75%

3-Arc Racer FX is Nintendo's second Super FX chip game. It plays OK, but how about adding some realism?
Fox, Out of This World, Virtua Fighter, and Daytona possible.

At the forefront of the polygon-design craze is a program called GameWare, developed by Wavefront, a California firm. GameWare software designed for Silicon Graphics workstations (other Wavefront systems were used to create graphics in movies such as The Lawnmower Man and Beauty and the Beast) allows programmers easily to model, move, and animate three-dimensional characters and backgrounds. Take a gander at these names: Acclaim, Argonaut, Capcom, Electronic Arts, Namco, Ocean, Probe, Sega of America, Spectrum HoloByte, Taito, and U.S. Gold. These are only some of the software companies currently using GameWare. GP

Namco's Ridge Racer, already in arcades, will be one of the first titles to appear on Sony's PlayStation.

Sega-techs went back into the lab to bring Saturn's rendering abilities up to Sony PS-X standards. Is current spec? How about 300,000 polygons a second?

3DO's Total Eclipse is a texture-mapped, polygon powerhouse.

Atari's Cybermorph for the Jaguar is a 84-bit polygon rollercoaster. Also look for Checkered Flag II for polygon racing.

Daytona is Sega's answer to Ridge Racer. It should be one of the first Saturn games released.

THE KNEEBOARD

The Hype: Can't get a good grip on your joystick? No problem with Mallard's Kneeboard. Strap this plastic board to your knee, then attach the joystick to its surface with Velcro strips. Now you're gaming! The Kneeboard retails for $9.95 (contact 916/483-7865).

Lab Results: OK — it's a piece of plastic with a Velcro strip, but it really does work. However, it's better suited for PC users than pest-happy video gamers.

GP Rating: 60%

Do ya need a Kneeboard?

ROCKFIRE IR-5

The Hype: Billed as "the ultimate in cordless gaming action." Fire's Rockfire IR-5 allows full-range game control up to seven feet away. Adaptable for lefties and righties, the SNES controller features "super-sensitive" fire and turbo buttons. The regular Rockfire retails for $59.95, and the dual version sells for $85.95 — both are now available.

Lab Results: Some actual thought has gone into the design of this controller, but while it's probably the most accurate and comfortable infrared remote we've tested, it's drastically overpriced.

GP Rating: 65%

TWIN TURBO

The Hype: You need never buy another battery! With Nakai's Turbo Twins, your Game Gear's charged and ready whenever you are. Turbo Twins snaps right into the Game Gear's battery compartment and is charged with a power adapter that's included with the package. Once it's charged, you can play up to six hours — and you can even play while the unit is charging! Turbo Twins retails for $34.95; a separate adapter plugs into the cigarette lighter of your car, allowing mobile gaming.

Lab Results: It works great, and it's even shaped to fit comfortably in your hand. On the downside, it makes the Game Gear bulky — not quite so portable anymore, is it?

GAME BOY

Comming to stores in May!
Let Jeff Lundrigan uncover for you the mysteries of life... or at least the mysteries in your favorite games.

Lots of odd mysteries to track down this month. In fact, thanks to games such as Mortal Kombat, in which a lot of cool things are deliberately hidden, about one-third of the letters I get these days are from people who want to know about hidden stuff — or at least stuff they think is hidden. I'm amazed at how observant and creative a lot of you are, and many of the designers I've talked to lately think the same. They're stunned to find out how deep into a game the players get, often putting things together the designers themselves hadn't thought of. Even if a lot of these mysteries don't amount to anything, keep looking — this is what gaming's supposed to be all about!

Secret of Mana
SNES/Square Soft
I've been playing Secret of Mana, and no matter how hard I try, I just can't get past the palace on the emperor's Gold Isle because a blue tiger and a blue minotaur keep on killing me. Can you tell me what's the easiest way to kill both monsters?

If you've reached the Blue Spike and Gorgon Bull, you've gained Syphid magic by now. The girl has an Analyzer spell, and if you use this on an enemy, it tells you exactly what kind of magic the enemy fears.

In this case, use Earth Slide on Blue Spike and Thunderbolt on the Gorgon Bull. Cast a second spell almost before the first one finishes, so keep up a barrage of magic and don't let up for an instant.

Use the girl's Analyzer spell on any enemy — especially bosses.

Next, fire off whatever attack spell the creature fears. You usually need to use the sprite.

Lucky's Little Helpers

The Legend of Zelda: Link's Awakening
Game Boy/Nintendo of America
There's a whole mess of secrets in Legend of Zelda that can be accessed using these different techniques:

- Obtain access anywhere: To warp one screen in any direction, just go to the edge of the screen and push in the direction you're facing, then hit Select a split-second later. You remain in the same place, but you're on the next screen. Use this technique to access places you ordinarily need a certain item to reach.

- Wall technique: Go up or down any staircase in any dungeon to a side-scrolling tunnel area. When you move from one screen to the next, hit Select. Save your game first — it's easy to do this incorrectly and teleport into a wall. After warping, continue to hold the directional pad in the direction you're facing. When you scroll to the next screen, you fall wherever the tunnel comes out, but you're in a secret world where everything is messed up. The walls look normal, but act like they're made of water, and the enemies are messed up, too. Walk up any staircase to make the level normal again.

- After Burner III
Sega CD/Sega of America
I've been playing After Burner III, and I found out that if you fly the highest that your plane can go and then turn diagonally, you can't get hit by the other planes' missiles.

There are two drawbacks. When it says "Wing Repair," watch out for the plane that can shoot at you. And when you're flying diagonally, look out for the red "deals" that follow your plane. Shake them by moving left and right, but watch out for missiles.

I've won the game using this trick on Expert difficulty.

Game Genie?

I found something weird in the Game Gear Game Genie. I press zeros, then erase them repeatedly until this comes on-screen: "Washing, washing on the line, who's the fairest of the five? Bluey whiteness!" or "You've found the easy secret, now find the hard ones." What does this mean?

Josh Boaz
Humboldt, TX

Well, kid, it turns out that the Game Boy and Game Gear models of Game Genie have "Easter egg" codes — ones that make the Genie do something odd, such as the messages you received. By repeatedly entering and erasing numbers, you were hitting the 1 and 2 buttons over and over, and accidentally entered a code. Other codes exist, and at the risk of angering my old buddy, Chris "Codemaster" Slate, here are a few more to try, this time for Game Boy.

Up, Down, Left, Right
B, A, Left, Right, Select
Up, Up, A, B, A, Down, Down
Right, Up, Down, Up, Left, Up, Down, Up
A, A, A, B, B, B, Start
Right, Left, Right, Left, Down, Down, Up, Up
A, A, B, B, A, A, Select
A, Left, Left, A, B, Right, Right, B

At the code screen, try pressing A, A, A, A, B, B, B, Start.

Voila! A secret message!

Paul Steven
Gobel, CA

I wish there were some magic way — you know, shoot the antenna and yell, "By the power of spoon-fed she-others!" and it would just go down in flames. But it never works that way.

First, shoot the rocket pods beneath each wing. Of course, you must constantly shoot the rockets as well, and the pods each take about a dozen shots to destroy. But if you destroy all of them on one wing, then move to the other, it makes the job easier.

Next, alternate shooting the chain gun on the belly with the pilot. If you time it correctly, the pilot won't hit you — shoot, wait, shoot, then wait again.

Watch for him to pull his gun. The chain gun takes a dozen shots, and the pods take a lot more than that.

I'm beginning to think my game is defective!

Mike Klein
Yucaipa, CA

That's an impressive load of cash, but the game's probably not defective. It takes only $100,000 to get an invitation to the Laurel Palace, but you can get in only during a one-player game. Chances are that you started a two-player game, either by mistake or with a second player who later quit, and so you're stuck out forever. Try starting again — back to the crap tables, shum — and make sure you're in one-player Adventure mode.

A number of readers asked about this. There's a wild rumor flying around that if you finish the game faster, you get a better ending — yeah right, like maybe you get to fight Ermac!

Actually, it's an outtake from the Lunar dubbing session. The actress providing the voice was trying to overdub — to match her dialogue with the character's lip movements — but went overtime and finished by saying, "Oops, too long," meaning she blew it. The folks at Working

Double Switch
Sega CD/Sega of America
I just got Double Switch. I easily passed Act I, but I have trouble in Act II. After I save Alex in her room, I know I have to save Phoebe from the mummy — but I don't know how. I also know you have to spring the alcove trap, but I don't know how. Please help me!
Victor Leong
Brooklyn, NY

Your problem is that you're not paying attention to the handymen. During Act I, he seems like one of the bad guys and you think you need to trap him. However, during Act II, you find out he's really on your side!
Here's a partial breakdown of Act II — keep in mind the game doesn't play exactly the same each time. You don't really need to catch cult members during Act I, so watch the scene between Corey Feldman and the handymen — just don't let the thug who comes into the basement shut down the system! A few scenes later, the handymen shows up in Brutos' room. Don't be distracted by the thugs in the basement and storage area, and don't trip the handymen! He shows you an extra trap in Brutos' room.

When the band begins practicing, watch the grader's room and lie shows you another trap. Once the new trap appears on your display, immediately go to the band's room and trap a cult member with the lamp trap before he starts slaughtering the band. Next, save Alex from the cultist who comes in her room.
Now switch to the grader's room and wait for the mummy to come in. Select the coffin trap and keep hitting the disarm button so it can't trap the grad. Next, power up the new hands trap and grab the mummy! Now hurry to the basement — the handymen has another trap!

Don't trap the handymen during Act II — he's a good guy with important traps to show you.

Trapping goons isn't necessary during Act II. Only worry about the guys going for the power box and security panels, as well as the ones who directly threaten tenants.

Assuming you've let the handymen show you the trap, you're all set to deal with the mummy. First, disarm the coffin trap so the mummy can't use it...

...then spring your brand-new hands trap on the mummy!

Can't get enough Mortal Kombat II? Neither can Kitaro-blaster Chris Slate. Here's what he's discovered since our last issue.

Welcome to another arm-ripping, head-chomping, life-draining edition of Codebreakers! Last month we gave you massive amounts of moves for Mortal Kombat II, but this month we have even more secret tricks and assorted goodies. And here's your first assignment: Crack MKII's hidden tricks! We've gotten hundreds of letters on moves and fatalities, but what we really want to know are the strange tricks, characters, codes, or rumors you've heard about or discovered. Y'know — the good stuff. The first gamer to send in a hot new trick gets a little something extra. But those of you who have seen the "Watchdogs" and "Shawn Attacks" on the Utilities screen aren't on to something.

Select the Metro Train Stage
Input this code at the Title screen — you hear an explosion if it worked properly. Now select the Vs. mode, and you can choose the Metro Train stage when you reach the Stage Select screen. It was previously available to you only in the boss round of the tournament!

Now you can access the Metro Train stage!

Shang Tsung's Pit Fatality: (hold Block) 2 Down, Up, Down
Baraka's Pit Fatality: 2 Forward, Down, High Kick
Jade: Just before the "2" on the tournament map during the match, win one round (it doesn't matter which one) using only the Low Kick button. You go through the portal and fight Jade in Goro's Lair. You can find her only in a one-player game.

Smoke: You can find Smoke during either a one- or two-player match. A face randomly appears in the right corner and says "Toasty!" after you uppercut your opponent or your opponent uppercuts you. It can happen frequently or not at all. If you're in the Portal stage, immediately hit Start while holding Down. Be sure to press the Start button on the side you're playing. In a two-player game, the person who hits Start first gets to fight Smoke.

Sub-Zero executes the uppercut fatality — and his competition.

Noob Saibot (version 3.1): Win 50 games in a row, playing against a second player at least part of the time. Noob is a super-tough ninja dressed in black. If you lose to him, you can fight him over and over.

Dead Pool Uppercut Fatality (version 3.1): When it says "Finish Him!" on the Dead Pool screen, hold down the Low Punch and Low Kick buttons while doing a normal uppercut.

Where there's Smoke, there's fire!
**The Ultimate Weapon**

Play a little Street Fighter in the middle of your Mega Man X game!

Grab all eight heat tanks and all four sub tanks, then go back through armored Armadillo's stage until you reach the last rail car that takes you to the boss door. Just reach the door door, clear out any birds in your way with a powered-up shot from your X-Blaster, then do a dash-jump off the platform and onto the wall above the door.

Climb the wall until you find a small area with an energy capsule. Grab it, then go through the boss door to complete the level. Repeat this process five times — on the fifth try, the energy capsule is replaced with a secret weapon station.

**Mortal Kombat**

Game Boy/Acclaim

**Goro Lives...**

Play as Goro! Beat the game and watch the credits. When "The End" appears, hold diagonal Up/Left + A + Select. Hold the buttons until the "Enter Your Initials" screen appears, then input your initials and press A. When the high-score table appears, press Start — you get a screen that reads "Goro lives... as you." Now you can play as Goro! And the other characters have strange new names.

**Passwords**

These codes get you through the game with all five air strikes left in reserve.

- Levels 5-8: DFE7PPGM
- Levels 9-12: LCM6NLY2
- Levels 13-16: WDLW6L

**Random Select (in version 3.1):** Highlight either character in the top corners (Liu Kang and Reptile) at the Character Select screen, then press the Start button while holding Up.

**Turn Off Throws (in a two-player match):** Hold Down and High-Punch on both joysticks after selecting your fighters. A message appears saying that throws are disabled.

**Slip Off Spikes After Fatality Uppercut:** Hold Down on both joysticks.

**To Play Pong:** Play through (you don't have to win them all) 250 matches and Pong appears. If you're not playing a two-player game, the action keeps going as usual until match 250 until you finally begin a two-player game, then Pong appears. First player to seven wins!

**Congratulations!!**

You have found the passage from the Outworld to the Earth Realm.

**When you perform the required elements for finding Jade or Smoke, you're treated to this screen in which you pass through the portal and into Goro's Lair for the big fight! And, man, are these guys tough!**

**Now you must battle with an undiscovered warrior from Mortal Kombat one!**

**Prepare yourself!! To return to Goro's Lair!**

**Pit and Spike Fatalties are nasty. You can perform them only in the Pit II and Kombat Tomb stages.**

C'MON, GIVE US A HELPING HAND
You've gotta be a real game addict to discover those secret tips and tactics — that's why we're so smart. But we want every game code we can get, and we can't do it all on our own. We're giving away a T-shirt for the best reader tips, and you get your name in print, too! So if you've discovered a cheat, get it down on paper and get it in the mail to us at: Codebreakers Game Players 300-A South Westgate Drive Greensboro, NC 27407

WIN! WIN! WIN! WIN!
That's right, we're doing it all over again this month. As an added incentive to get you guys to send us your tips, once again we've come up with a contest, arranged in conjunction with the guys at STD Entertainment. We're offering the readers who send us the best tips from games reviewed in this month's issue, either the SNProPad, the original clear controller; the SGPProPad-6, the best-selling six-button controller for the Genesis; the SNGProgramPad, a fully programmable SNES controller; or a SGPProgram Pad-2, the most powerful Genesis controller that bucks can buy.

Is the SGPProgram Pad-2 the ultimate in controllers? Send us your tip, and you could find out for yourself.
Played first game of Equinox.

After years of practice, still trying to conquer the third dungeon.

Had to skip graduation ceremony, but finally conquered the third dungeon.

Still living at home, no job, no friends, never kissed a girl, but finally defeated the green blobs in the fifth dungeon.

Having trouble seeing the screen, and need to take naps between dungeons, but you can now get to the sixth dungeon with ease.

Can't see the screen, can't hear the sound effects, can't work the joystick and having chest pains at the thought of the evil Empress. Feeling the end is near, you vow to someday complete your quest as you bequeath your joystick to your grandson.

Welcome to the 7 dungeons of Gallandian, an underground world full of ghosts, boys, blocks and evil women. They all want to kill you, but don't take it personally.

Your journey to rescue Siivagunner will span over 450 secret chambers. Without your magic dagger, it will span about two secret chambers.

After a long, bloody battle with boss character Sung Sung, you've earned a string for Glenda's harp. It's a small reward, but at least you're not dead.

You've survived to do battle with Sonya, the evil Empress. Nothing can stop you now, except the scary-looking rat that starts to snarl on your neck. Good luck.

**ANGEL ISLAND ZONE**

A tropical paradise is reduced to ash — where's the Sierra Club?

There's a sub-boss lurking in half the first acts. Don't fret about them until the end of the acts, though — you can't kill them 'til then.

“Drop napalm on me, will ya? We'll take this!” It's simple: Avoid the flame (a flame shield helps), and bounce off the sub-boss about five times.

Robonik's machine is a flying, flame-throwing hovercraft. Don't stand on the bridge — he burns it out from under you.

If you remembered to grab the flame shield (ahem), the Angel Island boss is no problem. Since you're fire-proof, stand beneath the machine and keep jumping into it.
**Hydorcity Zone**

Do spiny hedgehogs float in the water? Beats us! Test it and see for yourself. Blub, blub, blub....

You fight the sub-boss in a washing machine. When it drops down the left side of the screen, spin-dash to the right so you circle around and drop behind it. Now turn and spin-dash to the left so you avoid it as it drops from the right. Got it?

It finally comes to rest on the center agitator. Wait until its jets stop, then jump into it a couple of times. Lo, the cycle starts again, so repeat the whole thing until it's destroyed.

Start the second act by running like mad away from a moving wall.

But watch out! There are bouncy things that throw you backward — not a good thing with tons of granite breathing down your neck!

Robotnik's machine is crafty, no pun intended. It dips into the water, causing a waterspout that can pull you into its swirling blades. Run away!

There are two methods of attack. First, do a relatively normal jump-attack against the cockpit as it drops down to start the waterspout...

...then stand on top of one of Robotnik's depth charges and jump just before it explodes. The blast carries you high enough to land on him!

---

**Marble Garden Zone**

The prettiest stage in the game is also one of the deadliest!

The tuneler is this act's sub-boss. It's not too tough — just watch for the spikes falling from the ceiling. The tuneler itself tries to drop on you, but you should be OK if you keep moving.

There's a flame shield to the right of the lamp post that marks the beginning of the race. Grab it and you can perform fireball spin-dashes — you can smash through stuff, too!

Look for the lightning shield in a secret room just before you meet the boss. Four out of five hedgehogs surveyed preferred the lightning shield to other leading power-ups.

Robotnik gets airborne in the third round. You can steer tails — the upper-right corner is relatively safe, so wait there and drop on Robotnik as he flies in.
**CARNIVAL NIGHT ZONE**

Ugh! It ain't that pretty, and it's tough to get through, too! Aren't carnivals supposed to be some fun?

These carnival barrels create constant trouble. Stand on one, hold Up on the controller, then hold Down. If you get the rhythm, the barrel moves farther up and down each time.

Hit the main unit when the buzzsaw begins bouncing around. This opens the unit, but you can't hit it again because of its electric field. However, when the buzzsaw finally hits it... damage!

**WHO'S THE BOSS?**

When lightning strikes, Sonic's on the case!

This boss is one of Robotnik's deadliest creations. Zip back and forth until he drops the green ball. Quickly decide whether you've got more maneuvering room on the left or right, then hop over it.

And this is why you need that room: Robotnik activates his hedgehog magnet. This works a lot like the waterspout he uses during the Hydrocity Zone, pulling you into certain doom. Retreat!

When Robotnik dips down to retrieve his little sphere, jump on him once — if you try for more, you wind up hitting the electrodes around the outside. It takes time, but you can still beat him.

**ICE CAP ZONE**

You'd better keep moving, otherwise you'll turn into a hedgehog-sickle. Brrr!!!

When it stops moving, stand directly beneath it — the snowballs drop out of the sky, but they don't hit you. Jump up and hit it two or three times.

It's risky, but you've got to kill him fast — the pattern of freeze jets gets less predictable as the fight progresses!

Robotnik's freeze machine is a royal pain. Jump over the left-hand freeze jet, land on the small platform, then quickly jump into the saucer to get out of the way. Jump back over the jet that shoots to the right and hit him again.

You can't attack the sub-boss directly — use that legendary hedgehog cunning to get by.
Launch Base Zone

At last! Robotnik's final hiding place. Go get 'em, blue avenger!

The sub-boss ain't as tough as it looks. Wait for the spikes to stop spinning and pull back in, then hit from the sides - not the top or bottom!

One other tip: You can speed up if you're on the lower path and spin-jump from the top of the ramp. Now you can reach the flame shield on the ledge above the fire jet!

The Final Robotnik

Knuckles. Robotnik. One easy, one hard. You make the call.

Stand where the ground begins to curve and wait for Robotnik to fire a cannonball. Jump over or duck under it, then hop to the open gate and spin-jump into the cockpit.

But watch out — sometimes those balls come rolling back. If you're not ready, they squash yo!

Oh boy, you're in trouble now! Robotnik's final death machine is a killer. It's vulnerable only on the saucer, so avoid hitting the spines on top, and don't touch the claws, either. Attack it by jumping over the claws and hitting the saucer below the spines.

Robotnik's rocket is easy to pulverize. Jump on it as it comes up, then hold the controller so you keep bouncing on it until all four parts are smashed to smithereens.

If you're grabbed, Robotnik immediately goes into hovering-and-waiting-to-pounce mode. But just like the rest of the zone bosses, it takes just eight shots to do him in.

But watch for this spiny ball rotating around the cockpit. Make sure it's not coming around when you're attacking.

Once the initial skirmish is over, hop in the saucer and ride to meet Knuckles. It's a cinema scene, and Knuckles just goes away — a little too easy, don't you think?
Konami's new game keeps the Tiny Toon Adventures series alive and kicking. This time around Montana Max has built a high-tech cinema and has cast himself as the hero of all its movies. And Buster Bunny just hates bad acting. His only choice is to go into the movies himself and change the endings.

The great graphics, sound effects, and music of the earlier Tiny Toon games are present in this one, too. And although it's geared toward younger players, it's fairly challenging — some levels are downright difficult. Luckily, the complexity is balanced by handy bonus rounds. So grab some carrot-flavored popcorn and get ready to watch some movies!

**Sub-Games!**

Take a break from the action and try to earn some extras in soccer, basketball, and tug-of-war.

- **Kick an enemy and he disappears or is stunned. You only have a second or two to escape a stunned foe.**
- **Wait until the buzzard's at its lowest point, then hop on it.**
- **In the tug-of-war game, wait until Arnold is resting, then yank the rope. When he starts to pull, dig your feet into the ground.**
- **He's not wearing a black hat, but Cowboy Max is still the bad guy. Keep jumping left to stay on the horses. Give yourself room to jump Max's hat, then jump on his shin before he gets close.**

You must make three baskets to get a continue. Quickly move left and right to take out your opponent, and shoot when your meter is powered up.

T-Rex got you in a panic? Raptors breathing down your neck? Well, let 'ol Jeff Lundrigan put you on the safe track through the park.

**NO PARKING!**

Back to the park? Aaaaggh — the Raptors, they haunt me! Why can't they leave me alone! In Jurassic Park CD, you dive back into the jungles of Isla Nublar after the initial carnage has ended. Your mission: retrieve priceless dinosaur eggs for future study. The catch: the grown-up dinosaurs ain't too happy to see you running off with their eggs!

But it gets worse. Remember the guys who paid computer whiz Nedry to steal dinosaur embryos? Well, they switched to Plan B after Nedry became Dilophosaurus munchies, and a bunch of well-armed egg hunters are headed for the park — and one of the dinosaurs ain't what they have in mind.

Now you've got to outsmart the dinosaurs and outmaneuver the evil DNA-stalkers or you'll never survive long enough to get back to the mainland. Are you up to it? Ha — you'd better be!

---

**FIRST THINGS FIRST**

Use the visitor's center to store eggs, save your game, and heal yourself. Oh, and remember to heal yourself *before* saving your game.

Emily Shimura is the smart member of your team — she stayed back on the mainland. You get hints and help from her, but she's usually too late.

There's a stunner inside the helicopter. Notice how the cursor changes as it rolls over something you can pick up or otherwise use. Hmmm....

Get into Wu's office with the blue card key and search for the incubator, a tranquilizer gun, and the vital first-aid station. Once you have the Triceratops card key, you can open the locked cabinet and find the Brachiosaur CD.

You can also get into the game warden's office with the Triceratops card key. Among the useful stuff there is the stunner recharger.

Take the gas can from inside the jeep and use it on the raft engine. Hold down the button until the can stops gurgling — you need a full tank.

After dealing with the spitting wonders up river, you're happy to discover there's a first-aid kit there, too. Use it before heading back.

**DILOPHOS-WHATSOEVER**

Pound for pound, Dilophosaurus are the nastiest critters in the park. You wind up hating them worse than jungle mosquitoes.

In case you didn't get Shimura's little hint, you can use a big rock to steady the log over to the Dilophosaurus pen.

The trouble with Dilophosaurus is that they spit — a lot. Use the stunner on full charge to knock 'em down.
Try Sarah Topps
Let me guess: You’ve searched the park for that stupid crowbar, right? Well, look no farther — it’s practically in your grasp.

Go back to where the other two Triceratops are, wait for the mother to move, look at the tree, then grab a branch.

Once you feed the baby Triceratops, it moves and you can look at the metal box. Use the crowbar to open the box and grab the Triceratops card key.

There are more Dilophosaurs in the pump house — stunner, do your stuff! Use the wrench on the leaky steam pipe, then turn off the power.

Watch the Comay moving around — when she begins digging through the Triceratops’ nest, stun her fast before she can make it to the bushes. If you’re quick, she drops an egg.

There’s a security keypad in the second locker from the left. Input the code from the warden’s office (it’s different every time you play).

The noise of the opening gate brings the T-Rex. Hoo boy — stand firm until the gate opens, then shoot the Rex on its “pecking spot” just under the eye.

Rex, Shmex
Just when you thought your day couldn’t get any worse, you’ve got to face down a T-Rex. Not only is it the most voracious predator ever to walk the Earth, but its breath is also really bad.

Open the gate inside the utility area using the left-hand switch, use the tranquilizer gun on the Dilophosaur, then exit through the drain pipe.

The horn on the jeep drives the Triceratops crazy. Honk it, wait for the beast to smash the jeep, then honk it again when she turns toward you.

After the third honk-’n’-smash, the crowbar, Triceratops CD, and medical injector pop from the jeep. The injector is full of Heal-0-Quick, and the sick Triceratops gets right up and walks away.

Head back to the visitor’s center and use the Triceratops CD on the game warden’s computer to uncover the security code for the pump house.

Oh — make sure you pick up that big rock before you leave. You need every big rock you can get.

After firing a gas grenade or charged stun, immediately switch back to the cursor and zip through the gate, between the T-Rex’s legs!
Grab the eggs and bear horn from the Rex's nest, then hit the gate switch — aagghh, it's stuck!

When the T-Rex arrives, hit the switch again — the noise makes her attack the gate (remember the Triceratops?), When the gate is fully open, use the bear horn, then get out of there!

**Raptor Blues**

Until now you've relied on your brains; now you've got to trust dumb luck. The Raptors are going to kill you half the time, and there's not much you can do about it. Sorry.

A couple of big rocks can cause an avalanche and open the way into the Raptor cave.

Now do everything in the Raptor cave fast! Note the big rock to the left of the stairs — grab it and go!

Here's another use for big rocks — drop two into good old filter 27 so the water rises and you can grab the Velociraptor card key.

The exit is to the left of the filter, and here's where things get hairy. As the Raptors jump from their caves, shoot them with the tranquilizer. When they look like they'll stay put, use the card key on the door and quickly turn to face them again. Keep tranquilizing them until the door opens. Sometimes they just kill you anyway.

Once you're through the door, move forward until you reach this area. Grab the eggs, use the crowbar to open the grate, and beat a hasty retreat!

**THE HUMAN FACTOR**

Now that you've got the eggs, your troubles are almost over. Unfortunately, the most dangerous brute of all has just arrived....

Once the first two are down, turn and take care of the frogman in the water (Anybody bring a Plesiosaur?),

The final guy's the toughest, popping up in either of two places. Keep your cool and don't spaz out!

Collect the eggs, then take on the bad guys! It's mostly a matter of skill: Aim at their heads with the tranquilizer gun — and blast the guy with the shotgun first.

### ActRaiser 2
Enix for SNES; strategy, 6/12
The sequel to one of the first SNES games is as good as the first. The "town village" aspects of the original are missing but demon-infested action stages are top notch.

### The Addams Family
Ocean for Genesis; review, 6/12
Gomez saves the rest of the clan in what could have been a boring Mega Drive release. Instead, it's a fun, value-added game that's complex without being impossible.

### Aerof the Acro-Bat
Sunssoft for Genesis and SNES; Genesis strategy, 8/11
Sunssof's mascot character is a drooling bat who performs amazing feats while fighting off foes in the Big Top. Great graphics and animation are the high point.

### After Burner III
Sega of America for Sega CD; review, 9/11
Cinematic screens, CD sound, and the Navy's hottest fighter can't save this typical shooter. It's a good shooter, but it's more of a disappointment than a standout.

### Aladdin
Capcom for SNES; review, 7/11
This is the one without Digiscape animation, but who cares? It's got smooth moves, tons of personality, and a final boss that's better than the Genesis version. Its only drawback is that it's too short and easy.

### Awesome Passum
Tengen for Genesis; strategy, 6/12
This ecologically correct crusader wants to rid the world of pollution, so you'll just want to help him up — he talks constantly through four worlds of three levels each.

### AWS Pro Moves Soccer
ASCII for Genesis; sports, 8/11
Lots of extra features can't make up for frustrating gameplay. It's got a low price tag, however, so if you can get used to the strange moves, it's a bargain.

### The Adventures of Dr. Frankenstein
DTAC for SNES; review, 7/11
Half green-skinned Dr. Franken search the world for pieces of his robotic girlfriend. DTAC targets younger players, but they're the ones most likely to be frustrated by its lack of a password feature.

### The Adventures of Rocky & Bullwinkle and Friends
Absolute for Genesis; strategy, 6/12
Movie and TV tie-ins first-year effort isn't much in the graphics department, but it has some very good ideas — sometimes frustrating — game play.

### Aladdin
Sega of America for Genesis; strategy, 6/11 and 7/2
One of the best action games ever, this one has incredible graphics and animation (thanks to Virgin's Digiscape process), tons of humor, and, of course, great action.

### Bugs Bunny Rabbit Rampage
Sunssoft for SNES; review, 7/13
Our beloved bunny is in danger from a lunatic animator who's trying to turn him into a misadventure after another. Inconsistent technical quality and over-used sound effects are a drawback.

### Captain America and the Avengers
Mindscape for SNES; review, 6/12
Basic when compared to other recent comic-book games, but it has an old-time comic-book feel. Special moves keep it interesting.

### CastleVania: Bloodlines
Konami for Genesis; review, 7/12
A little rough, but still a great first outing for the series on Genesis. You'll be eager to beat it a third or even a fourth time. Fails a little short of the SNES version, though.

### Champions World Class Soccer
Acclaim for SNES; sports, 7/12
Realistic graphics and sound effects, combined with smooth control and accurate gameplay, put this one at the top. The one drawback is its lack of options.

### Championship Pool
Mindscape for SNES; strategy, 6/12
Rough around the edges, but it has just about every game-play option you could want — and then some! Perfect for serious pool players who can't afford a table.

### Chip 'n Dale Rescue Rangers 2
Nintendo of America for NES; review, 7/13
All you expect from a Capcom-Disney collaboration — great mystery-solving plot, top graphics and it's easy to get into the game-play's simple but hard bosses comprehension.

### Clay Fighter
Interplay for SNES; strategy, 6/10
The title's self-explanatory, really: Piny dough fighters take on formidable combat. Its quirky characters and settings make it unique — and another player can jump in at

Microcosm: Playmania for Sega CD; review, 784
A science-fiction thriller set inside the body of the president of the Cyber-technology company. Graphics look good, but everything follows predictable paths, and your own ship gets in the way more often than not.

The King of Monsters: Takara for Genesis; review, 6612
Four megapower monsters fight each other while being attacked by airplanes, tanks, and other weapons of war. But the whole thing seems generic: the fighters are allies, the cities are alike.

Kirby's Pinball Land: Nintendo of America for Game Boy; review, 7842

Kirby's Pinball Land: Nintendo of America for Game Boy, review, 7842
The popular purple-furred star in a solid little pinball game, with three different tables and enough bonus stages to keep you busy.

The Last Action Hero: Sony Imagesoft for Game Gear; strategy, 6610
Not "action" after all — collect tickets to help you collect the tools you need to fight a stage. More like the Last Strategy Hero, with puzzles likely to be its only fan.

The Last Action Hero: Sony Imagesoft for SNES; review, 7411
If dull, it's boring and frustrating. Better games are your thing. The Last Action Hero has what you're looking for. Quite frankly, it's a flop — just like the movie.

The Lawmower Man: THQ for SNES; review, 7841
Players who crave VR excitement can satisfy that cyber-appetite with this one. Although it's "almost" complete, it's about as close as you can get.

Lemmings: Ocean for Game Boy; special section, 6811
It's been on every system from PC to NES, now it's Game Boy's turn to be the strategy game of the century! Over 100+ levels of puzzles and tricks. Don't have a idea of fun, take a walk on the wild side.

Legend: Sega for SNES; strategy, 6812
Two heroes try to keep an evil leader from taking over their land — whoa, sounds like an RPG to sell its strength in its goofy good humor. But to get used to these jump-kicks, you do them incessantly.

Lethal Enforcers (MA-17): Konami for Genesis; strategy, 6811
Robberies, hijacking drugs — now this is gaming! A faithful adaptation of the arcade hit with fantastic digitized graphics and an own gun. Kill, kill, kill!

Lock-On: Vic Tokai for SNES; review, 6812

Mortal Kombat: Acclaim for Genesis, Sega CD, Game Boy; strategy, 6810
Bone-crunching action and blood for the Sega CD — makes one of this top fighting games. Love those finishing moves!

Mortal Kombat: Acclaim for Genesis; sports, 7843
Despite the small player size, this game is very impressive. It has a very high inten- sity to it. Fast action, solid control, and the soothing voice of Mary Albert combine to offer you a lot of arcade-style hoop entertainment.

NBA Showdown: Electronic Arts for SNES; sports, 7832
This game's season play feature, updated 12-mail rosters, and team-player option make this game a must-buy for basketball fans. It friendship the competition.

NBA Showdown '94: EA Sports for Genesis; sports, 7844
It's the best yet in the long line of EA Sports basketball titles. Besides a faster engine and new player animations, the new hot shots and on-the-fly offensive and defensive play-call making this a must-buy for hoop fans.

NFL '94 Starring Joe Montana: Sega of America for Genesis; sports, 7842
The addition of a SportsTalk play-by-play feature makes this the most realistic simulation that much better. This game is on top of the pile.

NFL Quarterback Club: Acclaim; Game Boy; sports, 6812
Not a sports sim, but competition of the NFL's top 13 QBs. Send your face into four events that test skills against the pack. From players doesn't release actual strength and weaknesses, there's not much to it.

NHL '94: EA for Genesis and Sega CD: Genesis; sports, 6811; Sega CD; sports, 7843
This is the answer to a hockey fan's dreams — this cart features NHL and NHLPA licenses, much quicker games, and brand new offensive weapons, icy blading (4-Way Power Play system).

NHL Stanley Cup: Nintendo of America for SNES; sports, 7842
Its rough-around-the-edges quality and lack of an NHLPA license sends this hockey sim down to the minor leagues. And Mode 7 hinders the game play. Disappointing.

The Ninja Warriors: Taito for SNES; review, 7845
A scrolling action game that's better than most because of its uniquely progressive vision and increasingly-difficult foes. The

Flying Edge for Genesis; strategy, $9.91
A terrible concept turns into a not-so-good game. When three X-Men disappear, Spider-Man and the crew try to spot the plot. Too hard to overcome, and you must repeat the first boring level too often.
Overall: 85%

Star Trek: The Next Generation
Absolute for NES; review, 6/91
A decent space-combat simulator, but it's not bad. As a translation of the TV series, it falls short. Who cares what Picard says—kill the alien races! All of 'em!
Overall: 89%

Stellar Fire
Turbografx for Sega CD; review, 7/93
A tank simulation set across the five moons of the planet Arcturus. Lots of variety from planet to planet, a snazzy bunch of bosses and hot music, but the game is hard and even the easy mode has enough enemies to keep you busy.
Overall: 82%

Street Fighter II Turbo
Capcom for SNES; strategy, $9.91
This time around, your opponents know new moves and use older ones in new ways, and you've never had this much speed before. You control the bosses, too.
Overall: 87%

Street Fighter Special Champion Edition
Capcom for Genesis; strategy, $9.91
The Genesis version was worth the wait—now you play against new opponents and can play bonus stages missing from the SNES version.
Overall: 90%

Super Baseball 2020
Elco; Arts for Genesis; sports, $9.92
Unlike the SNES version, this translation of the NEC GEO robotic baseball game uses "crackers"—land mines placed on the field. Graphics aren't much, though.
Overall: 24%

• Sub-Terranea
Sega of America for Genesis; review, 7/91
Pilot a craft through caverns as you rescue hostages, kill bad guys, and collect power-ups. It's mostly a shooter, but with puzzle elements thrown in for challenge. Still, it's nothing you haven't seen a zillion times.
Overall: 76%

• Super Alfred Chicken
 Mindscape for SNES; review, 7/94
Play the part of foul guy Alfred Chicken, in a 2-D level comedy action game. Puzzles and three Melon Chicken bosses stand between Alfred and the missing eggs he must collect. Cluck! Cluck!
Overall: 84%

• Super Battletank: War in the Gulf
Absolute for Game Boy; review, 7/94
Clear a path through hostile troops so the Allied forces can assemble. What it lacks in graphics, this one makes up in strategy. (Also available for SNES, Genesis, and Game Gear).
Overall: 73%

• Super BattleTank 2
Absolute for SNES; review, 7/91
Who says sequels aren't better than the original? This has more of everything than the original. Still, the action gets repetitive after the first eight-to-ten missions.
Overall: 77%

• Super Bomberman
Hudson Soft for SNES; strategy, $9.91
It may be based on an old NES puzzle game, but the multi-player option turns this into an awesome addictive treat. Once you and your friends tie into a few rounds, you'll be hooked. (Multi-Top compatible.)
Overall: 87%

• Super Goal 2
Jaleco for SNES: sports, 7/93
This isn't the best SNES soccer game, but it's one of the easiest to learn. Goal! fans will be pleased with the improvements.
Overall: 74%

• Super Empire Strikes Back
JVC for SMS; strategy, $9.92
This Star Wars sequel boasts the same fantastic graphics and movie-quality soundtrack of the first. You go from Hoth to Dagobah to Cloud City until you take on Darth Vader mano-a-mano.
Overall: 88%

• Super Loopy
Imagineer for SNES; review, 7/94
Form the most complex loop you can on a rectangular grid from a variety of random pieces. The strategy comes into play as you try to connect pieces you've already positioned. It'll drive you round the bend!
Overall: 85%

• Super Pinball: Behind the Mask
American Technos for SNES; review, 7/94
Three real pinball machines were copied for this game, and the entire playing field is always displayed — no scrolling and no disappearing balls! About as close as you can get outside a arcade!
Overall: 88%

• Super Putty
U.S. Gold for SNES; review, 7/92
Its repetitive nature keeps it from being truly outstanding, but overall, it's a first-rate effort. Turned by a wizard into a ball of blue clay, you can also transform into all manner of creatures.
Overall: 91%

Sonic CD
Sega of America for Sega CD; strategy, $7/4
The more you play, the more you'll enjoy! Sure, it's the same old Sonic, but he's made it to the top for a very good reason. Our 1993 CD Game of the Year.
Overall: 89%

Time Killers
THQ for Genesis; strategy, $9.91
This point-and-click translation has smaller characters, and the graphics have suffered, but it's tile excess. Eight warriors from throughout the ages mix it up. Come on! Outfighting all.
Overall: 56%

Tom & Jerry: The Movie
 Sega of America for Game Gear, strategy, $9.91
Puffed up in the cat-bash-mouse tradition. 7/4 captures that Saturday morning spirit with cartoon graphics and hectic, bounce-back violence. Not much originality, though.
Overall: 44%

Tony Media's Sidekicks Soccer
Electro Brain for SNES; review, 6/91
A super-fast paced, 2-D simulation for one or two players that's also easy to learn. There's a wide diversity of scoring, but defensive play falls short.
Overall: 72%

Top Gear
Kemco for SNES; review, 5/91
A government racing game has been made better, with 64 tracks and 16 countries. You can race on the full screen even in one-player mode this time around, and the split-screen two-player mode's still hot.
Overall: 85%

Total Carnage
Malibu for SNES; review, 7/91
It's all about falling alive while shooting everything in sight. Sure, it's a generic arcade-attack premise, but if you're trigger finger is itchy, here's the scratches it needs.
Overall: 77%

Turn and Burn
Absolute for SNES; review, 7/91
It's not as detailed as most PC flight sim, but it's still a great effort. Angele fans should take note, however, that this is a 'real' combat game, not a blast-em-up.
Overall: 83%

Veeda
THQ for SNES; strategy, 6/91
Based on episodes such as "Marooned" and "The Boy Who Cried Wolf" from the cutting TV series, this one really captures the mood of these bizarre cartoons. Lock up your common sense and just enjoy the ride.
Overall: 71%

• Virtual Pinball
Electronic Arts for Genesis; review, 7/94
You can design your own pinball machines.
Overall: 92%

Sonic The Hedgehog 3
Sega of America for Genesis; review 7/93
After a disappointing Sonic 2, this one really blasts onto the scene. Detailed modeling and amazing animation make it even better than Sonic CD! Blue lightning strikes!
Overall: 92%
ActRaiser 2
Enix for SNES; strategy, 6/12
The sequel to one of the first SNES games as good as the first. The "Sim Village" aspects of the original are missing but demonic-infested action stages are top notch.

Overall: 85%

The Addams Family
Ocean for Genesis; review, 6/12
Gomez saves the rest of the clan in what could have been a boring Mario clone. Instead, it's a not-bad, variety-filled game that's complex without being impossible.

Overall: 82%

The Adventures of Dr. Franken
DTMC for SNES; review, 7/11
Help green-slumbered Dr. Franken search the world for pieces of his robot girlfriend. DTMC targets younger players, but it's the ones least likely to be frustrated by its lack of a password feature.

Overall: 71%

The Adventures of Rocky & Bullwinkle and Friends
Absolute for Genesis; strategy, 6/12
Moose and Squirrel's first 16-bit cart isn't much in the graphics department, but it has some very hard -- sometimes frustrating -- game play.

Overall: 62%

Aero the Acro-Bat
Sunsoft for Genesis and SNES;
Genesis strategy, 6/11
Sunsoft's mascot character is a dorked-up Batman who performs amazing feats while fighting off foes in the Big Top. Good graphics and animation are the highlight.

Overall: 50%

After Burner III
Sega of America for Sega CD;
review, 6/10
Cinematic screens, CD sound, and the Navy's hottest fighter can't save this typical shooter. It's a good shooter, but it's more of a disappointment than a standout.

Overall: 70%

Aladdin
Capcom for SNES; review, 7/11;
strategy, 7/2
This is the one without Disney animation, but who cares? It's got smooth moves, tons of personality, and a final boss that's better than the Genesis version. Its only drawback is that it's too short and easy.

Overall: 82%

Awesome Possum
Tengen for Genesis; strategy, 5/12
This ecologically correct crusader wants to rid the world of pollutants. You'll just want to shut him up - he talks constantly through four worlds of three levels each.

Overall: 60%

AWS Pro Moves Soccer
ASCII for Genesis; sports, 7/1
Lots of extra features can't make up for frustrating game play, it's got a low price tag; however, so if you can get used to the strange moves, it's a bargain.

Overall: 80%

Bart & the Beanstalk
Acclaim for Game Boy; review, 7/4
The designers of this action game took a standard story, plastered the Simpsons faces on boring characters, then threw in some of the show's running jokes. Boring.

Overall: 35%

Bart Vs. the World
Flying Edge for Game Gear; review, 7/4
The twisted humor of other Simpsons games isn't here and the action segments could be from any game. Ignore it for home, but pack it for the beach.

Overall: 62%

Bart's Nightmare
Flying Edge for Genesis;
strategy, 6/10
Join Bart's search for homework through five Simpsons-filled worlds. "Windy World" is repetitive, and "Temple of Maggie" is impossible, but the rest are treat. (Also available for SNES.)

Overall: 62%

Battle Cars
Namco for SNES; review, 6/10
This big, bad,ballistic driving game takes the best of racing favorites and adds tons of other options, its blow-up-the-other-guy fun is definitely a must-play for racing fans.

Overall: 85%

Beauty and the Beast:
Belle's Quest
Sunsoft for Genesis; review, 7/11
Although it's easy, the graphics and well-crafted mix of problem-solving and arcade-action make this one worth your time.

Overall: 83%

Beauty and the Beast:
Roar of the Beast
Sunsoft for Genesis;
review, 7/11
The graphics may be beautiful, but the controls are a beast! Combine that with its repetitive nature, and this game may have you pulling out your fur - er... hair.

Bill Walsh College Football
EA for Genesis and Sega CD;
Genesis, sports, 6/10;
CD, sports, 7/3
Including last year's top 24 college teams plus another two dozen all-time greats, this one really shines. The overall effect is a more exciting, emotional game than John Madden (4-Way Play compatible).

Back talk

It's that time of the month again, time to (sob) say goodbye (sob)... But wait — only 30 more days to go before we meet again.

AND THE GOOD NEWS IS...

...we're doing it all again next month! We've already got a ton of great games lined up for review in June — and we've got an exclusive major preview that's still too secret to mention. We've also got a feature that examines how designers go about creating video-game superstars such as Sonic and Mario.

Oh, and on the tips and tactics front, we'll have strategy guides to help you get through top games like Star Trek: The Next Generation, Star Tropics and, of course, Super Metroid. So where are you gonna be this time next month? Think carefully. Remember — we know where you live.

DON'T TELL THE 'RENTS!

We've been playing through Mortal Kombat II for the last three weeks — but we don't even have to leave the office! In a deal with Bally/Midway, we've got a coin-op as the grand prize in an upcoming contest. You could be the lucky devil who gets to install it in your bedroom — provided your parents don't mind the screaming and all that blood. In the meantime, we're testing codes to keep you up to date with special moves... at least, that's our excuse for the hours we're spending in the back room!!

SEND US YOUR 'ZINES

We're running a feature on video-game fanzines in an upcoming issue of Game Players. If you run a fanzine related to video games, then send us a copy as soon as possible. Who knows — you might get extra readers through Game Players. Write to GP Fanzines; 300-A South Westgate Drive; Greensboro, NC 27407.

BEHIND THE SCENES

We always work up to the last minute to bring you reviews of the latest games... and this month was no exception. What do you think of our cover? We've been following Super Metroid since we played it at the Winter Consumer Electronics Show. What a game! We've been hounding everyone we know both here and in Japan to get a reviewable version, but our efforts paid off — we actually ended up with two copies! Sure the Suits in New Jersey (you know, the ones who pay the bills) were freaking out about us barely making our printer deadline — again! But it was worth it.

But did we get the score right? If you disagree with any of our ratings, let us know, and we might print your views. Write to: You Got It Wrong; Game Players; 300-A South Westgate Drive; Greensboro, NC 27407.

God, we love you guys. We love you so much, we'd like to give you our most prized possessions — Vince's Pez dispensers, Lucky's Viking helmet, the dragon we won in Vegas. But nah, you want something better than that. So how about a collection of T-shirts we just happened to have hanging around the office? Identify the game shown in this picture, then write your answer on the back of a postcard. Send your entry to: What an Awful Contest; Game Players; P.O. Box 29564; Greensboro, NC 27429. We'll pick 20 entries out of the hat on Friday, July 1st, and those folks will really get theirs.
